

Referral application form to use for the fast-track process

Under the Fast-track Approvals Act 2024

About this referral application

This referral application form has been approved by the Secretary for the Environment in accordance with the fast-track approvals process of the Fast-track Approvals Act 2024 (the Act). All referral applications under the Act must be submitted using this form.

We recommend you discuss your referral application and the information requirements with us before you lodge the referral application. Please contact the Fast-track support team on 0800 327 875 or email info@fasttrack.govt.nz

Please provide a general level of detail in your application; sufficient to inform the Minister's decision on the referral application.

You must use this form to apply for referral applications and complete all relevant fields, even where you provide supporting attachments that are more detailed. Include attachment or appendix numbers in the relevant fields and list the attachments in section 5 of this form.

If the required information and relevant supporting material is not provided, the application will be returned to you as incomplete.

If your application is determined to be complete, and the Ministry for the Environment (MfE) considers that your project may be capable of satisfying the assessment criteria and does not appear to involve an ineligible activity, and you have paid all related fees, charges and/or levies, then we will provide it to the Minister for Infrastructure (the Minister).

Unless the Minister decides to decline the application before doing so, the Minister will invite comments on the application from relevant local authorities, Ministers, administering agencies, identified Māori groups, owners of Māori land in the project area and any other person the Minister decides is appropriate. The Minister may also request further information from you, the relevant local authorities, or relevant administering agencies before making a decision on the referral application.

If the Minister accepts your referral application, then you may lodge a substantive application with the EPA and the substantive application may be considered by a decision-making panel.

Application fees and Cost recovery

Under the Fast-track Approvals (Cost Recovery) Regulations 2025 (the Regulations), applicants lodging a referral application are required to pay a fee (deposit) of \$12,000 (plus GST), and a levy of \$6,700 (plus GST) to the Environmental Protection Authority (EPA). The fees are set in

Schedule 1 of the Regulations. These fees must be paid before lodgement of your referral application. If the required amount is not paid the application will be returned as incomplete.

Please note the final costs payable at the referral stage may exceed the referral application fee (deposit) paid. More information about cost recovery under the Fast-track Approvals Act 2024 is available from [Fast-track approvals cost recovery process](#).

Submitting your application

You will need to submit this form through our digital Fast-track portal. You will need to receive a link to register/access the portal.

If you need any help with the form, you can call or email us:

- 0800 327 875 (0800 FASTRK) (from within New Zealand)
- email: info@fasttrack.govt.nz

How to send your completed form to us

Use the application portal – you will need to receive a link to register/access: [Fast-track website](#)

Your personal information

The Ministry for the Environment (MfE) is collecting your personal information for the purpose of administering your referral application under the Fast-track Approvals Act 2024. We will only use the information for the purposes of contacting you in relation to this application.

MfE may provide your application, or details from your application to other agencies or local authorities for the purpose of administering your referral application. If your application is accepted as complete and progresses through the referral process, the Minister may consult with other agencies and groups on your application. This will require the Minister to share the details of your application with the EPA, the Panel Convener, and those groups.

We will store your personal information securely. You have the right to access the personal information we hold about you and to ask for it to be corrected if it is wrong. If you would like to access your personal information, or have it corrected, please contact us at referrals@fasttrack.govt.nz

Official information

All information you provide with this application is subject to the Official Information Act 1982 and may be released in accordance with that Act.

Publishing your application

We intend to publish your referral application on the Fast-track Approvals website.

Any personal contact details in application documents will not be made publicly available. Please provide a copy of the application with all personal contact details redacted.

MfE may also redact certain information from publication in accordance with the Official Information Act 1992. If you think your application contains information which should be withheld, please clearly identify it and provide an explanation as to why it should be withheld.

Section 1: Applicant details

A person or persons may apply to use the fast-track process for a project. Where there is more than one person, the referral application must be lodged jointly by all of the persons who are proposed to be authorised persons for the project.

If the referral application is accepted and referred by the Minister, the person or persons who lodged the referral application will be specified as the person who is, or the persons who are, authorised to lodge a substantive application for the project.

1.1 Applicant(s) – repeat for all applicants

1.1.1 Organisation name: Brymer Farms Limited

1.1.2 NZBN (optional):

1.1.3 Contact name: Sanjil Mistry

1.1.4 Phone: s 9(2)(a)

1.1.5 Email address: s 9(2)(a)

1.1.6 Postal address (if preferred method of contact):

1.2 Agent acting on behalf of applicant (if applicable)

1.2.1 Organisation name: Barker & Associates

1.2.2 Contact name: Fraser McNutt

1.2.3 Phone: s 9(2)(a)

1.2.4 Email address: s 9(2)(a)

1.2.5 Postal address (if preferred method of contact):

1.3 Finance – Agent acting on behalf of applicant (if applicable)

1.3.1 Organisation name: Barker & Associates

1.3.2 Contact name: Fraser McNutt

1.3.3 Phone: s 9(2)(a)

1.3.4 Email address: s 9(2)(a)

1.3.5 Postal address (if preferred method of contact):

If you are making this application on behalf of the applicant, please attach evidence that you are authorised to make this application.

1.3.6 Please direct all correspondence relating to this application (including correspondence from MfE) to:

☐ Applicant(s)

If selecting Applicant and there is more than 1 person who lodged the referral application, please identify 1 person to receive all correspondence on behalf of all applicants.

☒ Agent for applicant

1.4.1 Compliance and enforcement history – repeat for all applicants

1.4.1 Have there been any compliance or enforcement actions taken against the applicant (or if the referral application is lodged by more than one person, any of those persons) under a specified Act definition for either 'compliance' or 'enforcement'?

☐ Yes – see below ☒ No – proceed next

1.4.2 If you answered yes above, please provide a summary of the relevant legislation and provisions, and any compliance or enforcement actions, and the outcome of those actions taken under the specified Act against the applicant or applicants, if the referral is being lodged jointly.

Section 2: Referral application summary

2.1 Project name

This is the name by which the project will be known publicly. For example - avoid using street addresses, place names, company names.

2.2 Project description and location

2.2.1 Provide a description of the project and the activities it involves

The project description helps us with inviting comments from relevant parties on the application, and publishing information about the application.

Brymer is a residential development that comprises circa 1,650 residential units of varying typologies, such as detached, duplexes, terraces, apartment units and retirement village units, along with a supporting mixed-use neighbourhood centre, open spaces, and infrastructure.

