

## **Feedback from MPI:**

### **Schedule 1**

No specific feedback, in terms of the estimated timeframes. For us, clear communication (and notice) around estimated timeframes is vital, as this allows us to manage/plan work in accordance with those timeframes. We are not aware of any issues that would introduce additional complexity or require the panel to take significantly longer to reach its decisions under section 81 of the FTAA.

### **Schedule 2**

We do not have specific view on who should be on the panel, though panel member(s) with a background, or area of expertise in RMA decision-making would be preferred.
