Dear [REDACTED],

NOTIFICATION OF INTENTION TO LODGE FAST TRACK APPROVALS ACT APPLICATION

Bathurst Resources along with its joint venture partner BT Mining is seeking authorisation through the Fast Track Approvals Act (FTAA) 2024 to continue the mining of coal resources on the Buller Plateaux. The Buller Plateaux Continuation Project (BPCP) will include continued mining on the Stockton Plateau and seeking new authorisations across the Denniston Plateau including Mt Frederick South and Escarpment.

As required by Section 29(1)(aa) of the FTAA 2024, we intend to lodge our substantive application for the BPCP, that is listed in Schedule 2 of that Act. We intend to lodge our application no sooner than 10 June 2026.

To obtain further information about the BPCP please contact the project team by email [REDACTED]). Otherwise, information can be found on our website www.bathurst.co.nz.

Dear [REDACTED]

NOTIFICATION OF INTENTION TO LODGE FAST TRACK APPROVALS ACT APPLICATION

This letter is to formally advise that as required by Sections 29(1)(aa) and 29(1)(b) of the Fast-track Approvals Act 2024 (FTA) Bathurst Coal Limited, Bathurst Resources Limited, BT Mining Limited and Buller Coal Limited (together, **Bathurst**) intend to lodge a substantive application for the Buller Plateaux Continuation Project (**BPCP**) that is listed in Schedule 2 of that Act. We intend to lodge our application no sooner than 10 June 2026.

In accordance with Section 29(1)(b) of the FTA, the matters listed in Section 59(2) of the Crown Minerals Act 1991 will be provided to you ahead of lodgement of the substantive application for the BPCP.

- We confirm we have been in contact with Land Information New Zealand in relation to access arrangements required for the land it administers.

Acknowledging DOC's role as administering agency under specified Acts in the FTA, Bathurst is also applying for wildlife authorities that would otherwise be applied for under the Wildlife Act 1953, concessions that would otherwise be applied for under the Conservation Act 1987 and approvals that would otherwise be applied for under the Freshwater Fisheries Regulations 1983 for the BPCP.

We have been in discussion and provided you with copies of relevant information for the BPCP. Please do not hesitate to contact us with any questions or concerns in relation to this application.

Dear [REDACTED]

FAST-TRACK APPROVALS ACT 2024 – SECTION 29(1)(B) INFORMATION

We write further to our letter dated 11 May 2026 by which we formally notified you of Bathurst Coal Limited, Bathurst Resources Limited, BT Mining Limited and Buller Coal Limited's (together, **Bathurst**) intention to lodge a substantive application for the Buller Plateaux Continuation Project (**BPCP**) in accordance with Sections 29(1)(aa) and 29(1)(b) of the Fast-track Approvals Act 2024 (**FTA**). We provide this letter as **Appendix A** for reference.

In accordance with Section 29(1)(b) of the FTA, Bathurst provides notice of its intention to obtain access arrangements over DOC administered land as required by Section 59(1) of the Crown Minerals Act 1991 (**CMA**). We have provided draft application documentation to you throughout the course of preparing the application. We also provide further information on the matters listed in Section 59(2) of the CMA in relation to the access arrangements sought as part of the BPCP ahead of lodgement of the substantive application below. The references given are references to the BPCP FTA application to be lodged later this week.

- The land affected is as follows as specified in more detail in Section 15.4 of Chapter 15 – Crown Minerals Act Approvals – Access Arrangements of the Substantive Application:
 - Plover Stream Conservation Area;
 - Ngākawau Ecological Area;
 - Stockton Conservation Area;
 - Millerton Conservation Area;
 - Stockton Scenic Reserve;
 - Ngākawau Local Purpose Reserve;
 - Mount Rochfort Conservation Area; and

