Ngati Kuta Hapū and the Hau – Kerei Whānau
Via the Fast-Track Portal
s 9(2)(a)

Tena koe e te Minita,

Re: FTA-2503-1034 - Submission to Waipiro Marina Infrastructure Project

E te rangatira, tenei te mihi mahana ki a koe. Tenei te whakaaro, te rangatiratanga o Ngati Kuta Hapū. Kia u ki te tika, kia kaha ki te Manaaki ki te taiao, ki te whenua, ki te moana o Ipipiri.

We are Ngati Kuta hapū, the mana whenua, mana moana of Ipipiri (Bay of Islands). Our rohe comprises the whenua and moana contained within the tribal boundaries *"Kei Taupiri ki te tonga, Anga ki Motukōkako ki te marangai, Anga atū ki Tikitiki ki te hauraro, Hoki atū ki Tāpeka, ki Kororāreka kei te hauraro"*

OUR POSITION:

We oppose the application because it does not meet the eligibility requirements of the Fast-Track Approvals Act 2024, and the proposal is yet to satisfy other matters of importance to us and the community.

The application:

A. **Has presented no evidence whatsoever, that the rights and interests of Māori have been considered** in accordance with Sections 7 and 11 (1) (c) of the Act, the obligations relating to Treaty settlements, recognised customary rights and MACA claims.
B. **Does not meet the Section 22 Referral Criteria of the Act** because it is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
C. **Does not meet the Section 22 (2) (v) requirement to support the Primary Industries**, including aquaculture, and
D. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991, because there are no technical reports.

DECISION SOUGHT:

That the application be declined for progressing to a listed project in the Fast- Track Approval process, and that it be referred to the Northland Regional Council Resource Consent process so that the matters raised in this submission can be appropriately addressed.

SUBMISSION

1. TREATY SETTLEMENTS & CUSTOMARY RIGHTS

Section 7 and 11 of the Fast-track Approvals Act 2024 establishes an obligation relating to Treaty settlements and recognised customary rights, and any relevant applicant groups with applications for customary marine title under the Marine and Coastal Area (Takutai Moana) Act 2011. The applicant has not satisfied the Section 7 and 11 obligations, of which there are two obligations to consider.

1.1 Fisheries Kaimoana (Customary Fishing) Regulations 1998, Gazette of Rohe Moana

The Customary fishing rights of Ngati Kuta and other hapu in the Eastern Bay of Islands are guaranteed to tangata whenua under Te Tiriti o Waitangi – the Treaty of Waitangi. These rights are protected by law in the:

- Treaty of Waitangi (Fisheries Claims) Settlement Act 1992
- 1992 Fisheries Deed of Settlement.
- Fisheries (kaimoana customary fishing) Regulations 1998

The Treaty of Waitangi (Fisheries Claims) Settlement Act 1992, Section 10 provides:

> *Effect of Settlement on non-commercial Māori fishing rights and interests*
>
> *It is hereby declared that claims by Māori in respect of non-commercial fishing for species or classes of fish, aquatic life, or seaweed that are subject to the Fisheries Act 1983 –*
>
> *(a) shall, in accordance with the principles of the Treaty of Waitangi, continue to give rise to Treaty obligations on the Crown; and in pursuance thereto*
> *(b) the Minister, acting in accordance with the principles of the Treaty of Waitangi, shall—*
> *(i) consult with tangata whenua about; and*
> *(ii) develop policies to help recognise—use and management practices of Māori in the exercise of non-commercial fishing rights; and…*

Section 186 of the Fisheries Act 1996 makes provision for the recognition of customary fishing interests and in accordance with Section 9 Fisheries (Kaimoana Customary Fishing) Regulations 1998.

On 20 December 2012, **the Crown recognised the customary (non-commercial) fishing interests of 10 hapu**[1] (not just Ngati Kuta and Patukeha), through the appointment of *"tangata tiaki"* – see Gazette Notice and Map in **APPENDICES 1 and 2**

a) Waipiro Bay and connecting Parekura Bay are a significant customary fisheries area to the hapu and this area has the largest cockle and pipi beds in the Bay of Islands.

b) Although the applicant has sought engagement with Ngati Kuta hapu, we cannot determine the effects on the customary interests of all the affected hapu, because the application is missing a fulsome range of technical information.

[1] The NZ Gazette Notice, 10 hapū identified, *Ngāti Kuta, Patukeha, Te Kapotai, Ngāti Manu, Ngāti Kawa, Ngāti Rahiri, Ngāti Rehia, Ngāti Hine, Ngāti Torehina, Te Uri Karaka*

c) The application is void of any consideration of the impacts on customary fisheries, and therefore void of considerations for potential mitigations.

The tangata tiaki of the other hapū, appointed by the Minister, have not been engaged by the applicant. Further, no discussions have occurred between the applicant and the tangata tiaki to identify what (if any) concerns they have on the proposed development with customary fishing, nor the possible remedies to address the concerns.

1.2 Marine and Coastal Area (Takutai Moana) Act 2011.

Subpart 1—Referral of project to fast-track approvals process sets out the steps for applicants to take before lodging a referral application. Section 11 (1) (c) of the Fast-Track Act, requires applicants to consult groups with applications for customary marine title under the Marine and Coastal Area (Takutai Moana) Act 2011 (MACA).

Ngati Kuta, Patukeha and our associated whānau are claimants identified as:

MAC-01-01-076: Ngāti Kuta and Patukeha ki Te Rawhiti /CIV-2017-485-321.

MAC-01-01-106: Rewha and Reweti Whānau /CIV-2017-485-352.

The purpose of the MACA is to:

(a) establish a durable scheme to ensure the protection of the legitimate interests of all New Zealanders in the marine and coastal area of New Zealand; and

(b) recognise the mana tuku iho exercised in the marine and coastal area by iwi, hapū, and whānau as tangata whenua; and

(c) provide for the exercise of customary interests in the common marine and coastal area; and

(d) acknowledge the Treaty of Waitangi (te Tiriti o Waitangi).

The proposal has not made any considerations of the potential impacts on Ngāti Kuta MACA interests nor appropriately consulted with the claimants on how the proposal will protect or minimise the impacts on our MACA claims. The applicant has not engaged the claimants and if approval is granted, the Government will enable privatisation of marine space in a location of significant customary kaimoana harvesting, denying hapū and whānau their ability to secure a marine title over this pataka kaimoana. Letters of support for this submission are attached.

1.3 Impacts to Ngati Kuta landowners

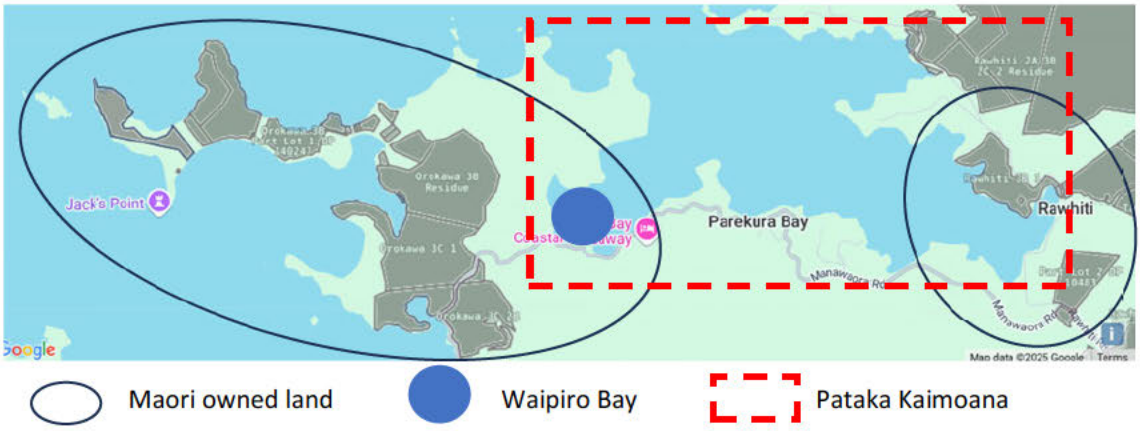

The applicant has not presented any data whatsoever, to show that the proposal has considered culture and heritage values, and that the impacts are known, and can be mitigated. 20 Whenua Māori lands are directly affected by this proposal, with regard to customary fishing and other impacts that the development will instigate.

Block ID	Number of Owners	Impact rating
Orokawa 1 A 2	23	M
Orokawa 3A 2A 2	14	M

Orokawa 31 2B	47	M
Orokawa 3A 2A 3	15	M
Orokawa 3B Part Lot 1 DP 140247	10	H
Orokawa 3B Part Lot 1 DP 41892	11	H
Lot 7 DP 41892	4	H
Orokawa 3B Part Lot 8 DP 41892	1	H
Lot 9 DP 41892	100	H
Orokawa 3B Part Lot 14 DP 41892	1	H
Orokawa 3B Residue	238	H
Orokawa 3 C1	5	H
Orokawa 3 C2 B	19	H
Rawhiti 3B 1	139	M
Rawhiti 2 A 9 A	31	M
Rawhiti 2 A 9 B	36	M
Tangatapu 4	3	M

DP Lot 2 10483	2	M
DP Lot 3 10483	2	M
TOTAL	**704**	

Below is a map showing the proximity of Whenua Māori to the proposed development site. Ngāti Kuta (and Patukeha) whānau are the owners of these lands and are kaitiaki of the waters surrounding the whenua. We harvest daily from the pataka kaimoana.

AFFECTED MAORI LAND BLOCKS

a) The Fast-Track criteria for the CMA as a subset of land, being adjacent to the project site, eliminates our customary rights and interests to be considered. The development is in the gazette rohe moana, established as an outcome of the Māori Fisheries Settlement 1992. We consider that we are, therefore, a significant affected party.

b) Considering the pan-hapū/whānau customary fishing interests for Waipiro Bay, the RMA is more appropriate to enable the interests of all the parties, including tangata tiaki and MACA

claimants. A Cultural Impact Assessment (CIA) comprising the collective interests is an appropriate method for their views to be expressed.

c) In 2005, the property (previously known as Bentzen Farms and later renamed Omarino) where the marina is proposed, commissioned a Cultural Impact Assessment to determine the impact of a subdivision development against cultural and heritage interests.

d) The assessment was undertaken by Ngati Kuta hapū and it identified extensive historical land-based evidence of our history for this location. This confirms our significant cultural interest in the adjacent marine area. A copy of the Ngati Kuta CIA is attached in **Appendix 3**.

e) Waipiro bay and the adjacent Parekura bay is a pataka kaimoana. The prominent species harvested from this area are karati, karahu, pipi, cockles, mullet and pupu. The area is also an important habitat for juvenile fish, birds and reptiles, including green turtles *(Testudines)*.

f) Parekura Bay is the location of the largest pipi and cockle beds in the Eastern Bay of Islands. This taonga is extremely high value to us and the community.

RECOMMENDATION:

The application has not satisfied the obligations to consider the rights and interests of Māori in accordance with Sections 7 and 11 of the Act and cannot evidence that meaningful discussions have been engaged with the hapū[2], MACA claimants and affected landowners.

We acknowledge the challenges for applicants to consult across multiple hapū and to remedy the issues, we propose that the matter be referred back to the RMA process where the input of all the hapū can be captured through the development of a Cultural Impact Assessment (CIA), as a method to overcome the pan-hapū, pan-MACA claimant engagement challenges. Ngūti Kuta will undertake to:

- Co- lead with Patukeha Hapū the coordination and engagement with the parties,
- Undertake a comprehensive assessment of the required technical reports to determine the impacts, work through the issues that may be raised with the parties, and provide feedback to the applicant through a CIA, and
- Do so in an agreed, timely but reasonable, manner.

2. SIGNIFICANT REGIONAL AND NATIONAL BENEFITS FOR FAST-TRACK.

We dispute the applicant's Economic and Research report (dated February 2025) that attempts to qualify the development as having significant regional and national benefit, to meet the Fast-Track criteria.

2.1 Expert Economic Analysis

Economic expert, Fraser Cosgrove, Managing Director of Insight Economics[3], has independantly assessed the proposal and presented evidence in response to the Economic and Research Report

[2] Hapū meaning, more than one (multiple)
[3] Insight Economics website Insight Economics

presented by the applicants. His comprehensive analysis is submitted in collaboration with the evidence of Ngāti Kuta hapū.

Specifically, the evidence addresses the following key issues arising from the report:

- The need/demand for the proposal;
- The one-time economic impacts of marina construction;
- The ongoing economic impacts of marina operations;
- Consistency with strategies and plans; and
- Unquantified economic benefits.

His findings are:

A. The economic report does not demonstrate a credible case for significant regional or national economic benefits. Its demand analysis is speculative and flawed, its assumptions unrealistic, and its conclusions unsupported by robust data.

B. The estimated impacts during both construction and operation are also only modest at best. Even if fully realised, they would not meaningfully move the needle on regional jobs or GDP, and certainly not in a way that could be deemed significant.

C. The proposal also appears to run counter to established regional strategies, which focus on consolidating marine development around more central, better-served hubs.

D. The notion that the project could address capacity constraints and meaningfully support local tourism is not well made and is also undermined by the current availability of nearly 250 berths across Auckland and Northland.

E. The application fails to meet the key economic threshold for referral under the Fast-track Approvals Act 2024.

The evidence of Fraser Colegrove is available in **Appendix 4.**

Qualified ecologist and resident, Dr. John Booth, has intimate firsthand knowledge of the ecology of Waipiro and Parekura Bay. Dr Booth has also raised his concerns about the proposal.

- The effects on the significant harvestable cockle bed,
- The vulnerable pre-Contact Māori middens and living sites,
- Rare upper shore ‘chenier-like’ spits at points of water inflow,
- Impacts on the mangrove microcosm,
- Loss of natural habitat for native fish, and birds and other animals,
- Biosecurity invasive species, such as Mediterranean fan worm and Eudistoma (white jelly droplets), that thrive in marinas.

Dr. Booths evidence is available in **Appendix 5**.

2.2 Ngati Kuta Economic Analysis.

The analysis carried out by Ngati Kuta Hapu has determined that the data presented in the applicants Economic and Research report is not justified. Instead, the report has distorted the economic benefit narrative by:

a) omitting essential facts,
b) distorted the economic assessment, by incorrectly assessing information such as;
   - the natural geographical catchment areas,
   - local population data,
   - actual distance (drive time) data, and
   - availability of regional marina infrastructure and market demand.

In the report, the Bay of Islands geographic area is defined as Te Rawhiti to Kerikeri (including Opua, Paihia and Kawakawa). Within this broad area, lies the Eastern Bay of Islands, where the development is proposed. The Eastern Bay of Islands is the area that lies between Russell and Te Rawhiti and the report should have identified this area as "the primary catchment area" – not the primary catchment area defined in the Economic report.

The report does not factor in nor discuss the unique challenges of the Eastern Bay of Islands and has mis defined the primary catchment area of the proposed marina. The Eastern Bay of Islands is;

a) the most isolated and rural part of the Bay of Islands.
b) It is the least populated part of the Bay of Islands.
c) It has restricted road access from the rest of the Bay of Islands.
d) It has important fisheries and other wildlife habitats that will be destroyed.

The report attempts to show how the project will deliver significant regional and national benefits, but the location of the development could not practically achieve these significant benefits.

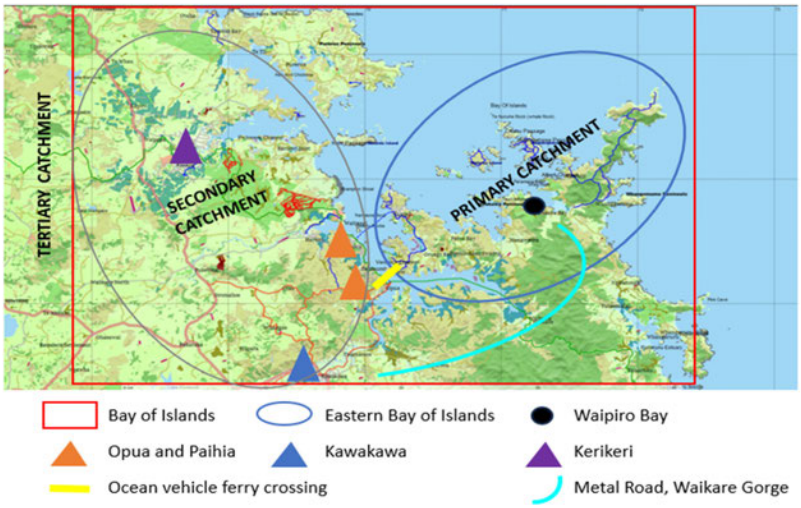

Drawing on our inter-generational knowledge of the region, our experiential knowledge (alongside the communities' knowledge) disputes the findings of the Economic and Research report for Waipiro Marina.

2.3 All Catchment Areas for Waipiro

The primary, secondary and tertiary catchment areas as defined in the report have wrongly determined the catchment areas for the proposed marina.

The primary catchment area should be described as the "Eastern Bay of Islands", as shown on the map below, and not inclusive of Opua, Paihia and Kawakawa. The location of the Waipiro Marina, is in the centre of what we deem the primary catchment area – the Eastern Bay of Islands.

MAP OF CATCHMENT AREAS

It is important to highlight that the secondary catchment area shown on the map, is already supported with existing marina infrastructure, one located in Opua and the other in Kerikeri.

2.4 The Primary Catchment Area (as per map above)

The Eastern Bay of Islands isolation factors make accessibility more expensive and less convenient for visitors, residents and vessel owners, particularly as access to the catchment is via a vehicle ferry (Okiato to Opua), or an alternate route consisting of a narrow unsealed and windy road via the Waikare gorge. The alternate route is not one that visitors or the boating community use, because it is unsafe and unpredictable.

a) The isolation factor means that the more favourable marina utilities for vessel owners are the marina's is located Opua and Kerikeri, not the distant Waipiro Bay.

b) Demand for utilities in the Eastern Bay of Islands is not genuinely achievable because the population growth is likely to remain low, as it has done historically.
   - In the 12yr period between 2006 and 2018, the population of Russell actually declined. The population count in 2018 shows that residential numbers are only 762 for the primary catchment area.
   - In the 5yr period between 2018 and the most recent census 2023, the population of Russell (including Rawhiti) is 798, a slight increase of 36 people.

c) Population data (census 2023) from Statistics New Zealand suggests that the primary catchment area has a low population generally, and this has been the case since 2006.

Number of people	Median age	Males	Females
798	58.8 yrs	384	408

The report does not consider any of the actual statistical data for the immediate area for the proposed marina and has instead leveraged statistical data relating to broader areas of the region, to attempt to show the significance of the development.

The incorporation of Opua, Paihia and Kawakawa has distorted the realities of the demand for marina utilities in Waipiro Bay, and we argue that it is senseless for vessel owners to by-pass the Opua and Kerikeri marina utilities to berth at Waipiro, which is further away and less accessible.

2.5 Residential occupancy in the primary catchment

The report excludes information about residential occupancy rates. This is important because readers can be led to believe that residential occupancy is higher than it really is, and therefore misleading the reader to believe that there is a strong demand for a marina.

a) **53.8%** of all livable dwellings in the Eastern Bay of Islands, are unoccupied, including the homes at the gated Omarino community at Waipiro Bay. The primary cause for the non-occupancy rates is that the Eastern Bay of Islands is primarily a holiday spot, where homeowners return to the bay, seasonally.

Dwelling counts for Russell (2023 Census)		
Occupied private dwellings 408	Unoccupied private dwellings 231	Occupied non-private dwellings 21

b) The report is leveraging population by promoting the statistics for all of Northland in which the population statistics for Northland (2023 Census) was 194,007.

c) However, of the total Northland population, the majority of the region's population lives outside the primary catchment
   - Secondary catchment population is 71,430 reside (Far North District),
   - Tertiary catchment population is 96,678 (Whangarei District), and 25,899 (Kaipara District).

Only 0.41% of Northlands population reside in the Eastern Bay of Islands, the primary (Waipiro) catchment area. We argue that there is no sufficient population demand for marina utilities at Waipiro. If the applicant believes there is sufficient population, their economic report has not validated it.

2.6 Marina Utilities in Northland (all catchment areas)

The report has not presented a full picture of the available Marina's across Northland and in doing so distorts factual information on the availability of utilities in the secondary & tertiary catchments.

Our data[4] research has identified all the marinas available to the Northland region, which comprises all the marina infrastructure available in the secondary and tertiary catchments

Marina	No. Berths	Berth sizes	No. berths available (as of 26 April 2025)	Catchment
Bay of Islands Opua	420	10.5 – 50m	20	Secondary
Kerikeri	193	10 – 27m	0	
Whangaroa	100	8 – 20m	3	
Port Nikau	120	Up to 20m	2	Tertiary
Kissing Point	20	Up to 18m	3	
Dockland 5	17	16 – 20m	2	
Tutukaka	260	10 – 20m	14	
Port Nikau	120	Up to 20m	2	
Marsden Cove	230	Up to 44m	0	
Total	**1,480**	**8 – 50m**	**46**	

a) 46 berths are available, and being advertised in Northland, for purchase or rent, now.

b) The Bay of Islands Opua marina is the closest to Waipiro Bay (a 56-minute drive) and has 20 berths advertised for purchase or rent (as of 26 April 2025). A number of those berths have been advertised for some time and are now being promoted at a reduced price. The same is occurring in other marinas, except Kerikeri, who have none.

c) Of the total available berths for the entire region, the development is proposing a 16.9% increase in additional berths, for a single bay

It is our view that Northland's marina capacity is sufficient and our due diligence considers that the demand referred to in the report has:

- unrealistically inflated demand, by incorrectly establishing the geographic and population data (demand) of the primary catchment
- distorted facts by only presenting 2 of 9 marinas in Northland, and
- incorrectly sized up demand for the Waipiro marina on the number of berths available, per capita of the entire region, but failed to show how existing marinas are struggling to fill the vacant berths that are available in Opua right now.

Instead, our data suggests that:

1. **There is no evidence of demand** from the primary catchment area identified in the Economic report

2. **The demand for berths could be in Kerikeri**, although we discount that demand also because the nearest marina to Kerikeri is Opua (not Waipiro), where there are 20 available berths, and have been for some time.

3. **The cost for a berth significantly outweighs the cost of a mooring**, and we believe that is a major deterrent for vessel owners to shift from a mooring to the marina.

[4] Marina data sourced from *marina.berths.com as of 26 April 2025*

The applicant has not validated a demand, and our regional data suggests there actually isn't one. Our concern is that the Eastern Bay of Islands is a ghost town where few humans reside and the proposed marina will increase "boat storage" for the wealthy living out of the region and offshore. The residents will become outnumbered by parked boats.

2.7 Estimated drive times and distances between catchments

The drive times and distances presented in the report are incorrect. Distance and drive times lead the reader to believe that the Waipiro marina is in close proximity (15-minute drive) to the broader catchment area (Russell, Opua, Paihia and Kawakawa), when in fact it is not.

Catchment	Waipiro To	Distance	Drive time
Primary	Russell Township	20.43km	24 minutes
Secondary	Opua, Paihia, Kawakawa	22.20 – 34.1 km	56 – 68 minutes (including car ferry)
Tertiary	Rest of Northland	92.3 – 194.4 km	1hr 15 mins (south) – 2 hrs 38 mins (north)

ACTUAL DRIVE TIMES BETWEEN CATCHMENTS

a) The isolation of the Waipiro development to the rest of the Bay of Islands, and Northland, is a critical factor that is not discussed in the Economic and Research report.

b) The report is therefore remiss of factual information and misrepresenting the rationale for significance by compiling data to make the project seem more significant that it is.

c) When "real" data is applied, the significance factor is diminished.

It is our view that the proposed marina's isolated location makes it a project that will deliver marginal regional and national benefits, therefore not meeting the requirements of the FTA.

2.8 Perceived demand for more public boat ramps

The Economic and Research report further claims that there is a strong demand for more public boat ramps, and the need to create this infrastructure to ease local congestion. The demand for additional local boat ramps can only come from the primary catchment area because it is not logical nor economical to transport smaller boats from the secondary and tertiary catchments.

a) There are 3 designated Council boat ramps located in the primary catchment area and more than 3 non-Council launch locations at Te Tawa Bay (Rawhiti), Te Uenga Bay (Parekura) and Matauwhi Bay (Russell Boat Club).

b) The demand pressure signaled in the report, is not a daily pressure, but a peak season holiday pressure. We estimate this to be less than 5 weeks in total, per annum.

c) The same pressure occurs in all of Northland during seasonal breaks, and it can be assumed that the same pressure is experienced at all boat ramps across New Zealand. It is a seasonal loading issue, not a daily issue.

Developing another boat ramp to sit predominantly idle for most of the year doesn't make sense. The environmental and wildlife impacts from a land reclamation for the ramp, will remove natural habitat and ecosystems permanently, for New Zealanders to enjoy boating for around 5wks each year. This is senseless.

It is ignorant and irresponsible to grant the installation of infrastructure that has no tangible demand.

RECOMMENDATION:

Our data suggests that the applicant has not satisfied the significant regional or national benefits of the project and therefore does not meet the FTA referral and approval criteria requirements. Our expert has produced a statement of evidence providing a highly qualified analysis of the Economic and Research report showcasing the anomalies of the report and therefore we recommend the Minister decline the project to be added as a listed project and instead, refer the project to the RMA standard consenting process.

3. CRITERIA FOR ASSESSING REFERRAL APPLICATION – SUPPORT PRIMARY INDUSTRIES INCLUDING AQUACULTURE

Section 22 of the Fast-Track Approvals Act 2024 sets out the criteria for assessing a referral application. Section 2 (a) (v) includes the need for referred applications to support the primary industries – including aquaculture. Although it is unclear as to what degree a referred application must prove support for the primary industries.

The Economic and Research report indicates that the project supports the primary industries in the following ways.

a) Forestry – the project supports the industry through the use of wood construction materials like wooden piles

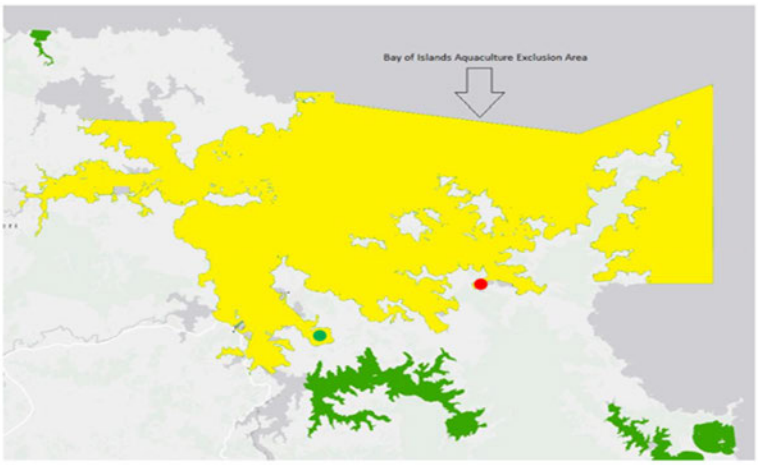

b) Mining – although not a primary industry, the project supports the industry through the use of fuel, and

c) Aquaculture – the report says it supports the industry but does not qualify how.

The report has determined that 20 FTEs will be contributing to the Primary Industries, including aquaculture, again without qualifying how.

We challenge the applicant's suggestion that aquaculture will benefit from the project because the Bay of Islands is an aquaculture **exclusion zone** as identified in the Proposed Regional Plan for Northland. This suggests that new aquaculture developments are considered to be an unsupported activity in the Bay of Islands.

BAY OF ISLANDS NEW AQUACULTURE EXCLUSION ZONE

This map shows the Bay of Islands Aquaculture Exclusion Area in yellow. The Bay of Islands Aquaculture Exclusion Area and other Aquaculture Exclusion Areas can also be viewed at I Maps | Ngā mahere matawhenua.

Waipiro Bay *Existing Oyster Farm Locations*

The only provisions for new aquaculture activities listed in the Regional Plan are for Marae based aquaculture:

1) the purpose of the aquaculture activities is to improve traditional customary kaimoana provision for marae,

2) the farmed kaimoana is not for sale,

3) the area of occupation is no more than one hectare per marae, and

4) the area of occupation is within the area traditionally harvested by the marae.

The claim made in the Economic and Research report that the development will contribute to aquaculture should therefore be voided. It is misleading and not factual.

3.1 Existing Commercial Aquaculture

Existing commercial aquaculture farms in the Eastern Bay of Islands produce some of New Zealand's best oysters. Oyster farms are most prominent in Orongo Bay (Russell) and the Waikare Inlet (near Opua). These farms are well established and have been in operation for many decades.

a) The report claims that the Waipiro Marina will support aquaculture but it cannot be substantiated. There is no rationale whatsoever that the proposed Waipiro Marina can service this sector because:
   - The Opua marina currently supports aquaculture operators in the Waikare Inlet, and
   - Orongo Bay farmers have direct access to infrastructure installed at the water's edge by their oyster processing sheds.

b) The Economic and Research report therefore is only delivering support to one primary industry (forestry) and the degree to which that industry is being supported has not been quantified in the report. It is assumed that concrete will be the primary construction material used for the marina, the number of piles that are needed could be substantive, but how substantial is not clear in the report.

c) Further, it would have been helpful for the report to identify potential suppliers of the wood piles to evidence that the applicant intends to source their wood products in New Zealand (and not cheaper imported non-NZ wood products). If piles were to be imported, then the project will not be supporting New Zealand's forestry sector.

RECOMMENDATION

The project has not satisfied the criteria for assessing a referral, because its support of the primary industries is unsubstantiated and, in our view, support for the primary sector is at best, marginal. We recommend the Minister to decline FTA 229.

4. RESOURCE MANAGEMENT ACT 1991 & COMMUNITY CONSIDERATIONS

In addition to Fast-Track eligibility concerns, the application must also meet the requirements of the Resource Management Act 1991.

The application is yet to satisfy the requirements of the RMA, and therefore we have not been able to undertake a qualified analysis of the proposal to determine cultural and environmental impacts. We cannot assess nor support a development that has only presented us skeleton desktop information. This flies in the face of professional practice and belittles the mana of Ngāti Kuta and the community.

The community is predominantly excluded from participating in the FTA process, a policy ignorance to Fast-Track around public opinion – no democratic values here! Ngāti Kuta value their views alongside ours and accordingly we append their letters of support.

4.1 Ecological Survey & Assessment of Environmental Effects (AEE)

The applicants have not been provided a comprehensive ecological survey nor an Assessment of Environmental Effects. The survey and assessment is needed help us determine:

a) Sediment quality and assessment of potential contaminant release (including metals) to Waipiro Bay and other areas particularly Parekura Bay.

b) The entire ecological picture of Waipiro and Parekura Bay to identify the habitats that may be affected and what mitigations will be undertaken to minimise adverse effects.

c) The actual impacts to the natural environment, wildlife and long-term effects such as sediment build up and movement over time.

d) The construction and ongoing maintenance impacts

e) The impacts from day-to-day marina activities, including potential sources of contamination from marina operations.

4.2 Hydrology Effects

There is no hydrology survey for this development. Dredging can bring about the physical destruction, removal of marine life, changes to water movement patterns and stir up sediment. This can destroy shellfish beds, fish habitat and generate new issues, long-term.

A 9ha development is a major construction and without the survey we cannot determine the impacts from dredging

a) Parekura Bay, near the development site, is culturally rich to local hapū as it is one of our primary sources of kai. The largest pipi and cockle beds in the Eastern Bay of Islands are located near Waipiro Bay. Other shellfish like oysters, karati, karahu and mullet most commonly harvested in Waipiro. It is a significant customary harvesting area.

b) Dredging can impact our pataka kaimoana including recreational shellfish harvesting areas. The map below shows where customary and recreational harvesting areas are.

c) Silt contributes to the extinguishing of shellfish beds and loss of seagrass and saltmarsh and can smoother deeper reefs and seafloor. It is incumbent on us all to reduce siltation as far as possible.

d) Even in the absence of the hydrology survey, we have a degree of certainty that the effects are considered by us to be high because 9ha of dredging (and reclamation) is a significant scale for a single development.

e) The Low tide mark lies significantly offshore from the coastline, meaning substantial dredging would be required to deepen the area sufficiently to allow boats to berth safely without the risk of beaching. This operation has the potential to drastically devastate and compromise the ecological, environmental and cultural integrity of Waipiro Bay forever.

f) The hydrology survey needs to consider both capital and maintenance dredging and the long-term effects on the environment in Waipiro and the Parekura Bay, and on fish and shellfish and their habitats.

MAP OF PATAKA KAI-MOANA FOR PAREKURA BAY (INCLUDING WAIPIRO)

With the absence of a thorough detailed Ecological Survey, an Assessment of Environmental Effects (AEE), and a Hydrology Survey, it is unethical and irresponsible to progress the project through Fast-Track. The true impacts of the proposed works cannot be determined without quality information. Redirecting this project to the standard RMA process will enable such information to be obtained.

4.3 Reclamation Work to Construct the Boat Ramp.

We strongly oppose the development of a public boat ramp as the infrastructure is not needed. The proposed reclamation work to achieve a boat ramp and parking area will destroy all natural habitats and ecosystems of all wildlife species in that part of the Waipiro Bay coastal marine area.

a) The provision of a boat ramp as a public amenity is a “carrot” dangled in the face of hapū and community to appease public concern and satisfy consent authorities that the public and community will also benefit. It is unacceptable for developers to suggest that this is an acceptable trade-off for the privatise of public space and an unacceptable justification for environmental destruction. We call this a “policy raupatu”(confiscation)!

b) The reclamation work will remove land and marine environments and our rights as promised under Te Tiriti.

We are fervently opposed to the development of a public boat ramp.

4.4 Fish & Shellfish Populations

A memorandum has been provided by Bioresearches to satisfy the Fast-Track process. The report was produced “in haste” specifically for the Fast-Track process which we abhorrently reject. Ticking boxes

is not good enough and it flies in the face of “decent democratic process and legislative best practice”.

The report raises numerous concerns for us.

a) The memorandum is a desktop assessment, indicating assumptions that are yet to be substantiated.

b) There has not been a fish, shellfish or other wildlife population survey completed to validate how they may be impacted by the proposal. A survey should be undertaken in Waipiro Bay and Parekura Bay, because both locations are inter-connected, and the development is likely to impact both locations during the construction and long-term.

c) The memorandum mentions the presence of green turtles, and an assumption that they are occasional visitors. We have several resident green turtles across different bays and argue that they are more present than expected, and residential. Turtles are a heritage species for Ngati Kuta, connecting us to our Pacific origins and are a taonga for all Pacific peoples. We have daily sightings of the resident turtles, and therefore desktop assumptions cannot be substantiated (total guess work).

d) The report correctly identifies nine species present in Waipiro Bay and its surrounds as having a New Zealand threat status of 'high risk,' six of which are classified as 'declining.' This highlights the need for thorough due diligence and further investigation to confirm that all at-risk species have been identified that potential impacts on these species are well understood, and that appropriate mitigation measures are developed to minimise the risk of further decline.

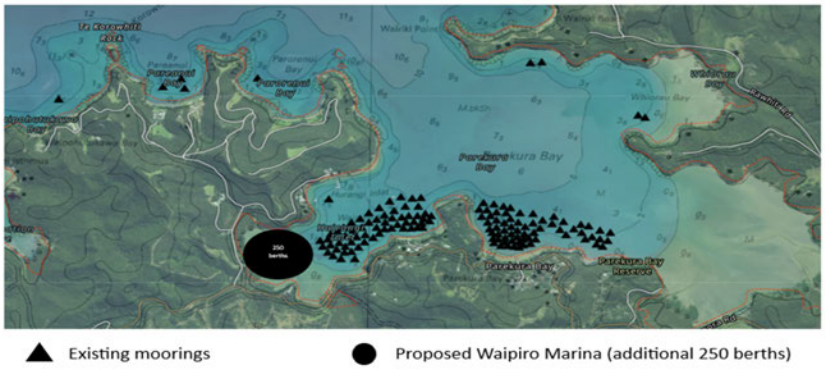

e) The Memorandum has recommended to the applicants, that a full investigation be undertaken, as impacts on wildlife ecology cannot be determined or fully considered from a desktop assessment. **We support this recommendation**.

4.5 Scale, Visual and Density concerns for Waipiro Bay (Huirangi Inlet)

Waipiro Bay (Huirangi Inlet) is designated as a Marine 4 Mooring Management Area. The inlet is a safe and sheltered anchorage making it an ideal site for moored vessels.

Below is a map of the Northland Regional Council mooring data for Waipiro Bay (Huirangi Inlet), which currently shows an allocation of approximately 131 moorings.

EXISTING MOORINGS

The development of these mooring areas has occurred in a gradual manner over time, reducing an abrupt visual impact on residents and the landscape.

Although moorings create issues for Councils, single boat moorings actually reduce visual impact on residents, because we are able to see through or beyond moored vessels. Likewise, density aspects for single moored vessels don't impede public access, still enabling boats to move in and around the bay, making customary harvesting possible.

However, the dense hard structure of a 250-berth marina constructed in the same location as the moorings, will create a sudden and abrupt visual and density impact.

a) **Privatisation of a 9ha** with "hard infrastructure" that will exclude public access for fisheries and recreational purposes

b) Highly intrusive visual harshness

c) **Boat density will increase by 80.1%** taking the total number of vessel allocations from 62 (moored vessels) to 312 (moored and berthed vessels)

d) An approximate additional 69 moorings are allocated within Parekura Bay, and if the proposed marina progresses, vessel density will rise to **a total of 381** for the areas combined.

e) We will be fully excluded because there will be no access to the Waipiro Bay pataka kaimoana and no ability to harvest kai!

The proposed infrastructure for 250 berthed vessels to the bay will extinguish cultural and recreational harvest areas in Waipiro bay. Additionally, habitat for resident wildlife (particularly high-risk species) will also be extinguished, and the density of both moored and marina vessels will be brutally abrupt impacting the visual aspect of the bay on everyone.

4.6 Privatisation of High Value Public Marine Space

Waipiro Bay is a popular bay for the entire community. Boating and marine recreational activities are daily interactions for both Māori and non-Māori, residents and visitors alike. It is a shared space for everyone, including the residents of Omarino.

1. Boating in and around the bay are common daily activities. On the high tide many fishermen will cruise through the area proposed for the marina, to catch live bait for use in other areas around the Bay of Islands. Tourists also pull off the road to enjoy the environment or explore the mudflats at low tide.