The residential community is underpinned by a series of design principles, which focus on creating a well-connected, legible and diverse community on Hamilton City's urban fringe. The proposed transport network, with a 20-metre wide spine road running north-to-south, is supported by local roads, cycle connections and pedestrian pathways to create an accessible and legible development. As aforementioned, a range of housing typologies and densities are proposed to meet the growing and changing needs of the housing market to ensure there are options for future residents. Each typology has been thoughtfully located, based on opportunities and constraints, with density ranging from larger lot residential (1,000m² and greater) to higher density allotments to provide for terraces and duplexes to ensure integration with the adjoining urban footprint.

In the heart of Brymer is a 0.3 hectare mixed-use neighbourhood centre that will provide a number of amenities and services to support the residential development. This mixed-use neighbourhood centre will include a number of commercial properties, café and superette. This element of the residential development has been scaled to support the density proposed, located directly adjacent to the majority of apartment building typology.

Integrated throughout the residential development are a number of open spaces that are well distributed to create a highly amenable community that will be a pleasant and enjoyable place to live for future residents. The open spaces support ecological restoration through the retention of a number of natural wetlands and riparian revegetation.

The residential development will be appropriately serviced via a robust infrastructure strategy, which includes a new pump station, wastewater discharge and treatment area, stormwater ponds, and utilisation of the existing water bores.

2.2.2 Provide a description or map of the whole project area that identifies its boundaries in sufficient detail to enable consideration of the referral application.

For example, site address(es), certificate of title(s), shape files

The site, Brymer, is situated within the Waikato District, directly adjoining the territorial boundary of Hamilton City to the west. Located on the edge of Hamilton, the site adjoins existing general residential areas to the north and east, as well as rural land to the south and west. Spatially, the site is well located to local amenities and services, including Dinsdale Shopping Centre, education facilities (Fraser High School and Aberdeen School) and public open spaces (Waiwhakareke Heritage Reserve, Hamilton Zoo and Te Kootii Park).

The site is bounded by Brymer Road to the north, the Grandview Heights and Western Heights residential suburbs to the east and Whatawhata Road/State Highway 23 to the south. The site is made up of several land parcels that together form a total area of 81 hectares. The land parcels are: Lot 3 Deposited Plan 385271; Lot 1 Deposited Plan South Auckland 87291; Lot 22 DPS 79526; Part Lot 2 DP 18355; and Allotment 365 Parish of Pukete.

A drain splits the combined site into two areas to the north and south as it aligns east to west through the middle of the site and bounding part of the site to the south.

Currently, the site predominantly comprises of lots in pasture, rural lifestyle and rural activities.

2.3 Ineligible activity

Your referral application must demonstrate that the project does not involve any ineligible activities as defined in Section 5 of the Act. Please consider each ineligible activity below and where relevant, provide the requested details.

*When providing your response below, where possible, **provide details of any parties involved, the extent of their holding and the activity relevant to their area.***

Where a project involves an activity that may be the subject of a determination under sections 23 or 24, and you are intending to seek a Ministerial determination for that activity under either section, you must still complete this section in full. Determinations under, and information required in respect of, sections 23 and 24 are covered further under 2.5 Ministerial determinations under sections 23 and 24.

If your application relates to certain mining activities below the surface of the land and meets the other relevant criteria under section 5(2) of the Act then an agreement under section 5(1)(a), (b), (j) or (k) may not be required. This should be identified under the relevant questions below, and you must provide the additional information required in respect of section 5(2) under 2.3 Ineligible activity.

2.3.1 Does the project include an activity that would occur on identified Māori land as defined in section 4 of the Act?

☐ Yes – see below ☒ No – proceed to next

a. If yes, please address the following:

- i. identify the land involved and the owner(s) of the land.
- ii. Confirm that the activity on the land has been agreed with the owners of the land and provide evidence of the written agreement; or

- A. advise whether it is proposed to seek a determination under section 23 and provide the information under 2.5 Ministerial determinations under sections 23 and 24 below; or
- B. advise whether it is proposed to rely on section 5(2) of the Act and provide the information under 2.3 Ineligible activity below.

2.3.2 Does the project involve an activity that would occur in a customary marine title area?

☐ Yes – see below ☒ No – proceed next

a. Address the following:

- i. Identify the relevant customary marine title area, who the customary marine title group is;
- ii. Provide evidence that written agreement has been obtained from the customary marine title group and provide a copy of the same; **or**
 - A. advise whether it is proposed to rely on section 5(2) of the Act and provide the information under 2.3 Ineligible activity below.

2.3.3 Does the project involve an activity that would occur in a protected customary rights area?

☐ Yes – see below ☒ No – proceed next

a. Address the following:

- i. Identify the protected customary rights area, the group who holds these rights and the nature of the protected customary right(s)
- ii. Explain your proposed activity and identify whether you consider that it would have a less than minor adverse effect on the exercise of the protected customary right(s), and briefly explain why; **or**
- iii. Advise whether you consider that your proposed activity would have a more than minor effect on the exercise of the protected customary right(s), and if so, confirm that the activity has been agreed to in writing by the protected customary rights group and provide a copy of that agreement.

2.3.4 Does the project involve an activity that would occur on:
Māori customary land; OR land set apart as a Māori reservation as defined in section 4 of Te Ture Whenua Māori Act 1993.

☐ Yes – see below ☒ No – proceed next

- 2.3.5** Does the project involve an aquaculture activity or an activity that is incompatible with aquaculture activities that would occur within an aquaculture settlement area (under section 12 of the Māori Commercial Aquaculture Claims Settlement Act 2004); or an area reserved under another Treaty settlement for the aquaculture activities of a particular group?

☐ Yes – see below ☒ No – proceed next

- 2.3.6** Provide details of the aquaculture activity or the activity that is incompatible with aquaculture and the location.

- 2.3.7** Provide details of the relevant aquaculture settlement area or Treaty settlement legislation reserving space for aquaculture and include details of the impacted parties or particular group.

- 2.3.8** Provide details on whether or not the applicant is authorised to apply for a coastal permit within the aquaculture settlement area, or area reserved under another Treaty settlement for aquaculture activities, including a copy of any such authorisation.

- 2.3.9** Does the project include an activity that would require an access arrangement under section 61 or 61B of the Crown Minerals Act 1991?

☐ Yes – see below ☒ No – proceed next

a. Provide the following information:

- i. what is the activity that would require the access arrangement; and
- ii. does the project include an activity that would occur on Crown owned land or internal waters and land of the common marine and coastal area described in Schedule 4 of that Act and provide details of the same.
- iii. If so describe how the activity meets the criteria in section 61(1A)(a-e) of the Crown Minerals Act 1991; **or**
- iv. Confirm and provide evidence that the project would not occur in an area for which a permit cannot be granted under that Act:

- 2.3.10** Does the project include an activity that would be prevented under any of sections 165J, 165M, 165Q, 165ZC, or 165ZDB (regarding the management of occupation in common marine and coastal area) of the Resource Management Act 1991?

