

Appendix B – Community Support for Kaiapoi SH1 Noise Mitigation

Project: State Highway 1 North Canterbury – Woodend Bypass Project (Belfast to Pegasus)

Application ID: FTAA-2512-1157

Submitter: Jan Vlk, [REDACTED]

This appendix contains community feedback from residents living along and near the existing SH1 corridor in Kaiapoi. The responses demonstrate that concerns regarding operational traffic noise are shared across multiple streets rather than being limited to a single property. Residents refer to reduced outdoor amenity, difficulty leaving windows open, early morning heavy vehicle noise and support for mitigation measures including noise barriers, low-noise surfacing and landscaping.

The feedback includes residents from or nearby:

- Whitefield Street
- Sneyd Street
- Epworth Street
- Bayliss Drive
- Hayson Drive
- Wyatt Street

The feedback demonstrates that the operational road-traffic noise issue is not isolated to one property. Residents have raised concerns about loss of outdoor amenity, difficulty opening windows, early-morning disturbance, and the need for practical mitigation such as noise barriers, bunds, vegetation and/or low-noise surfacing.

This material is provided to support the request that the draft designation conditions expressly include Kaiapoi residential receivers within the operational noise assessment, mitigation and monitoring framework.