2. The bay is highly accessible directly from the roadside at a shelly stand by the bridge in the inlet. This enables the non-boating community to enjoy the area.

3. Considering the high value of the bay to the community, allowing the proposal to proceed through the Northland Regional Council process, may enable the views of the community to be expressed.

4. The developer has presented the argument that the area, when developed, will have minimal visual impact on the wider community. This is an unfair and unjustified suggestion because their reports have not factored in the existing density of the moorings.

5. It is important to point out that the Omarino residents, few as they are, should not have an expectation that their land ownership adjacent to the marina, provides them a stronger set of rights to other residents.

6. The space that the proposed marina wants to occupy is at an exorbitant scale. 9ha's of marine space dedicated to a single group, creates a privatisation of a high value marine-estate, unequalled to any other development in the entire Northland Region.

7. The profits of the marina won't be shared with residents, nor will residents be compensated for loss of natural habitat or recreational space. The development is likely to generate an increase in local land values, increasing land rates for the residents who actually occupy their homes.

8. The proposed job creation won't include the residents as the work will be targeted to specialists, most who don't live in the primary catchment area.

9. The applicant has not proposed any remedies for the wildlife that has a high-risk NZ threat rating, and their correspondence has remained silent on the topic.

10. If there is genuine demand from New Zealanders for additional marina berths in the Bay of Islands, the most appropriate locations are Kerikeri and Opua—not the quiet, rural surroundings of Waipiro Bay. However, we strongly recommend that the Government ensures local hapū and iwi in those areas have access to economic benefits, including meaningful employment and financial returns, especially given their historical exclusion from such opportunities with 0% benefit from previous dealings with Marina developments in BOI.

11. If there is an expectation that owners of moored vessels in Waipiro and Parekura Bay will abandon their moorings and shift into the marina, it would be prudent for the applicant to show which owners have agreed to do this. Shifting will come at a significantly increased cost to what they pay now and we strongly question whether they will shift voluntarily.

12. The developer has not offered any compensation to the community, other than a boat ramp "carrot" which is not a plausible compensation.

The proposal has not considered density aspects alongside the high number of moorings. It needs to be significantly reduced to mitigate the impact.

4.7 Community Restoration Efforts

Ngati Kuta is partnered with two community organisations, the Eastern Bay of Islands Preservation Society and the Guardians of the Bay. These good folk work tirelessly to restore the natural environments of the Bay of Islands and their efforts will be undermined by the developers.

It is important to Ngāti Kuta, that they have an opportunity to express their views. The wealthy are benefiting from their efforts, because their restoration work creates the pristine environments that their homes are nestled in. The mauri of Ipipiri remains vibrant because of our restoration warriors.

4.8 Northland Regional Council, Te Ruarangi, and the Far North District Council

We are grateful that the Northland Regional Council (NRC) and the Far North District Council (FNDC) have made time to hear our concerns and respond to our pleas for support. They see the rationale for applying the principled approach of the Resource Management Act and the thorough investigative approach that can be achieved through that process.

In April 2024, Northland Regional Council made a submission to the Environment Committee on the Fast Track Approvals Bill. Their submission expressed, that the Bill is not appropriately balanced in its current form. Decisions made through the Bill risk being made in favour of economic outcomes without sufficient regard to the potential adverse effects. Council is also strongly opposed to the limited ability for tangata whenua affected by fast-track applications to participate in the decision-making process.

The key points raised in their submission sought a greater balance between enabling regionally and nationally beneficial developments with the protection of natural, built, and societal values. Their submission included key points on the following:

1. Tangata whenua participation in decision-making
2. Purpose of the Fast Track Approvals Bill
3. Eligibility of Prohibited Activities
4. Decision Making Process
5. Expert Panel Composition and Qualifications
6. Consultation and Participation
7. Processing Timeframes
8. Cost Recovery

The concerns of the Council's and Māori Caucus are echoed by the concerns of our community. Ngāti Kuta is in awe of the incredible support received from our wonderful community.

We applaud everyone's responses, and are grateful for their support, because their concerns echo ours and resonate the concerns raised in this submission. Attached are copies of the community's, Te Kahu O Taonui (all iwi of Northland), Te Ruarangi (Māori Caucus), NRC and FNDC letters of support – **Appendix 7.**

5. CONCLUSION

In closing, we request the Minister to deeply consider our concerns and pay close attention to the details that have not been provided in the application. We are significantly affected parties with genuine interests. The Fast-Track process does have its place and it is beneficial to grow the economy of the region. However, the large-scale developments for Fast-Track should be focused on locations where industry growth can thrive and where there is an obvious demand (example Kerikeri). The back roads of Waipiro Bay, is not the right location.

We present the details that the applicant's technicians have omitted to provide, as evidence that **the proposal does not meet the Fast-Track criteria** and therefore request that the Minister does not list the application and instead refer it back to the standard Resource Management Act application process.

We look forward to your decision.

Any written comment must be received by the Ministry for Primary Industries no later than 10 working days after the date of notification in the *New Zealand Gazette*.

Consultation on this proposal to incorporate material by reference is in addition to the usual process of consultation on draft import health standards under sections 22–24D of the Act.

Dated at Wellington this 17th day of December 2012.

MATTHEW STONE, Director Animals and Animal Products (acting under delegated authority), Ministry for Primary Industries.

Fisheries (Kaimoana Customary Fishing) Regulations 1998

Fisheries (Kaimoana Customary Fishing) Notice (No. 11) 2012 (Notice No. MPI 112)

Pursuant to Regulation 9 of the Fisheries (Kaimoana Customary Fishing) Regulations 1998, the Director Māori Partnership Implementation at the Ministry for Primary Industries (acting pursuant to a delegated authority in accordance with section 41 of the State Sector Act 1988) gives the following notice.

Notice

1. Title and commencement—(1) This notice may be cited as the Fisheries (Kaimoana Customary Fishing) Notice (No. 11) 2012.

(2) This notice shall come into effect on **21 December 2012**.

2. Interpretation—(1) In this notice, "area/rohe moana" means the area described in clause 6(1).

(2) Terms used in this notice have the same meaning as in the Fisheries (Kaimoana Customary Fishing) Regulations 1998.

3. Nomination of Tangata Kaitiaki/Tiaki—The Kororareka Marae Society, as endorsed by Ngāti Kuta-Patukeha, has nominated Diane Tito-Salive and Lorraine Young as Tangata Kaitiaki/Tiaki for managing customary food-gathering within the area/rohe moana described in clause 4(1).

4. Appointment of Tangata Kaitiaki/Tiaki—(1) On 6 December 2012, the Minister for Primary Industries appointed, under Regulation 9(1) of the Fisheries (Kaimoana Customary Fishing) Regulations 1998, Diane Tito-Salive and Lorraine Young as Tangata Kaitiaki/Tiaki for managing customary food-gathering within the area/rohe moana enclosed by a line:

(a) commencing at a point on the mean high water mark (MHWM) on the southern side of the Haumi River mouth (at 35°17.86′S and 174°06.19′E); then

(b) proceeding in a northerly direction to a point offshore (at 35°16.88′S and 174°06.31′E); then

(c) proceeding in a northerly direction to a point offshore (at 35°13.34′S and 174°05.73′E); then

(d) proceeding in a north-easterly direction to a point on the boundary of the exclusive economic zone (EEZ) (at 33°09.00′S and 177°39.00′E); then

(e) proceeding in a generally south-easterly direction along the boundary of the EEZ until its intersection with the line of latitude 35°16.87′S; then

(f) proceeding due west for 200 nautical miles to a point on the MHWM at Taupiri Bay (at 35°16.87′S and 174°17.66′E); then

(g) proceeding along the MHWM of the Bay of Islands to the point of commencement.

(2) The geographical coordinates used in paragraph 4(1)(a)–(g) are stated in terms of the WGS84 datum.

5. Confirmation of tangata whenua—Kororareka, along with Ngāti Hine, Ngāti Kaua, Ngāti Kuta, Ngāti Manu, Ngāti Rahiri, Ngāti Rehia, Ngāti Torehina, Patukeha, Te Kapotai and Te Uri Karaka, is confirmed as the tangata whenua of the area/rohe moana to which the appointment of the Tangata Kaitiaki/Tiaki relates.

6. Power to authorise the taking of fisheries resources for customary food-gathering—Tangata Kaitiaki/Tiaki appointed for the area/rohe moana may authorise any individual to take fisheries resources, managed under the Fisheries Act 1996, for customary food-gathering purposes from within the whole or any part of the area/rohe moana. No customary food-gathering of fisheries resources may take place in the area/rohe moana without an authorisation from a Tangata Kaitiaki/Tiaki.

Dated at Wellington this 17th day of December 2012.

KELLY DUNN, Director Māori Partnership Implementation, Ministry for Primary Industries.

Fisheries (Kaimoana Customary Fishing) Notice (No. 12) 2012 (Notice No. MPI 113)

Pursuant to Regulation 10 of the Fisheries (Kaimoana Customary Fishing) Regulations 1998, the Director Māori Partnership Implementation at the Ministry for Primary Industries (acting pursuant to a delegated authority in accordance with section 41 of the State Sector Act 1988) gives the following notice.

Notice

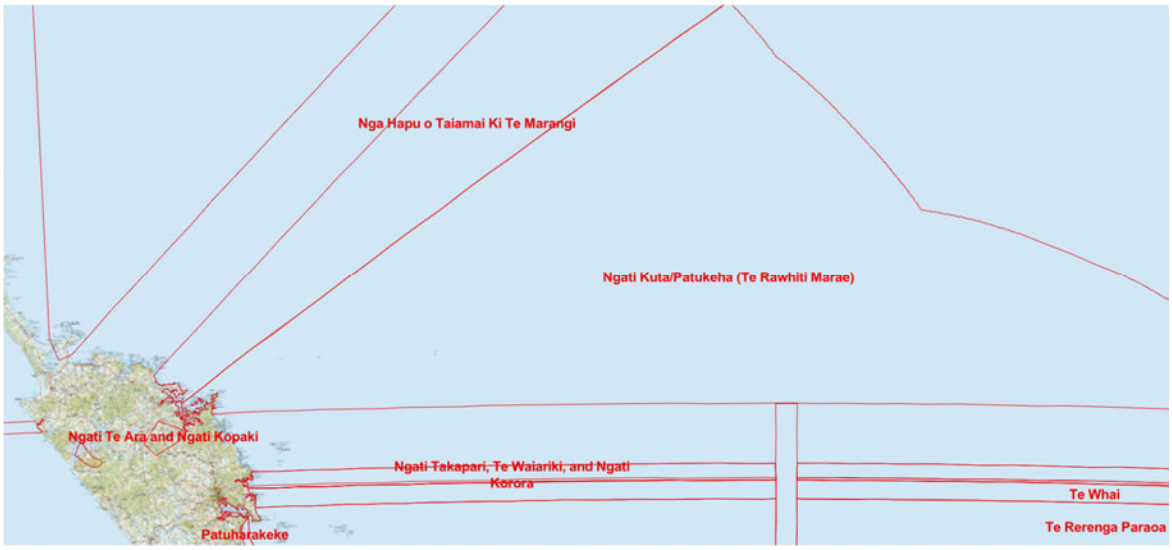

1. Title and commencement—(1) This notice may be cited as the Fisheries (Kaimoana Customary Fishing) Notice (No.12) 2012.

(2) This notice shall come into effect on **21 December 2012**.

2. Interpretation—(1) In this notice, "area/rohe moana" means the area described in clause 5(1).

DATES OF HIKOI	19 April 2005 20 May 2005

1. STATEMENT

Ngati Kuta Hapu Resource Management Unit together with iwi and hapu representatives from Ngati Wai Trust Board, Kororareka Marae Society and Ngati Manu Trust Board, are the parties to this assessment. The parties have collectively assessed the proposed subdivision to identify any impacts the proposal may have on cultural, heritage and environmental values.

Important Note:

This assessment is not a 'full historical or cultural account' of the activities and events that may have taken place on and around this property. Also, this assessment represents the views of the writers only and does not reflect the views or historical and cultural accounts of other iwi and hapu claiming interest within the rohe.

The representatives to this assessment are:

Ngati Kuta RMU	Natasha Clarke/Administrator
Ngati Wai RMU	Hori Parata/Manager
Ngati Manu Trust Board	Johnson Davis/Chairman
Kororareka Marae Society	Necia Shortland/Administrator

The property is situated within the rohe (tribal lands) of Ngati Kuta and Patukeha Hapu. Both hapu, have whakapapa connections to Ngati Wai and Ngapuhi Iwi. Whakapapa joins all the parties involved in this assessment.

Any inquiries into this report should be directed to Ngati Kuta Hapu Resource Management Unit for clarification.

1.1 Assessment Principles:

1. Avoid impacts and disturbances to areas of cultural significance

2. Remedy proposals by identifying alternative methods or sites to implement the proposed development(s)

1.2 Report Format:

The report will address matters relevant to applications lodged with New Zealand Historical Places Trust and applications to Far North District and Northland Regional Councils in two separate parts. However, both sections must be read concurrently to understand the full context of the recommendations concluded.

2. BRIEF HISTORICAL BACKGROUND

Ngare Raumati iwi held land rights in the Bay of Islands prior to Ngati Kuta occupation. Ngati Kuta whakapapa and oral histories of the past, recall active Maori alliances throughout the north but more so within the Bay of Islands area as European explorers and traders frequented the Bay of Islands to develop trade enterprise with Maori. Numerous writings document such activities and history also.

Court archive records show that Bentzen Farms property was originally part of large block called 'Rawhiti'. We understand, the Rawhiti block was the first European title issued for the land from its customary title and included the majority of land within the eastern Bay of Islands. The Maori owners identified on the Rawhiti block include Ngati Kuta and Patukeha ancestors – see appendix 1A/scehdule of ownership.

Later, the Rawhiti block was partitioned into two halves and re-named Rawhiti 1 and 2. The court partition order is difficult to read but we believe this may have occurred around 1910 – see appendix 1B. At this time, the Bentzen Farms property was contained within the Rawhiti 2 block. The Maori owners were then split into two groups and again Maori ownership of each half was determined – *see* appendix 1C/Rawhiti 2 schedule of ownership.

In the time since this partition, the Rawhiti 2 block was subdivided into smaller Lots and some Lots were eventually transferred into European ownership. Most of the land contained in the Rawhiti 1 parcel remains intact and continues to be in the ownership of Ngati Kuta and Patukeha whanau.

Regardless of the current day documentation for the transfer of the original Maori land blocks into European ownership, Maori continue to dispute the nature in which European settlers acquired the land. These matters have been filed with the Treaty of Waitangi Settlement Commission via 'land claims' and currently await hearing. Ngati Kuta is a claimant in this process.

3. PROPERTY LANDSCAPE FEATURES

- High Mountainous terrain leading down to flat coastal waterfront areas
- Large areas of bare grazing pasture, some recently re-vegetated
- Swamp and wetland catchment areas at foot of hills
- Small clusters of native bush and pine forest
- Archaeological features
- Maori taonga and wahi tapu
- Maori and non-Maori historic features relating to this and neighbouring properties

4. ARCHAEOLOGICAL ASSESSMENT

4.1 Cultural Values

In a broad sense, cultural values are determined and based on both the spiritual and the physical realms. They form the logic principles in which Maori base their lifestyles and actions.

These principles are used to understand the environment as a whole and the life-supporting elements it provides. These aim to provide a logical and solid, well balanced foundation to ensure all physical activities are conducted in a manner with regard and respect to sustaining the environment for the many life systems it supports.

According to Maori belief, the two principles combined provide a healthy state of well being for the environment as a whole, which in turn benefits everyone and everything.

Based upon these principles, the cultural values of importance for this property are:

- the land, its natural values and life systems it supports
- the coastal waters, its natural values and life systems it supports
- the fresh water streams, wetlands, its natural values and life systems it supports
- the air, its natural values and the life systems it supports

4.2 SIGNIFICANT AREAS OF HIGH CULTURAL VALUE

The property has several particular areas of cultural significance. They are:

- Te Korowhiti, a fortified headland Pa
- Huirangi, a terraced hilltop Pa
- High probable locations of koiwi remains
- Wahi tapu, sites where Maori oral histories document specific areas where specific events took place
- Taonga, including areas that may contain Maori artifacts
- Archaeological sites such as middens, agricultural material and terraces
- Coastal marine and fresh waterways

i. Wahi Tapu

Wahi tapu are areas of special significance. There is one known wahi tapu on the property located upon the ridgeline in the vicinity of the pine forest where Lots 13,14, 15 and 16 are proposed. The site was chosen by Maori as an area where the bodies of their deceased would be placed in trees for a duration of time while their flesh naturally decayed. It must be noted that other hapu or iwi may have other wahi tapu on this property also.

The bay immediately below our wahi tapu is Waipiro Bay, meaning 'smelly waters' from the odour of the slowly decaying bodies.

Since this time, the land has been well worked and cleared for the planting of the exotic pine forest. What remains unclear is what happened to the skeletal remains of all the bodies. This unknown raises concern and indicates that a cautious approach must be taken with the proposed developments in this area.

We have raised these matters with the applicant and discussions continue to identify best practice mechanisms to avoid negative impacts – see appendix 2/meeting minutes

ii. Taonga

The property contains several swamps and wetlands. Apart from obvious taonga such as wildlife, these swamps and wetlands are culturally significant in the sense that Maori preserved or hid taonga (artifacts) by burying them beneath the muddy swamp waters where many taonga remain today. Environmentally, swamps are also beneficial eco-systems that catch stormwater runoff. The ecological organisms of the swamps assist to cleanse runoff before it disperses into the coastal marine area.

Maori taonga are protected under the Antiquities Act. The Act offers procedures to deal with any taonga that are discovered. However, Maori preference is for the taonga to remain where they are and in the areas where their ancestors buried them.

It is unknown if any taonga are buried within the swamps on the property. The magnitude of Maori features and evidence of Maori occupation increase the likelihood of taonga being located here. Therefore, all swamp and wetland areas will be managed with the assumption that they may contain taonga. Again, these matters require ongoing discussion with the applicant in order to provide best possible protection.

iii. Koiwi (Human Remains)

Koiwi are very special taonga and an absolute level of respect is expected on all counts. The probable nature of burial locations upon this property is high. From our past experience with koiwi discoveries in the Bay of Islands, the coastal foreshore areas are where most remains are commonly located.

While managing the proposed development to ensure koiwi are not disturbed, our assessment principles must be actioned to avoid impacts and disturbances to areas of such significance.

There are also unforeseen natural events that disturb sensitive areas such as erosion and occasionally accidental discovery. Plans must be made to accommodate such events and the applicant has kindly offered co-operation in protecting these areas by establishing a 30metre setback area from MHWS of all buildable areas situated along the foreshore – see appendix 2/meeting minutes.

iv. Pa Features

There are two Pa on the property that requires the best possible protection. Te Korowhiti and Huirangi Pa are prominent features of the Bay of Islands. Te Korowhiti is currently in good condition and has not suffered any modifications except natural weathering from the elements. Huirangi however, has been significantly modified some years ago with the installation of a farm track. Recent upgrading of the farm track has further impacted the pa, modifying midden which are situated along the top of the pa ridgeline leading to Lot 12.

Discussions have been held with the applicant to identify appropriate methods to protect the pa from further modification. A Heritage covenant has been recommended in which the applicant supports – see appendix 2/meeting minutes

The full nature of heritage covenants and its protection mechanisms are yet to be identified although of all covenants available, this covenant 'possibly' provides the best possible protection.

Whilst investigation of 'all' covenant options are yet to be identified, for the purposes of this assessment, we will assume that the designated areas will be fully protected by heritage covenants.

Proposed covenant conditions must include:

- both pa will be protected in perpetuity
- identification of appropriate activities that can be conducted on the pa
- conditions securing tangata Whenua to ensure they are engaged in consultation should any person seek to change conditions
- appropriate conditions allowing tangata whenua access to the sites
- any other conditions that may be required

We further recommend that the applicant, NZHPT and ourselves discuss possible conditions prior to them being fixed to the covenants

4.3 Summary

These areas and features must not be disturbed but instead protected and preserved. We strongly recommend the following:

- Heritage covenants in perpetuity are placed on Te Korowhiti and Huirangi Pa to preserve the features for future generations
- Covenant conditions are identified and unanimously agreed to with Iwi
- No developments are carried out within the entire foreshore running between proposed Lots 1 – 11 and Lot 17 where koiwi are most likely buried. In this regard a 30metre setback from MHWS restricting construction within this area must be imposed
- An area upon the property is set aside as an urupa where koiwi can be re-interred should they be uncovered. Furthermore, another area must be set aside to store any archaeological material that may be unearthed during the construction. The following protocols for inclusion in the proposed Draft Management Plan are also recommended:
- The areas to be set aside for an urupa and archaeological depository must be identified and unanimously decided upon with local iwi
- The applicant and/or future Lot owners and/or the Residents Association must allow iwi access to the urupa and archaeological depository
- Expected use and management of the areas must be developed and unanimously decided upon with local iwi

- Any other iwi rules, protocols and procedures required to provide adequate protection and preservation of these matters must also be considered and included in the Management Plan

- The top ridgeline within proposed Lots 13, 14, 15 and 16 where deceased human bodies were once placed in trees to decay requires an adequate plan for the forest harvesting proposal. This is yet to be completed therefore a condition including iwi in this plan development is to be imposed

- Swampy wetland areas within proposed Lots 2 and 18 where Maori taonga are likely buried must not be disturbed in any way

- All earthworks are monitored by tangata whenua and at least two weeks notice given prior to any earthwork developments

- Should any taonga be discovered during any developments, all works are to cease immediately and tangata whenua contacted. Taonga must not be removed from their place of discovery.

5. PROPOSED DEVELOPMENTS

<u>New Zealand Historic Places Trust Application – Section 12</u>

There are several recorded archaeological sites and wahi tapu on the property. With the vast evidence of Maori occupation on this land, we are led to believe that there is a likelihood of further evidence or sites of past Maori and non-Maori activity, which have not yet been discovered. In this regard, a careful approach is required with the proposed development and future management of the individual Lots.

Bentzen Farms Ltd has made application to modify recorded and unrecorded archaeological sites via Section 12 of the Historic Places Act. Activities likely to affect archaeology and cultural values are:

- Construction of driveway access to all buildable areas
- Construction of internal road network
- Retaining walls and gabions
- Landscaping and surface modeling
- Storm water correction construction
- Planting and fencing
- Pine forest harvesting

5.1 Recorded Archaeological Sites Proposed for Modification

The following table identifies the archaeological sites proposed for modification and the activities that will impact the sites.

Site ID Number	Site Description	Location of Site (buildable area)	Proposed Modification
Q05/1296	5 Maori agricultural drains	Lot 1	Earthworks, landscaping, planting
Q05/1301	7 Maori agricultural drains	Lot 9	Earthworks, landscaping, planting
Q05/335	Kumara storage pit and terrace	Lot 11	Earthworks, landscaping and planting
Q05/338	Terraces	Lot 5	Earthworks, landscaping and planting
Unrecorded Sites	_____	13, 14, 15, 16, 18	Roading
Unrecorded Sites	_____	13, 14, 15, 16, 18	Pine forest harvesting activities

5.2 SITE ASSESSMENT DESCRIPTION

5.2.1 Site Q05/1296 – Agricultural Drains within Buildable Area of Lot 1

The site has been assessed by two archaeologists Northern Archaeological Research Ltd [NAR] in 2003 and Clough and Associates [CA] in 2004.

NAR report that the site is situated in an area of wetland that drains a small valley. The 5 drains of Maori origin were visible although some were indistinct – see appendix 3A.

CA reported 11 months later, that they were unable to confirm the existence of the drains. Testing indicated a normal soil profile posing questions as to what the structures might have been – see appendix 3B.

Both reports however, clearly indicate that water drains out through the buildable area and that the proposed development will affect this site.

The two archaeological reports give conflicting views on the following aspects:

Northern Archaeological Research	**Clough and Associates**
5 drains visible	Unable to confirm their existence
Crop marks visible	No crop marks visible
Of Maori origin	Unsure of origin as no evidence of activity recovered
Agricultural drains	Water drain caused by runoff
Proposed development will have impacts on the site	Proposed development unlikely to impact the site

We agree that significant water runoff flows through the site. We are cautious not to underestimate or undervalue the nature of the feature, which is protected by NZHPT. Therefore, for the purposes of our processing, we will assume that the feature is Maori Agricultural Drains.

5.2.2 Summary

We are not able to identify 'how' the proposed developments will impact the site as there is no information available which clearly details the nature and extent pertaining to the proposed landscaping, planting and earthworks.

5.2.3 Site Q05/338 – Terraces within Buildable Area in Lot 5

The proposed buildable area lies on the top of a hill within Lot 5 and currently contains buildings, which have been established for some time. Previous earthworks to the site have significantly modified and devalued the terrace features.

Two of the terrace features are located midway down the hill and is covered in native bush. A single terrace feature lies directly below a power pole within the buildable area above the existing Nissan hut. The exact nature of this terrace is undefined and recorded as a 'probable' terrace.

It seems the entire hill feature was an area where activities by Maori took place, prior to the establishment of the Nissan hut and other developments. Unfortunately, evidence of its original nature and uses has since been destroyed leaving only 3 terraces partially intact. Other features within the property suggest this area was another site where agricultural activities took place as it lies toward the end of a ridge line where pit features are recorded on another hilltop directly above.

5.2.4 Summary

We are not able to identify 'how' the proposed developments will impact the site as there is no information available which clearly details the nature and extent pertaining to the proposed landscaping, planting and earthworks.

5.2.5 Site Q05/1301 – Agricultural Drains within Buildable Area on Lot 9

Again, both NAR and CA have contradictory opinions in their reporting – see appendix 3A & B. None the less we aim to assess the site by assuming they are Maori agricultural drains. The information provided to us suggests that the buildable area either closely border's the site or incorporates the site slightly.

5.2.6 Summary

We are not able to identify 'how' the proposed developments will impact the site as there is no information available which clearly details the nature and extent pertaining to the proposed landscaping, planting and earthworks. However, we are confident that development can be achieved without impacting the site. This would require the buildable and curtilage areas to be reduced away from the site.

5.2.7 Site Q05/335 – Kumara Storage Pit and Terrace

The features are significant in terms of a bigger picture whereby the nearby Pa, Huirangi, encompasses it. It lies directly below the Pa along the tribal walkway ridgeline, which, opens out onto a headland. The pit and terrace are in fact, part of Huirangi Pa.

The obvious nature of the combined Pa and kumara pit features reveals the past Maori occupation and the lifestyles they led. The pit would have been an essential food storage area providing vital sustenance to its occupants. The combined features also confirm that Huirangi was a place of residence as well as verifying the likelihood that the drains recorded within proposed lot 9 is of an agricultural nature.

Set back slightly from the pit toward the Pa is a possible weathered terrace. The terrace lies within the proposed curtilage and buildable area. We have in the past discovered similar sites on other properties where terraces are located immediately adjacent to kumara pits. We have observed similar pit and terrace features on other properties in the Bay of Islands, which have a pa and ridge line combination. Here, we identified the remains of the foundations from a raised storage house, which in the day, lay directly upon the face of the terrace. The possibility of this terrace being of the same nature was discussed with CA who accompanied us on our assessment although no conclusive evidence of storage house foundations was observed.

Impacts to this site are obvious. Minimising the impacts must be investigated

5.2.8 Summary

Again, we are not able to identify 'how' the proposed developments will impact the site as there is no information available which clearly details the nature and extent pertaining to the proposed landscaping, planting and earthworks. We strongly advise that options be investigated to avoid negative impacts.

6. Other Section 12 Matters

A Section 12 authority will allow unrecorded areas to be modified. The proposed pine forest harvesting has the potential to destroy features as there are no effective contingency plans in place other than the procedures outlined in the proposed Revised Management Plan, *7.0 Maori Culture and Heritage*.

In theory, they aim to provide adequate protection measures. However, from our experiences, they are insufficient in practical terms as most excavator operators and sub-contractors would not, perhaps, have the slightest idea of what 'archaeological evidence' looks like, such as midden, hangi stones, Maori storage pits and 19th century remains etc. Supposing this is the case, it would therefore eliminate the contingencies detailed in the Proposed Management Plan.

The proposed Draft Management Plan has undergone amendment to which we have had input – see appendix 4/section 7.0 Maori culture and Heritage. This plan is yet to be confirmed and adopted as the final plan and will require further input to provide for the best possible procedures and protocols.

6.1 Summary

Section 12 applications require an extremely well planned approach and management regime for conducting construction developments. A 'Development Plan' must include the following:

- Full disclosure of all construction and associated activities
- Pre-construction assessments identifying areas of high, medium and low archaeological and cultural significance
- Assess high risk factors and seek alternative methods or routes
- Identify maximum extent of all construction, associated activities and the methods in which they will be achieved
- Supporting professional assessments confirming viability of the construction, including benefits and pitfalls
- Risk assessment and performance measures identified
- Identify construction team members, including archaeologists and tangata whenua, and their roles and responsibilities
- Time frames identified for conducting each construction
- Identification of logging techniques
- Monitoring regimes
- Any other information relevant to forestry and roading

6.2 Retaining Walls and Gabions

Some thought must be given in understanding the best methods for retaining. Many would argue that gabions are less visually intrusive. In some respects we would agree however from an archaeological and cultural view, gabions can be very intrusive, as they require more earthworks to install.

Further investigations are required to identify areas where retaining walls and gabions will be required. Each area needs to be assessed for its cultural values, which will then determine the type of retainer that should be installed.

6.3 Summary

In most circumstances, Maori do not support the modification of such taonga and often decline their support of applications. However this approach can bear great consequence to Maori if an authority is granted without conditions providing for their ongoing input toward the development.

Further information detailing the nature and extent of the proposed developments is yet to be provided. Once these matters are determined, then and only then are we likely to fully understand how much modification to all sites is likely to occur.

We believe that development within Lot 9 can successfully be achieved without disturbing the archaeological feature. However, it may require a slight adjustment of

the buildable and curtilage area away from the feature. It is difficult to assess Lots 1, 5 and 11 without detailed information of the constructions but it seems they will be significantly modified.

Retaining walls and gabions may also affect unrecorded features however no information as to where retaining is required has been supplied.

Landscaping and earthworks are of most concern. They can include a matrix of works yet the applicant has not defined what these proposals might include. Without this information, the proposal is very broad and open ended.

In principle we do not support the modification of 'protected sites' but should NZHPT grant an authority, we wish to continue investigating options to identify a balanced approach and best possible methods to achieving development.

6.4 Recommendations

The true nature and extent of the proposed developments likely to affect archaeological sites is unknown. Supporting such developments without all the facts is premature, carries a high element of risk to which consequences are often many.

Therefore, without the information we are unable to appropriately assess the proposal and any impacts it may have on cultural values we recommend the following:

i. NZHPT declines the application to modify archaeological sites to enable further investigation of the proposed development. Investigations would include:

(a) identify the full nature and extent of the proposed developments; and

(b) attempt to redesign the curtilage and buildable areas within each Lot so that they do not impact the archaeological features; and

(c) develop a plan in which the constructions will be conducted to avoid negative impacts

ii. Should NZHPT grant an authority to modify the site the following conditions should be affixed to the authority

(d) The Revised Management Plan inclusive of Iwi amendments is endorsed

(e) No developments may occur until a development plan is identified and unanimously agreed to by the iwi and hapu parties

(f) During the planning process of the development plan, the parties should address and consider options as recommended in points (a), (b) and (c) above

(g) The development plan upon completion is to be submitted to NZHPT prior to any developments for approval

(h) The plan must identify all proposed developments to which all relevant and supporting information must be supplied

(i) That perpetual heritage covenants are placed on Te Korowhiti and Huirangi Pa to protect and preserve the features for future generations

(j) That no developments whatsoever are carried out within the entire foreshore running between proposed Lots 1 – 11 and Lot 17 where koiwi are most likely buried and a 30metre setback from MHWS established restricting construction within this area, therefore being excluded from the authority

(k) That an adequate plan for the forest harvesting proposal is identified and unanimously agreed to by the iwi parties

(l) That swampy wetland areas within proposed Lots 2 and 18 where Maori Taonga are likely buried must not be disturbed in any way therefore being excluded from the authority

(m) That the applicant identifies two areas, one where koiwi can be re-interred if discovered and the other where archaeological material can be stored and that these areas are excluded from the authority

(n) That the applicant gives effect to the above conditions by allowing iwi to

(o) provide input via protocols, procedures and rules of the proposed Management Plan and any Development Plans

(p) All earthworks are monitored by tangata whenua and at least 2 weeks notice is given prior to earthwork activity

(q) Should any taonga be discovered during any developments, all works are to cease immediately and tangata whenua contacted. Taonga must not be removed from their place of discovery

(r) All plans are submitted to NZHPT prior to any constructions

7. CONCLUSION

The spirit of the Historic Places Act 1993 is to protect and preserve the historic and cultural heritage of New Zealand. The property contains significant historical and cultural values, which must be preserved. Maori protection methods differ significantly to those of NZHPT therefore a balanced approach needs to be identified.

Modern day opinions to individual features, in particular, middens and terraces, generally undervalue the features and minimise their significance. Current day development technicians often recommend that features will be protected and preserved by using techniques such as covering sites entirely with concrete slabs or dirt fill. The logic behind these techniques astounds Maori. Another example is where features are assessed individually. As a standalone feature, it is assessed for evidence of something historically spectacular. Should no such evidence be available, it is then classified as insignificant.

Our approach to understanding the significance of features is based upon its proximity to other features in the general area. This in turn often presents a bigger picture as to the nature of the area, what activities as a whole may have occurred. Subsequently, we are able to identify the significant historic and cultural values the area presents. Subdivision of land tends to individualise archaeological sites further as they become fragmented into smaller Lots.

The key central features forming the cultural foundation on the property are the two pa in which the individual terraces and middens across the property give greater understanding of the historic daily events that occurred. In this case, it is a unique situation to have all the features contained within one property.

These factors conclude our decision to fully protect and preserve all the features by declining our support to modify archaeological sites yet remaining open minded, to work through particular issues for the development, should NZHPT approve an authority.

8. RESOURCE CONSENT APPLICATIONS

The cultural assessment for resource consent applications is based on the same principles and fundamentals as our assessment for the Archaeological Applications in the previous section. Therefore, reference should be made to *4. Archaeological Applications,* with regard to all recommendations made in this section.

8.1 SUBDIVISION PROPOSAL DESCRIPTION

The applicant proposes to create a 18 Lot subdivision via a Management Plan. The Revised Management Plan with Iwi proposed amendments is contained in – appendix 4/7.0 Maori Culture and Heritage. The following developments are proposed:

Far North District Council

- Subdivision Consent – to create 18 Lots ranging from 5.3 to 10.8 ha
- Land use consent – to create building envelopes on each Lot, accommodation/recreation building, boat shed and earthworks associated with the proposal, including restoration of the logging head platform
- Retrospective land use consents – for earthworks and retaining wall work already undertaken

Northland Regional Council

- Land use consents – for earthworks associated with the proposed subdivision including restoration of the logging head platform
- Discharge and diversion of water consent – associated with earthworks and discharge consent for stormwater
- Coastal permits – for alterations to an existing jetty, new boat ramp and 5 new swing moorings in Waipiro Bay
- Retrospective land use and water diversion and discharge consents – for earthworks already undertaken on the site

9. INDIVIDUAL LOT ASSESSMENT

9.1 Lot 1 – Description

This coastal lot contains an area of 5.3ha. The proposed buildable and curtilage areas are located on moderately sloping land. Significant flows of stormwater naturally drain through the buildable and curtilage areas showing a deep scar outlet which drains out to Waipohutukawa Bay.

9.2 Archaeology

There are two archaeological sites recorded in this Lot, Q05/1296, described as agricultural drains and Q05/339, described as terraces. The buildable and curtilage area proposed slightly encompasses or borders site 1296. The curtilage area also

encompasses the foreshore, which is culturally sensitive in regard to possible koiwi burial areas. As described in the Archaeological Section, there are many coastal and cultural values presented in this Lot, therefore a careful approach to avoid disturbances is required.

Issues pertaining to the modification of this site is, identified in the Archaeology Application section of this report although it should be noted that we do not support modification of the archaeological site, as insufficient information was supplied to us at the time of processing.

9.3 Stormwater Disposal

No information has been supplied verifying the method in which stormwater runoff will be achieved. Significant amounts of stormwater runs off through this site and naturally drains out to the beach. Eventually, this matter will require addressing although the applicant has confirmed that no stormwater correction is intended during the development of the site. Instead, the new lot owner will address these issues once they are ready to develop the Lot. From a cultural perspective, correcting stormwater runoff and the methodology to achieve an effective result may potentially impact archaeology, coastal water quality and kaimoana stocks. It is assumed that piping will be used to drain water, which indicates that some earthworks will be required with the installation of pipes. Earthwork activities might impact the archaeological site and will most definitely require earthworks in the immediate foreshore area where koiwi could be buried. An authority to modify archaeological sites will be required to conduct the developments.

9.4 Effluent Disposal

An on-site effluent disposal by secondary treatment system to drip irrigation field is recommended by the engineer. As the buildable area is directly adjacent to the coastal marine area, locating a site for the drip irrigation field is to be identified.

The drip irrigation field should not be situated within the buildable or curtilage areas or foreshore area.

9.5 Driveway Access

One driveway access is proposed. Again this construction will require earthworks and with the various cultural areas present will require accurate construction information to ensure the areas are not disturbed. This activity may also require an authority to modify archaeological sites. Also, information is yet to be supplied to clarify how the internal road network to this Lot will be achieved. This too will impact archaeology and cultural values.