☐ Yes – see below ☒ No – proceed next

2.3.11 Provide details about which section the project does not comply with and, if relevant, the provisions of the regional coastal plan that are applicable.

2.3.12 Does the project include an activity (other than an activity that would require an access arrangement under the Crown Minerals Act 1991) that would occur on land that is listed in Schedule 4 of this Act?

☐ Yes – see below ☒ No – proceed next

a. Provide the following:

- i. identify the activity and which clause under Schedule 4 is applicable; and
- ii. confirm whether you are seeking that the Minister make a determination under section 24, and if so, whether the determination sought relates to existing electricity infrastructure or new electricity lines and provide the information under 2.5 Ministerial determinations under sections 23 and 24 below.

2.3.13 Does the project involve an activity that would occur on a national reserve held under the Reserves Act 1977 and requires approval under that Act?

☐ Yes – see below ☒ No – proceed next

a. Address the following:

- i. identify the activity and type of national reserve under the Reserves Act
- ii. identify what approval(s) would be required under the Reserves Act.
- iii. Confirm whether you are seeking that the Minister make a determination under section 24 and if so whether the determination sought relates to existing electricity infrastructure or new electricity lines.? If so, provide the information under 2.5 Ministerial determinations under sections 23 and 24 below

2.3.14 Does the project involve an activity that would occur on a reserve held under the Reserves Act 1977 that is vested in someone other than the Crown or a local authority?

☐ Yes – see below ☒ No – proceed next

a. Address the following:

- i. identify the activity, the reserve type under the Reserves Act, and the person in whom it is vested.
- ii. provide evidence that written agreement has been obtained from the person in whom the reserve is vested and provide a copy of the same; or
- iii. advise whether it is proposed to rely on section 5(2) of the Act and provide the information under 2.3 Ineligible activity below.

2.3.15 Does the project involve an activity that would occur on a reserve held under the Reserves Act 1977 that is managed by someone other than the Department of Conservation or a local authority?

☐ Yes – see below ☒ No – proceed next

a. Address the following:

- i. identify the activity, the reserve type under the Reserves Act, and the person or body who manages the reserve.
- ii. Provide evidence that written agreement has been obtained from the person or body responsible for managing the reserve and provide a copy of the same; **or**
- iii. advise whether it is proposed to rely on section 5(2) of the Act and provide the information under 2.3 Ineligible activity below; **or**
- iv. advise whether you consider the activity falls within the scope of section 5(5) of the Act, and provide the information under 2.3 Ineligible activity below.

2.3.16 Does the project involve an activity that is:

a. a prohibited activity under the Exclusive Economic Zone and Continental Shelf (Environmental Effects) Act 2012 or regulations made under that Act?

☐ Yes – please explain ☒ No – proceed next

b. described in section 15B (Discharge of harmful substances from ships or offshore installations) of the Resource Management Act 1991 and is a prohibited activity under that Act or regulations made under it;

☐ Yes – please explain ☒ No – proceed next

c. prohibited by section 15C (Prohibitions in relation to radioactive waste or other radioactive matter and other waste in coastal marine area) of the Resource Management Act 1991

☐ Yes – please explain ☒ No – proceed next

2.3.17 Does the project involve a decommissioning-related activity as described in section 38(3) of the Exclusive Economic Zone and Continental Shelf (Environmental Effects) Act 2012:

☐ Yes – please explain ☒ No – proceed next

2.3.18 Does the project involve an activity undertaken for the purposes of an offshore renewable energy project?

☐ Yes – please explain ☒ No – proceed next

2.4 Exemptions from requirement to provide agreement

2.4.1 Mining activities under section 5(2)

The agreement of the relevant groups referred to under 3.5 Persons affected is not required for certain mining activities under section 5(2). If you think this might apply to your application, answer the questions below.

2.4.1.2 Is your application for an activity that is prospecting, exploration, mining or mining operations of Crown-owned minerals undertaken below the surface of any land or area?

☐ Yes –see below ☒ No – proceed next

2.4.1.3 Provide details of the activity and identify the owner and occupier of the land and any relevant details concerning the land or area (such as whether it is identified Māori land)

2.4.1.4 Explain the extent, if any to which your activity may be likely to cause any damage to the surface of the land or any loss or damage to the owner or occupier of the land.

2.4.1.5 Explain the extent, if any to which your activity will be likely to have any prejudicial effect in respect of the use and enjoyment of the land by the owner or occupier of the land.

2.4.1.6 Explain the extent, if any to which your activity will be likely to have any prejudicial effect in respect of any possible future use of the surface of the land, and if no such effects are anticipated, please explain why.

2.4.2 Activities on land proposed to be the subject of a land exchange

The agreement of relevant groups referred to in (subsection 5(1)(a) of the Act) is not required if section 5(5) applies. If you consider this section may be relevant to your application, complete the below.

2.4.2.1 Is the reserve on which the activity is to occur proposed to be the subject of a land exchange?

☐ Yes ☒ No

2.4.2.2 Is the reserve a Crown-owned reserve?

☐ Yes ☒ No

2.4.2.3 Are the person or persons responsible for managing the reserve in place because of a Treaty settlement?

☐ Yes ☒ No

2.4.2.4 Provide any supporting details which may be relevant for your responses to the above questions.

2.5 Ministerial determinations under sections 23 and 24

Complete this section if you wish to seek a ministerial determination under section 23 or section 24 that your project is not an ineligible activity.

2.5.1 Determination in relation to linear infrastructure on Māori land under section 23

2.5.1.1 Is your application seeking a determination under section 23 (linear infrastructure on certain identified Māori land)

☐ Yes – see below ☒ No – proceed next

Provide the following information:

2.5.1.2 Confirmation that the activity is the construction of electricity lines or land transport infrastructure (and identify which it is)

2.5.1.3 Confirmation that the above construction (or operation of) will be undertaken by a network utility operator that is a requiring authority, and that that same party is the applicant for the necessary approvals, providing details of the same.

2.5.1.4 Confirmation that the activity would occur on identified Māori land that is Māori freehold land or General land owned by Māori that was previously Māori freehold land (and identify that land)

2.5.1.5 Provide information on the rights and interests of Māori in that land

- 2.5.1.6** Provide an assessment of the effects of the activity on those Māori rights and interests and on the relevant land.

