Hi Pamela,

Hope you're well, and staying warm & dry today

I just have a few quick q's following my initial review of everything yesterday:

1. Is there a plan somewhere showing the offset planting/mitigation measures proposed? I found ones relating to FW measures in Appendix 21, but couldn't find anything relating to Terrestrial measures.
2. Are the agreements with landowners somewhere for the offset sites?
3. Understand that no works are proposed within the ONL - is there a plan somewhere demonstrating this?
4. Understand no lighting or signage is proposed – just want to confirm that's correct?
5. Understand iwi consultation is still on-going with a number of iwi groups - do you have any update on how this is progressing?

Kind Regards,  
Emma