No information has been supplied to clarify how the developments will be achieved

9.6 Dwellings

Dwellings are not proposed as part of the subdivision development, however will require building consent prior to construction. The siting of dwellings will require investigation and assessment to ensure cultural values are protected

9.7 Summary

The applicant has made application to NZHPT to modify archaeological sites within this Lot. Further investigation is required, as no information is available as to the full extent of the developments proposed within this Lot

Information required is:

- Full details of how road access to the Lot, driveway access and stormwater correction will be achieved including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction

- Identifying the location for the effluent disposal drip irrigation field

9.8 Recommendations

Substantiating the viability of this site requires further information. There is limited room for development. Protecting archaeological sites, cultural values and sustaining the environment must be achieved. The following recommendations should be endorsed

- A 30metre setback is established from MHWS to avoid contact of the foreshore area where koiwi are possibly buried. Provisions for the management of this area must also be placed in the proposed Management Plan

- The buildable and curtilage areas are reduced away from the 30metre setback area and away from the archaeological feature

- Full details of how stormwater and effluent disposal constructions will be conducted, requires further discussion prior to the works being authorised. No drip fields should be located within the 30 metre setback area or within the proximity of the stormwater runoff drainage points

- Full details of how road access to the Lot will be achieved

- Tangata whenua are to be consulted prior to any developments

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan
  - protected archaeological sites Q05/1296 and 339 are situated within Lot
  - area of Maori cultural values, tangata whenua to be consulted prior to any developments
  - restricted 30metre building setback from MHWS
  - no further subdivision of lot may occur
  - no establishment of jetties or boat ramps may occur

10. Lot 2 – Description

This coastal lot contains an area of 10.5ha. The proposed buildable and curtilage areas are located on a flat site which lies between a wetland and Waipohutukawa Bay

10.1 Archaeology

There are two individual archaeological sites within the proposed curtilage areas that are situated in two different locations but are recorded as one site, Q05/854. Three other archaeological sites Q05/332, 230 and 231 are located away from the buildable area. Koiwi locations have been identified and a swampy wetland is located toward the rear of the buildable area. All earthworks within this Lot require careful management to ensure archaeological and cultural remains are not disturbed and also fresh and salt waterways are not contaminated.

Issues pertaining to the modification of this site are identified in the Archaeology Application section of this report although it should be noted that we do not support modification of either archaeological site as insufficient information was supplied to us at the time of processing.

10.2 Stormwater Disposal

Stormwater construction for the correction of stormwater disposal is also required within the buildable and curtilage areas in this Lot. Again, further information as to how correction might be achieved is pending. It is assumed that this construction may have impacts to archaeology and to cultural values associated with the swamp area.

10.3 Effluent Disposal

A secondary treatment system discharging to drip irrigation field is recommended. A suitable location for the drip irrigation field is yet to be identified. The irrigation field should not be located near the swamp or its outlets or the foreshore areas

10.4 Driveway Access

One driveway access is proposed. Again this construction and road access to the Lot will require earthworks and with the various cultural areas presented will require accurate construction information to ensure the areas are not disturbed. Archaeological site 231 may be impacted by road upgrade

No information has been supplied as to how road and driveway access will be achieved.

10.5 Dwellings

Dwellings are not proposed as part of the subdivision development, however, building consent prior to construction will be required. The siting of dwellings will require investigation and assessment to ensure cultural values are protected.

10.6 Summary

The applicant has made application to NZHPT to modify archaeological site Q05/854. No information has been supplied as to the full extent of the developments proposed within this Lot. Further information is required:

- Full details of how road upgrade, driveway access and stormwater correction will be achieved including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction

- Identifying the location for the effluent disposal drip irrigation field

10.7 Recommendations

Substantiating the viability of this site requires further information. There is limited room for development. Protecting archaeological sites, cultural values and sustaining the environment must be achieved. The following recommendations should be endorsed

- A 30metre setback is established from MHWS to avoid contact of the foreshore area where koiwi are possibly buried. Provisions for the management of this area must also be placed in the proposed Management Plan

- Full details of how stormwater and effluent disposal constructions will be conducted, requires further discussion prior to the works being authorised. No drip fields should be located within the 30 metre setback area, or within the proximity of the stormwater runoff drainage points or the swampy wetland

- Full details of how road access to the Lot will be achieved

- Tangata whenua are to be consulted prior to any developments

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan
  - archaeological site Q05/854
  - area of Maori cultural values, tangata whenua to be consulted prior to any developments
  - restricted 30metre building setback from MHWS
  - no further subdivision of Lot may occur
  - no jetties or boat ramps may occur

11. Lot 3 – Description

This coastal Lot contains an area of 5.5ha. The proposed buildable and curtilage areas are located on reasonably steep sloping land immediately adjacent to Te Korowhiti Pa. Significant flows of stormwater naturally drain through the buildable and curtilage areas showing deep scar pitting from stormwater runoff.

11.1 Archaeology

The Lot contains features of high cultural value. In particular, five archaeological features are recorded:

- Q05/330 – Te Korowhiti Pa
- Q05/329 – terraces
- Q05/669 – Te Korowhiti Pa

- Q05/855 – midden
- Q05/331 – pits

The buildable and curtilage areas lie almost upon the pa and the ridgeline spur leading to the pa. Te Korowhiti Pa requires special protection and discussions with the applicant identified that such will be achieved via a Heritage Covenant. The applicant has not applied to NZHPT to modify this site however it must be noted that any developments near this location will devalue the pa and the associated archaeological features regardless.

All earthworks within this Lot require careful management to ensure archaeological and cultural values will not be disturbed and salt waterways situated below this site are not contaminated. The buildable and curtilage areas should be re-designed away from the features

11.2 Stormwater Disposal

Significant stormwater runoff drains through the buildable area. Construction for the correction of stormwater disposal will be required. Again, further information as to how correction might be achieved has not been supplied.

The site contains obvious signs of natural path for stormwater flow. It is assumed that earthwork construction may have impacts to cultural values associated with the coastal marine environment.

11.3 Effluent Disposal

An onsite effluent disposal to drip irrigation field is recommended. A suitable location for the drip irrigation field is yet to be identified. The field must be located well away from the Pa, 30 metre setback and all waterways.

11.4 Driveway Access

One driveway access is proposed. Again this construction will require earthworks. Due to the close proximity of the pa, careful planning for driveway access is required to ensure earthworks do not impact on the pa or the ridgeline spur leading to the pa. This activity may require an authority from NZHPT. Detailed information is yet to be supplied

11.5 Dwellings

Dwellings are not proposed as part of the subdivision development, however, will require building consent prior to construction. The siting of dwellings will require investigation and assessment to ensure cultural values are protected.

11.6 Summary

Further investigation is required as to the full extent of the developments proposed within this Lot to prove its viability for development

- Full details of how driveway access and stormwater correction will be achieved, including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction

- Identifying the location for the effluent disposal drip irrigation field

- Assessment to re-design curtilage and buildable areas away from archaeological features is required

11.7 Recommendations

The buildable and curtilage areas are located in very close proximity to the Pa. Substantiating the viability of this site requires further information as the development may impact on loss of historic and cultural values in an outstanding landscape area as a result of the developments

Should Council approve the buildable and curtilage areas we recommend the following are endorsed:

- A 30metre setback is established from MHWS to avoid contact of the foreshore area where koiwi are possibly buried. Provisions for the management of this area must also be placed in the proposed Management Plan

- Full details of how stormwater and effluent disposal constructions will be conducted. Further discussions to occur with tangata whenua prior to the works being authorised.

- No drip fields should be located within the 30 metre setback area, or within the proximity of the stormwater runoff drainage points or in the location of the pa

- A condition restricting earthworks in this Lot until full details are disclosed and full consultation with tangata whenua completed

- Full details of location for the driveway access and its route. The access must not intrude on the ridgeline leading to the pa

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan
  - heritage covenant placed on Te Korowhiti Pa
  - archaeological sites Q05/330, 669, 329, 855, 331
  - area of Maori cultural values, tangata whenua to be consulted prior to any development
  - restricted 30metre building setback from MHWS
  - no further subdivision of Lot may occur
  - no jetty or boat ramp may occur

12. Lot 4 – Description

This coastal Lot contains an area of 10.8ha. The buildable and curtilage areas have been partially developed prior to this application and stormwater correction constructions are already installed. The buildable and curtilage areas are located upon a flat surface adjacent Pareanui Bay

12.1 Archaeology

There is possibly one recorded archaeological site within this Lot, Q05/1302 however unrecorded areas may also be present but requires clarification. All earthworks within this Lot require careful management to ensure archaeological and cultural

values will not be disturbed and that salt waterways situated directly adjacent to this Lot are not contaminated.

12.2 Stormwater Disposal

Stormwater correction has already been achieved although minor works to tidy up stormwater pipes is required. The end of the pipe outlet on the beach requires cutting and the applicant identified that a rock structure will be established to finish the pipe end. No earthworks to complete this is required. The minor works do not require any earthworks and no other earthworks have been identified.

12.3 Effluent Disposal

An onsite effluent disposal to drip irrigation field is recommended. A suitable location for the drip irrigation field is yet to be identified.

12.4 Driveway Access

One driveway access is proposed and is partially complete. Any further earthworks that may be required, to complete the access must be managed to safeguard any material and to ensure the coastal marine area is not contaminated.

12.5 Dwellings

Dwellings are not proposed as part of the subdivision development, however, building consent prior to construction will be required. The siting of dwellings will require investigation and assessment to ensure cultural values are protected.

12.6 Summary

Further information is required

- Details of all earthworks proposed
- Identifying the location for the effluent disposal drip irrigation field

12.7 Recommendations

Developing the buildable area could be achieved however further information is required to ensure cultural values will not be compromised. We recommend the following conditions

- A 30metre setback is established from MHWS to avoid contact of the foreshore area where koiwi are possibly buried. Provisions for the management of this area must also be placed in the proposed Management Plan

- Full details of how stormwater and effluent disposal constructions will be conducted, requires further discussion prior to the works being authorised. No drip fields should be located within the 30 metre setback area or within the proximity of the stormwater runoff drainage points or the location of Te Korowhiti pa which lies above the buildable area

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan
  - archaeological site Q05/1302

- area of Maori cultural values, tangata whenua to be consulted prior to any developments
- restricted 30metre building setback from MHWS
- no further subdivision of lot may occur
- no jetty or boat ramp may occur

13. Lot 5 – Description

This coastal Lot contains an area of 10ha. The proposed buildable and curtilage areas are located on a flat surface upon a hill that slopes down toward the foreshore. The buildable and curtilage areas are located within an area where buildings already exist.

13.1 Archaeology

Two archaeological features are recorded within this Lot, Q05/338 – terraces. The curtilage area encompasses or slightly borders the features. The applicant proposes to modify archaeological sites and has made application to NZHPT. The full details pertaining to the modification of this site is identified in the Archaeology Application section of this report. However it should be noted that we do not support modification of these features.

All earthworks within this lot require careful management to ensure archaeological and cultural values will be not disturbed and that salt waterways situated below this site are not contaminated.

13.2 Stormwater Disposal

Stormwater construction for the correction of stormwater disposal may be required within the buildable and curtilage areas in this Lot. Again, further information as to how correction might be achieved is pending. It is feared that this construction may have impacts to cultural values, and the recorded archaeological features and the coastal marine environment.

13.3 Effluent Disposal

An onsite effluent disposal to drip irrigation field is recommended. A suitable location for the drip irrigation field is yet to be identified although a bush covered slope on the northeast side of the site may be sufficient depending on the location of the archaeological site.

13.4 Driveway Access

Access to the Lot is already achieved. Due to the close proximity of the archaeological sites, any upgrading of the driveway access requires careful planning to ensure earthworks do not impact the feature.

13.5 Dwellings

Dwellings are not proposed as part of the subdivision development, however, building consent prior to construction will be required. The siting of dwellings will require investigation and assessment to ensure cultural values are protected.

13.6 Summary

Further information is required to identify the full extent of the developments proposed within this Lot

- Full details of how driveway upgrade and stormwater correction will be achieved, including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction

- Identifying the location for the effluent disposal drip irrigation field

13.7 Recommendations

The site could accommodate some development although there is limited room for development. Substantiating the viability of the site to ensure protection of cultural values requires further information. The following recommendations should be endorsed

- The buildable and curtilage areas are redesigned away from the two recorded archaeological sites

- A 30metre setback is established from MHWS to avoid contact of the foreshore area where koiwi are possibly buried. Provisions for the management of this area must also be placed in the proposed Management Plan

- Full details of how stormwater and effluent disposal constructions will be conducted, requires further discussion prior to the works being authorised. No irrigation drip fields should be located within the 30 metre setback area or within the proximity of the stormwater runoff drainage points or in the location of the archaeological sites

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan
  - archaeological sites Q05/338
  - area of Maori cultural values, tangata whenua to be consulted prior to any development
  - restricted 30metre building setback from MHWS
  - no further subdivision of lot may occur
  - no jetties or boat ramps may occur

14. Lot 6 – Description

This coastal Lot contains an area of 9.2ha. The proposed buildable and curtilage areas are located on a flat valley floor surface which was a logging head platform during recent forestry operations. The site is located adjacent to the foreshore. The buildable and curtilage areas have previously been worked with the installation of stormwater correction, driveway access and general site surface modeling.

14.1 Archaeology

Prior to the subdivision application, a logging head platform was installed within the proposed buildable area. At this time, an archaeological feature Q05/1298 was

destroyed. One other site is recorded in this Lot Q05/1299 – pits, located in the southwest corner of the Lot.

The application does not specify if further earthworks are proposed within this Lot. Any earthworks will require careful management to ensure archaeological values will be not disturbed and also cultural values pertaining to salt waterways situated adjacent to this site are not contaminated.

14.2 Stormwater Disposal

Some stormwater construction has been installed within this lot. Some minor finishing work is required with the existing pipe that leads out to the beach. This will include cutting rock formation at the outlet end. The application does not identify if earthworks are required to complete this. Further information is required for any constructions that may be initiated as part of the subdivision proposal as they may have impacts to cultural values.

14.3 Effluent Disposal

An onsite effluent disposal to drip irrigation field is recommended. A suitable location for the drip irrigation field is yet to be identified. The field must not be located within the 30 metre setback area or near stormwater drainage points

14.4 Driveway Access

One driveway access has already been achieved. A concrete access has been installed prior to application. The application does not state whether further earthworks to complete driveway access are required

14.5 Dwellings

Dwellings are not proposed as part of the subdivision development, however, building consent prior to construction will be required. The siting of dwellings will require investigation and assessment to ensure cultural values are protected.

14.6 Summary

Although some developments have already occurred, further information is required as to the full extent of the developments proposed within this Lot

- Full details of how driveway access and stormwater correction will be completed including the intended drainage pipes, if any and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction.

- Identifying the location for the effluent disposal drip irrigation field

14.7 Recommendations

Developing the buildable area could be achieved however further information is required to confirm viability of the site

The following recommendations should be endorsed

- A 30metre setback is established from MHWS to avoid contact of the foreshore area where koiwi are possibly buried. Provisions for the management of this area must also be placed in the proposed Management Plan

- Full details of how stormwater and effluent disposal constructions will be conducted, requires further discussion prior to the works being authorised. No drip fields should be located within the 30 metre setback area or the within the proximity of the stormwater runoff drainage points

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan
  - archaeological site Q05/1299
  - area of Maori cultural values, tangata whenua to be consulted prior to development
  - restricted 30metre building setback from MHWS
  - no further subdivision of lot may occur
  - no jetty or boat ramp may occur

15. Lot 7 – Description

This coastal Lot contains an area of 5.0ha. The proposed buildable and curtilage areas are located on the top of a coastal headland between Pareanui and Parorenui Bay

15.1 Archaeology

There are two recorded archaeological sites within this Lot – Q05/333 – pits and Q05/334 – terraces and midden. The maps identifying the curtilage area in this Lot suggest the curtilage slightly encompasses' both archaeological features. There is a high likelihood of unrecorded sites being located near the coastal edge of the headland

The application does not specify if further earthworks are proposed within this lot. Any earthworks will require careful management to ensure archaeological values will be not disturbed.

15.2 Stormwater Disposal

Stormwater construction has not been identified within this Lot however the engineer report recommends that stormwater be piped to dispersal outlet. This outlet has not been identified. Also, the application does not identify if earthworks are required to complete this. Further information is required for any constructions that may be initiated as part of the subdivision proposal as they may impact cultural values.

15.3 Effluent Disposal

An onsite effluent disposal to drip irrigation field is recommended. A suitable location for the drip irrigation field is yet to be identified. The engineer recommends that drip irrigation lines be laid in existing bush however this matter requires further consideration to ensure cultural and marine values are not compromised

15.4 Driveway Access

One driveway access has already been achieved although it is not yet concreted

15.5 Dwellings

Dwellings are not proposed as part of the subdivision development, however, building consent prior to construction will be required. The siting of dwellings will require investigation and assessment to ensure cultural values are protected.

15.6 Summary

Although some developments have already occurred, further information is required as to the full extent of the developments proposed within this Lot

- Full details of how driveway access and stormwater correction will be completed including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction.

- Identifying the location for the effluent disposal drip irrigation field

- Identifying the exact location of the curtilage area and the proximity to both archaeological sites

15.7 Recommendations

Further information supporting the viability of this site is required. The following recommendations should be endorsed

- A 30metre setback is established from MHWS to avoid contact of the foreshore area where koiwi are possibly buried. Provisions for the management of this area must also be placed in the proposed Management Plan

- Full details of how stormwater and effluent disposal constructions will be conducted, requires further discussion prior to the works being authorised. No drip fields should be located within the 30 metre setback area or within the proximity of the stormwater runoff drainage points

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan
  - archaeological site Q05/333 and Q05/334
  - area of Maori cultural values, tangata whenua to be consulted prior to any development
  - restricted 30metre building setback from MHWS
  - no further subdivision of Lot may occur
  - no jetty or boat ramp may occur

16. Lot 8 – Description

This coastal Lot contains an area of 7.7ha. It is comprised of two part Lots which will be legally held together in such a way that they cannot be sold, leased or dealt with

separately. The proposed buildable and curtilage areas are located on a flat area on a valley floor which has already undergone some development

16.1 Archaeology

Providing the application maps are correct there does not appear to be any other recorded archaeological sites within this Lot, however, this does not discount the presence of unrecorded sites. A ridgeline running through this Lot converges nearby Huirangi Pa. This increases the likelihood of unrecorded sites

If further earthworks are proposed within this Lot they will require careful management to ensure archaeological values will be not disturbed.

16.2 Stormwater Disposal

Some stormwater construction has been installed within this Lot. The engineer report recommends that stormwater be piped to adjacent drain. The application does not identify if earthworks are required to complete this. Further information is required for any constructions that may be initiated as part of the subdivision proposal as the impact to cultural values may occur.

16.3 Effluent Disposal

An onsite effluent disposal to drip irrigation field is recommended. A suitable location for the drip irrigation field is yet to be identified. It is recommended that drip irrigation lines be laid either on the elevated ridge flank or in the valley floor, depending on available groundwater separation. This matter requires further consideration and professional investigation to verify suitability to ensure cultural and marine values are not compromised

16.4 Driveway Access

One concreted driveway access has already been achieved.

16.5 Dwellings

Dwellings are not proposed as part of the subdivision development, however, will require building consent prior to construction. The siting of dwellings will require investigation and assessment to ensure cultural values are protected.

16.6 Summary

Although some developments have already occurred, further information is required as to the full extent of the developments proposed within this Lot

- Full details of how stormwater correction will be completed, including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction.

- Identifying the location for the effluent disposal drip irrigation field

16.7 Recommendations

Developing the buildable area could be achieved however further information is required to confirm viability. The following recommendations should be endorsed

- A 30metre setback is established from MHWS to avoid contact of the foreshore area where koiwi are possibly buried. Provisions for the management of this area must also be placed in the proposed Management Plan

- Full details of how stormwater and effluent disposal constructions will be conducted, requires further discussion prior to the works being authorised.

- Investigation of groundwater separation required. No drip fields should be located within the 30 metre setback area or within the proximity of the stormwater runoff drainage points

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan
  - area of Maori cultural values, tangata whenua to be consulted prior to development
  - restricted 30metre building setback from MHWS
  - no further subdivision of lot may occur
  - no jetty or boat ramp may occur

17. Lot 9 – Description

This coastal Lot contains an area of 6.6ha. The proposed buildable and curtilage areas are located on a flat area directly adjacent to Parorenui Bay.

17.1 Archaeology

There is one recorded archaeological site within this Lot - Q05/1301 being 7 Maori Agricultural Drains. No other recorded archaeological sites exist, however, this does not discount the presence of unrecorded sites. Issues pertaining to the modification of this site are detailed in the Archaeological assessment of this report.

High sensitivity areas for koiwi are present in this Lot, therefore, the buildable areas must be set back at least 30metres.

If further earthworks are proposed within this lot they will require careful management to ensure archaeological values will be not disturbed.

17.2 Stormwater Disposal

Some stormwater construction has been installed within this Lot. The engineer's report recommends that stormwater be piped to existing drain. The application does not identify if earthworks are required to complete this. Further information is required for any constructions that may be initiated as part of the subdivision proposal, as they may impact cultural values.

17.3 Effluent Disposal

An onsite effluent disposal to drip irrigation field is recommended on more elevated moderately sloping ground away from the beach. A suitable location for the drip

irrigation field is yet to be identified. This matter requires further consideration to ensure cultural and marine values are not compromised

17.4 Driveway Access

Proposed access to the site is via an existing farm track. Constructions associated with access formation activities have not been identified. Further information is required.

17.5 Dwellings

Dwellings are not proposed as part of the subdivision development, however, building consent prior to construction will be required. The siting of dwellings will require investigation and assessment to ensure cultural values are protected.

17.6 Summary

Although some developments have already occurred, further information is required as to the full extent of the developments proposed within this lot to substantiate its viability

- Full details of how stormwater correction and access driveways will be completed including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction.

- Identifying the location for the effluent disposal drip irrigation field

17.7 Recommendations

The development of this site requires further information. There is a limited area for development yet the scale of developments requires careful consideration. Protecting cultural values and sustaining the environment must be achieved. The following recommendations should be endorsed

- A 30metre setback is established from MHWS to avoid contact of the foreshore area where koiwi are possibly buried. Provisions for the management of this area must also be placed in the proposed Management Plan

- Full details of how stormwater and effluent disposal constructions will be conducted, requires further discussion and information prior to the works being authorised. No drip fields should be located within the 30 metre setback area or within the proximity of the stormwater runoff drainage points

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan
  - archaeological site Q05/1301
  - area of Maori cultural values, tangata whenua to be consulted prior to any developments
  - restricted 30metre building setback from MHWS
  - no further subdivision of lot may occur
  - no jetty or boat ramp may occur

18. Lot 10 – Description

This coastal Lot contains an area of 7.5ha. The proposed buildable and curtilage areas are located on a sloping area directly adjacent to Parorenui Bay.

18.1 Archaeology

Huirangi Pa – Q05/336 is the recorded archaeological feature within this Lot, however, this does not discount the presence of unrecorded sites. The buildable and curtilage areas are located in high sensitivity areas for koiwi are present in this Lot, therefore the buildable areas must be set back at least 30metres.

If further earthworks are proposed within this Lot they will require careful management to ensure archaeological values will not be disturbed.

18.2 Stormwater Disposal

Evidence of high stormwater flows running through the proposed buildable area on this Lot shows a reasonably deeply pitted outlet. Some significant stormwater correction will be required to achieve a good dwelling platform. The engineer's report identifies that soil creep is evident within this Lot which raises concern. The application however does not identify how stormwater disposal will be achieved and if earthworks are required. Further information is required for any constructions that may be initiated as part of the subdivision proposal, as they may impact cultural values. Further geotechnical assessments may also be required, especially with regard to water levels below ground.

18.3 Effluent Disposal

An onsite effluent disposal to drip irrigation field is recommended by the engineer. However we do not support their recommendation to lay drip irrigation lines on the sloping land below the access road set back from the beach. Instead, we would recommend that another site be identified on the sloping land 'above' the access road. This matter requires further consideration to ensure cultural and marine values are not compromised

18.4 Driveway Access

Proposed access to the site is via an existing farm track. Constructions associated with access formation activities have not been identified. Further information is required.

18.5 Dwellings

The site is relevantly small which will restrict the amount and types of developments for this site. Dwellings are not proposed as part of the subdivision development, however, building consent prior to construction will be required. The siting of dwellings will require investigation and assessment to ensure cultural values are protected.

18.6 Summary

This site has many natural and cultural characteristics, which will require modification. These values may be compromised. The following information must be identified

- Full details of how stormwater correction and access driveways will be achieved, including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction.

- Identifying the location for the effluent disposal drip irrigation field

18.7 Recommendations

Substantiating the viability of this site requires further information. There is limited room for development. Protecting cultural values and sustaining the environment must be achieved. The following recommendations should be endorsed

- A 30metre setback is established from MHWS to avoid contact of the foreshore area where koiwi are possibly buried. Provisions for the management of this area must also be placed in the proposed Management Plan

- Full details of how stormwater and effluent disposal constructions will be conducted, requires further discussion and information prior to the works being authorised. No drip fields should be located within the 30 metre setback area or within the proximity of the stormwater runoff drainage points or the curtilage area

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan
  - heritage covenant is placed on Huirangi Pa
  - archaeological site Q05/336
  - area of Maori cultural values, tangata whenua to be consulted prior to development
  - restricted 30metre building setback from MHWS
  - no further subdivision of lot may occur
  - no jetty or boat ramp may occur

19. Lot 11 – Description

This coastal Lot contains an area of 7.4ha The proposed buildable and curtilage areas are located on top of a headland spur directly below Huirangi Pa.

19.1 Archaeology

The Lot contains three recorded archaeological sites. The headland spur is an extension of Huirangi pa. The buildable and curtilage areas contain one feature combination, a kumara pit and terrace.

The kumara pit and terrace might be impacted as a result of the development. Issues are currently being discussed with the applicant to reduce the buildable area off the ridgeline spur. There is limited room to achieve a desired outcome. At the time of reporting, no agreement has been concluded.

Further earthworks are proposed within this Lot will require careful management to ensure archaeological values will not be disturbed.

19.2 Stormwater Disposal

Some stormwater correction will be required. The engineer recommends disposal to dispersal outlet however this outlet is yet to be identified. Further information is required for any constructions that may be initiated as part of the subdivision proposal as they may impact to cultural value.

19.3 Effluent Disposal

The engineer has recommended either an onsite effluent disposal to drip irrigation field or evapotranspiration beds following a standard septic tank. Earthworks in this area require further information and strict management to ensure cultural values are not compromised

19.4 Driveway Access

Proposed access to the site is via an existing farm track. Constructions associated with access formation activities have not been identified although some road upgrades is suggested. Further information is required

19.5 Dwellings

Dwellings are not proposed as part of the subdivision development, however, building consent prior to construction will be required. The siting of dwellings will require investigation and assessment to ensure cultural values are protected.

19.6 Summary

This site has many cultural characteristics, which will be impacted by the developments. Cultural values will be compromised and discussions are still being held with the applicant to redesign the location of the buildable and curtilage areas. The following information must be identified

- Full details of how stormwater correction and access driveways will be achieved including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction.

- Identifying the location for the effluent disposal drip irrigation field

19.7 Recommendations

Substantiating the viability of this site requires further information. There is limited room for development without impacting cultural values. The following recommendations should be endorsed

- The buildable and curtilage areas should be removed from the headland spur to avoid negative impacts to Huirangi Pa and the recorded archaeological sites

- A 30metre setback is established from MHWS to avoid contact of the foreshore area where koiwi are possibly buried. Provisions for the management of this area must also be placed in the proposed Management Plan

- Full details of how stormwater and effluent disposal constructions will be conducted, requires further discussion and information prior to the works being authorised. No drip fields should be located within the 30 metre setback area or within the proximity of the stormwater runoff drainage points or the curtilage area

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan
  - archaeological sites Q05/1300 and Q05/335 and Q05/831
  - area of Maori cultural values, tangata whenua to be consulted prior to developments
  - restricted 30metre building setback from MHWS
  - no further subdivision of lot may occur
  - no jetty or boat ramp may occur

20. Lot 12 – Description

This Lot contains an area of 7.8ha. The proposed buildable and curtilage areas are located high above the coastal Lots overlooking the bay. The site is surrounded by bare grazing paddocks. A planting plan for this lot is proposed

20.1 Archaeology

The ridgeline where the buildable and curtilage area is located is another extension of Huirangi Pa. Damage to a midden occurred during previous earthworks to the road network which services the buildable area. This midden has now been recorded as part of the pa. There is a high likelihood that more middens and other Maori features are contained along this ridge.

A possible location for an urupa has been identified within this Lot however the site is yet to be confirmed

Further earthworks are proposed within this lot which, will require careful management to ensure archaeological values will not be disturbed. However it should be noted that no further earthworks to the road network should occur.

20.2 Stormwater Disposal

Engineer recommended stormwater disposal either, by disposal to dispersal outlet or soak holes. Further information is required for any constructions that may be initiated as part of the subdivision proposal as they may impact cultural values.

20.3 Effluent Disposal

Engineer recommended effluent disposal to drip irrigation field after secondary treatment or evapotranspiration beds following a standard septic tank is recommended by the engineer. Again, earthworks in this area require further information to ensure cultural values are not compromised

20.4 Driveway Access

Proposed access to the site is via an existing farm track although the application suggests this is to be upgraded. Constructions associated with access formation activities have not been identified. Cultural values may be compromised, therefore further information is required.

Earthwork construction to the road network must be assessed as Huirangi Pa and the ridgelines from it may be seriously compromised

20.5 Dwellings

Dwellings are not proposed as part of the subdivision development however, building consent prior to construction will be required. The siting of dwellings will require investigation and assessment of cultural values and visual impacts

20.6 Summary

The following information must be identified

- Full details of how stormwater correction and access driveways will be achieved including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction
- Full details of how road upgrading is to be achieved
- Identifying the location for the effluent disposal drip irrigation field and/or the evapotranspiration beds following standard septic tank and earthworks required to achieve installation

20.7 Recommendations

Substantiating the viability of this site requires further information. In particular, earthworks are a concern with possible upgrading of the access road. The following recommendations should be endorsed

- The road upgrade method requires further information
- Full details of how stormwater and effluent disposal constructions will be conducted, requires further discussion and information prior to the works being authorised.
- The following information should be fixed to the new certificate of title
  - all construction subject to Management Plan
  - area of Maori cultural values, tangata whenua to be consulted prior to any development
  - urupa wahi tapu area subject to special protocol (location yet to be identified)
  - no further subdivision of Lot may occur

21. Lot 13 – Description

This Lot contains an area of 5.4ha The proposed buildable and curtilage areas are located on top of a ridge away from but overlooking Waipiro Bay.

21.1 Archaeology

There are no recorded archaeological sites within this Lot, however, this does not discount the presence of unrecorded sites as other sites have recently been recorded nearby. The pine forest borders this Lot where earthworks are proposed. Such works

will require careful management to ensure archaeological values will be not disturbed. Detailed recommendations for all activities within this Lot can be found in the Archaeological Assessment in the front of this report or in the amended proposed draft management plan in the appendix in reference to pine forest harvesting activities

21.2 Stormwater Disposal

Some stormwater correction will be required. The engineer recommends stormwater be piped to base of slope. Further information is required for any constructions that may be initiated as they may impact cultural values.

21.3 Effluent Disposal

The engineer recommend either an onsite effluent disposal to drip irrigation field or evapotranspiration beds following a standard septic tank. Earthworks in this area require further information to ensure cultural values are not compromised

21.4 Road & Driveway Access

Road and driveway access to this Lot is required. It is assumed that significant earthworks will be necessary to achieve a road suitable to carry out logging activities, which will require the use of heavy machinery.

Constructions associated with access formation activities have not been identified but must be supplied to ensure cultural values will be protected

21.5 Dwellings

Dwellings are not proposed as part of the subdivision development, however, building consent prior to construction will be required. The siting of dwellings will require investigation and assessment

21.6 Summary

This Lot is reasonably undeveloped and no information has been supplied to verify how the site will be developed. The following information must be identified

- Full details of how stormwater correction and access driveways and road network will be achieved including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction.

- Identifying the location for the effluent disposal drip irrigation field

21.7 Recommendations

The amended proposed management plan clearly detail's protocols and procedures associated with pine forest harvesting. The protocols and procedures must be applied with the development of this lot. Substantiating viability of the buildable area is yet to be determined. Further information is required as cultural values may be compromised. The following recommendations should be endorsed

- Details as per the Management Plan for forest harvesting must be provided. The recommendations detailed in the Archaeological

assessment at the front of this report should also be endorsed [see summary 6.1]

- Full details of how road network, driveway access, stormwater and effluent disposal constructions will be conducted requires further discussion and information prior to the works being authorised.

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan and Forest Harvesting Development Plan
  - area of Maori cultural values, tangata whenua to be consulted prior to development
  - no further subdivision of lot may occur

22. Lot 14 – Description

This Lot contains an area of 7.1ha The proposed buildable and curtilage areas are located on top of a ridge away from but overlooking Waipiro Bay.

22.1 Archaeology

There is one recorded archaeological site in this Lot Q05/856 which borders Lot 18. The site was identified during previous earthworks along the main entrance road to the property and is recorded as part of another site located on the immediate waterfront in Waipiro Bay.

The presence of unrecorded sites is high. The pine forest is located in this Lot and earthworks are proposed. Such works will require careful management to ensure archaeological values will not be disturbed. Detailed recommendations for all activities within this Lot can be found in the Archaeological Assessment in the front of this report or in the amended proposed draft management plan in the appendix.

22.2 Stormwater Disposal

Some stormwater correction will be required. The engineer has recommended stormwater be piped to base of slope or to appropriately designed dispersal outlet. Further information is required for any constructions that may be initiated as they may impact cultural values.

22.3 Effluent Disposal

The engineer has recommended either an onsite effluent disposal to drip irrigation field or evapotranspiration beds following a standard septic tank. Earthworks in this area require further information to ensure cultural values are not compromised

22.4 Driveway Access

Proposed access to the site is via an existing farm track. Constructions associated with access formation activities have not been identified. Further information is required.

22.5 Dwellings

Dwellings are not proposed as part of the subdivision development, however, building consent prior to construction will be required. The siting of dwellings will require investigation and assessment to ensure cultural values are protected.

22.6 Summary

This Lot is reasonably undeveloped and no information has been supplied to verify how the site will be developed. The following information must be identified

- Full details of how stormwater correction and access driveways and road network will be achieved including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction.

- Identifying the location for the effluent disposal drip irrigation field

22.7 Recommendations

The amended proposed management plan clearly detail's protocols and procedures associated with pine forest harvesting. The protocols and procedures must be applied with the development of this lot. Substantiating viability of the buildable area is yet to be determined. Further information is required as cultural values may be compromised. The following recommendations should be endorsed

- Details as per the Management Plan for forest harvesting must be provided. The recommendations detailed in the Archaeological assessment at the front of this report should also be endorsed [see summary 6.1]

- Full details of how road network, driveway access, stormwater and effluent disposal constructions will be conducted requires further discussion and information prior to the works being authorised.

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan and Forest Harvesting Development Plan
  - archaeological site Q05/856
  - area of Maori cultural values, tangata whenua to be consulted prior to development
  - no further subdivision of lot may occur

23. Lot 15 – Description

This Lot contains an area of 7.0ha The proposed buildable and curtilage areas are located on top of a ridge away from but overlooking Waipiro Bay. At present, the site is covered in pine

23.1 Archaeology

There are no recorded archaeological sites within this Lot, however, this does not discount the presence of unrecorded sites as other sites have recently been recorded

nearby. The pine forest covers this Lot and an application to modify archaeological sites has been lodged. Earthworks are required to establish the road network, driveway access, stormwater correction, effluent disposal and formation of house sites. Such works will require careful management to ensure archaeological values will not be disturbed. Detailed recommendations for all activities within this lot can be found in the Archaeological Assessment in the front of this report or in the amended proposed draft management plan in the appendix.

23.2 Stormwater Disposal

Some stormwater correction will be required. The engineer has recommended that stormwater be piped to watercourse or appropriately designed dispersal unit. Avoiding impacts to the watercourse is favoured however further information is required for any constructions that may be initiated as they may impact cultural values.

23.3 Effluent Disposal

The engineer recommended an onsite effluent system although he states that this is subject to specific design. The nature of this recommendation is unknown.

Regardless, earthworks in this area will require further information to ensure cultural values are not compromised

23.4 Driveway Access

Proposed access to the site is via an existing farm track. Constructions associated with access formation activities have not been identified. Further information is required.

23.5 Dwellings

Dwellings are not proposed as part of the subdivision development, however, building consent prior to construction will be required. The siting of dwellings will require investigation and assessment to ensure cultural values are protected.

23.6 Summary

This Lot is also reasonably undeveloped and no information has been supplied to verify how the site will be developed. The following information must be identified

- Full details of how stormwater correction and access driveways and road network will be achieved including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction.
- Identifying the location for the effluent disposal drip irrigation field

23.7 Recommendations

The amended proposed management plan clearly detail's protocols and procedures associated with pine forest harvesting. The protocols and procedures must be applied with the development of this lot. Substantiating viability of the buildable area is yet to be determined. Further information is required as cultural values may be compromised. The following recommendations should be endorsed

- Details as per the Management Plan for forest harvesting must be provided. The recommendations detailed in the Archaeological assessment at the front of this report should also be endorsed [see summary 6.1]

- Full details of how road network, driveway access, stormwater and effluent disposal constructions will be conducted requires further discussion and information prior to the works being authorised.

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan and a Forest Harvesting Development Plan
  - area of Maori cultural values, tangata whenua to be consulted prior to development
  - no further subdivision of lot may occur

24. Lot 16 – Description

This Lot contains an area of 8.0ha The proposed buildable and curtilage areas are located on top of a ridge away from but overlooking Waipiro Bay. At present, the site is covered in pine

24.1 Archaeology

A wahi tapu is located on this lot near the top ridge-line at the property boundary. Information pertaining to this wahi tapu can be found in the Archaeological Assessment at the front of this report. There are no recorded archaeological sites within this Lot however this does not discount the presence of unrecorded sites as other sites have recently been recorded nearby. The pine forest covers this Lot and an application to modify archaeological sites has been lodged. Earthworks are required to establish the road network, driveway access, stormwater correction, effluent disposal and formation of house sites. Such works will require careful management to ensure archaeological values will not be disturbed. Detailed recommendations for all activities within this Lot can be found in the Archaeological Assessment in the front of this report or in the amended proposed draft management plan in the appendix.

24.2 Stormwater Disposal

Some stormwater correction will be required. The engineer recommends stormwater be piped to watercourse or appropriately designed dispersal unit. Avoiding impacts to the watercourse is favoured, however further information is required for any constructions that may be initiated as they may impact cultural values.

24.3 Effluent Disposal

The engineer recommended an onsite effluent system although her advised that this is subject to specific design. The nature of this recommendation is unknown.

Regardless, earthworks in this area will require further information to ensure cultural values are not compromised

24.4 Driveway Access

Proposed access to the site is via an existing farm track. Constructions associated with access formation activities have not been identified. Further information is required.

24.5 Dwellings

Dwellings are not proposed as part of the subdivision development, however, building consent prior to construction will be required. The siting of dwellings will require investigation and assessment to ensure cultural values are protected.