2.5.2 Determination in relation to existing electricity infrastructure under section 24(2)

- 2.5.2.1** Is your application seeking a Ministerial determination under section 24(2) (in relation to maintenance, upgrading, or continued operation of existing electricity infrastructure on certain Schedule 4 land or in a national reserve)

☐ Yes – see below ☒ No – proceed next

Provide the following information:

- 2.5.2.2** Confirmation that the activity is the maintenance, upgrading, or continued operation of existing electricity infrastructure.

- 2.5.2.3** Confirmation that the activity would occur on eligible land, as defined in section 24(3).

- 2.5.2.4** Advise whether the activity would materially increase the scale or adverse effects of the existing electricity infrastructure and provide an explanation of the same.

2.5.3 Determination in relation to new electricity lines under section 24(4)

- 2.5.3.1** Is your application seeking a determination under section 24 (the construction and operation of new electricity lines on eligible land (as defined in schedule 4 excluding land classified as a national park or listed in subsections 2, 4, 5(a), 7 or 8 of that schedule)?

☐ Yes – see below ☒ No – proceed next

Provide the following information:

- 2.5.3.2** Is the activity the construction and operation of new electricity lines? (provide any necessary details)

Would the activity occur on eligible land (and identify which category of eligible land);

- 2.5.3.3** Provide the requested information for each alternative site considered for the construction and operation of the new electricity lines:

2.5.3.4 A description of the alternative site.

2.5.3.5 A statement of the anticipated and known financial cost of undertaking the activity on the alternative site.

2.5.3.6 A description of the anticipated and known adverse effects of undertaking the activity on the alternative site.

2.5.3.7 A description of the anticipated and known financial cost and practicality of available measures to avoid, remedy, mitigate, offset, or compensate for the anticipated and known adverse effects of the activity on the alternative site.

2.5.3.8 A description of any issues (including financial cost) that would make it impractical to undertake the activity on the alternative site.

2.5.3.9 An assessment of whether it would be reasonable and practical to undertake the activity on the alternative site, considering the matters referred to above.

2.6 Appropriateness for fast-track approvals process

Here you must explain how the project meets the referral application criteria ([section 22](#)). Please consider and respond where relevant, to each question.

If the project is planned to proceed in stages, you must explain how each stage meets the referral application criteria.

If a part of the project is proposed as an alternative project, you must explain how each stage meets the referral application criteria,

2.6.1 The criteria for accepting a referral application is that the project is an infrastructure or development project that would have significant regional or national benefits. Explain how this project satisfies the criteria:

The benefits of the Brymer would be regionally, and in some cases nationally significant, as:

- The project will generate a wide range of economic benefits that will be regionally significant, including but not limited to:

Brymer Project

- o In the next fifteen years, the project will support employment levels in the region, specifically for the construction industry.

Through consenting and design, the project will generate a number of jobs, that require expertise beyond the immediate locality of Hamilton, including from the Bay of Plenty, Waikato, and Auckland. This is anticipated to be ongoing as the project moves to detailed design, particularly as this is a staged development proposal.

The number of jobs generated will then increase once construction of the project begins. Given the scale of the project, construction workers will be required from outside of the immediate locality of Hamilton, from the wider Waikato and Bay of Plenty area. As outlined in the supporting Economics Memorandum, during construction Brymer will generate approximately 4,730 full-time

equivalent jobs.

o Once operational, the project will generate long-term employment through the retirement village with associated ancillary services and the commercial node that will support ongoing economic generation. This provides diversity in employment opportunities, from aged care workers to hospitality workers.

o Once completed, the project will accommodate a range of affordable housing options that will total circa 1,650 residential units and retirement living units. With this will come, new businesses, increased employment opportunities, and increased spending within the Waikato region.

Residential

o The development of circa 1,650 residential units provides an opportunity for greater residential choice in terms of location, accessibility and typology that will support additional residential capacity and respond to the local, regional and national housing shortage. Given the current housing market, with high demand and low supply, this will provide for a range of housing typologies that are high-quality, safe and warm for a significant number of people, now and into the future.

Further to the above, in the supporting Economics Memorandum appended to the referral application, Insight Economics' analysis confirms that both Waikato District Council and Hamilton City Council is unlikely to be meeting their housing capacity obligations under the National Policy Statement for Urban Development ('NPS-UD') and for this reason, Brymer represents a substantial boost in housing supply for Waikato to support the regional and national housing shortfall. As outlined on Page 13 of the Economics Memorandum, "the 1,650 residential dwellings enabled by the proposal represent an extremely significant increase in development capacity for the purposes of the NPS-UD".

Retirement Village

o The development of circa 250 retirement living units provides essential housing for the ageing population of Waikato and New Zealand. This has a significant benefit, both regionally and nationally, as the number of residents aged 75 and over is projected to grow in the catchment over the next 30 years.

o The provision of housing specifically for the ageing population means that the general housing market is freed up for others, which directly responds on a regional and national level to the shortfall in the housing market.

- The project will generate a wide range of social and cultural benefits that will be regionally and nationally significant, including but not limited to:

o The project delivers circa 1,650 residential units and retirement living units that responds to the national housing shortage, by providing a range of housing typologies that are high quality, safe and warm for a significant number of people, now and into the future.

o Through consultation with Mana Whenua, the project will incorporate cultural values into the design to ensure the regional and national cultural narrative of Mana Whenua are reflected in the development. This may include art, and taonga, using Ngā Iwi-endorsed artists, indigenous planting schemes, and cultural naming.

- The project will generate a wide range of environmental benefits that will be regionally and nationally significant, including but not limited to:

o The project directly responds to the national risk of climate change and natural hazards through the management of flooding hazards, via the stormwater management provided by the stormwater basins, and the incorporation of measures to support the reduction of greenhouse gas emissions, such as promotion of walking and cycling.

o The project integrates effectively with adjacent ecologically sensitive areas while reintroducing biodiversity into a relatively barren landscape. The project incorporates stormwater detention devices with native plantings, contributing to a positive ecological outcome. This will support the environmental outcomes within the immediate locality, but also on a regional scale due to the location of the site to the Lake Rotokauri and Lake Waiwhakareke that are part of the Rotokauri Catchment.

o By preserving the natural wetlands where possible, the project maintains critical habitat, supports biodiversity, and safeguards natural water filtration processes to benefit the region. The inclusion of stormwater management features helps mitigate runoff, capture sediment, and facilitate bioremediation, improving water quality. Additionally, native planting enhance regional ecosystems by creating wildlife corridors, improving air quality, and moderating urban temperatures.

