

- 13.12 Te Parawhau seeks a condition requiring that all Historic Heritage Management Plans, Archaeological Management Plans, archaeological investigation methodologies, accidental discovery protocols and any subsequent amendments be prepared in consultation with Te Parawhau and provided to the Hapū for review and comment prior to certification or implementation.
- 13.13 Te Parawhau also welcomes the invitation extended by the Expert Panel in Minute 5 to participate in a future hui, kānohi ki te kānohi, and considers that such engagement would assist the Panel in understanding the concerns raised throughout the CIA, independent expert reviews and these submissions. Te Parawhau respectfully requests the opportunity to present its comments directly to the Panel and supports any further engagement, including a site visit involving tāngata whenua and Hapū representatives, that may assist the Panel in its consideration of the proposal.