24.6 Summary

This Lot is also reasonably undeveloped and no information has been supplied to verify how the site will be developed. The following information must be identified

- Full details of how stormwater correction and access driveways and road network will be achieved, including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction.

- Identifying the location for the effluent disposal drip irrigation field

24.7 Recommendations

The amended proposed management plan clearly detail's protocols and procedures associated with pine forest harvesting. The protocols and procedures must be applied with the development of this lot. Substantiating viability of the buildable area is yet to be determined. Further information is required as cultural values may be compromised. The following recommendations should be endorsed

- Details as per the Management Plan for forest harvesting must be provided. The recommendations detailed in the Archaeological assessment at the front of this report should also be endorsed [see summary 6.1]

- Full details of how road network, driveway access, stormwater and effluent disposal constructions will be conducted requires further discussion and information prior to the works being authorised.

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan and Forest Harvesting Development Plan
  - area of Maori cultural values, tangata whenua to be consulted prior to development
  - no further subdivision of lot may occur

25. Lot 17 – Description

This Lot contains an area of 6.4ha There is an existing house within the proposed buildable area on this Lot. The site is located on flat land and contains developments such as a swimming pool, a small cottage to the rear of the house and a garage. The

application makes no reference to any proposed developments within this Lot. This Lot is comprised of two part lots which will legally be held together in such a way that they cannot be sold separately.

25.1 Archaeology

One recorded archaeological site is located within this Lot – Q05/337 – pits and terraces. The site is located south of the house on a broad headland. The application does not propose to modify this site. Although there are no recorded archaeological sites within this Lot this does not discount the presence of unrecorded sites. There is the very high likelihood that unrecorded sites are situated within this block, especially along the top boundary of the Lot along a ridgeline that leads to Huirangi pa. The entire foreshore area heading south from the existing house toward the western boundary will most likely contain archaeological material. These areas however will be protected by covenant in favour of FNDC.

Should the applicant elect to re-develop the existing dwellings, the works will require careful planning and management to ensure archaeological values will not be disturbed.

25.2 Stormwater Disposal

Stormwater mechanisms are currently installed but may require addressing should the buildable area be re-designed with new dwellings. Impacts to the Waipiro Bay must be determined and information is required for any constructions that may be initiated as they may impact cultural values.

25.3 Effluent Disposal

There is an existing effluent system installed. Any proposal to redevelop the site will require a re-assessment of the existing system to identify if it is functioning well and to ascertain if any upgrade is required. As the buildable area is located directly adjacent Waipiro Bay, earthworks in this area will require further information to ensure cultural values are not compromised

25.4 Driveway Access

Access to the site already exists. Any constructions associated with upgrading the access have not been addressed. Further information is required.

25.5 Dwellings & Structures

As described above, there are a number of existing dwellings within the buildable area of this Lot.

The Lot also contains a reasonably large pile jetty, which has an existing consent. The applicant is not making application to upgrade the structure in any way. Should the proposed jetty in Lot 18 be granted, any future applications to extend this existing jetty are unlikely to be supported by iwi as further. An extension is likely to cause over-development of Waipiro Bay and consequently impact coastal values and kaimoana beds

Any proposals to upgrade the dwellings require further consultation and detailed information supplied.

25.6 Summary

The Lot has been developed for numerous years and no information has been supplied to verify how the site will be developed, if any. The following information must be identified

- Full details of how stormwater correction and access driveways and road network will be achieved, including the intended drainage pipes and other systems, where they will be installed, how much earthworks will be required and any other information relevant to achieving the construction.

- Identifying the location for the effluent disposal drip irrigation field

25.7 Recommendations

The site is obviously viable in its current form. Any new proposed development will require consultation. We recommend:

- A 30metre setback is established from MHWS to avoid contact of the foreshore area where koiwi are possibly buried. Provisions for the management of this area must also be placed in the proposed Management Plan

- Should any new developments be proposed, full details of how stormwater and effluent disposal constructions, if any, will be conducted requires further discussion and information prior to the works being authorised. No drip fields should be located within the 30 metre setback area or within the proximity of the stormwater runoff drainage points

- The following information should be fixed to the new certificate of title

  - all construction subject to Management Plan
  - archaeological site Q05/337
  - area of Maori cultural values
  - restricted 30metre building setback from MHWS
  - no further subdivision of lot may occur
  - no jetty upgrades to occur
  - no boat ramps to occur

26. Lot 18 - Proposed Boat Shed, Accommodation, Implement Shed and Recreational Facility

The application seeks consent to erect a boat shed, accommodation and recreational facility within the coastal area adjacent the existing jetty. The applicant proposes to convert the existing woolshed and shearers' quarters to achieve this. Originally, it was proposed to raise the foundations of the buildings but the applicant has since proposed a change whereby they now intend to lower the existing woolshed to achieve a better entry at ground level.

We also viewed the boat shed structure as a visually impacting development which would have negatively impacted cultural and environmental values due to the amount of earthworks that are required to accommodate the building. In particular, significant removal earth at the base of Huirangi Pa would be required to achieve the

desired area for the construction. Again, the applicant has since amended the proposal by removing the boat shed development from this area entirely and relocating them to the area on Lot 18 where the nursery is currently located. We fully support this

Land use consent is also sought for an implement shed which, is proposed for erection adjacent the location identified as the caretakers cottage within this lot. Other than a basic drawing of the building and a basic engineer assessment of the buildable area for the 'caretakers cottage', no detailed information is available particularly pertaining to the site proposed for the implement shed. The engineer also recommends stormwater to be piped to adjacent watercourse, which requires further investigation.

26.1 Summary

The amendments as to the proposed boat sheds are complimentary on all counts. Potential impacts to cultural, historical, archaeological, environmental and visual values are significantly reduced. Further information is required for this development, although this may not be disclosed until building consent application.

The implement shed however is not supported and requires further information prior to subdivision consent being granted.

26.2 Recommendations

We support the amended proposal for the boat shed, accommodation and recreational facility but require further information for stormwater correction, road/driveway access, effluent disposal and hazardous goods storage, if any is proposed, prior to construction.

We do not support the proposed location for the implement shed as further information is required to prove the site viable for the development.

27. OTHER DEVELOPMENT MATTERS

27.1 Public Access Matters

Public access is a matter of concern to tangata whenua. Recently the Government confiscated the entire foreshore estate from tangata whenua and placed it in public ownership. The Foreshore and Seabed Act has since been established offering 'assurance to all New Zealanders that access to New Zealand's beaches will be protected. Furthermore, the Resource Management and Electricity Act will be amended to accommodate the changes.

These matters aside, we acknowledge the high public use of the beaches within the Bay of Islands. The District Plan provisions 12.10.13 'Access to Waterbodies' takes into consideration

> *"whether the subdivision provides public access to the coastal marine area or to lakes or rivers, and whether that access is appropriate, given the nature of the land subject to the subdivision process, and the sensitivity of the waterbody to environmental effects resulting from the use of that access by the public"*

27.2 Summary

Public access is, a matter of importance to tangata whenua and of course the general public. We not only use the coastal area for customary purposes but the public, also visit the coastline for one reason or another.

Providing public access across land to beaches may compromise archaeological sites. Our discussions with the applicant identified an area within one bay located in lot 11 which, could be set aside for public use. Discussions have been held to assess the possibility of setting aside a grass area for the public to enjoy. This area however, will only be accessible via boat and possibly at low tide by foot

27.3 Recommendations

We strongly recommend an area upon Lot 11 adjacent a small beach to the east of the lot is set aside for use and enjoyment by the public. This area is also situated away from other areas on the property which contain cultural values. The following recommendations should be endorsed:

- Council should accept this proposal to provide public access
- The applicant should fence an appropriate area upon lot 11 to provide adequate room for public users to picnic and rest
- A fixture to the certificate of title for Lot 11 should state the area which has been set aside for public use

28. Coastal Permits

The proposed coastal development is a matter of interest. Several concerns arose with regard to negative impacts to cultural values. In particular, Waipiro Bay contains pipi and oyster beds where tangata whenua collect kaimoana for both personal and customary purposes.

Waipiro Bay is a designated Marine 4 area. This alone, contributes contamination factors associated with moored boats. The proposed jetty is likely to further contribute negatively.

However, our discussions with the applicant identified other factors, which should be considered. They are:

1. The applicant proposes a 'communal' jetty and boat ramp facility for use by those who may purchase subdivided lots
2. Should the communal jetty and boat ramp be approved, the applicant proposes to restrict further development of jetties and boat ramps within the new lots by way of consent conditions. This information will also be fixed to the certificates of title for each lot

These factors present the possibility of reducing future impacts to the coastal marine environment. Restricting future jetty and boat ramp development along this coastal portion holds favourable merit.

We also raised issues about the overall length of the jetty, the number of pontoons and direction in which the jetty would be situated, directly out into Waipiro Bay. Again, the applicant provided us with the following reason.

3. The proposed length is to achieve successful depth for the reasonably large runabout boats that are likely to be berthed

4. The number of pontoons were to accommodate several boats at any one time and also allowed boats to be tied to the jetty in good order as the caretaker will have to take the boats in and out of the water one at a time.

5. The direction of the jetty is to achieve the desired water depth. For example, if the jetty direction were to point east, the desired water depth would be reduced and will result in the seabed being dredged to achieve successful depth. Dredging will have to be maintained and such routine could occur annually. The applicant does not support dredging thus the reason for the proposed jetty

There are arguments for and against the jetty proposal however after some consideration the long term benefits could be favourable in light that future developments will be banned. Favour can only be fully determined if Council actually restricted further development of jetties within the other bays by placing effective conditions on the consent. Furthermore, before we could support the development, we would seek firm conditions removing the consent holders right to appeal this condition as provided in sections 120 and 121 of the RMA, in perpetuity.

Other matters would also require consideration, for example, what action or process would Council initiate if the consent holder canceled the consent. Also, conditions restricting the establishment of fuel pumps, water tanks, sewage tank facilities and installation of electricity on the jetty would be required before we would support the proposal. These possible developments would increase negative impacts significantly

28.1 Proposed Moorings

The applicant has made application for 5 swing moorings in Waipiro Bay. At the time of reporting, no discussions have been held with the applicant addressing these matters. However, our view is such that in light of the significantly large jetty, should the jetty be granted we would recommend the moorings be declined.

In this regard, future opportunities to apply for moorings is still available to new Lot owners and each application can be made on a case by case basis. Several factors for moorings must be taken into consideration at the time of application. The factors are:

- Does the applicant reside full time in Waipiro Bay
- Why do they require a mooring
- Can their boat be removed from the water by trailer

Over development and crowding of the bay must be measured. The proposed coastal developments suggest quite a sophisticated establishment which provides jetty, boat ramp and boat shed for Lot owner's convenience. We assume the residents of this property will have access to sufficient machinery required to haul boats from the water as they must be transported a distance to the boat sheds

28.2 Boat Ramp

The proposal was not supported as it is seen as un-necessary over development of the foreshore. The community currently launches boats from Te Uenga Bay, approximately 2 kms from Bentzen Farms.

The applicant advises that they propose to achieve a boat ramp which, will sit below the existing foreshore level, not above ground level as standard ramp structures do. This information has bought new dimensions to the proposal.

28.3 Summary

Tight timeframes have not provided sufficient opportunity for the jetty and boat ramp options to be fully explored although there may be benefits in investigating this further

28.4 Recommendations

The developments are neither supported nor opposed but further investigations should be conducted to identify possible options, consent conditions, design options and relevant details to establish the structures, is recommended. Should Council grant consent for the jetty development we would recommend the following conditions:

- Council prohibit the future erection of jetties and boat ramps along the coast of all new lots by way of condition on the consent
- A condition is fixed to the consent prohibiting the future establishment of fuel pump, water, sewage and electricity installations on the jetty
- Council also prohibit any right to appeal consent conditions as provided in section 120 and 121 of the RMA and any other sections relevant to such, by fixing a permanent condition to the consent
- The moorings application is declined

29. Retrospective Consents

Landuse consents from FNDC for earthworks and retaining wall work previous carried out on the property are sought, as are landuse and water diversion and discharge consents from NRC. Previous earthworks has, compromised environmental and cultural values. Some were supported by tangata whenua. However, the actual amount of earth removed from specific sites was not and would never have been supported by tangata whenua.

29.1 Summary

We take a strong stand against the issuing of retrospective consents. Resource Consent must be obtained prior to all developments to enable proposals to be measured against the Resource Management Act and the District Plan to ensure environmental and cultural values are not adversely impacted.

Issuing resource consent for an activity 'after' the works have been completed poses serious threat to sustaining a quality environment. Worse still is granting retrospective consent without penalty. The Resource Management Act clearly sets

out the nature in which penalties should be applied however local authorities rarely embark on this process. Retrospective consent processing leaves little hope for Maori and New Zealanders for that matter, that the principles of the RMA can and will be upheld by local authorities. Granting retrospective consent only encourages developers to abuse a weakness in the system as it increases their chances of obtaining resource consent, especially if the nature of the development is controversial.

29.2 Recommendations

We do not support the application for retrospective consents and recommend the following:

- The application for retrospective consents is declined in whole

30. Restoration of Logging Head Platform

The logging head platform is a matter for urgent attention. Significant amounts of unauthorised earthworks to this site resulted in the 'mining' of a Maunga. As stated above, the destruction is controversial. Several site inspections have been conducted by tangata whenua to assess the extent of damage.

Site meetings with NRC and FNDC staff identified that mitigation was required. Further to these discussions, whilst we realise the Maunga cannot be restored to its original state we expressed to the applicant our desire to re-construct the site to achieve something similar. A plan was developed along with associated timeframes. Unfortunately, the plan was never submitted to Council for consent. Some time later, it was lodged as part of the subdivision consent.

30.1 Summary

Recently, we met with the applicant to address this matter. We expressed our desire for Bentzen Farms Ltd to split the subdivision application to enable the Log Head Restoration to be restored prior to the subdivision application. Splitting the application would also have given us greater time in which to complete a cultural assessment for the subdivision proposal. This recommendation however was reported to be difficult and so processing the two together progressed

30.2 Recommendations

The following recommendations are sought

- The logging head platform be granted for restoration as soon as possible
- All fill required to complete the restoration is should be imported to the site
- Should Council decline resource consent for the subdivision, we urge Council to separate the logging head proposal and grant consent this activity as an individual proposal for initiation as soon as possible
- A plan to manage and monitor the works is developed prior construction. Tangata whenua to be consulted prior to any development

31. CONCLUSION

Proving the viability for the development of some of the proposed building and curtilage areas cannot be determined at this time due to insufficient information. The applicant proposes to modify archaeological sites and impact cultural values within some of the buildable and curtilage areas but is unable to provide the exact details as to extent of such modifications.

Whilst we are not opposed to some development of the property or possible subdivision of the blocks we conclude that without this vital information we are unable to support the application in its current form. However, ongoing discussions with the applicant, is required to further assess the proposed developments with the aim of seeking resolve.

Also, the timeframes in which we were given to provide advice and conduct a cultural assessment has been extremely tight. In this regard, in depth discussions and opportunities to explore ideas and options further were not forthcoming. Ideally, this would have been preferable and may well have substantiated the development of some Lots.

Unfortunately, our assessment is incomplete but we hope it provides some clarity of the matters of importance to tangata whenua and the values which, we aim to protect and preserve

The property is unique in so far as it contains a number of key cultural elements which, is not commonly found throughout the Bay of Islands. Most properties have already undergone extensive subdivision and development and historic and cultural values either destroyed or significantly devalued.

We urge the applicant to seek and forward the information required to enable the completion of this assessment. Should the information not be forthcoming, we urge Councils to give serious consideration to the matters identified in this report and seek favourable support of our recommendations

32. SUMMARY OF RECOMMENDATIONS

1. NZHPT – Section 12 Application to Modify Archaeological Sites

- That the application is declined

2. Should NZHPT grant an authority the following conditions are recommended

(a) The Revised Management Plan inclusive of Iwi amendments is endorsed

(b) No developments may occur until a development plan is identified and unanimously agreed to by the iwi and hapu parties

(c) During the planning process of the development plan, the parties should first identify the full nature and extent of the proposed developments, attempt to redesign the curtilage and buildable areas within each Lot so that they do not impact archaeological features and develop a plan in which the constructions will conducted

(d) The development plan upon completion is to be submitted to NZHPT prior to any developments for approval

(e) The plan must identify all proposed developments to which all relevant and supporting information must be supplied

(f) That perpetual heritage covenants are placed on Te Korowhiti and Huirangi Pa to protect and preserve the features for future generations

(g) That no developments whatsoever are carried out within the entire foreshore running between proposed Lots 1 – 11 and Lot 17 where koiwi are most likely buried and a 30metre setback from MHWS established restricting construction within this area, therefore being excluded from the authority

(h) That an adequate plan for the forest harvesting proposal is identified and unanimously agreed to by the iwi parties

(i) That swampy wetland areas within proposed Lots 2 and 18 where Maori Taonga are likely buried must not be disturbed in any way therefore being excluded from the authority

(j) That the applicant identifies two areas, one where koiwi can be re-interred if discovered and the other where archaeological material can be stored and that these areas are excluded from the authority

(k) That the applicant gives effect to the above conditions by allowing iwi to continue to provide input via protocols, procedures and rules of the proposed Management Plan and any Development Plans

(l) All earthworks are monitored by tangata whenua and at least 2 weeks notice is given prior to earthwork activity

(m) Should any taonga be discovered during any developments, all works are to cease immediately and tangata whenua contacted. Taonga must not be removed from their place of discovery

(n) All plans are submitted to NZHPT prior to any constructions

3. Resource Consent Applications

Overall, the subdivision proposal is neither supported nor opposed. Further information is required to enable a full cultural assessment. A summary follows:

3.1 Recommended Standard Consent Conditions

(a) That the conditions recommended for the NZHPT authority, a - n above, are affixed also to any resource consent

3.2 The following activities are opposed

(a) All retrospective applications

(b) 5 Moorings

3.3 The following activities are supported

(a) Establishment of a Public use area in Lot 11

(b) Establishment of protection covenants on both Te Korowhiti and Huirangi Pa

(c) Establishment of designated areas for an urupa and archaeological material depository

(d) Establishment of a 30metre setback from MHWS along every proposed coastal Lot

(e) Relocation of Boat shed facilities away from the coastal area

(f) Reducing the height of the proposed accommodation and recreation facility in Lot 18

(g) Restoration of the logging head platform

(h) Proposed Revised Management Plan including Iwi amendments is endorsed

3.4 The following activities require further information and discussion

(a) Designation of Lots, buildable and curtilage areas and boundaries

(b) Extent of earthworks for internal Road upgrade, including forestry activities and driveway access to each Lot

(c) Extent of earthworks for stormwater correction and stormwater design specifications and estimated water flows to foreshore areas

(d) Designation of effluent drip irrigation systems for each Lot

(e) Extent of retaining wall and gabion structures and locations and estimated earthworks

(f) Nature and extent of landscaping including estimated earthworks

3.5 The following activities require consideration and measure

(a) Proposed jetty and boatramp in exchange for title fixtures prohibiting further structures

(b) Extra Lots in exchange for title fixtures prohibiting further subdivision

(c) Covenants and other protection mechanisms in perpetuity

Statement of Evidence of Fraser James Colegrave, Economist, Auckland

INTRODUCTION

Qualifications & Experience

1 My name is Fraser James Colegrave.

2 I am an economic consultant and the managing director of Insight Economics, a boutique economic consultancy that I founded in 2013. Prior to that, I was the founding director of another economic consultancy, Covec Limited, for 12 years.

3 I hold a Bachelor of Commerce (1st-class honours) in economics from the University of Auckland, where I received numerous prizes and scholarships for academic excellence.

4 I have worked as an economic consultant for 25 years, successfully leading more than 600 projects across a wide range of sectors. My main areas of expertise are resource management, market supply and demand analysis, property development, and local infrastructure funding. I have undertaken extensive work in these areas for many of New Zealand's largest organisations.

5 Current and recent clients include: Argosy Property, Auckland Council, Calder Stewart, Crown Infrastructure Partners, Far North District Council, Fletcher Building, Foodstuffs, Fulton Hogan, Hamilton City Council, Harvey Norman, Kāinga Ora, Kiwi Property, Kmart, Mike Greer Homes, Neil Group, Ngai Tahu, NZ Productivity Commission, Orams Marine, Sanderson, Skyline, Templeton Group, Tramco, Universal Homes, and Woolworths NZ.

6 I also have recent experience that is directly relevant to these proceedings. For example, in 2022 I assessed the likely future supply and demand for marina berths in Auckland as part of a complex resource consent process. Last year, I helped Orams Marine assess the likely supply/demand for marine-related office spaces on its land. Currently, I am working on a detailed submission to FNDC's Proposed District Plan and therefore have a good understanding of the district and regional economies.

7 More generally, I have presented expert evidence on a wide range of economic matters at more than 120 hearings before Councils, Boards of Inquiry, Independent Hearing Panels, the Land Valuation Tribunal, the Environmental Protection Agency, the Environment Court, the Family Court and the High Court.

Code of conduct

8 Although these proceedings are not before the Environment Court, I have read the Code of Conduct for Expert Witnesses in the Environment Court Practice Note (2023), and I agree to comply with it as if these proceedings were before the Court. My qualifications as an expert are set out above. This evidence is within my area of expertise, except where I state that I am relying upon the specified evidence of another person. I have not omitted to consider material facts known to me that might alter or detract from the opinions expressed.

My Involvement

9 I was engaged to peer review the economic report accompanying the referral application (the **report**) for the proposed marina development (the **proposal**) under the Fast Track Approvals Act 2024 (the **Act**).

Scope and Structure of this Evidence

10 The remainder of this evidence examines the methodology, inputs, assumptions, and conclusions in the report to help determine if the proposal is likely to provide regionally or nationally significant economic benefits.

11 Specifically, this evidence addresses the following key issues arising from the report:

11.1 The need/demand for the proposal;

11.2 The one-time economic impacts of marina construction;

11.3 The ongoing economic impacts of marina operations;

11.4 Consistency with strategies and plans; and

11.5 Unquantified economic benefits.

EXECUTIVE SUMMARY

12 This evidence presents a detailed peer review of the economic report (**the report**) supporting the proposed Waipiro Bay marina development (**the proposal**) to see, based on the report's contents, whether the proposal is likely to generate regionally or nationally significant economic benefits.

13 Having carefully examined the report's methodology, inputs, assumptions, and conclusions, I consider the economic case underpinning the proposal to be fundamentally flawed.

14 First, the report adopts a three-layer catchment to estimate future berth demand, but admits that half of prospective berth owners are likely to live elsewhere. This directly undermines the theoretical foundations of the analysis and renders it of no real use. Not only that, but the core (primary and sceondary) catchments identified for the proposed marina do not even overlap the market of which it supposedly forms part.

15 Second, the primary and secondary catchments are also stagnant from a population growth perspective, with only 50 extra people living there between 2013 and 2023. Catchment household incomes are also 40% below the national average, which raises serious concerns about the financial means of locals to afford a marina berth, let alone a boat to keep there. For context, the report estimates that each berth/boat combination at the proposed new marina will be worth about $1 million.

16 Despite that, the report assumes that every 100 extra people living in the proposal's catchments will demand an extra marina berth. I strongly disagree for the financial reasons just identified, but I also note that the assumed rate of 1 berth per 100 people is four times the national average (in 2020), which itself had been steadily declining due to lower rates of boat ownership and usage per capita over time.

17 Third, the analysis disregards extensive capacity existing in nearby marinas, with 246 berths currently available (as at 5 May 2025) across Auckland and Northland. In addition, the report fails to account for the significantly cheaper option of mooring, which many prefer just on cost alone.

18 Fourth, the report relies on the experience of nearby marinas to assess likely demand and pricing for the proposal despite many significant differences between. For example, the two marinas relied on are far more accessible and urbanised, plus they benefit from extensive supporting structures and services that will not be replicated on the proposal site. e.g. haul-out facilities and boat repair businesses.

19 Demand issues aside, I also have significant concerns with the report's estimates of the proposal's one-time and ongoing economic impacts. The underlying workings lack transparency, and the results defy comparable benchmarks.

20 Despite that, the estimated employment and GDP impacts in the report still fall well below what could reasonably be considered regionally significant, with construction boosting regional employment by only 0.07% for two years, and GDP by only 0.14%.

21 I also query how much of the facility's construction would be completed by regional firms rather than the (generally) larger and more experienced Auckland-based firms. Similarly, there is no gaurantee that the materials required for construction will be sourced from the Northland region either, which further reduces potential impacts.

22 The proposal also does not appear particularly consistent with regional strategies, which instead seek to concentrate most future growth in and around the more accessible and established locations of Ōpua and Kerikeri.

23 Consequently, in my view, the economic report fails to demonstrate that the propsal will have regionally or nationally significant benefits.

NEED/DEMAND FOR THE PROPOSAL

Summary of Economic Report Approach & Findings

24 The economic report assesses the likely need/demand for the Waipiro marina proposal through a series of loosely interrelated steps, which proceed as follows:

24.1 Delineate three catchments for the nearby Ōpua marina using drive times of:

(a) 15 minutes for the **primary** catchment;

(b) 30 minutes for the **secondary** catchment; and

(c) Two hours minutes for the **tertiary** catchment.

24.2 Analyse Ōpua's catchment population growth by age group from 2013 to 2023;

24.3 Summarise its berth sizes, prices and estimated annual sell-down rate;

24.4 Provide additional context by briefly profiling the sizes, prices, and availability of berths at the more distant Kerikeri Cruising Club & Marina;

24.5 Delineate three catchments for the proposed new marina just like for Ōpua;

24.6 Summarise its population growth by age group from 2013 to 2023;

24.7 Derive ratios of existing berths per capita for the Far North District, and for Whangarei District;

24.8 Apply those ratios to projected population growth within the proposal's three catchments to estimate total growth in catchment berth demand;

24.9 Attribute a share to the proposal and estimate its annual uptake rate; then

24.10 Comment on likely berth sizes and achievable prices based on Ōpua marina.

25 Via this process, the report projects demand for an extra 310 berths within the proposal's three catchments over a 10-year period from 2023 to 2033. Then, without any real explanation or justification, it assumes that this implies market demand for 200 to 250 berths at Waipiro Bay, which are expected to sell rapidly at a rate of 40 to 50 berths per annum.

Overall Methodology

26 I acknowledge that the methodology used in the report resembles the approach sometimes used to assess the market for localised offerings like new retail stores.

27 However, as always, the quality and integrity of an analyses' outputs depends critically on how well the underlying methodology is implemented.

28 As discussed below, I consider the report's implementation of its own methodology to be fundamentally flawed, so I do not place any weight on its findings or conclusions.

29 Specifically, I reject the report's conclusion that the proposal will generate significant regional benefits during construction or operations, for the reasons set out below.

Catchments Adopted

30 As noted above, the report adopts a three-layer catchment for the proposal based on drive times of 15 minutes, 30 minutes, and two-hours, respectively.

31 In a typical supply and demand analysis, these catchments are intended to capture the geographic area from which most (if not all) of a business' customers originate.

32 And, due to greater proximity and hence convenience, those residing in the primary catchment are more likely to frequent a business than those in the secondary catchment, and similarly for those in the secondary catchment versus the tertiary.

33 Despite that, the report itself concedes that many prospective future purchasers of berths in the proposed marina are likely to come from outside these catchments.[1] While that is indeed likely to be the case, this statement completely invalidates the catchments delineated and renders the overall analysis of limited inferential value.

34 Not only that, but the proposed new marina is not even in the primary or secondary catchments of the "primary market for the Bay of Islands" which it allegedly forms part of. This can be seen in Figure 2 on page 7 of the report, where the marina is quite isolated and consequently falls outside the primary and secondary catchments of Bay of Island (**BOI**) marinas. i.e. as delineated in Figure 2 of the report.

35 Similarly, the two existing BOI marinas at Ōpua and Kerikeri are outside the primary and secondary catchments delineated for Waipiro Bay. This further confirms that the

[1] See section 4.1 on page 15

proposal does not address the same core market for marina berths in the BOI and instead serves a different market.

36 A 2014 study by the Northland Regional Council (**NRC**)[2] also demonstrates significant differences in the roles, functions, and markets for marinas in the far north. Specifically, it shows that Kerikeri mainly services the regional population, while Ōpua serves an equal mix of locals and visitors (mainly from Auckland). Conversely, moorings in the eastern BOI – where the proposal is located – almost exclusively serve visitors due to its remoteness and the proliferation of holiday homes. Consequently, all three largely serve different markets.

37 Table 1 elaborates by displaying the proportion of moorings and marina berths in each location estimated to be owned by regional households versus visitors. Clearly, there are significant differences between the locations, with moorings in the Eastern BOI almost entirely providing for visitors, while those in the other two locations are owned mainly by locals/regional

Table 1: Estimated Ownership Rates by Regional Households

Location	Moorings	Berths
Kerikeri	72%	89%
Ōpua	55%	50%
Eastern BOI	16%	n/a

38 Commuting data just published for the 2023 census also shows that people living in the Eastern BOI seldom participate in the Ōpua and Kerikeri labour markets, which further confirms that the three areas serve different economic roles and functions.

39 Specifically, of the 432 people that worked in the Ōpua SA2 in 2023, only 2.1% commuted there from the Eastern BOI. Similarly, of the 2,814 people that worked in the Kerikeri Central SA2, only 0.3% commuted there from the Eastern BOI.

[2]Available here: https://www.nrc.govt.nz/media/4z0pcwya/mooringsandmarinasstrategyfinaljuly2014web.pdf

40 I therefore strongly disagree that the proposed marina at Waipiro Bay serves the same core market as existing marinas in Ōpua and Kerikeri, and hence that the latter can be used to benchmark the likely demand and pricing of the former.

41 In summary: I have significant concerns with the catchments delineated in the report. They are internally inconsistent, and they fail to capture the origin of at least half of expected future berth owners. In addition, they fail to materially overlap with the core market for BOI marinas, which the proposal allegedly forms part of.

Population & Demographic Analysis

42 The report devotes considerable time to analysing population growth rates and age distributions for the Ōpua marina, and for the proposed new one at Waipiro Bay. However, it is unclear exactly what purpose that information serves, and these tables appear to just "fill the page" but otherwise serve no obvious purpose.

43 That said, some interesting insights can be gleaned from this information. For example, Figure 14 of the report reveals very limited growth within the primary and secondary catchments of the proposed new marina over the past 10 years, with only an extra 30 people in the primary catchment over that time, and only 20 in the secondary. At the purported rate of one berth per 100 people, which I interrogate below, that equates to demand for only half an extra berth in the primary and secondary catchment over the last 10 years.

44 I also note that the primary catchment of the proposal comprises fewer than 1,000 people, which makes it a very small market for a 200 to 250 berth marina.

45 It is also unclear how many people residing in the proposal's supposed catchments would have the financial means to purchase a berth, let alone a boat.

46 Indeed, detailed census demography data show that the primary, secondary, and tertiary catchments identified for the proposed marina have significantly lower incomes than the national average. In fact, the median household income in the primary catchment was 40% lower than the national average in 2023 ($60k vs $102k).

47 It is therefore difficult to see how every additional 100 people residing in the three catchments would create demand for an additional marina berth, let alone the boat that they would supposedly keep there.

48 To elaborate, according to the economic report, the marina itself will have a market value of $80 to $100 million, and this will accommodate boats worth $150 million. Assuming 225 berths – which is the midpoint of the size range cited – this translates to about $1 million per berth/boat combination.

49 Frankly, I struggle to see how households living so far below the national average income level could afford this.

Assumed Penetration Rate & Proposal Market Share

50 Having delineated a set of catchments for the proposed new marina and then profiled their populations, the report next estimates the proportion that will likely demand an additional marina berth (which I refer to as the penetration rate).

51 Amongst other things, the report relies quite heavily on the recent experience and current situations at Ōpua and Kerikeri to justify its assumptions.

52 For example, page 12 of the report notes that there are no berths currently available at Kerikeri with potential for other marinas in the northland region to meet future demand. This appears to imply that the proposal could help meet any excess demand spilling over from Kerikeri.

53 While that may be true in theory, the proposal is quite far away. Indeed, despite being less than 20 kilometres in a straight line across the water, the proposal is about a 90-minute drive from Kerikeri. This is illustrated in the map below, which confirms that the proposal is too far away to service the same market as Kerikeri.

Figure 1: Driving Time/Distance from Kerikeri to Waipiro Bay

54 Similarly, Page 13 of the report analyses the composition and uptake of Ōpua Marina berths by stage. It states "given Ōpua Marina is considered to be the main competitor to the proposed Waipiro Marina, this provides valuable context for the proposed Waipiro Marina in terms of berth sizing and expected annual sales."

55 With respect, as already shown, the proposal falls outside the primary and secondary catchments for the BOI market – as delineated in the report itself – so it is not a direct competitor for Ōpua. By the same reasoning, it also follows that Ōpua's experience provides no relevant insights to the likely pricing and uptake of berths at the proposed site, especially given their different local characteristics, degrees of urbanisation and overall accessibility, plus their proximities to complementary goods and services.

56 For example, the proposal does not include any haul-out facilities or marine support services, so its users would have to travel to Ōpua to access those. As a result, the proposal will be less convenient and desirable than berths in Ōpua or Kerikeri.

57 In short, I do not consider Ōpua or Kerikeri to provide a reliable basis for estimating the likely prices, sizes, or uptake of berths at the proposed new marina.

58 With the scene set, page 17 of the report documents its calculations of berths per capita, which it then applies to growth in the catchment population to derive estimated 10-year growth in berth demand.

59 It notes that the existing ratio of berths per capita in the Far North and Whangarei is 1 per 100 compared to only 1 per 280 people in Auckland

60 Despite the report admitting that many prospective buyers live in Auckland – where the ratio of berths per capita is 2.8 times lower than Northland – the report instead adopts the much higher local rate (which is highly skewed by inter-regional flows).

61 With expected growth of 31,000 people in the proposal's three catchments over the 10-year period, the report estimates demand for an additional 310 marina berths over a 10-year period (i.e. at a rate of 1 per 100 extra people).

62 I consider this approach highly misleading for several reasons, including the catchment and population issues already identified. In addition to those, I consider the report's estimates of berth demand further invalidated by the following issues.

63 First, given that a large share of the proposal's berths was admitted to likely meet demand arising outside the catchments delineated in the report, a more generalised (i.e. national) rate of berth ownership should have been used, not the district average.

64 According to Figure 24 of the report, there are currently 13,320 marina berths in New Zealand, which service a population of approximately 5.2 million people. This translates to a national average berth ownership rate of only 0.25 per 100 people.

65 Applying this to the catchment's growth of 31,000 people would reduce the estimated growth in berth demand by 75%, slashing it from 310 (as per the report) to only 78.

66 Second, the use of point-in-time ownership ratios fails to capture important changes over time. A very recent article on the Boating NZ website provides useful insights,

noting that people are not only taking their boats out less often, but that they are also taking shorter average trips when they do venture out.[3]

67 Perhaps unsurprisingly, this trend is reflected in the reported number of yachts and launches owned per capita. This is illustrated in the table below, which I adapted from a recent report by marine industry specialists, Wardale consulting.[4] It plots the number of yachts and launches per capita in NZ from 2008 and 2020, from which I then derived the marginal (or change in) ownership rate over that period.

Table 2: Change in NZ Yacht & Launch Ownership Rates from 2008 to 2020

Year	NZ Population	Yachts/Launches	Rate per 100 People
2008	4,260,000	22,000	0.52
2020	5,100,000	24,150	0.47
Change	**840,000**	**2,150**	**0.26**

68 In short, the NZ rate of ownership for yachts and launches fell from 0.52 in 2008 to 0.47 in 2020 due to a sharp decline in the *marginal* rate of ownership, with only 0.26 additional boats being owned per 100 additional people.

69 Given that only some of these additional vessels will demand a marina berth, rather than a mooring, these trends are clearly important, but the report does not acknowledge or incorporate them. As a result, the economic report systematically overstates the likely future demand for the proposal.

70 As a cross-check, I note that the 2014 marina and moorings study by NRC also projects much lower growth in demand than the economic report reviewed herein. In fact, the NRC study projected demand for only 20 additional moorings in the entire Eastern BOI over a 20-year period, which translates to only one per annum. This is 40 to 50 times lower than the uptake rate proffered in the economic report for the proposed marina, where 200 to 250 berths were assumed to sell down in only three to four years.

[3] https://www.boatingnz.co.nz/2025/04/emerging-nuances-in-nz-boating-ownership-and-activity/

[4] https://hdp-au-prod-app-nels-shape-files.s3.ap-southeast-2.amazonaws.com/5216/5472/7426/Nelson_Marina__Supply_and_Demand_Analysis_26MAR2021.pdf

71 Third, while the report does briefly profile two nearby marinas, it otherwise fails to acknowledge that there is already a strong network of existing and emerging marinas that will compete for demand.

72 According to a quick skim of online sources, existing marinas in Northland and Auckland have nearly 250 empty berths available now for rent or purchase across multiple locations, prices. Table 3 provides further details. By ignoring these existing sources of competing supply, the economic report systematically overstates the market opportunity for the proposal. When proposed new marinas are also considered, the need for it diminishes further.[5]

Table 3: Berths Currently Available in Auckland & Northland (as at 1 May 2025)

Region	Marina	Berths Available (as @1 May 2025)
Northland (51 berths)	Bay of Islands Ōpua	24
	Kerikeri	0
	Whangaroa	3
	Port Nikau	2
	Kissing Point	3
	Dockland 5	2
	Tutukaka	14
	Port Nikau	2
	Marsden Cove	1
Auckland (195 berths)	Bayswater Marina	51
	Bucklands Beach Marina	0
	Gulf Harbour Marina	22
	Half Moon Bay Marina	12
	Hobsonville Marina	30
	OBC Marina	5
	Orakei Marina	12
	Pine Harbour Marina	22
	Sandspit Yacht Club Marina	1
	Viaduct Basin Marina	2
	Viaduct Marina	0
	Waiheke Marina	15
	Westhaven Marina	23
Total		**246**

73 Fourth, related to the previous point, the report also overlooks the fact that many new owners of yachts and launches will choose to simply moor them, not occupy a

[5] See, for example, https://environment.govt.nz/assets/what-government-is-doing/Fast-Track-Unlisted/Hobbs-Bay-Marina/216.09-FTA216-Hobbs-Bay-Marina-Project-Sch-2A-MfE-assessment-form-Stage-1_Redacted.pdf

marina berth. Given the massive price differential between these two options, moors will likely remain preferred for many New Zealanders well into the foreseeable future.