2.6.2 Explain how referring the project to the fast-track approvals process:

2.6.2.1 Would facilitate the project, including by enabling it to be processed in a more timely and cost-effective way than under normal processes; and

The fast-track process will enable the project to be processed in a more timely and cost-efficient manner than under the normal process, for the following reasons:

- Under the Fast-track Approvals Act 2024, expert panels will consider required approvals as a single application package, as opposed to the normal process where several applications would be required for the different activities and to different territorial authorities;
- Under the Fast-track Approvals Act 2024, public and limited notification is precluded, expert panels are only permitted to invite comments from specified persons who have a short timeframe to provide comment;
- Under the Fast-track Approvals Act 2024, timeframes are shorter and stricter than that of the normal process; and
- There is resourcing in place to process the application efficiently and certainty around timeframes for the applicant to ensure the project remains 'shovel ready'.

2.6.2.2 Is unlikely to materially affect the efficient operation of the fast-track approvals process

The applicant has a fully engaged project team who are already progressing towards a full resource consent package, hence referring this project will see the substantive application lodged in the following few months to ensure the efficient operation of the fast-track process.

2.6.2.3 Has the project been identified as a priority project in a central government, local government, or sector plan or strategy (for example, in a general policy statement or spatial strategy), or a central government infrastructure priority list?

For example – a sector plan that specifically identifies the project including details such as location.

☐ Yes – see below ☒ No – proceed next

a. Identify the plan, strategy or list (or any other relevant document).

2.6.2.4 Will the project deliver new regionally or nationally significant infrastructure or enable the continued functioning of existing regionally or nationally significant infrastructure?

☐ Yes – see below ☒ No – proceed next

a. Explain how the project will deliver this.

2.6.2.5 Will the project increase the supply of housing, address housing needs, or contribute to a well-functioning urban environment (within the meaning of policy 1 of the National Policy Statement on Urban Development 2020). If yes, explain how the project will achieve this.

Please refer to the Economics Memorandum.

2.6.2.6 Will the project deliver significant economic benefits, and if so, how?

Please refer to the Economics Memorandum.

2.6.2.7 Will the project support primary industries, including aquaculture, and if so, how?

No.

2.6.2.8 Will the project support development of natural resources, including minerals and petroleum, and if so, how?

No.

2.6.2.9 Will the project support climate change mitigation, including the reduction or removal of greenhouse gas emissions, and if so, how?

The project takes into consideration climate change, particularly through the management of flooding hazards via the stormwater management provided by the stormwater basins and incorporates measures to support the reduction of greenhouse gas emissions (such as renewable electricity generation via the solar farms and active mode transport infrastructure).

Climate change will be accounted for within the stormwater design undertaken by Maven. In particular, climate adjusted stormwater rainfall data from NIWA's HIRD V4 database, which applies NIWA's rainfall adjusted temperature projections will be utilised. This rainfall data will be used within specialised stormwater software (such as HEC RAS, HEC HMS, 12d and C3D) to simulate the potential future extreme storm events for the pre and post site conditions. The design will account for overland flows through the development to manage DxV and flooding risks to safeguard people and infrastructure against potential future extreme storm events and manage the potential effects of climate change.

2.6.2.10 Will the project support climate change adaptation, reduce risks arising from natural hazards, or support recovery from events caused by natural hazards, and if so, how?

The site is not located within proximity of the coast. The stormwater management approach for the site takes into account climate change, with flood modelling scenarios and stormwater events having been undertaken taking into account future rainfall and climate change scenarios. There are no known other natural hazards that are applicable to the site, or latent hazards that could be exacerbated through climate change.

2.6.2.11 Will the project address significant environmental issues, and if so, how?

While there are not significant environmental issues to be addressed on the site, it is considered that the project will address any significant environmental issues through best-practice design and engineering solutions.

The site is not located within proximity of the coast. The stormwater management approach for the site takes into account climate change, with flood modelling scenarios and stormwater events having been undertaken taking into account future rainfall and climate change scenarios. There are no known other natural hazards that are applicable to the site, or latent hazards that could be exacerbated through climate change. Any natural hazards and their risk can be managed through mitigation measures and design.

Climate change will be accounted for within the stormwater design undertaken by Maven. In particular, climate adjusted stormwater rainfall data from NIWA's HIRD V4 database, which applies NIWA's rainfall adjusted temperature projections will be utilised. This rainfall data will be used within specialised stormwater software (such as HEC RAS, HEC HMS, 12d and C3D) to simulate the potential future extreme storm events for the pre and post site conditions. The design will account for overland flows through the development to manage DxV and flooding risks to safeguard people and infrastructure against potential future extreme storm events and manage the potential effects of climate change.

2.6.2.12 Is the project consistent with local or regional planning documents, including spatial strategies, and if so, how?

Brymer has broader alignment with the overall growth within the Waikato, due to its proximity to the Hamilton City jurisdiction and opportunity for contiguous integration. This is developing further through ongoing consultation with Future Proof Partners.

Section 3: Project details

Remember: at this stage only a general level of detail is required, enough to inform eligibility to use the fast-track approvals process.

For construction activities, please state the anticipated commencement and completion dates.

Construction activities, initially earthworks, will commence as soon as practical once resource consent has been obtained. Detailed design will commence as soon as resource consent is issued and is expected to take six months to complete the initial stages. Once the project is underway, the timeframe to completion is anticipated to be 3-5 years.

3.1 Approvals required

Applications must specify all of the proposed approvals sought but only need to provide a general level of detail about each proposed approval, sufficient to inform the Minister's decision on the referral application.

For each proposed approval an applicant must be eligible to apply for any corresponding approval under a specified Act. For example, if an approval is for a notice of requirement under the RMA, the applicant for that approval would need to be a requiring authority.

Applications for approvals under a specified Act, as required by in [section 13\(4\)\(y\)](#), are covered below in 3.8 Specific proposed approvals.

3.1.1 Outline the approvals sought under the Resource Management Act 1991.

Waikato District Plan:

- Residential Activity [Permitted Activity];
- Commercial Activity [Non-complying Activity];
- Signage [Restricted Discretionary Activity];
- Earthworks [Restricted Discretionary Activity];
- Three Waters Infrastructure & Servicing [Restricted Discretionary Activity];
- Subdivision [Non-complying Activity]; and
- Transport Corridors [Discretionary Activity].

Waikato Regional Plan:

- Land Use Consent for Soil Disturbance;
- Land Use Consent for Culverts;
- Groundwater Take Permit;
- Discharge Permit for Wastewater onto or into Land; and
- Discharge Permit for Stormwater.

- National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health 2011:

o The site investigation confirmed that the site is considered to be a 'piece of land' under Regulation 5(7) of the NES:CS as HAIL A10 and A17 is more than likely than not to have occurred. Regulation 10 requires consent as a Restricted Discretionary Activity.

- National Environmental Standards for Freshwater Management:

o This relates to potential natural inland wetlands, with the extent to be determined, however this may relate to vegetation clearance and earthworks within or around natural inland wetlands, drainage of natural inland wetlands, and loss of natural inland wetlands.

See Attachment 2 Planning Memorandum for further detail.

3.1.2 Outline the approvals sought under the Conservation Act 1987

3.1.3 Outline the approvals sought under the Reserves Act 1977

3.1.4 Outline the approvals sought under the Wildlife Act 1953

Wildlife Act Authority for the handle, capture, relocate of salvaged lizards, and accidental kill. See Attachment 2 Planning Memorandum and Attachment 7 Ecological Memorandum for further detail.

3.1.5 Outline the approvals sought under the National Parks Act 1980

Not Applicable.

3.1.6 Outline the approvals sought under the Heritage New Zealand Pouhere Taonga Act 2014

Not Applicable.

3.1.7 Outline the approvals sought under the Freshwater Fisheries Regulations 1983

Not Applicable.

3.1.8 Outline the approvals sought under the Exclusive Economic Zone and Continental Shelf (Environmental Effects) Act 2012

Not Applicable.

3.1.9 Outline the approvals sought under the Crown Minerals Act 1991

Not Applicable.

3.1.10 Outline the approvals sought under the Public Works Act 1981

Not Applicable.

3.1.11 *Only applicable if more than one applicant:* Provide a statement of which approvals are proposed to be held by which applicant.

Not Applicable.

3.1.12 Where there are any particular eligibility requirements to apply for an above approval; identify what they are, who the relevant applicant is, and confirm that the relevant applicant meets those requirements (including providing any necessary supporting information or documentation to evidence this).

Not Applicable.

3.1.13 Are there any other types of consents, certificates, designations, concessions, and other legal authorisations (other than contractual authorisations or the proposed approvals) and you consider are needed to authorise the project (including any that may be needed by someone other than you as the applicant(s)). Provide details on whether these have been obtained.

No.

3.2 Project stages

3.2.1 If the project is planned to proceed in stages, provide:

1. A statement of whether the project is planned to proceed in stages, including:
 - a. an outline of the nature, scale and timing of the stages; and
 - b. a statement of whether you intend to lodge a separate substantive application for each of the stages.
 - i. If a substantive application is intended to be lodged for each stage, address the questions under the section (Appropriateness for fast-track approvals process) for each stage of the project

The proposed staging is outlined in the Urban Design Drawing Package.

3.3 Alternative project

3.3.1 If the project is proposed as an alternative project, provide:

1. A statement of whether a part of the project is proposed as an alternative project in itself; and
 - a. Describe that part of the project; and
 - b. Explain how that part of the project proposed as an alternative project meets the referral assessment criteria in section 22 of the Act.

Not Applicable.

3.4 Adverse effects

3.4.1 Describe any anticipated and known adverse effects of the project on the environment.

Please refer to Section 5 of the Planning Memorandum.

3.4.2 Provide a statement of any activities involved in the project that are prohibited activities under the Resource Management Act 1991, and identify the relevant prohibited activity provision.

Not Applicable.

3.5 Persons affected

3.5.1 Provide a list of the persons, groups and/or entities who you consider are likely to be affected by the project.

The list should include, as relevant, local authorities, relevant Māori groups (as set out at section 13(4)(j)(ii)-(vii) of the Fast-track Approvals Act 2024), persons with a registered interest in land that may need to be acquired under the Public Works Act 198; and if the project includes a land exchange, the holder of an interest in the land that is to be exchanged by the Crown (see Consultation requirements for referral application).

Hamilton City Council; Waikato District Council; Waikato Regional Council; Waka Kotahi; Future Proof; • Te Whakakitenga o Waikato-Tainui & Ngaati Maahanga

- 3.5.2** Provide a summary of any consultation undertaken with the above persons and/or groups who you consider are likely to be affected by the project, and any other groups required to be consulted with under section 11 of the Act, and how the consultation has informed the project.

Please refer to Section 6 of the Planning Memorandum.

- 3.5.3** List any Treaty settlements that apply to the project area and provide a summary of the relevant principles and provisions in those settlements.

The following treaty settlements apply to the geographical location of the project:

- Waikato-Tainui Raupatu 1995 Settlement.
- Waikato-Tainui Raupatu Claims (Waikato River) Settlement Act 2010.
- Ngaati Hauaa Claims Settlement Act 2014.

The Waikato Tainui Raupatu Claims (Waikato River) Settlement Act 2010 was enacted in May 2010 with the purpose of implementing co-management of the Waikato River between Waikato Tainui and the Crown for the purpose of restoring and protecting the health and well-being of the Waikato River for future generations. Through this piece of legislation, it is intended to implement the 'Vision and Strategy' for the River.

The objectives of the Vision and Strategy include the restoration and protection of the health and wellbeing of the River and the relationship of Waikato-Tainui to the river; adopting of a precautionary principle towards decisions that may result in adverse effects on the river; recognition and avoidance of adverse cumulative effects; recognition of strategic importance of the Waikato River and the promotion of improved access to the Waikato River.

The Vision and Strategy forms part of both district plans and the RPS and is given effect through the plans (district and regional) administered by regional and territorial authorities along the river. The settlement also provides for joint management agreements between Waikato-Tainui and the local authorities; participation in river-related resource consent decision-making; recognition of a Waikato-Tainui Environmental Plan provision for regulations relating to fisheries and other matters managed under conservation legislation and an integrated river management plan.

The site is located within the Waipa River catchment, via the Ohote Stream. The confluence of the Waipa River and the Waikato River is just north of Ngaruawahia township. This means that ultimately discharges from the sites will find their way to the Waipa River and eventually into the Waikato River. Best practice methodologies will be employed, designed and developed to avoid any adverse effects on these Rivers in the development and ongoing use of the land.

Waikato-Tainui Claims Settlement Act 1995

The relevant provision of this Act is that it provides 'right of first refusal' on all Residual Crown Land. As none of the landholdings is Residual Crown Land, this Act has no bearing on the application.