74 Finally, I note that if there truly is a demand for additional marina berths to meet local growth in demand, the best places to meet it are Kerikeri and Ōpua, which are far more accessible and have existing industry networks to service and support them.

75 In summary: I strongly reject the report's analysis of the need/demand for the proposal. The methodology is internally inconsistent with respect to the geographic market served, and the assumptions used do not reflect trends in ownership over time. In addition, the report fails to acknowledge competition from other marinas and from the much cheaper option of mooring. Overall, I place no weight on the report's conclusions about the need/demand for the proposed new marina.

ONE-TIME DEVELOPMENT IMPACTS

76 Page 21 of the report presents the proposal's estimated one-time impacts from development, where employment will supposedly be provided for 89 FTE-years, and regional GDP boosted by $14.4 million. So, for example, if construction is spread over two years, there will be full time employment for 45 people, with more than $7 million added to regional GDP each year.

77 Notwithstanding the fact that these figures are quite small and thus highly unlikely to be regionally significant, I also note that their realisation depends on attracting enough demand for the project to be financially viable. Given NRC's projection of only one additional berth per annum for the entire eastern BOI, it seems highly unlikely that there would be enough demand to support the project, so there is (arguably) only a slim chance that it would proceed in any case

78 Even if the project did proceed, the estimated impacts are not regionally significant, in my view. For example, official data from Statistics New Zealand show that the region employed 68,300 people in 2024 and generated more than $10 billion of GDP. Given those figures, and assuming the economic report's estimates of one-time impacts are correct, the proposal would boost regional:

78.1 Employment by only 0.07% for two years; and

78.2 GDP by only 0.14% for two years.

79 In my view, and notwithstanding my comments above about the highly ambitious demand assumptions underpinning these estimated one-time impacts, they are not regionally significant.

80 To make matters worse, I also note that a lot of the labour required to complete the project could be recruited from outside the region, rather than all being sourced from within it as the economic report implicitly assumes. Indeed, the highly specialised construction firms capable of undertaking such work are more likely to reside in the much larger Auckland market, than in the Northland region.

81 Similarly, there is no guarantee that the materials required to build the marina would be sourced locally either, with a reasonable chance that they are instead sourced from larger markets like Auckland (or from overseas).

82 To the extent that construction is awarded to an Auckland-based firm and/or key materials sourced from outside the region, there may be little to no impact on the Northland region itself from the proposal's potential future development.

ONGOING IMPACTS

83 I also have significant doubts about the estimated ongoing economic impacts of the proposal's future operations. According to the report, a 200-berth marina would sustain 47 full-time jobs and generate $10.1 million of GDP annually, while a 250-berth marina would sustain 58 jobs and $12.7 million of GDP annually.

84 I have spent considerable time trying to understand and reverse engineer these calculations, as they are much higher than comparable marinas elsewhere. However, despite my best efforts, I was unable to decipher the calculations underpinning these reported ongoing impacts, and the logic applied in the report is unorthodox, to say the least.

85 The problem is that the economic report first estimates the GDP allegedly sustained annually by operations without any mention of the inputs or assumptions used. Then, it translates that into corresponding employment estimates based on very broad GDP per employee ratios for the overall marine sector of which marinas are only one very small part.

86 To better understand the likely impacts of the proposal if/when operational, I searched a range of online sources. This led me to a detailed 2023 analysis of the New Zealand marina industry, which revealed that the average New Zealand marina:[6]

86.1 Stores 269 vessels;

86.2 Turns over $2.6 million in revenue annually;

86.3 Employs 8.8 people; and

86.4 Pays $523,000 in annual wages/salaries.

87 Given that this data was gleaned from the actual operations of 58 New Zealand marinas in 2023, I consider its findings far more authoritative than the undocumented assumptions underpinning the economic report's impact estimates.

88 Accordingly, I strongly doubt that the proposal would provide ongoing employment for 47 to 58 people and generate more than $10 million of GDP annually, as the economic report claims.

89 The 2014 NRC study mentioned earlier also indicates much lower ongoing impacts from marina operations. In fact, it estimates that the ongoing operation of a 250-berth marina would be:[7]

89.1 Annual GDP of $1.2 million; and

[6] The full report appears to be pay-walled, but a two-page summary is available here https://static1.squarespace.com/static/5e9e6e9754bda967065b6643/t/673be5b8dc30b3319568cdd4/1731978695007/NZMOA_Industry_overview2pages.pdf

[7] The report presents estimates for a 1,000-berth marina, which I have scaled down to 250 berths here.

89.2 Full time employment for 18 people (including flow-on effects).

90 Quantitative impacts aside, I also consider that the economic report has not properly considered or acknowledged the highly seasonal nature of marina operations and hence their ongoing impacts.

91 Marinas are not year-round operations with stable demand from one month to the next. Instead, they experience peaks in summer, and troughs in winter. As a result, employment is highly seasonal, which undermines the ability of marinas to sustain permanent employment for locals. In my view, this seasonality is an important piece of the picture, but it is not adequately captured.

92 In summary: I seriously doubt the report's undocumented, quantitative impacts of the proposal's marina operations, which are several times higher than a recent industry study, and the 2014 NRC study. In addition, the report fails to consider the highly seasonal nature of such activity and its implications for economic outcomes.

CONSISTENCY WITH PLANS/STRATEGIES

93 In addition to critiquing the economic report's facts and figures, I also briefly considered whether the proposal is likely to be consistent with strategies and plans.

94 Despite being more than a decade old, the 2014 NRC study already mentioned appears to still be current, so I used that to assess the proposal's degree of alignment with relevant strategies and plans.

95 For context, the strategy was "prepared to inform Northland Regional Council's decision making about the way in which moorings and marinas are provided for in Northland over the next 20 years", so it is highly relevant here.

96 Unfortunately, however, the proposal does not appear to be consistent with this.

97 For example, when discussing how to best meet growth in the BOI, the NRC report states that "easily accessible locations like Ōpua and Kerikeri are expected to experience most – but not all – of the demand for associated mooring space."

98 The NRC report then goes on to state that its proposed approach is "to focus most of the mooring and marina growth for the Bay of Islands in the Ōpua area, to build on the existing infrastructure and to minimise sprawl into other areas." Consequently, "Ōpua will continue to be the maritime hub of the Bay of Islands."

99 On the flipside the strategy *does* identify a longer-term action to "investigate the potential demand for marina berths in Waipiro Bay to inform a Coastal Plan review in the late 2030s", which lends some support to the proposal.

100 However, even then and ignoring the much later timing envisaged in the strategy, Waipiro Bay is only one of three places identified for potential future marinas, with the other two being clustered around Kerikeri and thus forming a logical extension of the existing marina there.

101 Overall, I do not consider the proposal to be well-aligned with strategies and plans.

UNQUANTIFIED ECONOMIC BENEFITS

102 Finally, I considered whether the proposal may generate significant economic benefits that are not explicitly quantified in the report.

103 The short answer is "No, it will not."

104 For example, the report states that the proposal will provide a new boat ramp nearby. While that may be the case, there are already two there, and I understand that these are only at capacity for about eight weeks per year. Accordingly, any benefits will be limited to only that period.

105 Further, section 7.1 of the reports says that the proposal will be regionally significant because it will alleviate existing supply shortages as reflected in the current prices of Marina berths and Ōpua. However, the report also shows that there were 33 berths available at the time of its writing, so this is logically inconsistent.

106 Similarly, section 7.2 says that the proposed marina will make a significant contribution towards supporting the ongoing growth of local tourism, but this is pure conjecture and, in my view, is highly unlikely for the various reasons set out above.

SUMMARY AND CONCLUSION

107 In my view, the economic report does not demonstrate a credible case for significant regional or national economic benefits. Its demand analysis is speculative and flawed, its assumptions unrealistic, and its conclusions unsupported by robust data.

108 The estimated impacts during both construction and operation are also only modest at best. Even if fully realised, they would not meaningfully move the needle on regional jobs or GDP, and certainly not in a way that could be deemed significant.

109 The proposal also appears to run counter to established regional strategies, which focus on consolidating marine development around more central, better-served hubs.

110 The notion that this project could address capacity constraints and meaningfully support local tourism is not well made and is also undermined by the current availability of nearly 250 berths across Auckland and Northland.

111 As such, in my view, the application fails to meet the key economic threshold for referral under the Fast-track Approvals Act 2024.

Re: Opposing Fast Tracking of approval for Waipiro Bay Marina Development
Bay of Islands

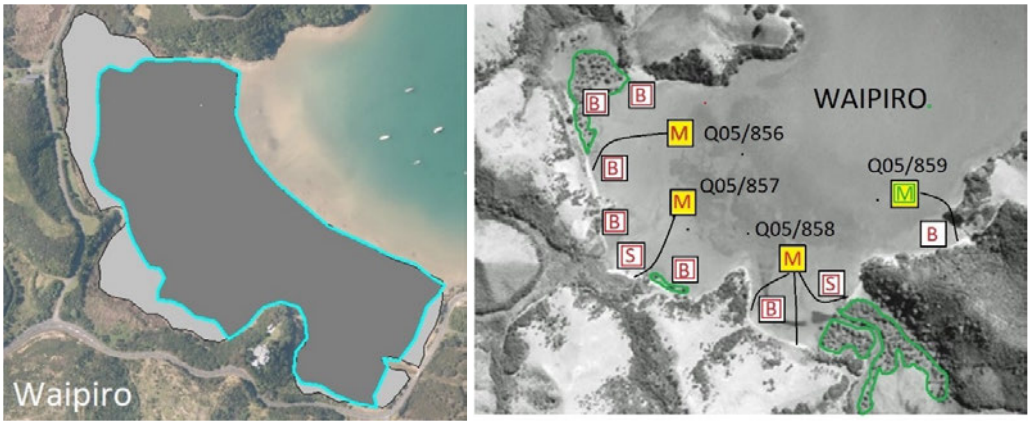

Tena koe e te Minita,

I am a qualified marine ecologist with a PhD, and have published widely on the nature of, and changes over time in, the ecology of the waters of the Bay of Islands.

This submission is in opposition to any Fast Tracking of the proposed marina at Waipiro Bay in the eastern Bay of Islands.

Key ecological/archaeological concerns around construction of the marina include the following.

- Waipiro Bay contains a significant harvestable cockle bed similar in extent to nearby Whiorau;
- The bay contains vulnerable pre-Contact Māori middens and living sites;
- Similarly, rare uppershore 'chenier-like' spits at points of water inflow – one already highly modified – will almost certainly become ecologically defunct;
- The small tidal estuary at the bridge in the southeastern corner is an easily-accessed, relatively-intact mangrove microcosm at risk;
- Loss of natural habitat for native fish, and birds and other animals;
- Invasive species such as Mediterranean fan worm and Eudistoma (white jelly droplets) thrive in marinas.

Waipiro Bay's cockle bed in 2018 (dark grey, left), and chenier spits (S), beaches (B) and archaeological sites (yellow boxes) over the 1951 image before the road existed (right).
(Source: Booth et al. 2024: New Zealand Journal of Marine and Freshwater Research, DOI: 10.1080/00288330.2023.2298913).

Broader issues

But there are broader issues to consider too when it comes to building a large marina, including the following.

- Reduction in natural flushing, potentially leading to eutrophication;
- Release of toxins from boats, and during dredging;
- Roads are narrow and windy with poor surfaces which are not well-maintained. Increased traffic will further burden these roads, with accidents more likely;
- More boats will increase the pressure on the already-crowded natural environment of Ipipiri, particularly during the summer peak. Species particularly affected by boat traffic are marine mammals, especially the bottle-nosed dolphins.
- The effective 'privatisation' of a major portion of Waipiro Bay benefits just one or two shareholders – and the rest of the community is forced to suck it.

In summary

The scale of the proposed development is inappropriate and unnecessary, particularly given the location. There are many negative ecological and societal implications of it going ahead. Allowing forfeiture of much of Waipiro Bay into private hands for personal profit is not worthy of any government.

Protect Waipiro Bay: Do not fast-track approve the proposed 200–250 Berth Marina

To: Ministry for the Environment, MPI, DOC, NRC, FNDC, MBIE, The NZ Government

We call upon the responsible Ministries and their respective Ministers to decline Application FTA229 and refer it to the standard Resource Management Act (RMA) consent process, where robust environmental assessment, public participation, and mana whenua engagement are properly upheld.

Submitted on 3 May 2024, the application to build a 250-berth marina is fundamentally flawed and fails to meet key eligibility criteria required for referral and approval through the Fast-Track process. It also breaches legal, environmental, and cultural requirements under both the Fast-Track Approvals Act and the Resource Management Act (RMA).

It further ignores matters critical to our community, our vulnerable environment, our cultural landscapes and our way of life in the Eastern Bay of Islands.

The proposed Waipiro Bay Marina development is based on a flawed and misleading economic assessment. The application inflates projected demand and misrepresents existing data. Currently, Northland is home to nine marinas with a combined total of 1,575 berths. An additional marina is under construction in Whangārei, which will initially provide space for 117 vessels, with spaces still available. Also, according to NRC data, 46 berths are currently vacant and available across Northland, including 20 at the nearby Ōpua Marina-just a 49–56-minute drive from Waipiro Bay. Many of these berths remain vacant throughout the year and are being offered at discounted rates due to persistently lower demand than previously anticipated, which is a clear regional trend the proposal fails to acknowledge.

In addition to marina availability, Waipiro Bay already accommodates 62 moorings, with neighbouring Parekura Bay holding a further 69. These have been introduced incrementally over time, allowing the local community and natural environment to adapt without overwhelming visual or ecological disruption.

By contrast, the proposed 250-berth marina would nearly triple the current number of vessels in the area—from 131 to 381—an increase of over 80%. This would result in a sudden and dramatic escalation in boat traffic and density, significantly altering the visual landscape and placing immense pressure on the marine ecosystem. The adverse environmental consequences—particularly to biodiversity, water quality, and the ecological balance of the inlet—would be immediate and long-lasting.

Critically, the application also bypasses public consultation, Māori landowners of whenua Māori around the proposed development site and inlet, denying local residents and mana whenua the opportunity to meaningfully participate in decisions about the future of this coastal taonga. It disregards Māori rights and interests protected under Section 7 of the Fast-Track Approvals Act, including obligations relating to Treaty settlements and recognised customary rights.

Furthermore, the proposal fails to meet the criteria outlined in Section 22 of the Fast-Track referral criteria of the Act, which require projects to demonstrate clear and significant national or regional benefits and alignment with strategic priorities, such as support for primary industries (Section 22 (2) (v)). Notably, the proposed marina site is located within an aquaculture exclusion zone—where aquaculture operations are not permitted—placing it in direct conflict with established regional planning provisions.

We call for this proposal to be declined under the Fast-Track process and instead referred to the standard Resource Management Act (RMA) consent pathway, where robust environmental scrutiny, public participation, and mana whenua engagement are guaranteed.

The proposed development does not address local iwi and hapū concerns and does not consider the potential impacts on local hapū and Iwi in accordance with the Marine and Coastal Area (Takutai Moana) Act (MACA).

If Application FTA229 is referred by the Minister to an expert panel under Schedule 2 of the Fast-Track Approvals Act and subsequently approved, the Government risks breaching multiple legal and constitutional obligations. These include statutory duties under the Resource Management Act, particularly those relating to environmental protections, planning consistency, and public participation (Section 6 (a, b, e & f), Sections 12 & 17). It would also contravene key provisions of the Fast-Track Approvals Act itself—specifically Section 7, which upholds Māori rights, Treaty settlements, and recognised customary interests, and Section 22, which requires that projects demonstrate clear, significant, and regionally or nationally beneficial outcomes aligned with strategic priorities. Furthermore, proceeding with this application in its current form would be

inconsistent with the principles of Te Tiriti o Waitangi, including active partnership, meaningful participation, and protection of our taonga. It would override existing regional planning instruments—such as aquaculture exclusion zones—without proper due process, setting a dangerous precedent for coastal development and undermining the integrity of New Zealand's environmental and planning framework.

What are some of the impacts of the proposed development?
Ultimately, this development must be stopped. A project of this scale—with serious cultural, ecological, and social implications—requires transparent, evidence-based decision-making that respects both the environment and the communities who call this place home.
The proposed marina would cause irreversible damage:
• To the Treaty partnership between the government, mana whenua and hapū
• Destroying areas of cultural harvest significance
• Eliminating native wildlife habitat, including that of high-risk species
• Altering the ecological and visual landscape of Waipiro Bay
• Privatising 9 hectares of public marine space
• Extinguishing customary food-gathering areas

Shockingly, the application lacks basic environmental assessments, including:
• An Ecological Survey
• A Hydrology Survey
• A Cultural Impact Assessment
• A robust Assessment of Environmental Effects (AEE)
• Robust community input and engagement

Waipiro Bay is not just water—it is our taonga, a source of identity, sustenance, and intergenerational connection. We cannot protect our culture, pataka kai, and wildlife without proper evidence and an inclusive process.
This development must return to the proper consent pathway, so the voices of the Bay of Islands are heard.
To our community: Let's stand together to protect our waters, kai sources, wildlife, and future. Sign the petition to stop this harmful development and safeguard Waipiro Bay for generations to come.

What is the proposal?
A local family with a commercial arm has proposed to build a 250+ berth marina. This marina is intended to service a wide range of vessel sizes. The proposal claims that the marina will benefit the public by:
• Reducing traffic at Te Uenga Boat Ramp
• Providing potential key utilities (note – these are already available at the Opua marina);
• Providing retail services.

In summary, the proposal appears to provide mere convenience for a small portion of the community and does not provide a significant benefit at a regional or national level.
What is required to approve Fast Track?
Under the Fast-Track Approvals Act, the following considerations are made when determining whether to approve fast track of a consent application:
• the project is an infrastructure or development project that would have significant regional or national benefits; and
• referring the project to the fast-track approvals process –
• would facilitate the project by enabling it to be processed in a timely and cost-effective manner; and
• is unlikely to materially affect the efficient operation of the fast-track approvals process.

In considering whether to refer the application to the fast-track approvals process, the relevant Minister must consider the following:
• Whether the project would be inconsistent with a Treaty settlement or a joint management agreement;
• whether it would be better dealt with under other legislation;

• whether the project has significant adverse effects on the environment;
• whether the project area includes land that is considered necessary for a Treaty settlement process.

Because Waipiro Bay is more than just a piece of coastline—it’s part of who we are.
Here’s why it matters:
• Waipiro Bay is a taonga, home to rich marine life, cultural traditions, and a close-knit community.
• The Eastern Bay of Islands have been kept free of large-scale commercial development to preserve its scenic beauty and natural value. Maintaining its natural integrity is the best long-term economic and ecological value to the public.
• The proposed marina would privatise public water, destroy customary food-gathering areas, and alter the bay forever.
• The application bypasses due process, silencing local voices, ignoring Māori rights, and skipping essential environmental protections.
• We have the evidence: demand for marina berths is low, and this project offers no proven regional or national benefit.
• The sharp rise in boat density will further strain the already over-saturated Eastern Bay of Islands.
• The economic benefits will go solely to the developers, with no meaningful revenue such as rates going to Council or the public. Instead, the marina will increase infrastructure costs, adding pressure to already limited Council resources.

Protect Waipiro Bay: Do not fast-track approve the proposed 200–250 Berth Marina

To: Ministry for the Environment, MPI, DOC, NRC, FNDC, MBIE, The NZ Government

We call upon the responsible Ministries and their respective Ministers to decline Application FTA229 and refer it to the standard Resource Management Act (RMA) consent process, where robust environmental assessment, public participation, and mana whenua engagement are properly upheld.

Submitted on 3 May 2024, the application to build a 250-berth marina is fundamentally flawed and fails to meet key eligibility criteria required for referral and approval through the Fast-Track process. It also breaches legal, environmental, and cultural requirements under both the Fast-Track Approvals Act and the Resource Management Act (RMA).

It further ignores matters critical to our community, our vulnerable environment, our cultural landscapes and our way of life in the Eastern Bay of Islands.

The proposed Waipiro Bay Marina development is based on a flawed and misleading economic assessment. The application inflates projected demand and misrepresents existing data. Currently, Northland is home to nine marinas with a combined total of 1,575 berths. An additional marina is under construction in Whangārei, which will initially provide space for 117 vessels, with spaces still available. Also, according to NRC data, 46 berths are currently vacant and available across Northland, including 20 at the nearby Ōpua Marina-just a 49–56-minute drive from Waipiro Bay. Many of these berths remain vacant throughout the year and are being offered at discounted rates due to persistently lower demand than previously anticipated, which is a clear regional trend the proposal fails to acknowledge.

In addition to marina availability, Waipiro Bay already accommodates 62 moorings, with neighbouring Parekura Bay holding a further 69. These have been introduced incrementally over time, allowing the local community and natural environment to adapt without overwhelming visual or ecological disruption.

By contrast, the proposed 250-berth marina would nearly triple the current number of vessels in the area—from 131 to 381—an increase of over 80%. This would result in a sudden and dramatic escalation in boat traffic and density, significantly altering the visual landscape and placing immense pressure on the marine ecosystem. The adverse environmental consequences—particularly to biodiversity, water quality, and the ecological balance of the inlet—would be immediate and long-lasting.

Critically, the application also bypasses public consultation, Māori landowners of whenua Māori around the proposed development site and inlet, denying local residents and mana whenua the opportunity to meaningfully participate in decisions about the future of this coastal taonga. It disregards Māori rights and interests protected under Section 7 of the Fast-Track Approvals Act, including obligations relating to Treaty settlements and recognised customary rights.

Furthermore, the proposal fails to meet the criteria outlined in Section 22 of the Fast-Track referral criteria of the Act, which require projects to demonstrate clear and significant national or regional benefits and alignment with strategic priorities, such as support for primary industries (Section 22 (2) (v)). Notably, the proposed marina site is located within an aquaculture exclusion zone—where aquaculture operations are not permitted—placing it in direct conflict with established regional planning provisions.

We call for this proposal to be declined under the Fast-Track process and instead referred to the standard Resource Management Act (RMA) consent pathway, where robust environmental scrutiny, public participation, and mana whenua engagement are guaranteed.

The proposed development does not address local iwi and hapū concerns and does not consider the potential impacts on local hapū and Iwi in accordance with the Marine and Coastal Area (Takutai Moana) Act (MACA).

If Application FTA229 is referred by the Minister to an expert panel under Schedule 2 of the Fast-Track Approvals Act and subsequently approved, the Government risks breaching multiple legal and constitutional obligations. These include statutory duties under the Resource Management Act, particularly those relating to environmental protections, planning consistency, and public participation (Section 6 (a, b, e & f), Sections 12 & 17). It would also contravene key provisions of the Fast-Track Approvals Act itself—specifically Section 7, which upholds Māori rights, Treaty settlements, and recognised customary interests, and Section 22, which requires that projects demonstrate clear, significant, and regionally or nationally beneficial outcomes aligned with strategic priorities. Furthermore, proceeding with this application in its current form would be

inconsistent with the principles of Te Tiriti o Waitangi, including active partnership, meaningful participation, and protection of our taonga. It would override existing regional planning instruments—such as aquaculture exclusion zones—without proper due process, setting a dangerous precedent for coastal development and undermining the integrity of New Zealand's environmental and planning framework.

What are some of the impacts of the proposed development?
Ultimately, this development must be stopped. A project of this scale—with serious cultural, ecological, and social implications—requires transparent, evidence-based decision-making that respects both the environment and the communities who call this place home.
The proposed marina would cause irreversible damage:
• To the Treaty partnership between the government, mana whenua and hapū
• Destroying areas of cultural harvest significance
• Eliminating native wildlife habitat, including that of high-risk species
• Altering the ecological and visual landscape of Waipiro Bay
• Privatising 9 hectares of public marine space
• Extinguishing customary food-gathering areas

Shockingly, the application lacks basic environmental assessments, including:
• An Ecological Survey
• A Hydrology Survey
• A Cultural Impact Assessment
• A robust Assessment of Environmental Effects (AEE)
• Robust community input and engagement

Waipiro Bay is not just water—it is our taonga, a source of identity, sustenance, and intergenerational connection. We cannot protect our culture, pataka kai, and wildlife without proper evidence and an inclusive process.
This development must return to the proper consent pathway, so the voices of the Bay of Islands are heard.
To our community: Let's stand together to protect our waters, kai sources, wildlife, and future. Sign the petition to stop this harmful development and safeguard Waipiro Bay for generations to come.

What is the proposal?
A local family with a commercial arm has proposed to build a 250+ berth marina. This marina is intended to service a wide range of vessel sizes. The proposal claims that the marina will benefit the public by:
• Reducing traffic at Te Uenga Boat Ramp
• Providing potential key utilities (note – these are already available at the Opua marina);
• Providing retail services.

In summary, the proposal appears to provide mere convenience for a small portion of the community and does not provide a significant benefit at a regional or national level.
What is required to approve Fast Track?
Under the Fast-Track Approvals Act, the following considerations are made when determining whether to approve fast track of a consent application:
• the project is an infrastructure or development project that would have significant regional or national benefits; and
• referring the project to the fast-track approvals process –
• would facilitate the project by enabling it to be processed in a timely and cost-effective manner; and
• is unlikely to materially affect the efficient operation of the fast-track approvals process.

In considering whether to refer the application to the fast-track approvals process, the relevant Minister must consider the following:
• Whether the project would be inconsistent with a Treaty settlement or a joint management agreement;
• whether it would be better dealt with under other legislation;

• whether the project has significant adverse effects on the environment;
• whether the project area includes land that is considered necessary for a Treaty settlement process.

Because Waipiro Bay is more than just a piece of coastline—it’s part of who we are.
Here’s why it matters:
• Waipiro Bay is a taonga, home to rich marine life, cultural traditions, and a close-knit community.
• The Eastern Bay of Islands have been kept free of large-scale commercial development to preserve its scenic beauty and natural value. Maintaining its natural integrity is the best long-term economic and ecological value to the public.
• The proposed marina would privatise public water, destroy customary food-gathering areas, and alter the bay forever.
• The application bypasses due process, silencing local voices, ignoring Māori rights, and skipping essential environmental protections.
• We have the evidence: demand for marina berths is low, and this project offers no proven regional or national benefit.
• The sharp rise in boat density will further strain the already over-saturated Eastern Bay of Islands.
• The economic benefits will go solely to the developers, with no meaningful revenue such as rates going to Council or the public. Instead, the marina will increase infrastructure costs, adding pressure to already limited Council resources.

322644328	Courtney	Addison	8040	This is a special place, and there is no need to fast track a major, and frankly unnecessary, development such as this. Should a marina eventually be built, it must only be after due process has been followed, including impact assessments from appropriately qualified people, and full and fair public consultation.

321839284	Lamorna	Ahitapu-Rogers	184	Te Rāwhiti is a rare and beautiful place, a peninsula of outstanding natural beauty, clear waters and abundant kaimoana. A huge marina is not right for our windy, narrow roads and our small communities. In Rāwhiti, our way of life is handed down from our tūpuna. This would destroy one of our four taonga pipi beds, with the health of all interconnected. It would worsen the caulerpa disaster. Protect our moana, protect our taiao, protect our people.

322115558	Rebecca	Jerram	1072	Expediting this kind of project continues the mindless and inequitable destruction of our natural heritage areas which is becoming synonymous with the current Coalition Government in my opinion. We all need to voice our outrage and opposition, to ensure that these ecological marine areas always remain in public hands for future generations.

322623542	Philippa	Lynch	7020	Fast Track legislation is by-passing controls needed to secure ecological, social and cultural values. It will produce bad outcomes. It makes sloppy law. It attempts to solve very complex issues with simple fixes - and will fail.

322601729	Michael	McIlvride	1050	Any proposed project put under Fast Track is inherently designed to ignore the voices of the people who will be most negatively impacted by the projects. These same people will also receive none of the benefits. All projects put forward under this process should be opposed on principle

322602987	Leanne	Munro	6012	Its too big, the risk of degradation to the marine environment would appear to be substantial, there are berths currently unoccupied elsewhere - and its in an area that is already a aquaculture exclusion zone. Plus, no consultation with local iwi - so wrong. If approved it appears to risk breaching multiple obligations the government has.

321993266	Awanui	Ririnui-Ryan	627	Pollution, sea trafficking is bad for the environment in these areas, with a marina installed that will add to the damage of our beautiful oceans. As tangata whenua we are already dealing with caulerpa, a seaweed that spread across the floor of the bays that kills all seafood, more boats coming through the poisonous seedweed will spread and kill more. SAY NO TO THE FASTTRACK BILL!

Summary

Hoppers Development and Azuma Property are proposing a 200+ berth for the head of Waipiro Bay in the relatively undeveloped eastern Bay of Islands. They are applying to the Minister of Infrastructure to use the new Fast Track Approvals process rather than the standard processes under the Resource Management Act.

The proposed development area includes subtidal, intertidal, vegetated and unvegetated tidal flats, including old and juvenile mangroves, salt marsh, and low, sparse seagrass. This is part of an ecological continuum that includes freshwater wetland and its fringing native shrubland and low forest (especially in the southwest).

The construction of the marina would require dredging of the marina footprint and probably an area around it, along with a route to the marina from deeper waters. The dredging would remove vegetation and other benthic cover for intertidal and subtidal habitats and infauna (fauna in marine sediments). This would remove wildlife habitats, including habitats probably used by some species listed as at-risk or threatened.[1]It would also remove the southwestern habitat continuum, which runs from subtidal flats to intertidal mangroves, salt marsh, freshwater wetland, shrubland, and low forest.

Approximately 40% of the marina footprint appears to be reclamation. This will probably use much of the dredged spoil, although it is unclear how much. National-level policy only supports reclamation in limited circumstances.[2] In this case, the reclamation would be for car parking and a building. Under the NZCPS, reclamations should not be permitted for either of these activities.[3]

There will be considerable noise during construction, including noise from pile driving and building activities. Once constructed, the marina's night lighting regime will likely be considerably altered from the present dark-sky regime. This anthropogenic lighting is likely to adversely affect some seabirds and other wildlife.

It is unlikely that construction could be permitted within an area covered by a Biosecurity Controlled Area Notice. As this notice prevents anchoring, fishing, and diving, it seems improbable that construction activities using heavy machinery would be allowed. Tiny fragments can spread the alien Caulerpa species, so preventing this during construction would not be possible, especially when machinery and material are being removed from the site.

Construction activities, especially dredging, would resuspend considerable amounts of fine sediment during the construction period and possibly when access channels need to be dredged in the future. This suspended fine sediment would settle onto any remaining intertidal and subtidal benthic surfaces. The limited areas of seagrass not destroyed directly by the construction would be unable to survive a regime where fine sedimentation increases and fine sediment reduces water clarity.

[1] For example, Australasian bittern and pāteke, which are listed in Robertson et al, 2021, Conservation status of birds in Aotearoa New Zealand 2021. https://www.doc.govt.nz/globalassets/documents/science-and-technical/nztcs36entire.pdf

[2] Department of Conservation 2010. New Zealand Coastal Policy Statement. Policy 9. https://web.archive.org/web/20240510065726/https://www.doc.govt.nz/globalassets/documents/conservation/marine-and-coastal/coastal-management/nz-coastal-policy-statement-2010.pdf

[3] See above

The Waipiro Bayhead ecological sequence meets three of the four criteria for ecological significance in the RPS for Northland.

To protect indigenous biodiversity in the coastal environment, NZCPS Policy 11 requires adverse effects to be avoided for Indigenous taxa listed as threatened or at-risk in the New Zealand Threat Classification System. Pāteke are "threatened—nationally increasing," so adverse effects on them and their habitat must be avoided. The vegetated intertidal vegetation in the Bayhead is mapped as a significant bird habitat for the Australasian Bittern in the Regional Policy Statement maps.[4] Australasian bitterns are classified as Threatened-Nationally- Critical in the New Zealand Threat Classification System. New Zealand coastal orcas and bottlenose dolphins are reported by marine mammal expert Ingrid Visser,[5] as using Waipiro Bay and adjoining localities. New Zealand coastal orcas (*Orcinus orca)* have a threatened-national critical status, while bottlenose dolphins (*Tursiops truncatus*) have a threatened–nationally endangered status.[6]

The Waipiro Bayhead subtidal, intertidal, and freshwater habitats, along with their fringing native vegetation, are of high natural character. NZCPS Policy 13 requires that significant adverse effects be avoided, and all other effects be avoided, remedied or mitigated. The proposal would essentially remove or otherwise destroy the high natural character of the subtidal and intertidal habitats.

The proposal

This proposal between Hoppers Developments (which builds marinas and other coastal developments) and Azuma Property is for a 200+ berth marina to be constructed at the head of Waipiro Bay in the eastern Bay of Islands. Little detail is available about what is proposed. Figure 1 is an artist's impression of the proposed marina once constructed. It shows the proposed marina extending at least 350m seaward from the western shore/bay head.

The proposed marina is shown to take up virtually all the Bay apart from a very narrow strip between a car park and the southern coast, and a slightly wider marina water accessway on the northern shore. The "reclamation" or harbour infilling for a large car parking area and a building looks to occupy about 40% of the site. The artist's impression does not show over 200 berths, so that may just be "artistic license", or it may be that the marina would extend further out into the Bay.

Much of the inner bay would likely be dredged for the marina, with the dredge spoil likely being used to create the land for the car parking and building. Given that the marina proposes to accommodate large boats, the dredging will likely extend to the west beyond the marina's footprint.

[4] There seems to be a small error mapping the significant bird habitat in the south-west of the Bayhead as the inshore wetland vegetation has been excluded from the mapped significant bird habitat.

Figure 1: An artist's impression of the proposed marina at Waipiro Bay, eastern Bay of Islands[7].

Methodology

I reviewed the documents provided by the applicant and undertook a site visit on 6 May 2025. Limited information about what is being proposed is available, with the artist's impression (Figure 1) being the primary guidance. The preliminary ecological assessment for the applicant was a high-level desktop assessment.

The site inspection was focused on an intertidal walk and assessment from just west of the road bridge along the southern and western shores of Waipiro Bay. Low tide times and tidal ranges were not favourable for inspecting the lower sections of the intertidal, so the inspection focused on just below mid-tide and above. The subtidal was not inspected because the Controlled Area Notice for the alien *Caulerpa brachypus* and *Caulerpa parviflora* (marine alga) prohibits diving and snorkelling in much of the south-eastern Bay of Islands, including all Parekura Bay.

The existing environment

Figure 2 shows the proposed marina's general location (red dot) within the southern part of Waipiro Bay in the eastern Bay of Islands.

[7] From: Azuma Property and Hoppers. 2025 January. New Bay of Islands Marina- Bay of Islands- Initial Discussion Document

The intertidal environment along the southern shore includes a narrow band of older, tall mangroves around mid-tide in soft sediment areas (mainly mud). Inshore of this are some juvenile mangroves, patches of low-density short seagrass (Zostera), and scattered glasswort (*Salicornia quinqueflora)* in the upper intertidal. While mud is the dominant substrate in the lower intertidal, sand, rock and cobbles form the substrate above mid-tide. Fish observed in the partially inundated intertidal included flounder and mullet. Birds observed in the intertidal area included white-faced heron, pied shag and paradise shelduck. Kingfisher nests were observed in a low cliff along the southern shore near the bayhead. In the southwestern corner of the Bay is the native coastal vine powhiwhi *(Ipomoea cairica*), which is widespread internationally but classified as at-risk, naturally uncommon in New Zealand, whose natural southern limit is Waitemata Harbour[8].

Figure 2: Waipiro Bay in the lower central section of the image, with a red dot showing the location of the head of the bay.

The head of the Bay has several small outlet streams flowing across intertidal flats. In the mid-tide area is a mangrove treeland (scattered trees, some very old). Groups of younger mangroves are near the shore and scattered patches of short, low-density seagrass are in the mid-upper intertidal. Close to the shore is a relatively narrow band of saltmarsh, dominated by oioi, *Juncus kraussii* and *Plagianthus divaricatus* (Photo 2). The intertidal flats that could be assessed had rock oysters, Pacific oysters, and cockles. No pipi were found, but their absence cannot be confirmed as we could not view low intertidal sites.

[8] https://www.nzpcn.org.nz/flora/species/ipomoea-cairica/

Several small streams flow through a freshwater wetland in the south-west section of the Bay (Photo 1). The wetland is dominated by raupo with flax and pampas in the canopy. Other scattered canopy plants include manuka and wheki. Its size is approximately 0.26ha[9]. Figure 3 illustrates the location of the freshwater wetland in the southwest of the Bay (teal blue colour) as shown in the Northland Regional Council Regional Coastal Plan.

Photo 1: Freshwater wetland (with summer green raupo dying back for winter) in the southwest, looking to mangroves

[9] Areas from: West, Anderson and van Winkel 2025. Preliminary ecological assessment of the proposed Waipiro Bay Marina. Prepared for Azuma Property

Photo 2 shows an area of juvenile mangroves with salt marsh behind (oioi).

Figure 3 shows the older mangroves in the head of the bay as part of a Significant Bird Area due to the presence of the Australasian bittern. The Significant Bird Area extends into a more extensive mangrove and saltmarsh area, as shown in Figure 4 (northwest Bayhead). The Australasian Bittern has a critical conservation status and a declining trend.[10]

[10] Robertson et al 2021 Conservation status of birds in Aotearoa New Zealand 2021. https://www.doc.govt.nz/globalassets/documents/science-and-technical/nztcs36entire.pdf

Figure 3: The location of the freshwater wetland in the southwest of the Bay (teal blue colour) and the significant bird area (orange) as shown in the Northland Regional Council Regional Coastal Plan.

Heading north in the bayhead, there is a small headland with a mixture of native (tall pohutukawa, kanuka and tutu (Coriaria arborea var arborea)) and alien species (pampas, cotoneaster and wild ginger).

The wetland in the northwest part of the bayhead has scattered old mangroves around mid-tide. Inshore are small mangroves with saltmarsh species further inshore (scattered *Juncus kraussii*, oioi (more abundant in the north), *Plagianthus divaricatus*) and glasswort inshore of the saltmarsh. The dryland is dominated by mown grass.

On the landward side of the Omarino Road, which comes within ten metres of the marine environment in this location, is a second freshwater wetland. This has a teal overlay in Figure 4. This freshwater wetland is a raupo dominant reedland with several ponds with low sedges in the shallows and small floating plants. Some *Carex secta* and flax are present. This wetland has several pāteke[11] and possibly bittern on a seasonal basis. It is relatively small at 0.65ha. Figure 5 shows that part of this wetland used to be a saltwater-influenced estuary rather than freshwater.