Ngaati Hauaa Claims Settlement Act 2014

The Ngaati Hauaa Claims Settlement Act 2014 was enacted December 2014 with the purpose of addressing the breaches of the Treaty of Waitangi and implementing an agreement and understanding moving forward. The settlement legislation includes an apology from the Crown, an agreed historical account, cultural redress as well as financial redress.

The intent of the settlement legislation is to foster a respectful and meaningful relationship between Ngaati Hauaa and the Crown and to ensure Ngaati Hauaa are involved in a constructive manner in regard to decision making and the development of land within their rohe moving forward.

Ngaati Hauaa area of interest extends westwards from the base of the Kaimai's to encompass the Te Aroha, Matamata, Morrinsville, Hamilton, Cambridge, Karapiro, Piarere and Te Poi. The western extent of their area of interest just sits to the west of the land.

Ngaati Hauaa have developed an Environmental Management Plan (EMP) which articulates the values, frustrations and aspirations of the iwi and addresses the health and wellbeing of land and waterbodies within the rohe.

The EMP expresses Ngaati Hauaa values in relation to the health and wellbeing of their lands, air, waters, wetland and fisheries, urban development within the rohe, cultural heritage and customary activities, and the use and development of Māori land including marae, urupa and papakainga. It also outlines ways to support and enhance Ngāti Hauā as tangata whenua and enhance their role as kaitiaki. The plan further specifies priority projects and expectations of consultation undertaken by others with Ngaati Hauaa.

The EMP is split into various parts, with Part 3 outlining the policies of the Plan (such as sustainable land use and development, water, wetlands, fisheries, air, cultural heritage etc and Part 4 outlining the implementation of the Plan (i.e. engagement with Ngaati Hauaa).

As noted above, best practice methodologies will be employed, designed and developed to avoid any inappropriate and/or unreasonable adverse effects.

- 3.5.4** If relevant, detail any principles or provisions in the Ngā Rohe Moana o Ngā Hapū o Ngāti Porou Act 2019 that would be invoked by the project and identify which

aspects of the application trigger or otherwise invoke these requirements.

No.

3.5.5 Will the project be located on land returned under a Treaty settlement?

☐ Yes – see below ☒ No – proceed next

3.5.6 Provide evidence of written agreement by the owners of the land returned.

3.5.7 Describe any processes already undertaken under the Public Works Act 1981 in relation to the project:

3.5.8 Provide information identifying any parcels of Māori land, marae, or identified wāhi tapu within the project area:

3.6 Legal interests

3.6.1 Provide a description of any legal interests you or any others applying, have in the land on which the project will occur, including a statement of how that affects your ability to undertake the work.

Not Applicable.

3.7 Other matters

3.7.1 Have any activities included in the project, or any that are substantially the same as those involved in the project, previously been the subject of an application or a decision under a specified Act?

Please note the term 'application' includes a notice of requirement and any other means by which a decision may be sought under a specified Act.

☒ Yes – see below ☐ No – proceed next

3.7.2 If an application has been made, provide details of the application.

A referral application was previously lodged in relation to this site for a residential development, similar to this proposal.

3.7.3 If a decision has been made, also provide the outcome of the decision and the reasons for it.

The project was not successfully referred.

3.7.4 Provide a description of whether and how the project would be affected by climate change and natural hazards:

Not Applicable.

Provide the additional details requested below as relevant to your application.

3.8 Specific proposed approvals

3.8.1 Approvals under the Resource Management Act 1991

3.8.1.1 Resource consents

If your application is seeking a consent for an activity that would otherwise be applied for under the Resource Management Act 1991, including an activity that is prohibited under the Act, provide the information below:

- An assessment of the project against any relevant national policy statement, any relevant national environmental standards and, if relevant, the New Zealand Coastal Policy Statement.

Please refer to Section 4 of the Planning Memorandum.

- Information on whether, to the best of your knowledge, there are any existing resource consents relevant to the project site to which RMA section 124C(1)(c) (existing consent would need to expire to enable the approval to be exercised) or RMA section 165ZI (space already occupied by the holder of an aquaculture permit) would apply if the approval were to be applied for as a resource consent under that Act

Not Applicable.

3.8.1.2 Resource consents where the project includes standard freshwater fisheries activities

If your application is seeking a resource consent and your project includes a standard freshwater fisheries activity, provide the information requested below:

COMMERCIAL

- If an in-stream structure is proposed (including formal notification of any dam or diversion structure), provide a description of the extent to which this may impede fish passage.

Not Applicable.

- Indicate whether any fish salvage activities or other complex freshwater fisheries activities are proposed.

Not Applicable.

3.8.1.3 *Designations*

If your application is seeking a designation or an alteration to an existing designation for which a notice of requirement would otherwise be lodged under the Resource Management Act 1991, provide the information below:

- An assessment of the project against any relevant national policy statement, any relevant national environmental standards, or, if relevant, the New Zealand Coastal Policy Statement.

Not Applicable.

3.8.1.4 *Designations where the project includes a standard freshwater fisheries activity*

If your application is seeking a designation or an alteration to an existing designation and your project includes a standard freshwater fisheries activity, provide the information requested below:

- If an in-stream structure is proposed (including formal notification of any dam or diversion structure), provide a description of the extent to which this may impede fish passage.

Not Applicable.

- Indicate whether any fish salvage activities or other complex freshwater fisheries activities are proposed.

Not Applicable.

3.8.1.5 *Change or cancellation of conditions*

If your application is seeking a change or cancellation of resource consent condition that would otherwise be applied for under the Resource Management Act 1991, provide:

- Information about whether the change or cancellation of the condition is material to the implementation or delivery of the project.

Not Applicable.

3.8.1.6 *Certificates of compliance*

If your application is seeking a certificate of compliance that would otherwise be applied for under the Resource Management Act 1991, provide:

information that demonstrates the activity that the certificate of compliance is intended to cover can be done lawfully in the location without a resource consent.

Not Applicable.

3.8.2 Approvals relating to Conservation Act 1987, Reserves Act 1977, Wildlife Act 1953, and National Parks Act 1980

3.8.2.1 Concessions

For applications seeking a concession that include a lease, answer the following:

- Will the lease be for a term (including any renewals that will, or is likely to, be more than 50 years?)
☐ Yes – see below ☒ No – proceed next
- Will the granting of the lease trigger a right of first refusal or a right of offer or return?
☐ Yes – see below ☒ No – proceed next
 - If you answered yes to both a. and b. above, provide evidence that the applicant has written agreement from the holder(s) of the right of first refusal or right of offer or return to waive that right for the purposes of the proposed lease.