[11] Included in the annual pāteke count

Figure 4: The location of the freshwater wetland in the northwest of the Bay (teal blue colour) and the significant bird area (orange) as shown in the Northland Regional Council Regional Coastal Plan.

To the east of the northwest Bayhead tidal wetland, the area of vegetated intertidal flats decreases. The northern shore is dominated by hill slopes with a kanuka-dominated forest cover and some tree ferns and mahoe. Beyond the headland that appears to be the outer extent of the marina footprint are several large houses with long finger jetties.

Wildlife

The site inspection was not timed for optimal wildlife viewing, as this did not match the timing of low tide. Birds that might be present include those shown in Table 1, which is from the applicant's preliminary ecological assessment[12]. Of those listed species, pied shag was observed. Additional species observed included white-faced heron, kingfisher and paradise shelduck. Pāteke are known to be present[13]. Some species listed in Table 1 will likely use habitats affected by the proposed marina and its construction.

[12] West, Anderson and van Winkel 2025. Preliminary ecological assessment of the proposed Waipiro Bay Marina. Prepared for Azuma Property

[13] Included in the annual BOI pāteke counts

Table 1: Table of bird species that may occur within the proposed development area[14].

Species	Scientific Name	Threat Status	Habitat used	Habitat use
Banded rail Moho pererū	*Hypotaenidia philippensis*	At Risk-Declining	Mangrove/Wetland	Foraging, Roosting, Breeding
Australasian bittern Matuku-hūrepo	*Botaurus poiciloptilus*	Threatened – Nationally Critically	Predominantly freshwater wetlands, but may use salt marsh/mangroves	Foraging, Roosting
Brown teal Pāteke	*Anas chlorotis*	Threatened – Nationally Increasing	Intertidal, Mangroves	Foraging, Roosting
Caspian tern Taranui	*Hydroprogne caspia*	Threatened – Nationally Vulnerable	Subtidal	Foraging
Fernbird Mātātā	*Poodytes punctatus*	At Risk-Declining	Predominantly freshwater wetlands, but may use salt marsh/mangroves	Foraging, Breeding
Little penguin Kororā	*Eudyptula minor*	At Risk-Declining	Subtidal	Foraging
Little black shag Kawau tūī	*Phalacrocorax sulcirostris*	At Risk-Naturally Uncommon	Subtidal	Foraging
Little shag Kawaupaka	*Microcarbo melanoleucos*	At Risk - Relict	Subtidal	Foraging
New Zealand dotterel Tūturiwhatu	*Anarhynchus obscurus*	At Risk - Recovering	Intertidal	Foraging
Reef heron Matuku moana	*Egretta sacra*	Threatened - Nationally Endangered	Intertidal	Foraging
Pied shag Kāruhiruhi	*Phalacrocorax varius*	At Risk - Recovering	Subtidal	Foraging
Red-billed Gull Tarāpunga	*Chroicocephalus novaehollandiae*	At Risk-Declining	Intertidal	Foraging
Spotless crake Pūweto	*Zapornia tabuensis*	At Risk-Declining	Predominantly freshwater wetlands, but may use salt marsh/mangroves	
South Island pied oystercatcher Tōrea	*Haematopus finschi*	At Risk-Declining	Intertidal	Foraging
Variable oystercatcher Tōrea pango	*Haematopus unicolor*	At Risk - Recovering	Intertidal	Foraging,
White-fronted tern Tara	*Sterna striata*	At Risk - Recovering	Subtidal	Foraging

The preliminary ecological assessment discusses the potential for other types of wildlife to inhabit or use the area likely to be affected by the construction and use of the marina. I cannot provide additional information at this stage, except to clarify that (contrary to the preliminary assessment), seagrass is scattered throughout much of the intertidal area I assessed. This low-stature intertidal seagrass shows that the Waipiro Bayhead is possibly less disturbed than the wider Parekura Bay, which lost its 15 ha of seagrass many years ago. All the Waipiro Bay seagrass would likely be removed directly as part of the development or a change in sedimentation regimes caused by the development.

[14] Source: West, Anderson and van Winkel 2025. Preliminary ecological assessment of the proposed Waipiro Bay Marina. Prepared for Azuma Property

Fish, marine invertebrates and marine mammals

Fish, marine invertebrates, and marine mammals and their habitats could not be adequately assessed in the context of this proposal due to time and condition constraints, a lack of information about the proposal, and the Biosecurity Controlled Area Notice preventing anchoring, diving, fishing, and snorkelling. However, the proposal (in addition to the already discussed mid and upper intertidal habitats) likely includes low intertidal and shallow subtidal habitats. Furthermore, a larger area will likely be dredged to provide sufficiently deep-water access to and along the seaward edge of the proposed marina.

Cockles at and above mid-tide are relatively abundant and relatively small.[15]. We could not confirm their size at low tide level because of the tide times on the day of the site visit. Cockles are an important food for eagle rays, which are an important food for New Zealand populations of orcas.

New Zealand coastal orcas (Orcinus orca) have a threatened-national critical status, while bottlenose dolphins have a threatened–nationally endangered status.[16]

Natural character

I mapped high and outstanding natural character in the Regional Policy Statement for Northland in 2012-2013. This mapping was done at a regional scale and did not capture many local-scale variations, especially in the Bay of Islands.

Waipiro Bay/ Huirangi Inlet was not mapped as having a high natural character at the regional scale when the mapping was undertaken in 2012-2013. When assessed in 2025 at a more detailed scale, it would be appropriate to map the western continuum of shallow subtidal to intertidal flats (including mangroves and salt marsh) and adjoining freshwater wetlands and surrounding native shrubland and low forest as having a high natural character. The causeway in the northwest bisects what is still shown in the Access New Zealand website as part of the coastal marine hydro unit (Figure 5). This wetland is still public land and has become more of a freshwater wetland rather than an estuarine continuum from freshwater to marine wetland. It is now of high natural character.

With the existing moorings, the outer part of the Bay/ Huirangi Inlet would not meet the threshold for high natural character in 2025.

[15] The relatively small size is common in many BOI locations and a relatively recent phenomenon (John Booth, pers. comm

Relevant policies

New Zealand Coastal Policy Statement 2010[17]

Policy 10 Reclamation and de-reclamation

(1) Avoid reclamation of land in the coastal marine area, unless:

(a) land outside the coastal marine area is not available for the proposed activity;

(b) the activity which requires reclamation can only occur in or adjacent to the coastal marine area;
(c) there are no practicable alternative methods of providing the activity; and

(d) the reclamation will provide significant regional or national benefit.

Policy 11 Indigenous biological diversity (biodiversity)

To protect indigenous biological diversity in the coastal environment:

(a) avoid adverse effects of activities on:

17 https://web.archive.org/web/20240510065726/https://www.doc.govt.nz/globalassets/documents/conservation/marine-and-coastal/coastal-management/nz-coastal-policy-statement-2010.pdf

(i) indigenous taxa that are listed as threatened or at risk in the New Zealand Threat Classification System lists;

(ii) taxa that are listed by the International Union for Conservation of Nature and Natural Resources as threatened;

(iii) indigenous ecosystems and vegetation types that are threatened in the coastal environment, or are naturally rare;

(iv) habitats of indigenous species where the species are at the limit of their natural range, or are naturally rare;

(v) areas containing nationally significant examples of indigenous community types; and
(vi) areas set aside for full or partial protection of indigenous biological diversity under other legislation; and

(b) avoid significant adverse effects and avoid, remedy or mitigate other adverse effects of activities on:

(i) areas of predominantly indigenous vegetation in the coastal environment;

(ii) habitats in the coastal environment that are important during the vulnerable life stages of indigenous species;

(iii) indigenous ecosystems and habitats that are only found in the coastal environment and are particularly vulnerable to modification, including estuaries, lagoons, coastal wetlands, dunelands, intertidal zones, rocky reef systems, eelgrass and saltmarsh;

(iv) habitats of indigenous species in the coastal environment that are important for recreational, commercial, traditional or cultural purposes;

(iv) habitats, including areas and routes, important to migratory species; and

(vi) (vi) ecological corridors, and areas important for linking or maintaining biological values identified under this policy.

Policy 12 Harmful aquatic organisms

(1) Provide in regional policy statements and in plans, as far as practicable, for the control of activities in or near the coastal marine area that could have adverse effects on the coastal environment by causing harmful aquatic organisms to be released or otherwise spread, and include conditions in resource consents, where relevant, to assist with managing the risk of such effects occurring.
(2) Recognise that activities relevant to (1) include:
(a) the introduction of structures likely to be contaminated with harmful aquatic organisms;
(b) the discharge or disposal of organic material from dredging, or from vessels and structures, whether during maintenance, cleaning or otherwise; and whether in the coastal marine area or on land;
(c) the provision and ongoing maintenance of moorings, marina berths, jetties and wharves; and
(d) the establishment and relocation of equipment and stock required for or associated with aquaculture.

Policy 13 Preservation of natural character

(1) To preserve the natural character of the coastal environment and to protect it from inappropriate subdivision, use, and development:

(a) avoid adverse effects of activities on natural character in areas of the coastal environment with outstanding natural character; and

(b) avoid significant adverse effects and avoid, remedy or mitigate other adverse effects of activities on natural character in all other areas of the coastal environment; including by:

(c) assessing the natural character of the coastal environment of the region or district, by mapping or otherwise identifying at least areas of high natural character; and

(d) ensuring that regional policy statements, and plans, identify areas where preserving natural character requires objectives, policies and rules, and include those provisions.

(2) Recognise that natural character is not the same as natural features and landscapes or amenity values and may include matters such as:

(a) natural elements, processes and patterns;

(b) biophysical, ecological, geological and geomorphological aspects;

(c) natural landforms such as headlands, peninsulas, cliffs, dunes, wetlands, reefs, freshwater springs and surf breaks;

(d) the natural movement of water and sediment;

(e) the natural darkness of the night sky;

(f) places or areas that are wild or scenic;

(g) a range of natural character from pristine to modified; and

(h) experiential attributes, including the sounds and smell of the sea; and their context or setting

National Policy Statement on Freshwater 2024[18]

Section 3.22 Natural inland wetlands

Every regional council must include the following policy (or words to the same effect) in its regional plan:

"The loss of extent of natural inland wetlands is avoided, their values are protected, and their restoration is promoted, except where:

(a) the loss of extent or values arises from any of the following:

(i) the customary harvest of food or resources undertaken in accordance with tikanga Māori

[18] https://environment.govt.nz/assets/publications/Freshwater/NPSFM-amended-october-2024.pdf

(ii) wetland maintenance, restoration, or biosecurity (as defined in the National Policy Statement for Freshwater Management)

(iii) scientific research

(iv) the sustainable harvest of sphagnum moss

(v) the construction or maintenance of wetland utility structures (as defined in the Resource Management (National Environmental Standards for Freshwater) Regulations 2020)

(vi) the maintenance or operation of specified infrastructure, or other infrastructure (as defined in the Resource Management (National Environmental Standards for Freshwater) Regulations 2020

(vii) natural hazard works (as defined in the Resource Management (National Environmental Standards for Freshwater) Regulations 2020); or

(b) the regional council is satisfied that:

(i) the activity is necessary for the purpose of the construction or upgrade of specified infrastructure; and National Policy Statement for Freshwater Management 2020

(ii) the specified infrastructure will provide significant national or regional benefits; and

(iii) there is a functional need for the specified infrastructure in that location; and

(iv) the effects of the activity are managed through applying the effects management hierarchy.

Then

(3) Every regional council must make or change its regional plan to ensure that an application referred to in subclause (2) is not granted unless:

(a) the council is satisfied that:

(i) the applicant has demonstrated how each step of the effects management hierarchy will be applied to any loss of extent or values of the wetland (including cumulative effects and loss of potential value), particularly (without limitation) in relation to the values of: ecosystem health, indigenous biodiversity, hydrological functioning, Māori freshwater values, and amenity values; and

(ii) if aquatic offsetting or aquatic compensation is applied, the applicant has complied with principles 1 to 6 in Appendix 6 and 7, and has had regard to the remaining principles in Appendix 6 and 7, as appropriate, and

(iii) there are methods or measures that will ensure that the offsetting or compensation will be maintained and managed over time to achieve the conservation outcomes; and

(b) any consent granted is subject to:

(i) conditions that apply the effects management hierarchy; and

(ii) a condition requiring monitoring of the wetland at a scale commensurate with the risk of the loss of extent or values of the wetland; and

(iii) conditions that specify how the requirements in (a)(iii) will be achieved.

(4) Every regional council must make or change its regional plan to include objectives, policies, and methods that provide for and promote the restoration of natural inland wetlands in its region, with a particular focus on restoring the values of ecosystem health, indigenous biodiversity, hydrological functioning, Māori freshwater values, and amenity values.

Assessment of the impacts of the proposed Waipiro Bay Marina

Likely impacts

The construction of the marina would require dredging the marina footprint and probably an area around it, along with a route to the marina from deeper waters. The dredging would remove vegetation and other benthic cover for intertidal and subtidal habitats and infauna (fauna in marine sediments). This would remove wildlife habitats, including habitats probably used by some species listed as at-risk or threatened. [19]It would also remove the southwestern habitat continuum, which runs from subtidal flats to intertidal mangroves, salt marsh, freshwater wetland, shrubland, and low forest.

The construction of the Omarino access causeway has already altered the salinity regime of the freshwater wetland northwest of the Bayhead. This area has fully evolved into a freshwater wetland.

Approximately 40% of the marina footprint appears to be reclamation. This would probably use much of the dredged spoil, although it is unclear how much. National-level policy only supports reclamation in limited circumstances.[20]In this case, the reclamation would be for car parking and a building. Under the NZCPS, reclamations should not be permitted for either of these activities.[21]

There would be considerable noise during construction, including noise from pile driving and building activities. Once constructed, the marina's night lighting regime would likely be considerably altered from the present dark-sky regime. This anthropogenic lighting is likely to adversely affect some seabirds and other wildlife.

It is unlikely that construction could be permitted within an area covered by a Biosecurity Controlled Area Notice. As this notice prevents anchoring, fishing, diving, and snorkelling, it seems improbable that construction activities using heavy machinery would be allowed. Tiny fragments can spread the alien Caulerpa species, so preventing this during construction would not be possible, especially when

[19] For example, Australasian bittern and pāteke, which are listed in Robertson et al, 2021, Conservation status of birds in Aotearoa New Zealand 2021. https://www.doc.govt.nz/globalassets/documents/science-and-technical/nztcs36entire.pdf

[20] Department of Conservation 2010. New Zealand Coastal Policy Statement. Policy 9. https://web.archive.org/web/20240510065726/https://www.doc.govt.nz/globalassets/documents/conservation/marine-and-coastal/coastal-management/nz-coastal-policy-statement-2010.pdf

[21] See above

machinery and material are being removed from the site. Lifting the CAN would not be the solution, as it would likely take many years to be sure that the alien Caulerpa has been removed from the area covered by the CAN.

Construction activities, especially dredging, would resuspend considerable amounts of fine sediment during the construction period and possibly when access channels need to be dredged in the future. This suspended fine sediment would settle onto any remaining intertidal and subtidal benthic surfaces. The limited areas of seagrass not destroyed directly by the construction would be unable to survive a regime where fine sedimentation increases and fine sediment reduces water clarity.

Assessment of ecological significance and compliance with NZCPS Policy 11 (Biodiversity)

For an area of indigenous vegetation or wildlife habitat to be classified as significant, it is required to meet one or more of the four criteria for ecological significance in Appendix V of the Northland Regional Policy Statement.[22]

Criterion in RPS	Whether addressed
Representativeness	1(a) (i) (ii) The ecological site is largely indigenous vegetation and habitat of indigenous fauna. It is likely typical of what would have existed in 1840, given the size of the old mangrove trees (Photo 3). It is not possible to assess whether faunal assemblages representing most guilds expected are present (iii) This criterion is met.
Rarity/distinctiveness	(b) Except for pāteke, New Zealand coastal orca and bottlenose dolphins, there is insufficient information to confirm which threatened, at-risk, data-deficient or uncommon species are present. However, part of the area is ranked as a Significant Bird Habitat in the Northland Regional Coastal Plan because of its use by the Australasian Bittern. New Zealand coastal orcas and bottlenose dolphins are reported by marine mammal expert Ingrid Visser,[23] as using Waipiro Bay and adjoining localities. New Zealand coastal orcas (*Orcinus orca)* have a threatened-national critical status, while bottlenose dolphins (*Tursiops truncatus*) have a threatened–nationally endangered status.[24] This criterion is met.
Diversity and pattern	Intact ecological sequences are present, especially in the southwest of the Bayhead. This criterion is met.
Ecological context	There is insufficient information to assess whether this criterion applies.

In summary, the Waipiro Bayhead ecological sequence meets three of the four criteria for ecological significance in the RPS for Northland.

Department of Conservation New Zealand Threat Classification Series 29. https://www.doc.govt.nz/globalassets/documents/science-and-technical/nztcs29entire.pdf

Photo 3: An example of an old mangrove in Waipiro Bayhead that would be removed by the proposed development

To protect Indigenous biodiversity in the coastal environment, NZCPS Policy 11 requires adverse effects to be avoided for Indigenous taxa listed as threatened or at-risk in the New Zealand Threat Classification System. Pāteke are "threatened—nationally increasing," so adverse effects on them and their habitat must be avoided. The vegetated intertidal vegetation in the Bayhead is mapped as a significant bird habitat for the Australasian Bittern in the Regional Policy Statement maps.[25] Australasian bitterns are classified as Threatened-Nationally Critical in the New Zealand Classification System. In addition, New Zealand coastal orcas and bottlenose dolphins are reported by marine mammal expert Ingrid Visser,[26] as resting, socialising and foraging in Waipiro Bay and adjoining localities. New Zealand coastal orcas (*Orcinus orca)* have a threatened-national critical status, while bottlenose dolphins (*Tursiops truncatus*) have a threatened–nationally endangered status.[27]

[25] There seems to be a small error mapping the significant bird habitat in the south-west of the Bayhead as the inshore wetland vegetation has been excluded from the mapped significant bird habitat.
[26] Visser 2025 Orca Research Trust submission against fast-tracking the application for fast track approval for Waipiro Bay Marina.
[27] Baker, Boren, Childerhouse, Constantine, van Helden, Lundquist, Rayment & Rolfe, 2019. Conservation status of New Zealand marine mammals, 2019. Natural character and NZCPS

The Waipiro Bayhead subtidal, intertidal, and freshwater habitats, along with their fringing native vegetation, are of high natural character. NZCPS Policy 13 requires that significant adverse effects be avoided, and all other effects be avoided, remedied, or mitigated. The proposal would largely remove or otherwise destroy the high natural character of the subtidal and intertidal habitats, so it could not be considered to be consistent with NZCPS Policy 13.

Harmful aquatic organisms and NZCPS

Policy 12 requires policy statements and plans to control, as far as practicable, activities that could cause harmful aquatic organisms to be released or spread. The Biosecurity Act also has strict requirements for Controlled Area Notices (including the proposed location). The proposal would pose a high risk of spreading alien Caulerpa within the Bay and potentially beyond (with the transport of equipment and dredgings).

Northland REGIONAL COUNCIL
Te Kaunihera ā rohe o Te Taitokerau

Committee Secretariat
Environment Committee
Parliament buildings
Wellington
s 9(2)(a)

19 April 2024

Northland Regional Council submission on the *Fast-track Approvals Bill*

Northland Regional Council is grateful for the opportunity to provide feedback on the Fast-track Approvals Bill that has been presented to the House of Representatives. This Bill is a significant shift in the way that major infrastructure and other developments gain approvals under a range of resource management legislation. Council recognises that Northland has experienced underinvestment in infrastructure for decades – the region also has areas of significant deprivation. The need for infrastructure and development with significant regional benefits is recognised and strongly supported. Council is supportive of a fast-track pathway for such proposals, provided it is appropriately balanced alongside environmental, cultural, and social outcomes.

Council is of the view that the Bill is not appropriately balanced in its current form. Decisions made through the Bill risk being made in favour of economic outcomes without sufficient regard to the potential adverse effects. Council is also strongly opposed to the limited ability for tangata whenua affected by fast-track applications to participate in the decision-making process.

In our submission points below, we have included changes that we consider necessary to provide an appropriately balanced fast track process. To that end, we would like to reiterate that council is supportive of a fast-track process and we recognise earlier fast track legislation provided for a substantially expedited consenting process for important infrastructure investments across the country, including in Northland. The relief we have sought through our submission points is intended to enable an expedited approval process, whilst ensuring decision makers take into account and provide for the wellbeing of our communities and environment.

We have seen draft submissions from Te Uru Kahika, Local Government New Zealand, and the New Zealand Planning Institute. Our submission was prepared independently from these entities, yet we have reached similar conclusions on the Bill's existing shortfalls, risks, and issues that need to be addressed prior to becoming law.

Submission Points

Summary of Submission Points

The key points raised in this submission seek a greater balance between enabling regionally and nationally beneficial developments with the protection of our natural, built, and societal values. We include submissions on the following:

1. Tangata whenua participation in decision-making
2. Purpose of the Fast Track Approvals Bill
3. Eligibility of Prohibited Activities
4. Decision Making Process
5. Expert Panel Composition and Qualifications
6. Consultation and Participation
7. Processing Timeframes
8. Cost Recovery

1. Tangata whenua participation in decision making

Council is concerned that the FTAB as it stands runs significant risk of severely constraining iwi and hapū participation in decision making by failing to provide adequate provision for Māori rights and interests and cut across the principles of the Treaty of Waitangi.

This is due to:

- The absence of any reference to upholding Treaty principles (i.e. the omission of any reference to Section 8 RMA);
- participation largely being limited to post settlement governance entities, Marine and Coastal Area Act claimants/rights holders and hapū with mana whakahono-a-rohe agreement;
- The process not being fully open to non-settled iwi/hapū will exclude a significant proportion of potentially affected tangata whenua from participating in the decision making process;
- Timeframes for input and decision making are also unlikely to be practical for tangata whenua;
- The wide discretion open to Ministers and the expert panel on the extent to which iwi/hapū can participate in decision making.

The combination of these factors creates risk of ill-informed decisions, the inability for tangata whenua to promote protection of their rights and interests and inconsistent approaches to Māori participation – the consequence being harm to the relationship between Crown and iwi /hapū with similar implications for local government.

Relief sought:

- Include a requirement for all persons exercising functions and powers under the FTAB to take into account the principles of the Treaty of Waitangi.
- Explicitly require Ministers to document the results of consultation with hapū / mana whenua prior to referral decisions and require that their views be taken into account in referral decisions and any subsequent directions to the expert panel/
- Explicitly require expert panels to invite comment from hapū / mana whenua prior to recommendations to Ministers.

2. Purpose of the Fast-Track Approvals Bill

Council opposes the current wording of the FTAB purpose defined under s3: The purpose of this Act is to provide a fast-track decision-making process that facilitates the delivery of infrastructure and development projects with significant regional or national benefits.

The purpose of the FTAB, and consequently all subsequent sections, schedules, and clauses of the Bill, is silent on any actual and potential impacts that could occur as a result of granting approvals to a project with the deemed significant regional or national benefits. By omitting any link to environmental, social, cultural, and economic within the purpose, projects that have significant adverse impacts will ostensibly be approved provided there are also significant benefits. There is no equalisation method within the existing wording, and the emphasis is weighted almost entirely towards the demonstration of significant benefits.

The consideration of projects for listing and/or referral need only to achieve this purpose, and the subsequent consideration of the application will consider whether or not the purpose is achieved over all other legislation. The wording provides no balance and is ambiguous to the point where almost any project with a large enough scale could pass the test of meeting the purpose. This could potentially include projects that have hitherto been declined for approvals due to substantial and significant adverse effects. It is anticipated that such projects will be submitted to the Joint Ministers for listing and referral due to the inability to progress under long-standing protections. The purpose of the FTAB essentially trumping all other legislative intent (such as section 5 of the RMA) is not supported – we recommend amendments to the bill to provide greater balance. The omission of any reference to Section 8 of the RMA (the requirement to take into account the principles of the Treaty of Waitangi) is also of significant concern.

Relief sought:

- Amend the purpose of the FTAB to support the delivery of infrastructure and development projects with significant regional or national benefits balanced by the environmental, social, economic, and cultural heritage protective mechanisms enshrined in the Resource Management Act, Conservation Act, Wildlife Act, Reserves Act, the EEZ Act, Freshwater Fisheries Regulations, Heritage NZ Pouhere Taonga Act.
- Include a requirement for all persons exercising functions and powers under the FTAB to take into account the principles of the Treaty of Waitangi.

3. Eligibility of Prohibited Activities

Council opposes the eligibility of projects that are fully or are in part prohibited activities pursuant to the RMA for referral and consideration under the FTAB.

Regional and District Councils regulate activities pursuant to Part 3 of the RMA and are authorised to classify activities and activity statuses in their relevant plans pursuant to Part 3 and s77A of the RMA. Classes of activities and their regulatory requirements under resource consent processes are defined in s87A of the RMA, and provides under s87A(6):

> *If an activity is described in this Act, regulations (including a national environmental standard) or a plan as a prohibited activity, -*
>
> *(a) no application for a resource consent may be made for the activity and*
> *(b) the consent authority must not grant a consent for it;*

Regional and District Plan making is a participatory process that generally involves:

- multiple rounds of consultation with members of the public and subject matter experts,
- submissions on the plan text and further submissions following amendments,
- hearings convened by the Environment Court and independent commissioners where evidence supporting said submissions is presented and considered in an objective and considered manner,
- mediations between submitters and Council where consensus could be gained;
- appeals on matters where agreements could not be reached, and
- scheduled reviews to determine effectiveness and appropriateness of plan provisions over time.

This process results in a robust decision that has been tested in the courts of law and with our communities. Prohibited activity rules in plans are subject to a particularly high level of scrutiny and these provisions are applied very carefully (for example to avoid allocating freshwater beyond allocation limits). It is appropriate for councils to have the ability to prevent a consent pathway for prohibited activities where potentially permanent and significant impacts would arise from the activity being undertaken,

The FTAB seeks to establish a separate process for several approvals under different legislation, including the RMA. As there is no consent pathway for a prohibited activity under the RMA, nor a regulatory process to assess an application for a prohibited activity, there is ambiguity in the intent and procedure of accepting a referral for an application with a prohibited component. Where a prohibited activity is referred and approved by the Joint Ministers, it would operate in the same manner as a plan change, but without the democratic and participatory process enshrined in current law. This is beyond the scope of a consenting process and the would-be powers authorised by the FTAB.

We therefore oppose the inclusion of cause 17(5):

> *A project is not ineligible just because the project includes an activity that is a prohibited activity under the Resource Management Act 1991.*

Relief sought:

- Delete clause 17(5).

4. Decision Making Process

Council opposes the referral and decision-making processes for projects under Schedule 2A and Schedule 2B of the FTAB.

As Schedule 2A projects are not being identified, there is insufficient information available to undertake a genuine feedback process and insufficient information available to understand the total implications of the FTAB for local authorities.

We understand that the selection of listed projects will include those deemed to provide significant national and regional benefits based on the recommendations of an appointed panel with decisions made by the Joint Ministers. Successful and sustainable infrastructure projects require an appropriate amount of due diligence at the front end to align with the long-term planning processes Councils and Government Agencies undertake. There are examples of projects in Northland referred through the COVID-19 Fast Track Recovery Process which have not had sufficient due diligence, and now local ratepayers and New Zealand tax payers are financially burdened to address funding gaps.

Given that projects to be listed under Schedule 2A will be decided upon in the passing of this bill, the amount and quality of the due diligence undertaken is unknown and there will be no opportunity to raise concerns for the local authorities and departments who must 'inherit' the regulation of these projects. It is important for this process to be transparent in order for Local Authorities to be able to input into the process and understand the long-term implications of such development to plan accordingly.

There are also significant risks created by the decision-making process for referred activities caused by a lack of independent expert consideration for project applications and uncertainty surround the level of scrutiny of Joint Ministers decision making. The current wording in the Bill requires the creation of an expert panel, who will be:

- assigned to assess a substantive application of a Listed or Referred Project

- required to complete the assessment within an extremely short period of time
- tasked with the creation of conditions for each approval; and
- subject to limitations on undertaking any substantive consultation (see Submission Point 6).

Regardless of the recommendation reached by the expert panel, the recommendation can be ignored or overturned by the Joint Ministers pursuant to s25(4) and (5) of the FTAB:

> *(1) The panel must prepare a report with recommendations on the substantive application referred to it under this Act and provide the report to the joint Ministers.*
> *(2) In preparing the report, the panel must consult the Minister for Māori Crown Relations: Te Arawhiti and the Minister for Māori Development.*
> *(3) Those Ministers must be allowed 5 working days to comment on the draft report, its assessment of the project in relation to the relevant Treaty settlement, and any conditions relevant to that assessment, before the report is provided to the joint Ministers for their final decision.*
> *(4) Joint Ministers must not decide to deviate from a Panel's recommendations unless they have undertaken analysis of the recommendations and any conditions included in accordance with the relevant assessment criteria.*
> *(5) In determining a substantive application, the joint Ministers may refer a part or the whole of the panel's recommendations back to the panel to reconsider and give the panel any directions the Ministers think appropriate as to the reconsideration of a part or the whole of the recommendations.*
> *(6) The Ministers may –*
> *a. Seek clarification from the panel on any recommendation:*
> *b. Commission additional advice:*
> *c. Seek further comments from any affected parties.*
> *(7) After considering the expert panel's report on a referral application for a project, the joint Ministers must –*
> *a. Approve the project and grant the relevant approvals subject to the conditions (if any) specified in the approval; or*
> *b. Decline to approve the project.*
> *(8) The responsible agency must notify the applicant of the joint Ministers' decision, including (if applicable) the reasons for declining approval.*
> *(9) An applicant whose application for approval is declined my reapply to the Ministers by lodging a fresh referral application with the responsible agency.*

It is anticipated that an independent panel of qualified experts would approach the assessment of any application in an objective manner, fully considering every aspect of the proposal. The objectivity of this assessment is substantially limited by the lack of consultation ability, overarching purpose of the legislation and the required timeframes; however, the existing wording of s25(4) enables an overriding, unqualified analysis of the expert panel recommendations.

Clause 5(2) of Schedule 3 appears to enable Treaty settlement arrangements to be modified by agreement with the relevant iwi authority/settlement entity, however under Clause 5(3)

the iwi authority / settlement entity cannot "*unreasonably withhold*" agreement to a modified arrangement. This is very vague language and is likely to create uncertainty and has the potential to cut across settlement arrangements. This and associated references should be deleted given settlement arrangements have been through a legislative process that should be respected.

Relief sought:

- Amend the decision-making process to align with the Fast-Track process developed under the Natural and Built Environment Act 2023, which provided:
    - Decision making powers to the independently appointed expert panel and Minister for the Environment;
    - A realistic timeframe within which substantive applications could be fairly assessed and determined;
    - Delete Section 5(3) of Schedule 3 and the reference in Section 4 relating to 'unreasonably withholding agreement'.

5. Expert Panel Composition and Qualifications

Council opposes the currently worded composition and qualification requirements of the expert panels tasked with assessing applications.

The Expert Panels to be convened to consider projects referred under Schedule 2B are defined through section 7 of schedule 3:

(1) The members of the panel must, collectively, have –
- *a. The knowledge, skills, and expertise relevant to the purpose of this Act; and*
- *b. The knowledge and skills required for matters specific to the project, including the technical expertise relevant to the project; and*
- *c. An understanding of te Tiriti o Waitangi / the Treaty of Waitangi and its principles; and*
- *d. an understanding of tikanga Māori and mātauranga Māori; and*
- *e. if appropriate, conservation expertise.*

(2) A person is not ineligible for appointment as a panel member by reason only that the person is a member of a particular iwi or hapū (including an iwi or hapū that is represented by an iwi authority that much be invited by the panel to comment on the application).

In its current form, the composition of the panel and the qualifications of its members severely restricts the ability of the panel to undertake a comprehensive review of any substantial applications that would support a project listed or referred under Schedules 2A and 2B. Of note:

- Specific knowledge, skills, and technical expertise required are limited to achieving the purpose of this Bill, which as noted above is restricted to the delivery of large developments, but not assessment of impacts.

- The inclusion of the need for an understanding of te Tiriti and tikanga Maori and Matauranga Maori holds no weight given the lack of reverence to these instruments in the decision-making process.
- There is no requirement for professional accreditation, which bypasses the inherent codes of ethics and good practice that are required to be recognised in New Zealand and abroad as a competent and objective professional.

Further to the lack of definition set out in the relevant clauses, the Bill's requirement to assess applications within strict timeframes further limits the availability of independent subject matter experts. This sector and tangata whenua are already stretched with respect to the availability of competent professionals. The rate at which referred projects will be assessed will have immediate implications to:

- The quality and robustness of an assessment of projects;
- The quality and efficiency of conditions of consent or other approvals;
- The availability of subject matter experts to non-Fast-Track projects.

The existing provisions do not afford adequate oversight of potential long-term impacts to the environment, communities, tangata whenua and cultural values. Gaps in expertise will be particularly at issue during condition development, which could hinder the ability for local authorities and other regulators to effectively enforce approvals. There are also likely to be implications for council operated infrastructure that need to be understood and considered by the panel (e.g. roading, wastewater) – this will require good technical knowledge and close liaison with council's infrastructure managers which takes time.

Relief Sought

- Amend provisions set out under Schedule 3 to:
    - require panel members to be professionally qualified or otherwise approved by the panel convenor;
    - require panel composition to include sufficient knowledge and expertise in environmental assessments and law, which is particularly important for adopted conditions of any approval.

6. Consultation and Participation

Council opposes the form in which submissions have been sought for the FTAB as well as the proposed restriction of public participation in the assessment of any project.

Further to Point 4, the lack of information available to substantively assess and consider the proposed FTAB (with particular respect to an empty Schedule 2A), the rushed nature of moving the FTAB through the Parliamentary process, creates significant risk of poor outcomes – this is compounded by what we see as inadequate participatory rights in decision making which can be critical in reaching informed decisions.

Regarding a lack public involvement in the consideration of projects as set out in s20 of Schedule 4, the wording of the provision indicates that the agencies, persons, and groups identified to invite comment will have little-to no impacts on the recommendations adopted by the Joint Ministers.

The identified parties requiring invitations to comment also appear to be arbitrary and are not linked by potential effects, but only property boundaries. This characteristic becomes more prominent as the potential adverse impact grow. In its current wording, there is no requirement to consult with downstream water users, residents and persons within a shared aquifer and/or air shed, nor are considerations for the effects on quality of life taken into account, such as noise and vibration, visual impacts, traffic safety and generation, and community aspirations.

We acknowledge the consultation required with iwi authorities, MACA applicants / rights holders and parties to Mana Whakahono a Rohe agreements. Limiting consolation to these entities creates a major gap in Northland where we have around 200 hapū. As it stands the requirement in the FTAB to consult / engage with hapū appears entirely at the discretion of Ministers and / or the expert panel. Our existing resource management legislation recognises that different types of activities have different types of effects in both scale and nature. Where these effects could impede on the quality of life for surrounding people, environments, culture and other activities, the RMA affords the ability for Councils to notify resource consent applications to seek further information to fully assess effects and impose appropriate conditions to enable the operation of activities while limiting adverse effects.

Finally, the extent to which comments are taken into account are not clear in this Bill, and the appeal rights to such parties are limited only to points of law submitted to the High Court. This subsection does allow the expert panel to invite others to comment on a proposal at their discretion, but there are no matters of discretion defined in the Bill. Hearings are also not required but may be held if the expert panel deems appropriate.

In its current form, the requirements to invite comments from those identified appear to lack any purpose other than to note comments from relevant parties.

Relief sought:

- Amend provisions to link identified stakeholders and relevant parties notified and invited to comment based on scale and magnitude of effects, as per the existing processes that exist in the NBEA Fast-Track process.
- Strengthen requirements for applicants, Ministers and the expert panel (Section 20(3-6) to consult with hapū / mana whenua.
- Amend existing clauses and add clauses to enable the expert panel to notify applications in special circumstances.
- Clearly state the purpose of consultation and the direction to the Expert Panel with respect to considering submission responses.
- Extend the timeframes for consultation in line with the existing NBEA Fast-Track process.

7. Processing Timeframes

Council Opposes the proposed processing timeframes prescribed in s21 of Schedule 4.

The assessment of a substantial application for major infrastructure or developments by a panel of 4 individuals requires careful consideration of the facts and investigations contained in an application, the corroboration of statements made in such an application and the associated time required to consider these, and consensus between panel members who will likely have different perspectives and considerations. Input from the relevant local authorities will be required, particularly where impacts could be potentially significant and cover a broad area or there are major implications for council infrastructure / capacity.

The FTAB currently limits the timeframe for input from local authorities to the expert panel to 10-days. This timeframe also applies to iwi / hapū where they have an opportunity to comment. For context, this is similar to the timeframe required to process a controlled activity with only minor potential effects. The FTAB projects are likely to be significant in terms of scale, complexity and potential adverse effects. Further to this, information requested from local authorities would be sought so late in the assessment process that any feedback regarding the serviceability of a project would potentially be of limited use to the decision making process, or may require the application to be declined for further refinement.

Council also notes that the expert panel also has a very restricted timeframe with which to process and assess an application and we have concerns that these timeframes will preclude the ability of the panel to fully consider a proposal.

Relief sought:

- Amend processing timeframes set out in Section 21 of Schedule 4 to include a minimum of 40-working-days following receipt of comments under Clause 21 and enabling the doubling of timeframes (a further 40-working days) where deemed appropriate by the expert panel.

8. Cost Recovery

Council supports the ability for Local Authorities to recover costs associated with input to the approvals process and ongoing monitoring of consent/authorisation conditions.

Applications processed under the COVID-19 Recovery (Fast-track Consenting) Act 2020 did not enable Local Authorities to recover costs associated with effort and resources used in responding to expert panel queries that comprised part of the application process. This meant that ratepayers bore these particular application costs.

It is recognised that the NBEA 2023 provided local authorities the ability to recover all costs associated with the fast-track consenting process.

We therefore support the inclusion of:

- clause 2(4)(d) of Schedule 1 of the FTAB:

  the recovery of costs of the processes under Part 2 of Schedule 10 of the Natural and Built Environment Act 2023, as provided for in clause 94 of that schedule, and as applied by clause 9 of Schedule 1 of the repealed Act.

and

- clause 14(1) of Schedule 13 of the FTAB:

  a local authority must recover from an application the actual and reasonable costs incurred by the local authority in complying with this schedule and schedule 4.

However, there does not appear to be any provisions that recognise the need to compensate iwi or hapū to participate in the decision-making process.

Relief sought:

- Set out provisions in the legislation that provides appropriate compensation for iwi or hapū input.

Signed on Behalf of the Northland Regional Council

c/- ftareferrals@mfe.govt.nz

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

I represent the Karetu Maori Committee for Ngati Manu hapu and am authorised to provide this submission.

We support the submission of Ngati Kuta and Patukeha hapu, as it incorporates our views.

We are united in the position of opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture, and
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991.

Lastly Waipiro Bay has long been a source of kaimoana for our people including Huai, Tio, Kanae, Patiki, Kahawai, Tamure and more. You must also be aware that the spread of Exotic Caulerpa in this rohe moana threatens the life of the moana right now, surely eradicating this invasive seaweed and protecting this rohe moana is the priority. We most certainly stand with Ngati Kuta and Patukeha.

We seek that you **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views to be adequately considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that stage 2 also.

Mauri ora

Mā Ngāti Manu, mō Ngāti Manu, e ai ki a Ngāti Manu.

Hon. Chris Bishop
Infrastructure Minister
Fast-Track Approval
c/- ftareferrals@mfe.govt.nz
11 May 2025

Dear Minister Bishop,

I am the founder of the Orca Research Trust and I request that you **decline the application for Fast-Track Approval for the Waipiro Bay Marina.**

It is my understanding that this proposal will include 200-250 marina berths for vessels in the Waipiro Bay region as well as a public boat providing access to the region for even more vessels. The documents I have viewed indicate that there will be dredging, excavation and reclamation, along with pile driving and associated construction vessel traffic during the building of the project. This will include, but not be limited to, disturbance of the marine environment, the benthos and the shoreline.

I am a marine mammal researcher who has over 30 years of experience documenting the orca (*Orcinus orca*) and bottlenose dolphins (*Tursiops truncatus*) in New Zealand waters. I can assure you that the Waipiro Bay is of great significance to the uniquely New Zealand populations of these animals. They not only rest and socialise in this Bay and the adjoining regions but they also forage (hunt for and consume prey) there. Currently, there are only a few areas left in New Zealand, and even fewer in Northland, which have relatively undisturbed areas where these Nationally Critical populations can conduct these behaviours. The marina will destroy, exclude and/or limit the animals' use of the area.

The New Zealand orca are the only ones in the world known to hunt in and around mangrove forests. It is well established that the destruction of mangrove forests has been accelerating over the years and New Zealand is no exception. The applicants impact assessment indicates that that mangrove forest and the adjacent region will be destroyed and also potentially harmed by changes in hydrodynamics. Fish species, including young elasmobranchs (rays, sharks and skates, the primary food on NZ orca) will be excluded from the remaining mangrove forests by the rock wall that will be built. The consequences of this to the orca, and their prey will have long-term effects.

In addition, subsequent to the project being completed, there will be a massive increase in the number of vessels using this region and the 'outer' Bay of Islands area. This will increase the likelihood of boat strike. New Zealand already has one of the highest rates of boat strike of orca in the world. This aspect

has not been included in the 'fast track' application, and yet it is vital that it is given the consideration that it deserve in order to fully assess the impact to marine mammals.

Above, I provide a photography I took of the the permanent injury to the sub-adult male orca known as Ben (NZ101). The injury occurred as a result of a boat strike in the Bay of Islands. It was sustained by a small recreational sized vessel (i.e., the type of vessel which would use the boat ramp proposed by the applicant). Another record (not shown) was from a boat strike by a launch of the size and type that the marina proposed by the applicant would host.

In summary, I support the submission by Ngati Kuta and Patukeha hapu which reflects my concerns about protecting this area and having our opinions heard. Therefore, I **strongly urge you to decline the fast track application** of Azuma Property Limited (in partnership with Hopper Developments Limited). By requiring the applicant's proposal to proceed through the standard resource consenting process, the views of the concerned scientific community can be adequately considered.

Respectfully submitted,

Dr Ingrid N. Visser (PhD)

Re: Fast-track Approval for Waipiro Bay Marina

1. This response is made on behalf of Te Kahu o Taonui (Te Tai Tokerau Iwi Chairs Forum).
2. Te Kahu o Taonui was established in 2006/07 and is now a collective of Authorities in Te Tai Tokerau namely Ngāti Kuri Trust Board, Te Rūnanga Nui o Te Aupōuri, Te Rūnanga o Te Rarawa, Te Rūnanga o NgāiTakoto, Te Iwi o NgātiKahu Trust, Kahukuraariki Trust / Ngātikahu ki Whangaroa, Te Rūnanga o Whaingaroa, Te Runanga-Ā-Iwi-Ō Ngāpuhi, Te Rūnanga o Ngāti Hine, Ngātiwai Trust Board, Te Iwi o Te Roroa and Te Rūnanga o Ngāti Whātua.
3. The aim of Te Kahu o Taonui is to advance the collective aspirations of Te Tai Tokerau iwi and hapū. "Me mahi tahi tātou mō te iwi te take".

POSITION:

4. Te Kahu o Taonui supports the submission of Ngāti Kuta and Patukeha hapū, as it incorporates our philosophy and views.
5. We are united in the position of opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-track Approval because:
    - The application has not satisfied the Fast-track Approval Act 2024, s.7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
    - It does not meet the Referral Criteria in s.22(1)(a) of the Act because it is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
    - It does not meet the s.22(2)(v) requirement to support the Primary Industries, including aquaculture, and
    - It is yet to appropriately satisfy s.8, 12 and 17 of the Resource Management Act 1991.

We seek that you **decline the application for Fast-track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views to be adequately considered.

Should you decide to progress the proposal to Stage 2 of the Fast-track Approvals process, we request to be able to participate in that stage 2 also.

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

The Guardians of the Bay of Islands support the submission of Ngati Kuta and Patukeha hapu, as it incorporates our views.

We are united in the position of opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture, and
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991.

In addition:

5. Genuine consideration needs to be given to the impact of the local environment and ecosystems, including the increased risk to local biosecurity from pest-mammals to an area of extremely low pest numbers and extended risk of the spread of Caulerpa.

We seek that you **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views to be adequately considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that stage 2 also.

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

We are nearby landowners to the proposed Waipiro Marina and are members of the Eastern Bay of Islands Preservation Society Inc. We are authorised to provide this submission.

We are writing in support of the submission of Ngati Kuta and Patukeha hapu, as it incorporates our views.

We are united in the position of opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture, and
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991.

The construction of a marina of any size in this designated outstanding landscape area would require substantial dredging of an important regenerating coastal tidal area and is seaward of a Significant Bird Area – Critical Bird Habitats (Australasian Bittern (Matuku) and Brown Teal (Pateke) and should not be allowed to proceed.

Over recent years the Eastern Bay of Islands, Ipipiri, has come under intense pressure from the increasing numbers of recreational boats. The resultant increase in boating, fishing and gathering activity has caused restrictions to be placed by various authorities on at least six areas of the Bay of Islands. (see map in attachment.)

Since Marinas were completed at Kerikeri and Opua 20-25 years ago, there has been a huge increase in the number of recreational boats using the waters of Ipipiri, Bay of Islands. In 2021 a Marine

Mammal Sanctuary with a 5 knot speed restriction had to be imposed because of this increase in recreational boat traffic. There are now only about 23 dolphins left from a population of several hundred a few years ago. Having a potential 200 plus extra boats in the area from a proposed new marina is quite unthinkable if the purpose of the Sanctuary is to be achieved.

We seek that you **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views to be adequately considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that stage 2 also.

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

We support the submission of Ngati Kuta and Patukeha hapu, as it incorporates our views.

We are united in our opinion that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture, and
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991.

It is quite clear to us that this proposed development is purely about making money for the interested parties and has no benefits, what so ever, for the environment, community or society. There would not be a single thing about this proposal that will serve anyone other than a few privileged people. It is beyond belief that the Minister would, for one moment, consider fast tracking this environmentally and socially inappropriate development.

We seek that you **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views to be adequately considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that stage 2 also.

Ngāti Kahu Formal Public Statement of Support:

MAHI KOTAHITANGA MO TE KAITIAKITANGA O TE TAIAO: We have an opportunity to support our whanaunga of Ngati Kuta and Patu Keha hapu at Rawhiti to fulfil their rights and responsibilities of kaitiakitanga, by doing 5 things before or by 10 May 2025:

1. Read the information below.
2. Click the petition link.
3. Sign the petition.
4. Share the links to the “Stop Waipiro Bay Marina” page and the petition.
5. Write your letter of opposition to the fast track proposal and email it to stopwaipiromarina@gmail.com

The hapu of Ngati Kahu Te Iwi have faced similar fights against government attacks upon their kaitiakitanga me te taiao ki roto i ta ratou rohe. MAHI KOTAHITANGA MO TE KAITIAKITANGA O TE TAIAO.

🛑 Protect Waipiro Bay: Say NO to the Fast-Tracked 250-Vessel Marina, Sign and Share the petition to ALL community groups.

🗓️URGENT! The petition closes on 10 May to meet the fast-track deadline.

🚨 What’s Happening?

A 250-berth marina is proposed for Waipiro Bay under the Fast-Track Approvals Act 2024 (Application FTA229).

We strongly oppose it.

❌ Why We Say NO:

• Fails the Requirements: Doesn’t meet requirements under the Fast-Track Act or the RMA.
• No Public Voice: This fast-tracked process shuts out the community.
• Fails the Criteria: No proven regional or national benefit. The site is an aquaculture exclusion zone.
• Distorts Demand: Marinas nearby (like Opua) have vacant berths. No need for more.
• Ignores Māori Rights and interests: Disrespects the interests of local hapū and iwi through Treaty settlements and customary practices (Fast Track Act, Section 7).

⚠️ What's Missing?

The application lacks:

• ❌ Ecological Survey
• ❌ Hydrology Survey
• ❌ Cultural Impact Assessment
• ❌ Proper Environmental Effects Assessment (AEE)
• ❌ Proper community engagement and input

🌊 What’s at Risk?

• Loss of public marine space to privatisation
• Destruction of taonga species & habitats
• Wiping out customary food gathering areas

• Irreversible cultural and ecological harm

🟩 What We Want:

• Decline the Fast-Track application
• Refer it to the standard consent process for public input
• Let our community be heard
• Protect our Bay for future generations

✊ Let’s Protect Our Bay

🛑Protect Waipiro Bay, Ipiriri | Bay of Islands

Appendix 1: Ngāti Kahu Formal Public Statement of Support

Ngati Kahu Te Iwi
May 7 at 2:13 PM ·

MAHI KOTAHITANGA MO TE KAITIAKITANGA O TE TAIAO: We have an opportunity to support our whanaunga of Ngati Kuta and Patu Keha hapu at Rawhiti to fulfil their rights and responsibilities of kaitiakitanga, by doing 5 things before or by 10 May 2025:

1. Read the information below.
2. Click the petition link.
3. Sign the petition.
4. Share the links to the "Stop Waipiro Bay Marina" page and the petition.
5. Write your letter of opposition to the fast track proposal and email it to stopwaipiromarina@gmail.com

The hapu of Ngati Kahu Te Iwi have faced similar fights against government attacks upon their kaitiakitanga me te taiao ki roto i ta ratou rohe. MAHI KOTAHITANGA MO TE KAITIAKITANGA O TE TAIAO.

🔴 Protect Waipiro Bay: Say NO to the Fast-Tracked 250-Vessel Marina, Sign and Share the petition to ALL community groups.
🗓️URGENT! The petition closes on 10 May to meet the fast-track deadline.
🚨 What's Happening?
A 250-berth marina is proposed for Waipiro Bay under the Fast-Track Approvals Act 2024 (Application FTA229).
We strongly oppose it.
❌ Why We Say NO:
• Fails the Requirements: Doesn't meet requirements under the Fast-Track Act or the RMA.
• No Public Voice: This fast-tracked process shuts out the community.
• Fails the Criteria: No proven regional or national benefit. The site is an aquaculture exclusion zone.
• Distorts Demand: Marinas nearby (like Opua) have vacant berths. No need for more.
• Ignores Māori Rights and interests: Disrespects the interests of local hapū and iwi through Treaty settlements and customary practices (Fast Track Act, Section 7).
⚠️ What's Missing?
The application lacks:
• ❌ Ecological Survey
• ❌ Hydrology Survey
• ❌ Cultural Impact Assessment
• ❌ Proper Environmental Effects Assessment (AEE)
• ❌ Proper community engagement and input
🌊 What's at Risk?
• Loss of public marine space to privatisation
• Destruction of taonga species & habitats
• Wiping out customary food gathering areas
• Irreversible cultural and ecological harm
✅ What We Want:
• Decline the Fast-Track application
• Refer it to the standard consent process for public input
• Let our community be heard
• Protect our Bay for future generations
✊ Let's Protect Our Bay
Waipiro Bay is not just water—it's our taonga.
Let's protect our culture, wildlife, and future.

RUSSELL PROTECTION SOCIETY (INC)

P O Box 154

Russell, Bay of Islands

rps.org.nz

8 May, 2025

Hon. Chris Bishop

Infrastructure Minister

Fast-Track Approval

c/- ftareferrals@mfe.govt.nz

Proposed Fast Track Referral for Waipiro Marina

1. The Russell Protection Society (RPS) has been involved in a number of planning and tourism studies, some sponsored by central government, that looked at the future growth and development of the Bay of Islands. These studies have all supported an "inner and outer bays" concept whereby infrastructure is concentrated in Paihia, Opua, Kerikeri and a lesser extent Russell, while the outer bays and islands have been kept largely in their natural state in order to serve as the primary attraction for domestic and overseas tourism.

2. The Far North District Council is currently engaged in a lengthy and expensive process of reviewing its District Plan. This Plan largely adopts the inner and outer bays concept through its policy development and pattern of zoning. The RPS has invested a lot of time and energy by fully participating in this planning process. We are therefore concerned that a fast tracking of the proposed Waipiro Marina development could serve to undermine the Council and the ratepayers of the Far North by taking away our decision making powers invested in the proposed District Plan.

3. The proposed Waipiro Marina is potentially a complex project that could result in many effects that may not be evident at first. Marinas are expensive to develop and are usually only financially viable because the surrounding land values escalate, leading to valuable commercial and urban growth. At present Waipiro Bay is a beautiful and serene part of the outer bays that lacks infrastructure and ready access. The proposal is to heavily modify this natural environment through large scale dredging and earthworks. Longer term development of the surrounding hinterland could have an even greater impact. With due respect, the future of this area should be decided by the Far North community.

4. This project is being promulgated on the basis of growth in income and jobs for the local community. Unfortunately this has not been demonstrated with other marina developments in Northland, including at Tutukaka and Doves Bay. What hasn't been properly factored is the loss of natural amenity and its attractiveness for the multi-million dollar tourist industry in the Bay of islands. These natural values cannot be simply recovered once a project of this scale is allowed to intrude into the outer bays. What is required is an independent, comprehensive impact assessment that looks at the broader cost-benefit issues, and that will help foster informed decision making at the local level.

5. The criteria for fast tracking a project have not been met in this instance because:

- The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered. This is vitally important because of the present state of Treaty settlements in Te Tai Tokerau.
- Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
- Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture (it could serve to undermine the local fishing and marine farming industries), and
- It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991.

6. The Russell Protection Society supports the concerns of local Hapu in their role as traditional kaitiaki for the area. Waipiro Bay is an important part of the food basket or mataitai for the local community and should be accorded appropriate protection. We ask that you acknowledge their concerns by declining to fast track the proposed Waipiro Marina.

Bob Drey

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

I am a representative of the Whitley/Jamieson families and am authorised to provide this submission. Our families have had a strong connection to the Bay of Islands since 1836 & my parents have owned a property in Waipiro Bay since 1982.

I support the submission of Ngati Kuta and Patukeha hapu, as it incorporates my views.
We are united in the position of opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture, and
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991.

We seek that you **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views to be adequately considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that stage 2 also.

Regards,

lwjamieson

8 May 2025

Ngāti Torehina Ki Matakā

CIV 2017-404-572

Via email: s 9(2)(a)

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

My name is Herbert Rihari and I am one of three mandated kaikōrero for Ngāti Torehina Ki Matakā, a neighbouring hapū from the Pēwhairangi basin, who have close historical ties to the mana-whenua of the Wiapiro Bay area - Ngāti Kuta and Patukeha.

As a tribally selected kaikōrero, I am authorised to provide this written submission which ultimately seeks to endorse and support the views of Ngāti Kuta and Patukeha who are the 'ahikā' (ultimate authority and caretakers) of our interests there.

Accordingly our hapū are aligned with the position of opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture, and
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991;
5. It increases the risk of greater marine pest infestation, such as the caulerpa outbreak, from spreading exponentially to other parts of the Pēwhairangi basin and further;
6. It risks our 'kapata kai' (food pantry) being contaminated from fecal coliforms due to poor vessel management practices and protocols (which is already the cause of the caulerpa outbreak);

7. It seeks to serve an exclusive demographic of transient marine travellers who have little to zero interest in learning or investing in the people or infrastructure of the area;
8. The applicants have not bothered to meet with mana-whenua and therefore are unlikely to appreciate the unextinguished authority of mana-whenua, cemented by He Whakaputanga and further augmented by Te Tiriti o Waitangi;
9. We don't want the full restoration of Ngāti Kuta and Patukeha authority to be further suffocated because the affluent ideals and expenditure invested in the development is too great or 'unfair' to reverse.

Accordingly, we seek that you **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views and in particular the views of Ngāti Kuta and Patukeha to be adequately considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that stage 2 also.

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

We are an affected neighbouring landowner and am authorised to provide this submission.

We support the submission of Ngati Kuta and Patukeha hapu, as it incorporates our views.

We are united in the position of opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture, and
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991.

Additionally, we have resided at Parekura Inlet for more than 4 generations and we are greatly concerned that the installation of a marina requires significant dredge works, generating silt movement into Parekura Bay. One of the last pipi beds in the Bay of Islands is beside our property, and likely to be impacted. We have not been provided any substantive assessments that guarantees that this won't occur. The applicant has not undertaken any type of hydrology report.

We seek that you **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views to be adequately considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that stage 2 also.

Mauri ora,

Michelle Elboz - Resident

From Te Rūnanga ā Iwi ō Ngāpuhi,

Te Rūnanga ā Iwi ō Ngāpuhi support the hapū in their stance against this Waipiro Bay Marina Development which is being pushed through as part of the Fast Track Approval process.

We 100% support the local stance that: Waipiro Bay is a taonga, a source of identity, sustenance, and intergenerational connection. Locals cannot protect their culture, their waters, pātaka kai, and wildlife without proper evidence and inclusive decision-making.

While we acknowledge that fast-track processes can serve a purpose in enabling socially beneficial infrastructure, particularly when outcomes overwhelmingly support whanau wellbeing, such mechanisms must be used with extreme caution where environmental harm is possible.

In this instance, the proposed development is sited within both a Rāhui and a legally designated Controlled Area Notice (CAN) zone in Te Rāwhiti Inlet, an area where restrictions on boating and fishing exist to curb the spread of the invasive exotic caulerpa which poses immense risk to our various taonga species in the moana.

Media Release
Tangata Whenua launch campaign to stop Fast Track Proposal for Waipiro Bay Marina Development in Bay of Islands
Dated 1 May 2025
The fight to protect the takutai moana against the Fast Track has arrived in the Bay of Islands. Azuma Property Limited and Hopper Developments Limited Partnership has made an application to the Minister of Infrastructure to consider a fast-track application for a 250 berth marina at Waipiro Bay in the Bay of Islands.
The proposal would see a huge 250 berth marina built with retail and hospitality outlets and petrol station. There are already 62 moorings at the site.
“The application for fast track in March has blindsided our hapū and local haukāinga. The pace of the fast-track process is really overwhelming, its something we have never experienced before through the RMA” shares Shirley Hakaraia (local whenua Māori landowner and hapū kaikōrero).
“Our moana carries the mauri – the life force that connects us all. It is the heartbeat of ourwhenua, it sustains life and nurtures our identity. This mauri is under threat,” said Kohu Atatu Hakaraia (Patukeha).
“This whole area has been a kai basket for generations, not just for our whānau, but from multiple hapū across the area.”
On top of an existing caulerpa invasion and now have a fast-track application in our rohe. There is a massive impact for us in the hapū, we do not have the resource and capacity to manage all these impacts in our rohe.

Ngāti Kuta, Te Patu Keha as local hapū of the area are launching a campaign to stop the fast-track application for the Waipiro Bay Marina.

“The fast-track process is non notified, shutting out the voice of the community from the process. As haukāinga we are going public and inviting the community and concerned landowners to join us as we fight the fast track” states Glenys Papuni.

“As hapū we are challenging the developer, we say their Economic and Research Report submitted with the proposal inflates demand and distorts data. We assert that their proposal does not demonstrate significant regional or national benefit. The proposed area lies within an aquaculture exclusion zone and undermines existing local marine industries” shares Papuni. Tangata whenua are calling on the Minister for Infrastructure Chris Bishop, Minister for Regional Development Shane Jones and Minister for Māori Development Tama Potaka to decline the fast-track application for Waipiro Bay Marina and send it back to the Resource Management Act for due process to enable our community to input.

Waipiro Bay is not just water—it is our taonga, a source of identity, sustenance, and intergenerational connection. We cannot protect our culture, our waters, our pātaka kai, and our wildlife without proper evidence and inclusive decision-making.
What action can whānau take?

Ngati Kuta ki Te Rawhiti Hapu & Rewha Reweti Whanau Claims

Wai 2768 and CIV 2017-485-352

Email: s 9(2)(a)

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

I/We represent our whanau and hapu here, living at Rawhiti in the Eastern Bay of Islands, and I am authorised to make this submission.

I/We support the submission of Ngati Kuta and Patukeha hapu, as they incorporate our views on our values, customs, and traditions.

We are united in the position of opposition that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7, relating to Treaty settlements and recognised customary rights. There is no evidence that Treaty settlements and recognised customary rights have been adequately considered.

2. It does not meet the Section 22 Referral Criteria of the Act because it is not a significant regional or national benefit development. It has presented misleading economic and research data, creating a perception that it is a development of substantial regional benefit.

3. It does not meet the Section 22 (2) (v) requirement to support primary industries, including aquaculture.

4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991. This application should be considered through the normal Resource Consenting process. This will give our wider community time to evaluate and/or support its merits.

5. Our waterways in our rohe moana are infested with Caulerpa Brachypus and Parafolia, and no solution is in sight. In the meantime, the spread of this invasive pest and any boat traffic or seabed disturbance from near or within the Waipiro marina site could be financially, environmentally, and customarily catastrophic.

6. In addition, the MACA Amendment Bill remains outstanding, and this outcome affects Ngati Kuta and Patukeha Customary Marine Title positions. Ngati Kuta, in particular, has made substantive submissions under the RMA Act to secure its traditional coastal boundaries,

fishing areas, rocks, reefs, fishing grounds and islands. The coastal areas within the Bay Of Islands, including Waipiro Bay, are a part of that test.

We seek that you **decline the application for Fast-Track Approval** so that the proposal can proceed through the standard resource consenting process. This will allow our views to be adequately considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in Stage 2 also.

Mauri ora,

Robert Willoughby

Ngati Kuta Claimants WAI 1307 and WAI 2768 (MACA)
Via email: s 9(2)(a)

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

We represent the claimants WAI 1307 and WAI 2768 for the hapu of Ngati Kuta hapu and am authorised to provide this submission.

We support the submission of Ngati Kuta and Patukeha hapu, as it incorporates [my/our] views.

We are united in the position of opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:-

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.

2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.

3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries,including aquaculture.

4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the *Resource Management Act 1991.*

5. Is ineligible pursuant to Section 18 of the Act as there is an existing treaty settlement for Ngati Kuta Patukeha hapu and existing settlement legislation that has not been considered in the existing Hauai 1993

treaty settlement and the associated *Reserves and Other Lands Disposal Act 1995*.

We seek that you decline the application for Fast-Track Approval to enable the proposal to proceed through the standard resource consenting process. This will allow our views to be adequately
Considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that stage 2 also.

Ngā mihi,
Huia Azimi - Claimant WAI 1307
for Matutaera Clendon, Robert Willougbhy, Russell Hook (Claimants WAI 1307/MACA WAI 2768)
s 9(2)(a)

Position Statement on the

Proposed Waipiro Bay Marina (FTA229)

Summary

1. This submission is written on behalf of the claimants WAI 1307 and WAI 2768 for Ngāti Kuta ki te Rawhiti who seek to uphold the mana of the tupuna of Ngāti Kuta me Patukeha hapū.

2. We submit that Ngāti Kuta and Patukeha are two distinct hapū and that whilst they hold their own hapū rangatiratanga, they hold non-severable close ties of kinship, whakapapa, whenua, moana and aspirations. We stand in opposition to the Fast Track as mana whenua of Waipiro Bay, Te Rawhiti, Ipipiri.

3. Ngāti Kuta and Patukeha hapū oppose the inclusion of the Waipiro Bay marina proposal (FTA229) in the Fast Track Approvals process on the grounds that the project is ineligible under Clause 18 of the Fast Track Approvals Act 2024. The project falls within a shared rohe moana and whenua over which Ngāti Kuta and Patukeha hold shared customary marine title, ancestral authority and recognised statutory rights. These rights are protected under Te Tiriti o Waitangi, affirmed through the WAI 1040 Te Paparahi o Te Raki inquiry and reinforced by existing statutory instruments including the *Fisheries (Notification of Tangata Kaitiaki/Tiaki) Notice 2016* and the Hauai Settlement provisions of the *Reserves and Other Lands Disposal Act 1995.*

4. Under Clause 18, Ministers must consider whether existing or future Treaty settlements are impacted. The proposed marina directly intersects with active WAI claims (WAI 1140, 1307, 1958, and 2768) and customary marine title applications by Ngāti Kuta and Patukeha. These claims include clear assertions of non-cession of sovereignty, shared customary ownership, and overlapping interests which require careful negotiation and cannot be overridden by a streamlined legislative mechanism. The land and marine area in question is within the ancestral boundaries affirmed by our tupuna and upheld in the Waitangi Tribunal.

5. The proposal further **conflicts with the Hauai Settlement,** which includes specific redress over foreshore lands and esplanade strips adjacent to Oke Bay and related coastal blocks. The intent of the Hauai Settlement was to return wahi tapu and Māori land and associated foreshore for the common benefit of the people of Aotearoa under Māori authority. The failure of the applicant to recognise this existing settlement framework renders the project **ineligible under the Act**.

6. In addition to these legal and Treaty-based grounds, the project **fails to demonstrate clear public benefit** required by the Fast Track Approvals Act. It offers **primarily private commercial gain**, while externalising **significant public, cultural, and ecological costs**. These include the **biosecurity threat of invasive, exotic Caulerpa**, disruption to the Te Pēwhairangi Marine Mammal Sanctuary, and the desecration of mahinga moana kai and wāhi tapu that are fundamental to the mana, identity, and obligations of Ngāti Kuta and Patukeha as mana i te whenua, mana i te moana, and hunga tiaki.

7. To proceed without resolving these matters would be a breach of both statutory and Treaty obligations. We therefore submit that the Waipiro Bay marina proposal is **ineligible** and **must be removed from the Fast Track Approval process immediately**.

8. We expand further on our grounds for ineligibility in sections below.

Grounds for Opposition 1: Ineligibility – Customary Marine Title and Treaty Interests

9. We consider that the Waipiro Bay marina proposal is **ineligible for consideration under the Fast-track Approvals Act 2024**, pursuant to **Clause 18**, as it fails to account for the **shared customary marine title and customary native title** held jointly by **Ngāti Kuta and Patukeha**.

10. Our hapū have maintained continuous occupation and exercise of kaitiakitanga over the area in question, with **customary rights affirmed at the time of He Whakaputanga and Te Tiriti o Waitangi**. We are two hapū with **indivisible shared interests** in this rohe moana and rohe whenua, and we reject any attempt to separate or diminish those rights for the purposes of project development or Treaty negotiation. The area forms part of our ancestral takiwā and has been held collectively through **whakapapa, raupatu, and intergenerational ahi kā**. As mana i te whenua, ahi ka roa, we know this area intimately and are active in our tiaki of it (Figure 1 -map).

11. We further submit that this proposal is **in conflict with the future Treaty settlement process** being pursued by Ngāti Kuta and Patukeha through the **Te Paparahi o Te Raki Inquiry**, and our active WAI claims (WAI 1140, 1307, 1958, and 2768). These claims assert **Māori customary land and marine title** within the project area and are grounded in evidence presented to the Waitangi Tribunal and historical narratives passed down through our tupuna.

12. Importantly, the findings of the **Stage 1 WAI 1040 report** concluded that **Ngāpuhi never ceded sovereignty**. Ngāti Kuta and Patukeha have never agreed that kāwanatanga may override our tino rangatiratanga or apply legislation to our marine territories without consent. Any development advanced under the Fast-track Approvals Act in this context would be inconsistent with the principles of Te Tiriti and incompatible with the mandate process Ngāti Kuta and Patukeha are currently engaged in.

13. The **area of interest** for Ngāti Kuta me Patukeha is historically recognised as **raupatu land**, held jointly following the taking of land from Ngare Raumati in the aftermath of the deaths of Te Aupauro and Whakahoe around 1826. This was land gained through bloodlines and combat, reaffirmed through whakapapa ties and enduring kinship. Our customary marine title over Waipiro Bay is inseparable from that history.

14. This is supported by the testimony of Moka Puru, Rangatira of Patukeha and claimant in WAI 1140, who provided detailed evidence of our boundaries and authority. He described the region stretching:

> "Kei Taupiri ki te tonga, Anga ki Motu Kōkako ki te marangai, Anga atu ki Tikitiki ki te hauraro, Hoki atu ki Tapeka kei te hauauru..."
> *(From Taupiri in the south, to Motukōkako in the east, Tikitiki to the north, and Tapeka to the west.)*

15. These boundaries were not simply geographical but **sacred knowledge gifted by our ancestors** to be held in trust by future generations. Moka Puru also identified **Rewiri Tarapata**, a tupuna of Ngāti Kuta, as the one to whom Waipiro Bay and the surrounding lands were entrusted. These lands remain under the guardianship of Tarapata whānui and the broader hapū collective of Te Rawhiti.

16. The evidence confirms that **Waipiro Bay sits within our shared rohe moana**, as defined both in whakapapa and in claim documentation. These customary rights and Treaty interests make the project **ineligible under Clause 18**, and any attempt to progress it through Fast-track without recognition of these matters would constitute a breach of the Crown's legal and constitutional obligations.

Grounds for Opposition 2: Ineligibility – Existing Settlement - 1993 Hauai Settlement

17. We submit that the Fast Track application of Waipiro Bay is ineligible pursuant to Clause 18 of the *Fast Track Approvals Act* as this project has failed to consider the obligations arising under our existing Treaty of Waitangi Settlements and customary rights recognised under the *Marine and Coastal Area (Takutai Moana) Act 2011*.

18. The Hauai Settlement as filed by George Hakaraia and Matutaera Clendon on behalf of themselves and the other Trustees of the Hauai Trust was filed in respect of land known as Hauai 2DIC, 2D2 and 2D3 and the beneficiaries of the Hauai Trust and/or the beneficial owners of the Hauai Trust Lands.

19. That settlement involves redress pursuant to WAI 200 as filed in 1991 for grievances that were occasioned in the 1970s.

20. However, in furtherance of the grievances faced at Hauai, in 2005, Ngāti Kuta hapū filed a Statement of Claim under the Te Paparahi o te Raki Inquiry for historical grievances occasioned by kawangatanga against the hapū of Ngāti Kuta.

21. At that time, the Crown did not raise objections to Hauai being included in the Te Paparahi o Te Raki Inquiry and as such, Ngati Kuta hapu assert that they are eligible for further redress pursuant to any future treaty settlement.

Statutory Obligations

22. Ngāti Kuta and Patukeha's mana motuhaketanga in Te Pēwhairangi is supported by statutory obligation as well as not only by ancestral and constitutional authority - notably:
    - The settlement legislation relevant to the Hauai Settlement is *Reserves and Other Lands Disposal Act 1995* No 54 (as at 01 August 2020), Public Act – New Zealand Legislation [1];
    - Gazetted customary authority under the Fisheries Notice 2016 (Notification of Tāngata Kaitiaki/Tiaki for Area/Rohe Moana of Ngāti Kuta-Patukeha

[1] This section relates to all the piece of land comprising 25.1180 hectares, more or less, being Hauai 2D8 Block, situated in Block XV, Bay of Islands Survey District, and being all the land comprised and described in *Gazette* Notice B. 138640.1 (North Auckland Registry) (*New Zealand Gazette*, 1982, page 3627) (M.L. Plan 15060).

The Hauai Settlement 1993

1 Short Title

This Act may be cited as the Reserves and Other Lands Disposal Act 1995.

Hauai land claim

2 Oke Bay Scenic Reserve

(1) The reservation of the land described in subsection (5) as a reserve under the Reserves Act 1977 is hereby revoked.

(2) The land described in subsection (5) is hereby vested in the trustees of the Hauai Trust for an estate in fee simple and, subject to subsection (4) and to section 3, shall be held by those trustees on the same trusts as those on which that land was held immediately before the Crown acquired that land from the trustees of the Hauai Trust.

(3) The land described in subsection (5) shall be deemed to be Maori freehold land within the meaning of the Maori Land Act 1993.

(4) Nothing in section 24 of the Conservation Act 1987 shall apply to the vesting, by subsection (2) of this section, in the trustees of the Hauai Trust of the land described in subsection (5) of this section, but, subject to section 3 of this Act, a strip of land 20 metres wide extending along the foreshore of the land described in subsection (5) of this section shall be held by the trustees of the Hauai Trust as a Maori reservation within the meaning of the Maori Land Act 1993 for the common use and benefit of the people of New Zealand.

(5) This section relates to all the piece of land comprising 25.1180 hectares, more or less, being Hauai 2D8 Block, situated in Block XV, Bay of Islands Survey District, and being all the land comprised and described in *Gazette* Notice B. 138640.1 (North Auckland Registry) (*New Zealand Gazette*, 1982, page 3627) (M.L. Plan 15060).

(6) For the purpose of this section, **foreshore** means such parts of the bed, shore, or banks of a tidal water as are covered and uncovered by the flow and ebb of the tide at mean high-water mark.

3 Wahi tapu site

(1) Notwithstanding section 2, the piece of land described in subsection (3), which is a wahi tapu site and which would otherwise be held by the trustees of the Hauai Trust pursuant to that section shall be held by the trustees of the Hauai Trust as a reservation for the protection of wahi tapu.

(2) Notwithstanding section 2, a piece of land 3 metres wide, adjacent to but around the landward side of the wahi tapu site to which this section relates, shall be held by the trustees of the Hauai Trust as a walkway for the general public.

(3) The wahi tapu site to which this section relates is all that piece of land containing 6800 square metres, more or less, being part Hauai 2D8 Block, situated in Block XV, Bay of Islands Survey District; as shown marked "A" on SO Plan 66958.

5 Revocations

(1) The Proclamation by which the land described in section 2(5) of this Act was declared to be Crown land subject to the Land Act 1948, which Proclamation was published in the *Gazette* of 7 December 1978 at page 3344, is hereby revoked.

(2) The following notices, namely,—

(a) the notice by which the land described in section 2(5) of this Act was set apart, pursuant to the Land Act 1948, as a reserve for recreation purposes, which notice was published in the *Gazette* of 11 April 1979 at page 1095; and

(b) the notice by which the Bay of Islands Maritime and Historic Park Board was, under the Reserves Act 1977, appointed to control and manage, as a reserve for recreation purposes, the land described in section 2(5) of this Act, which notice was published in the *Gazette* of 18 October 1979 at page 3021; and

(c) the notice by which the land described in section 2(5) of this Act was, under the Reserves Act 1977, declared to be classified as a reserve for scenic purposes and to be thereafter known as the Oke Bay Scenic Reserve, which notice was published in the *Gazette* of 4 November 1982 at page 3627,—

are hereby revoked.

L Following subsequent negotiations the parties have now agreed to settle the claim. As part of that settlement the Crown has introduced legislation vesting Hauai 2D8 Block in the Hauai Trustees and vesting Felix Farm in the Crown. This legislation also:

i removes the reserve status of the Hauai 2D8 Block;

ii provides that section 24 of the Conservation Act (which requires the reservation of a marginal strip when land is disposed of by the Crown) shall not apply to the vesting of Hauai 2D8 Block in the Hauai Trustees but that subject to sub-paragraph (iii) of this paragraph, an area equivalent to that otherwise covered by a marginal strip shall be held by the Hauai Trustees as a Maori reservation for the common use and benefit of all New Zealanders;

iii excludes a wahi tapu area from the Maori reservation for the common use and benefit of all New Zealanders referred to in sub-paragraph (ii) of this paragraph and provides that the wahi tapu area is to be held by the Hauai Trustees as a reservation for the protection of wahi tapu;

iv preserves public access along the coastline of Hauai 2D8 Block by providing that a strip of land three metres wide, adjacent to, but around the landward side of the wahi tapu site referred to in sub-paragraph (ii) of this paragraph is to be held by the Hauai Trustees as a walkway for the general public.

23. Pursuant to clause 2 of the *Reserves and Other Lands Disposals Act 1995*, the reservation known as Oke Bay Scenic Reserve was vested in the trustees of the Hauai Trust and the previous reserve status under the *Reserves Act 1977* was revoked by Clause 5.

24. The purpose of the *Fast Track Approvals Act 2024* pursuant to Clause 10 therein, outlines which approvals are eligible for the fast-track process. It applies to projects requiring multiple approvals under various Acts like the *Resource Management Act 1977, Wildlife Act*, and others. Specifically, it allows for a single application to cover multiple approvals instead of separate applications under each relevant Act. The project owner applies to joint Ministers, who can then refer the project to an expert panel.