3.8.2.2 Land exchanges

For applications seeking an approval for a land exchange involving conservation land, provide the details below:

- A description of both land areas proposed for exchange (for example, maps showing areas and location, addresses and legal descriptions where possible)
Not Applicable.
- The financial value of the land proposed to be acquired by the Crown
Not Applicable.
- A brief description of the conservation values of both pieces of land, including an explanation of why the exchange would benefit the conservation estate.
Not Applicable.
- If the land exchange would trigger a right of first refusal or a right of offer or return, provide evidence that the applicant has written agreement from the holder of the right of first refusal or right of offer or return to waive that right for the purpose of the land exchange
Not Applicable.
- Provide sufficient detail in respect of both land areas to confirm that no part of any land to be exchanged by the Crown is land listed in Schedule 4 or a reserve declared to be a national reserve under section 13 of the Reserves Act 1977.
Not Applicable.

3.8.3 Approvals relating to complex Freshwater Fisheries activities

If your application is seeking an approval or dispensation that would otherwise be applied for under regulation 42 or 43 of the Freshwater Fisheries Regulations 1983 in respect of a complex freshwater fisheries activity provide the information requested below:

- Whether an in-stream structure is proposed (including formal notification of any dam or diversion structure), and a description of the extent to which this may impede fish passage.

Not Applicable.

- Whether any fish salvage activities or other complex freshwater fisheries activities are proposed.

Not Applicable.

3.8.4 Approvals relating to Exclusive Economic Zone and Continental Shelf (Environmental Effects) Act 2012

If your application is seeking a marine consent that would otherwise be applied for under the Exclusive Economic Zone and Continental Shelf Act 2012, provide the information requested below:

- Any information relating to whether the Minister for Conservation is an affected person.

Not Applicable.

- If the applicant or the proposed holder of the marine consent has already applied for a consent under the EEZ Act in relation to the project, provide:

- Details of any application made;
- An explanation of any decisions made on that application; and
- Any information that Minister may consider under section 22(6) (comparison of activity against current or likely use of the area).

Not Applicable.

- Additional information (in a summary form) about compliance or enforcement action taken against the applicant or the person who is identified in the application as the proposed holder of the marine consent by the EPA under the EEZ Act.

Not Applicable.

3.8.5 Approvals relating to Crown Minerals Act 1991

3.8.5.1 *Access arrangements*

For an approval for an access arrangement that would otherwise be applied for under section 61 or 61B of the Crown Minerals Act 1991, provide:

- Information that confirms the applicant or the person identified in the application as the proposed holder of the access arrangement complies with section 59(1) and (2) of the Crown Minerals Act 1991 (which applies as if a reference to an access arrangement under that Act were a reference to an access arrangement under this Act) including;
 - Evidence that the applicant or person has provided each owner and occupier of the relevant land a notice in writing of their intention to obtain an access arrangement; and

- Evidence that the notice complies with the requirements in section 59(2) of the Crown Minerals Act, and any matters required by regulations. =

Not Applicable.

3.8.5.2 Mining permits

For an approval for a mining permit that would otherwise be applied for under section 23A of the Crown Minerals Act 1991, provide the information requested below:

- A copy of the relevant exploration permit or existing privilege to be exchanged for a mining permit that entitles the holder to mine a Crown-owned mineral.
Not Applicable.
- The name and contact details of the proposed permit participants and the proposed permit operator.
Not Applicable.
- A proposed work programme for the proposed permit, which may comprise committed work, committed or contingent work, or both.
Not Applicable.
- Evidence of the technical or financial capability of the proposed permit holder to comply with and give proper effect to the work programme.
Not Applicable.
- Information about the proposed permit holder's history of compliance with mining or similar permits and their conditions.
Not Applicable.
- The proposed date on which the substantive application is intended to be lodged (if your referral application is accepted) in accordance with section 42(11).
Not Applicable.
- If the authorised person proposes to provide information under section 37 (to the relevant chief executive), the date on which the person intends to provide that information.
Not Applicable.
- The proposed duration of the permit.
Not Applicable.

3.8.5.3 Mining permits for petroleum

If the proposed approvals include a mining permit for petroleum, provide:

- A map of the area over which the mining permit application is intended to be made, the area in which the surrender of an exploration permit or existing privileges is proposed (which must be the same area as the area over which the mining permit application is intended to be made), and the extent of the resource and reserves to which the development plan relates.
Not Applicable.

COMMERCIAL

- The resources and reserves relating to the project, estimated in accordance with the Petroleum Resources Management System.

Not Applicable.

- A high-level overview of the following:
 - the proposed field development plan;
 - the proposed date for the commencement of petroleum production;
 - the economic model for the project;
 - the proposed duration of the proposed mining permit and;
 - decommissioning plans.

Not Applicable.

3.8.5.4 Mining permits for minerals other than petroleum

If the proposed approvals include a mining permit for minerals other than petroleum, provide:

- A map of the area over which the mining permit application is intended to be made, the area in which the surrender of an exploration permit or existing privileges is proposed (which must be the same area as the area over which the mining permit application is intended to be made), and the extent of the resource and reserves to which the development plan relates.

Not Applicable.

- For minerals other than gold or silver, a report or statement confirming the ownership of the minerals targeted

Not Applicable.

- Information on whether the application will be for a Tier 1 or Tier 2 permit.

Not Applicable.

- An estimate of the mineral resources and reserves relating to the project, including a summary on acquisition of the data and the data underpinning the estimate (such as information on sample locations, grade, and geology). For a Tier 1 permit application the resources and reserves relating to the project are to be estimated in accordance with a recognised reporting code such as JORC or NI 43-101.

Not Applicable.

- An indicative mine plan.

Not Applicable.

- A high-level overview of the following:
 - the proposed mining method;
 - the proposed date for the commencement of mining and estimated annual production;
 - the economic model for the project;
 - the status of or anticipated timing for completing any pre-feasibility or feasibility studies;
 - the proposed methods for processing mined material and handling and treating waste and;
 - anticipated plans for mine closure and rehabilitation.

Not Applicable.

Section 4: Authorisation

To the best of my knowledge, the information contained in this application is true and correct.

- ☒ I confirm that I am authorised to make this application.
- ☒ I have provided a copy of the application with all contact details redacted.
- ☒ I understand that all actual and reasonable costs incurred in relation to this application by MfE, EPA and other central and local government agencies will be recovered from me in accordance with section 104 of the Act, and the Fast-track Approvals Cost Recovery Regulations 2025.

Signature:

Date: 23/05/2025

Name: Fraser McNutt

Section 5: Attachments

list any documents submitted with the application.

- Remember: include a copy of your application with oil contact details redacted.