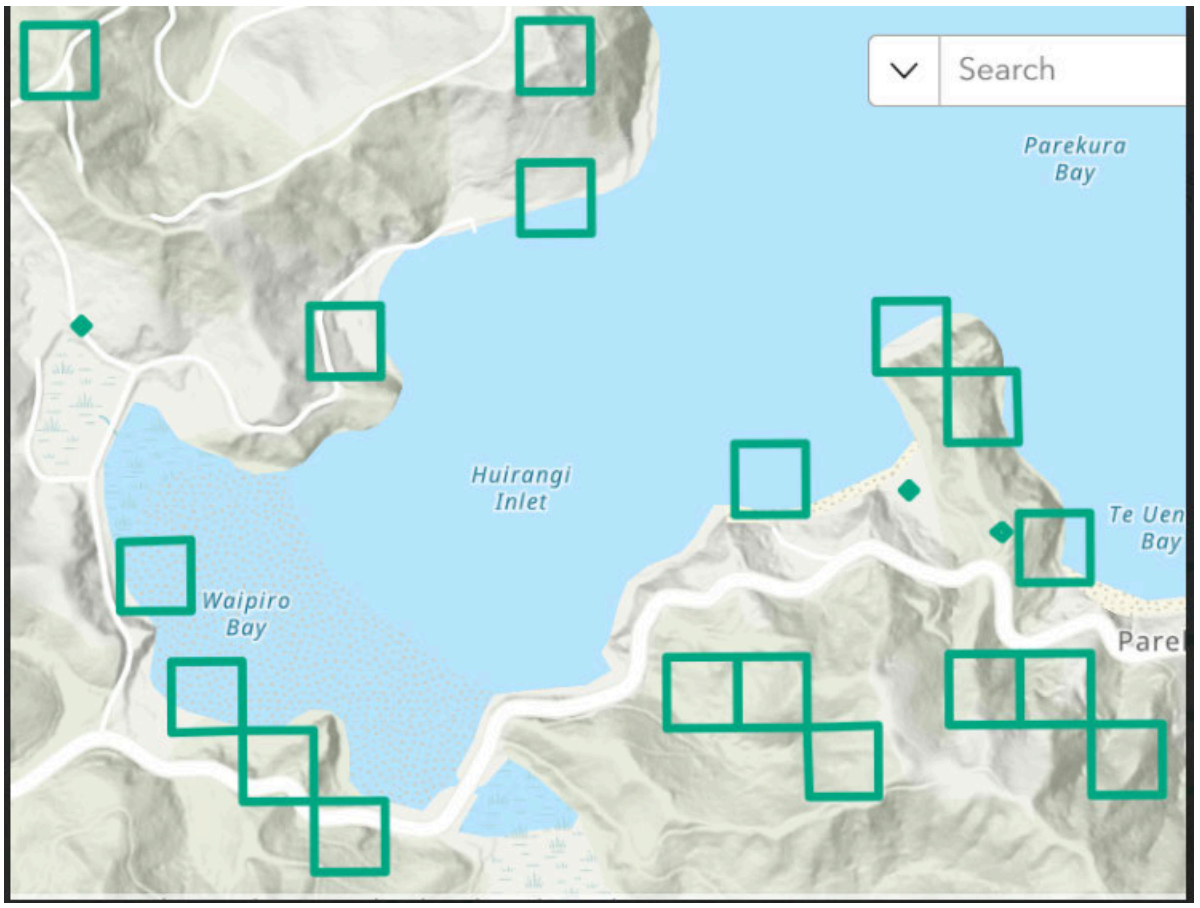

25. We submit that the *Reserves Act 1977* has been revoked and replaced by the *Reserves and Other Lands Disposals Act 1995* pursuant to the existing settlement obligation which renders the project ineligible pursuant to clause 18.

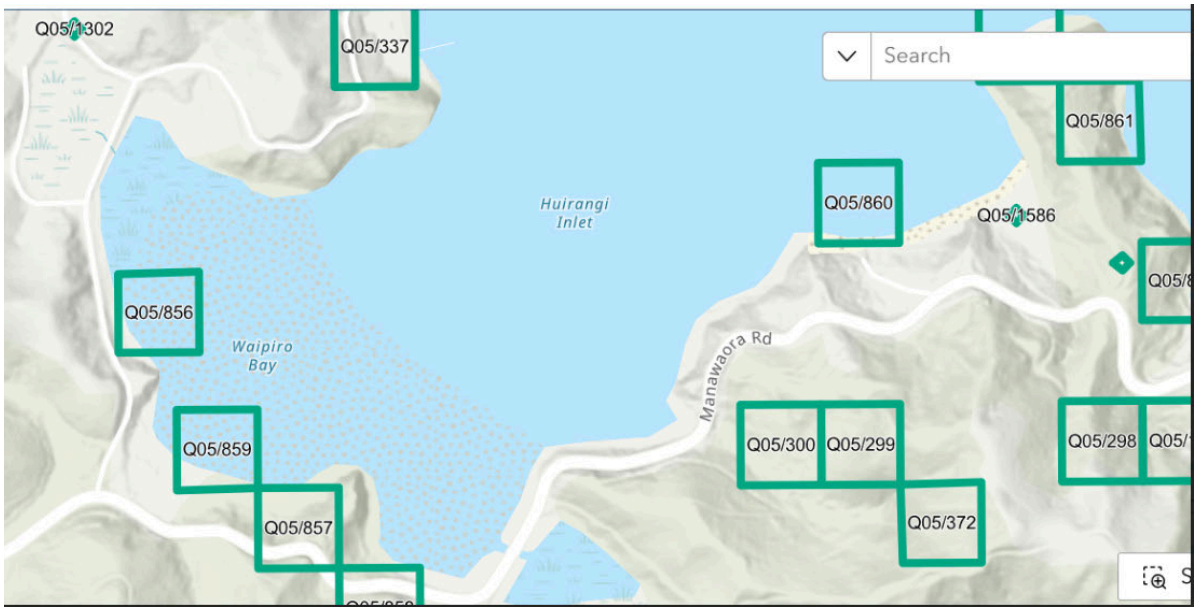

26. The likely return of esplanade, wahi tapu and/or sections at Waipiro Bay under claim pursuant to the future treaty settlement as per WAI 1307 and WAI 1140, will likely resemble the manner in which Hauai has been returned, that is, as -esplanade returned as Māori reservations adjacent to the

foreshore to service the common use and benefit of the people of New Zealand.

27. The recorded archeological sites surrounding the proposed site of Waipiro Bay Marina are as follows. There are identifiable wahi tapu sites surrounding this development also as identified in diagrams marked B.

28. 

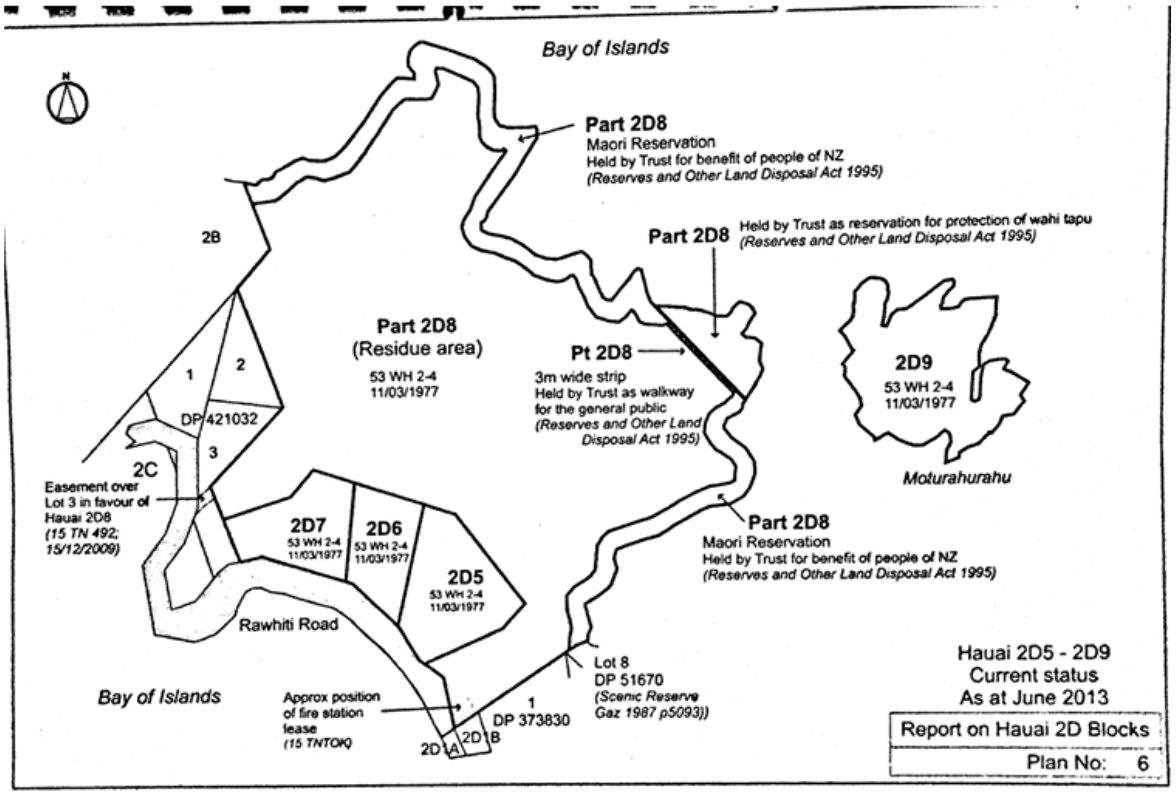

29. This marina therefore seeks to privatise and restrict the public use of the marginal strips within Te Rawhiti disregarding provisions of the Conservation Act, 1987 section 4A with respect to marginal Strips. In doing so, they remove the utility and enjoyable access of the beachfront from the use of all New Zealanders.

30. Section 3 of the Act, in the Hauai settlement found accordingly that:-

"a strip of land 20 metres wide extending along the foreshore of the land described … was to be held by the trustees of the Hauai Trust as a Māori reservation within the meaning of the Māori Land Act 1993 for the common use and benefit of the people of New Zealand."

31. The strip of land described at Hauai for that settlement is depicted below:-

32. The 20 metre strip referred to in said legislation therefore clearly refers to the publicly owned land along all waterways and coasts in Te Rawhiti (referred to colloquially as the 'Queen's Chain') including Waipiro Bay.

33. The marina is ineligible pursuant to clause 18 (c) as they therefore have failed to consider:-

"the relevant principles and provisions in those Treaty settlements, including those that relate to the composition of a decision-making body for the purposes of the Resource Management Act 1991"

34. However, of more importance, the project fails to acknowledge the customary nature of such an esplanade as adjacent to wāhi tapu, and the significance it holds for Ngāti Kuta me Patukeha.

35. We reference the recent heritage listing of Te Araaka trail as adjacent to the Hauai blocks impacted by the Hauai Settlement 1993, which demonstrates the cultural significance of Oke Bay and which attracts the provisions of Heritage New Zealand Pouhere Taonga Act 2014.

36. We submit that Waipiro is not dissimilar in its cultural heritage appeal and will likely also fall under similar provisions of that Act once returned to Māori.

37. Oke Bay holds several species of fish including Tarakihi grounds which are of significance to the hapū of Ngāti Kuta Patukeha and which are covered under the Hauai settlement.

38. A kuia of Ngāti Kuta, Enfidaville Titore, recites:-

> *"When the tide goes out, fish don't swim against the sea current. When the tide comes in, the fish go out to the open sea."*

39. The significance of the finding in the Hauai settlement necessitates that the land adjacent to the esplanade, and the foreshore up to high water mark as connected to the customary rights of Ngāti Kuta hapū extend into their customary marine title which envelops the entirety of the rohe Ngati Kuta me Patukeha.

40. We note the revocation provided for in the Reserves and Disposals Act 1995 and the intention therein whereby it was clear that there was a direct intention to remove the Bay of Islands Maritime and Historic Park Board being appointed to control and manage the reserve for recreation purposes.

41. The scope and purpose of this marina directly contravenes the intention of the Hauai Settlement legislation as relevant to the existing and future treaty settlements and as such, under FastTrack, this project should be deemed ineligible.

Grounds for Opposition 3: Gazetted Customary Authority

42. Ngāti Kuta and Patukeha are recognised Tāngata Kaitiaki/Tiaki under the *Fisheries (Notification of Tāngata Kaitiaki/Tiaki for Area/Rohe Moana of Ngāti Kuta-Patukeha) Notice 2016*, and consequently hold statutory authority and obligations for the protection and management of customary fisheries in the rohe moana encompassing Waipiro Bay. The proposed marina development (FTA229) poses a direct and material threat to these customary

rights, which are guaranteed under the *Fisheries Act 1996* and grounded in tikanga Māori. These rights are not aspirational—they are legally recognised and operational.

43. The *Fast-track Approvals Act 2024* obliges Ministers and expert panels to act consistently with the principles of Te Tiriti o Waitangi, and to properly consider any adverse impacts on existing statutory rights. Proceeding with this project in the absence of meaningful engagement with Ngāti Kuta and Patukeha—as mana whenua and holders of gazetted authority—constitutes a breach of these obligations. The proposal will irreversibly compromise our mahinga kai, desecrate wāhi tapu, and obstruct our ability to exercise Kaitiakitanga. These are not abstract values—they are legally enshrined responsibilities with inter-generational significance.

Grounds for Opposition 4: Failure to meet Purpose of the Act

44. The *Fast-track Approvals Act 2024* is designed to accelerate projects that deliver **genuine public benefits of regional or national significance**. The proposed Waipiro Bay marina does not meet this threshold. Instead, it reflects a development model centred on **private gain**, with **minimal public utility** and **significant public risk**.

Primarily Private Benefit

45. This marina is being advanced by private developers (Azuma Property Ltd and Hopper Developments) for the exclusive use of recreational boating clientele. Berths are expected to be priced beyond the reach of the general public, and there are **no assurances of open public access**, equitable fee structures, or any community ownership arrangements. The economic returns—through asset appreciation and berth revenues—will be largely **captured by private investors**, not the wider community.

Weak Public Case

46. The project does not respond to any known public infrastructure shortfall. Nearby facilities, such as Opua Marina, are **underutilised**, with no independent demand study provided to justify additional capacity. The supposed benefits to regional tourism and employment are **generalised and unsupported**, lacking the evidence expected for a project of claimed national significance. Proposed public features—such as a boat ramp and trailer parking—are **minor and incidental**, offered only as accessories to an otherwise exclusive private development.

High Public and Environmental Cost

47. The true costs of this project will be **borne by the public**, iwi, and the environment. The location sits within a **marine mammal sanctuary**, and the risks of disturbance to breeding habitat and migratory species are considerable. The threat of further incursion of exotic **Caulerpa** —already subject to emergency biosecurity controls, is acute, and the increased boat traffic associated with this marina significantly elevates that risk. Should the incursion worsen, it is the **public** - not the developer, who will shoulder the cost of monitoring, containment, and ecosystem restoration. Likewise, the potential desecration of **wāhi tapu** and the loss of **customary gathering rights** represent profound cultural costs, which have not been accounted for.

Contradiction of Legislative Purpose

48. The Fast Track Approvals Act is intended to support projects that deliver clear public value—such as housing, renewable energy, climate resilience, or

critical infrastructure. A luxury marina for high-income users does not meet that intent. To allow such a project to bypass standard consent scrutiny is to **undermine public trust** and set a dangerous precedent for the **privatisation of coastal commons** under the guise of economic development.

49. We therefore call for the immediate removal of the Waipiro Bay marina proposal from the Fast-track process. It does not meet the statutory or moral threshold required, and its continuation through this mechanism would breach both the Fisheries Act, the Hauai Settlement 1993 and the Crown's Tiriti obligations to Ngāti Kuta and Patukeha as Kaitiaki of this Taonga Tuku Iho.

Conclusion

50. For all the reasons set out in this submission, the Waipiro Bay marina proposal must be deemed **ineligible** under the Fast-track Approvals Act 2024. The application fails on multiple statutory grounds, including:

    a. the existence of **shared and indivisible customary marine title** and ancestral rights held by Ngāti Kuta and Patukeha;

    b. its intersection with **active and unresolved Treaty claims**, including WAI 1140, WAI 1307, WAI 1958, and WAI 2768;

    c. its failure to account for the **existing Hauai Settlement** and its statutory implications under the Reserves and Other Lands Disposal Act 1995;

    d. the **gazetted recognition** of Ngāti Kuta and Patukeha as Tāngata Kaitiaki/Tiaki under the Fisheries Act 1996; and

    e. its inability to demonstrate the **public benefit** required by the Act, in contrast to the profound cultural, environmental, and economic costs it would impose.

51. This is not a project of national significance. It is a commercial venture that seeks to privatise a shared taonga under the guise of development. To fast-track such a project would not only undermine the integrity of the Act — it would violate the Treaty partnership, displace customary authority, and further burden our environment and communities.

52. We therefore reaffirm our position: **the Waipiro Bay marina proposal must be withdrawn from the Fast-track process.**

Te Whakaaetanga
Tribal Collective
Via email: s 9(2)(a)

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

My name is Herbert Rihari and I am the Chair of a tribal collective Trust called Te Whakaaetanga.

I write to you today on behalf of our collective and affiliate hapū - Ngāti Kuta, Patukeha, Ngāti Torehina Ki Matakā and Ngāti Manu me ngā hapū rīriki - Te Uri o Raewera and Te Uri Karaka.

As our Te Whakaaetanga Trust (TWT) Chair, I have been asked and authorised to provide this written submission which ultimately seeks to endorse and support the views of Ngāti Kuta and Patukeha who are the mana-whenua and 'ahikā' (ultimate authority and caretakers) of our collective interests there.

Accordingly TWT hereby provide this submission, on behalf of our affiliate hapū, supporting the position of opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture, and
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991;
5. Ngāti Kuta and Patukeha kuia and kaumātua have traditional marine practices which are at risk of being threatened by the marina and the presentation and understanding of those practices require deeper discussion and consultation.
6. Pēwhairangi basin does not have a need for another marina and instead, investment should be made toward 'protection' mechanisms and practices such as stronger vessel monitoring of international sea faring crafts. These practices should be developed and introduced before any new marinas are considered. Why would you create more opportunity for marine pests to be introduced to our shoreline?

7. The ebb and flow of Waipiro Bay creates its own eddy where, over time, sediment build up has occurred and is likely to increase and the presence of a marina will only expedite that increase unless dredging is practiced which will only add further disturbance and threat to the ecosystem.
8. The applicants have not bothered to meet with mana-whenua and therefore are unlikely to appreciate the unextinguished authority of mana-whenua, cemented by He Whakaputanga and further augmented by Te Tiriti o Waitangi;
9. We don't want the full restoration of Ngāti Kuta and Patukeha authority to be further suffocated because the affluent ideals and expenditure invested in the development is too great or 'unfair' to reverse.

Accordingly, we seek that you **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views and in particular the views of Ngāti Kuta and Patukeha to be adequately considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that stage 2 also.

Mauri ora,

Herbert Rihari - Trust Chair

Te Whakaaetanga Trust

Northland REGIONAL COUNCIL
Te Kaunihera ā rohe o Te Taitokerau

8 May 2025

Hon Chris Bishop

By email: s 9(2)(a)

Tēnā koe Minister Bishop,

The Northland Regional Council (council) would like to reiterate its concerns with elements of the Fast Track Approval Act 2024 (FTA) – these concerns are becoming increasingly apparent as prospective referral and listed projects are being advanced in Te Taitokerau.

For your information, we attach the council submission on the Fast Track Approvals Bill dated 19 April 2024. A summary of the concerns raised in this submission are provided below:

- The FTA constrains iwi and hapū participation in decision making by failing to provide adequate provision for Māori rights and interests and cuts across the principles of the Treaty of Waitangi. This risks ill-informed decisions due to an inability for tangata whenua to promote protection of their rights and interests.

- While council acknowledge the consultation required for referral applications (in section 11 of the Act), consideration of projects for referral are only required to demonstrate how the purpose ho of the FTA will be achieved. . This standard creates the prospect that almost any project with a large enough scale could pass the test of meeting the purpose, despite the outcome of consultation.

  That issue is exacerbated by the limited subsequent opportunities for tangata whenua to provide comments on substantive applications once these are before an expert panel (noting under section 53 this is limited to post settlement governance entities, Marine and Coastal Area Act claimants/rights holders and hapū with mana whakahono-a-rohe agreements).

  Council is particularly concerned that s53 of the FTA creates a major gap in Northland where we have around 200 hapū who would have very limited opportunity to participate in decision making that affects their interests because they do not meet the criteria set out in the FTA as it relates to eligibility to provide comment.

- The lack of balance in the purpose of the FTA (section 3) that effectively elevates infrastructure and development projects (assuming significant regional or national benefit) over environmental, social, cultural, or economic concerns – meaning projects that have significant adverse impacts are open to being approved provided significant benefits are demonstrated.

- The eligibility of projects that are fully or are in part prohibited activities under the district or regional RMA plans for referral and consideration under the FTA – which cuts across robustly developed local planning regimes.

- The significant risks created by the decision-making process for referred activities caused by a lack of independent expert consideration for project applications and uncertainty over the level of scrutiny applied in decisions on applications for referral to the fast track process.

- The timeframes in the FTA are also likely to be a concern for both councils and tangata whenua.

As expected, these concerns with the FTA process are starting to manifest in real terms – an example is the referral process underway for a marina at Waipiro Bay in the Bay of Islands. An overview of the proposal and local tangata whenua views on it were presented to Te Ruarangi[1] on 8 May 2025. This presentation highlighted the major concerns of local hapū (and many local community members) with the proposal and the FTA process. At this meeting, Te Ruarangi iwi and hapu members passed the following motions:

> *The Te Ruarangi iwi and hapū caucus support Ngāti Kuta and Patukeha in their stance in opposition of Waipiro Bay Marina fast-track approval Application 229 (as detailed in the attached memo).*
>
> *That the Te Ruarangi iwi and hapū caucus support Ngāti Kuta and Patukeha to consider requesting a Mana Whakahono-a-Rohe agreement with Northland Regional Council.*

The very limited opportunity to comment on the project prior to a referral decision being made and the risk that these comments are not given sufficient weight within the FTA are of concern.

Please do not hesitate to contact me should you wish to discuss.

Ngā mihi

Geoff Crawford
Chair/Heamana

[1] Te Ruarangi is a working party made up of representatives from Northland iwi and hapū and elected members of council.

2 May 2025

Anthea Dunning

Via email: s 9(2)(a)

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

I support the submission of Ngati Kuta and Patukeha hapu, as it incorporates my views.

We are united in the position of opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture, and
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991.

We seek that you **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views and the views of the entire Eastern Bay of Islands Community to be adequately considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that stage 2 also.

07/05/2025

Christopher Bartlett

Via email: s 9(2)(a)

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

I am a member of a family with a property in Waipiro Bay, located within close proximity to the proposed Waipiro Marina.

My family have a longstanding membership with the Eastern Bay of Island Preservation Society Inc.

I support the submission of Ngati Kuta and Patukeha hapu, as it incorporates my views.

We are united in the position of opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture, and
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991.

Waipiro Bay is a pristine environment, with exceptional natural beauty. A Marina in this environment would be a visual scar, and completely out of character with both Waipiro Bay and the general area. Homes and buildings in the eastern Bay of islands are sparsely distributed, and typically quite modest. They do not dominate their surrounds. The proposed Marina is not in any way sympathetic to this area from an aesthetic standpoint.

Construction of the proposed Marina would involve considerable modification to the natural environment. The proposed level of modification is significant in the sense that once it is done, it would never be able to be undone.

Risks around fuel storage and transfer mean that there is an ongoing threat to the marine environment in the vicinity of the proposed marina. Although these risks can be managed to an extent, they can never be fully mitigated. The consequences of major leakage of fuel would be catastrophic.

There is already some Helicopter traffic in and out of Waipiro Bay. A Marina would no doubt lead to an increase in demand for this type of service. Any additional Helicopter traffic in the area would cause considerable disturbance to nearby property owners.

Road access to Waipiro Bay is not adequate for servicing the additional traffic that the proposed marina would generate. The road is a lightly sealed and narrow. Road surface deterioration is already an issue even with the relatively light traffic volumes currently experienced. Even a small increase in traffic would accelerate the decay of what is already a poorly maintained road. The safety implications of this cannot be overlooked.

Blackwater (untreated sewage) is also a concern. Although it is accepted that marinas are a 'no discharge' zone, it is equally well known that many boaties do not adhere to this. It is almost impossible to police. This is an unacceptable threat to both the local environment and to those who use the bay recreationally for swimming and other water-based activities.

We seek that you **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views to be adequately considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that stage 2 also.

Mauri ora,

Christopher Bartlett

Hon Chris Bishop
Infrastructure Minister
Parliament Buildings

Dear Minister

Letter of support for Ngati Kuta's and Patukeha's opposition to the use of the Fast Track Approvals Act to assess a proposed marina for Waipiro Bay, BOI

I am a resident of the Bay of Islands and am lucky enough to own a boat, which enables me to enjoy the wonderful scenery and anchorages here.

I wish to support the opposition by local hapū (Ngati Kuta and Patukeha) to the Fast Track Approvals Act 2024 processes, being used to assess a proposed 200+ berth marina, plus extensive car parking, within Waipiro Bay. An expert panel evaluated this project in 2024, as part of the development of the Fast Track Approvals Act 2024. The panel concluded that the application did not meet the requirements of the new legislation, for being assessed using the truncated procedures in the new Act. Nothing has changed and the proposal still does not meet the tests for the Fast Track Approvals Act processes and should be evaluated using the Resource Management Act procedures.

My reasons for supporting the use of the assessment processes in the Resource Management Act rather than the Fast Track Approvals Act process include:

1. This is a private development with minimal public benefits
2. The development primarily takes place on public land (sub-tidal and intertidal habitats) and then largely privatises that space.
3. There are notable adverse environmental impacts
4. The project is not of significant regional or national benefit (section 22 FTAA). I know from my own experience that there is really no demand for extra marina berths in the Bay of Islands. Opua Marina is much more accessible to anyone driving from Auckland than Waipiro Bay, but has discovered that the recent extension has meant that it has ended up with many unsold berths, and this is in addition to berths that existing owners can't sell. Any Bay of Islands demand for additional marina berths would come from the Kerikeri-Rangitane area, which would be a one- to two-hour trip by vehicle, including a car-ferry trip. The eastern Bay of Islands near the proposed marina has little development so there would be no local demand.
5. The area is within a controlled area notice under the Biosecurity Act, which prevents anchoring, fishing, and diving.

I have also noticed that the project proposal documents have not addressed section 6 (Matters of National Importance), section 7 (Other Matters), section 8 (Treaty of Waitangi), or section 12 (Restrictions on Use of the Coastal Marine Area) of the Resource Management Act.

I therefore ask Minister Bishop to decline the application to use the Fast Track Approvals Act to assess the proposal for a 200+ berth marina in Waipiro Bay in the eastern Bay of Islands.

Yours sincerely

Annie Hill

RICHARD FRATER

Via email :s 9(2)(a)

Dear Minister

Re: Fast-Track Approval for Waipiro Marina

I/We represent myself and family as a shared land owner of Opunga Cove and am authorised to provide this submission.

I support the submission of Ngati Kuta and Patukeha hapu, as it incorporates my

views.

We are united in the position of opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture.
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991.

This would be so detrimental to the unique area of New Zealand's National Treasure, the Bay of Islands -The BOI is already suffering hugely from over fishing and is fast heading into a rapid decline of this special and unique region . This development proposal is based on profit motivation and does nothing to preserve the special uniqueness of the area for generations to come. Simply short term thinking. It will lead to the destruction of the Bay Of Islands as we know it now and which is already under massive pressure in all areas.

We seek that you **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views to be adequately considered.

Please please do think seriously about this and do not let it proceed.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that stage 2 also.

Yours sincerely

Richard F Frater

Rose Frater

Via email: s 9(2)(a)

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

I am a member of a family of local landowners near the proposed Waipiro Marina.

I am also a member of the Eastern Bay of Islands Preservations Society Inc.

I support the submission of Ngati Kuta and Patukeha hapu, as it incorporates my views.

We are united in opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture, and
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991.

I want to formally express strong opposition to the proposed marina development in Waipiro Bay. This project, requiring substantial dredging in a regenerating coastal tidal area, is located near a Significant Bird Area—critical habitats for the Australasian Bittern and Brown Teal. Recent ecological surveys indicate declining populations of fish, shellfish, and dolphins in the Bay of Islands, largely due to increasing recreational and commercial activity. Further development will only accelerate this degradation.

Additionally, the proposed site is currently battling the invasive seaweed Caulerpa, which local groups are working tirelessly to contain. A marina with 250 additional berths and boats would exacerbate its spread, posing irreversible consequences for the region's delicate marine ecosystem.

Beyond environmental concerns, the intensification and commercialisation of this project would significantly increase boat and vehicle traffic, impacting both Waipiro Bay and the broader Bay of

Islands. The existing roading infrastructure is inadequate to support such expansion—particularly the coastal route to Russell, which is narrow, winding, and prone to slips. The inland route remains unsealed, raising further safety risks.

We seek that you **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views to be adequately considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that Stage 2 also.

Via email: s 9(2)(a)

Tena koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

I support the submission of Ngati Kuta and Patukeha hapu, as it incorporates myviews.

We are united in the position of opposition, that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture, and
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991.

I firmly believe the Eastern Bay of Islands is one the world's last pristine, unspoiled coastal environments.. When compared to Europe, the America's, Africa, Asia and Australia - none of these countries has the low population numbers that New Zealand has. We need to preserve the uniqueness that the Bay of Islands is known for internationally. This fact is what makes New Zealand world renowned. Our National Parks, incredible diverse scenery including rivers, lakes, mountains, fjords, and 15,000 kilometers of coastline (most of this coastline is undisturbed)and this is what gives our tiny,young nation a unique advantage. However as is widely known this coastline has recently been invaded by the invasion of caulerpa bought in by sea vessels from other countries. Such threats to our existing fragile waters and seabed habitat will only be exacerbated and further destroyed by allowing further marine industrial development to the seabed and surrounding waters. In such unique environments as Waipiro Bay such commercial developments as proposed by Hopper and Azuma Properties should not be allowed. There are already 2 marinas in the Bay of islands both of which can be expanded.

David Attenborough is releasing a documentary this week concerning the absolute importance of the oceans to all ecosystems on the planet earth. He notes that the ocean is more important to protect than just the earth itself. Attenborough is internationally renowned for his wildlife work. He

holds a degree in Natural Science from Cambridge university, a postgraduate degree in Social Anthropology from the London School of Economics and has 32 honorary degrees from universities worldwide.

An important point to make is that the sea should not be allowed to be owned by any one or group of people. The sea is a finite resource and once it is built on this intrusion to the natural environment will be there forever.

We seek that you **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow our views to be adequately considered.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, we request to be able to participate in that stage 2 also.

Mauri ora,

Sarah Yates

Tena koe e te Minita,

Re: Fast-Track Referral for Waipiro Marina

I am opposed to Fast-Track referral based on the following

1. The Eastern Bay of Islands has been kept free of large-scale commercial development to preserve its scenic beauty and natural value. Maintaining the bays of the eastern Bay of Islands in their natural state represents their highest and best long-term economic and ecological value to the public. Marina development in Waipiro Bay would be a permanent significant alteration of this balance primarily for the substantial benefit of the applicant and developers. Commercial development and marine infrastructure in the Bay of Islands should remain concentrated along the Western flank where the majority of the population lives and existing services are located. Opua, Pahia Russell, and Kerikeri are the logical access points to the Bay of Islands, not Waipiro Bay.

2. Providing easy access to the eastern Bay of Islands thru 200-plus marina berths and significant additional trailer boat launching facilities would further overwhelm the Eastern Bay of Islands with more users than can be safely or environmentally sustained. During the summer busy season, anchorages in the Eastern Bay of Islands already often become saturated with boats. This becomes a safety issue when storms are passing through. Completion of the proposed marina and trailer boat launching facilities would significantly exacerbate this problem, both thru the increased numbers of boats recreationally using area anchorages, and thru further restriction of the number of visiting boats that would be able to anchor in Waipiro Bay. Waipiro Bay has long been considered an important safe storm anchorage in the boating community. Perceived demand is not justification by itself for development.

3. Waipiro Bay and surrounds is rural in nature and has no proximate infrastructure and support services and insufficient local population to justify a Marina. There are no haul out and maintenance facilities provided for in the proposal, and no nearby marine services. Marine service providers would need to make a two-hour round trip from Opua to provide services. Berth holders would primarily be non-

local. Area roads are inadequate for the increased traffic, including trailer traffic, a concern that has not been substantively addressed by the applicant.

4. A Marina in Waipiro Bay would not provide significant national or regional benefits as required by Fast-Track. The primary economic benefit would be to the applicant/developers who stand to make a **$50 million profit** from the sale of marina berths at estimated average sales prices of **$80,000 to $1.2 million per berth** (based on sales and development cost estimates provided in the economic assessment prepared on behalf of the developers). This profit is made possible through the rent-free transfer of permanent seabed occupation rights without due process, including appropriate public consultation.

5. Approval would create the appearance of political "quid-pro-quo" (underlying applicant is a major National Party and Act Party political donor) for a project that does not otherwise appear to merit or qualify for Fast-Track approval.

6. The marina would not generate rates or significant other revenues to Council to offset higher costs of maintaining roads and services, placing further pressure on our Council's limited resources.

7. Waipiro Bay is in an area subject to a Controlled Area Notice due to the presence of the highly invasive Caulerpa seaweed. This Caulerpa invasion is spreading rapidly in the area. Construction of the proposed marina could interfere with eradication efforts, and the associated dredging activities could create a high risk of further spread to previously unaffected areas. Also, the marina proposal itself is a significant distraction for those who are trying to focus on addressing the local Caulerpa invasion. Efforts to eliminate Caulerpa are what needs to be fast-tracked.

8. The proposed Waipiro Bay marina includes a large area of reclaimed seabed to be used for car-parking facilities and a boat ramp. A similar fast-track application was recently denied for a proposed **Rangitane boat ramp** and carpark which was to be built on a seabed reclamation in the Te Puna Inlet. Using reclaimed seabed for purposes of a car park would represent a significant precedent in New Zealand and is not appropriate for Waipiro Bay based on the factors cited in the Rangitane decision.

9. A marina would have a negligible effect on local jobs. Tutukaka marina's wage expenditure amounts to only approximately $225,000 per annum. This is a good indicator of the minimal potential value of local job creation that the Waipiro Bay marina would provide. Also, jobs would largely be seasonal in nature.

10. Fast-track disrespects our local Northland community. Under Fast-Track, an important decision that will permanently affect the local community will be made at a national level in a manner that bypasses substantive local participation in the decision-making process and ignores existing community-based long-term regional planning efforts already in place. This type of long-term resource decision is best made under a Northland and community centric approach.

11. There is broad-based community opposition to building a marina in Waipiro Bay including opposition by local Ngati Kuta and Patukeha hapu and the Eastern Bay of Islands Preservation Society.

I also strongly support the submission of Ngati Kuta and Patukeha hapu, as it incorporates my views that the proposed Waipiro Bay Marina Infrastructure project does not meet the criteria for Fast-Track Approval because:

1. The application has not satisfied the Fast-Track Approval Act 2024, Section 7 relating to Treaty settlements and recognised customary rights. The application is void of any evidence that Treaty settlements and recognised customary rights have been adequately considered.
2. Does not meet the Section 22 Referral Criteria of the Act because is not a development of significant regional or national benefit. It has presented misleading economic and research data, creating a perception that it is a development of significant regional benefit.
3. Does not meet the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture, and
4. It is yet to appropriately satisfy Sections 8, 12 and 17 of the Resource Management Act 1991.

Please **decline the application for Fast-Track Approval** to enable the proposal to proceed through the standard resource consenting process. This will allow appropriate due-process consideration of this proposal.

Should the Minister decide to progress the proposal to Stage 2 of the FTA process, I request to be able to participate in that stage 2.

Mauri ora,

Jay Howell

07 May 2025

Ngatiwai Trust Board Resource Management Unit (RMU)
Via email: s 9(2)(a)

Tēnā koe e te Minita,

Re: Fast-Track Approval for Waipiro Marina

We, the Ngatiwai Trust Board RMU, are authorized to submit this letter. We support the submission of Ngāti Kuta and Patukeha hapū, as it reflects our views.

We collectively oppose the proposed Waipiro Bay Marina Infrastructure project, as it does not meet the criteria for Fast-Track Approval for the following reasons:The proposed Waipiro Marina project could significantly impact the Ngātiwai MACA (Marine and Coastal Area) claim in several ways:

Customary Rights: The project may infringe on the customary rights and interests of Ngāti Kuta and Patukeha hapū and Ngātiwai, as protected under the Marine and Coastal Area (Takutai Moana) Act 2011. The marina would disrupt traditional activities such as kaimoana (seafood) harvesting

Environmental Impact: The marina could lead to environmental degradation, affecting the marine ecosystem that Ngāti Kuta and Patukeha hapū and Ngātiwai relies on. This includes the spread of invasive species like Caulerpa, which could further harm the marine environment

Legal and Cultural Considerations: The project may not adequately consider the legal and cultural implications for Ngāti Kuta and Patukeha hapū and Ngātiwai. The Fast-Track Approval process might bypass thorough consultation and engagement with Ngāti Kuta and Patukeha hapū and Ngātiwai, potentially undermining our MACA claim

Resource Management Act (RMA): The relationship between the MACA and the RMA is complex. Any rights won under the MACA could be nullified by resource consents and other prioritized activities under the RMA

Overall, the proposed marina could pose significant challenges to Ngāti Kuta and Patukeha hapū

And the Ngātiwai MACA claim, affecting our customary rights, environmental stewardship, and legal standing.

The application also fails to satisfy Section 7 of the Fast-Track Approval Act 2024, which pertains to Treaty settlements and recognized customary rights. There is no evidence that these have been adequately considered.

It does not meet the Section 22 Referral Criteria of the Act, as it is not a development of significant regional or national benefit. The application presents misleading economic and research data, creating a false perception of significant regional benefit.

It does not fulfill the Section 22 (2) (v) requirement to support the Primary Industries, including aquaculture.

It has yet to appropriately satisfy Sections 8, 12, and 17 of the Resource Management Act 1991.

We request that you decline the application for Fast-Track Approval, allowing the proposal to proceed through the standard resource consenting process, where our views can be adequately considered. Should the Minister decide to advance the proposal to Stage 2 of the FTA process, we request to participate in that stage as well.

Mauri ora,

Clive Stone
Ngatiwai Trust Board RMU