www.bathurst.co.nz

- Waimangaroa–Granity Conservation Area.
- The purposes for which the rights of access are required are for mining and mining operations as specified in the draft access arrangements and Section 15.4 of Chapter 15 – Crown Minerals Act Approvals – Access Arrangements of the Substantive Application.
- The proposed programme of work and the likely adverse effects are specified in Chapter 1 – Project Wide Overview, Chapter 6 – Assessment of Environmental Effects and Section 15.4 of Chapter 15 – Crown Minerals Act Approvals – Access Arrangements of the Substantive Application. This includes the following:
 - terrestrial and wetland ecology effects;
 - freshwater ecology effects;
 - water quality and hydrology effects;
 - landscape and visual effects;
 - historic heritage effects;
 - recreation and access effects;
 - amenity and operational effects; and
 - closure and long-term obligations.
- The compensation and safeguards against any likely adverse effects are specified in Chapter 7 – Management and Monitoring of Actual and Potential Environmental Effects of the Substantive Application. This detail has also been provided in draft application documentation through the data room. Where adverse effects cannot be avoided, Bathurst proposes remediation, mitigation, rehabilitation and measures to address residual effects. Key measures include:
 - clean-water diversions;
 - staged earthworks;
 - erosion and sediment controls;
 - selective handling and encapsulation of acid-forming materials;
 - engineered landforms;
 - active and passive water treatment;
 - progressive rehabilitation;
 - vegetation direct transfer;
 - indigenous planting;
 - fauna salvage and relocation;
 - biosecurity controls;
 - pest and weed management;
 - archaeological recording;
 - managed public access; and
 - controls for noise, vibration, traffic, lighting, dust, waste and hazardous substances.

- The types of permits held and applied for are specified in Chapter 14 – Crown Minerals Act Approvals – Mining Permits and Chapter 15 – Crown Minerals Act Approvals – Access Arrangements.
- The direct net economic and other benefits of the activities are specified in the Economic Impact Assessment prepared by AIGIS Group and peer review by Market Economics Limited and Section 6.3 of Chapter 6 – Assessment of Environmental Effects of the Substantive Application.

Please do not hesitate to contact us with any questions or concerns in relation to this application.

Yours faithfully

Dear [REDACTED]

FAST-TRACK APPROVALS ACT 2024 – SECTION 29(1)(B) INFORMATION

We write further to our letter dated 11 May 2026 by which we formally notified you of Bathurst Coal Limited, Bathurst Resources Limited, BT Mining Limited and Buller Coal Limited's (together, **Bathurst**) intention to lodge a substantive application for the Buller Plateaux Continuation Project (**BPCP**) in accordance with Sections 29(1)(aa) and 29(1)(b) of the Fast-track Approvals Act 2024 (**FTA**). We provide this letter as **Appendix A** for reference.

Bathurst seeks access arrangements in relation to Crown land administered by Land Information New Zealand within the area authorised by Minerals Exploration Permit 61157 held by Buller Coal Limited for the BPCP.

There are also several parcels of unallocated Crown land within the proposed Stockton Coal Mining Licence replacement mining permit boundary. Bathurst is currently working with an accredited supplier to finalise land status reports which have identified LINZ as the likely administering agency.

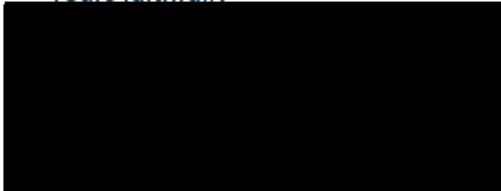

In accordance with Section 29(1)(b) of the FTA, Bathurst provides notice of its intention to obtain access arrangements over LINZ administered land as required by Section 59(1) of the Crown Minerals Act 1991 (**CMA**). We have provided draft application documentation to you throughout the course of preparing the application. We also provide further information on the matters listed in Section 59(2) of the CMA in relation to the access arrangements sought as part of the BPCP ahead of lodgement of the substantive application below. The references given are references to the BPCP FTA application to be lodged later this week.

- The land affected is specified in Section 15.4 of Chapter 15 – Crown Minerals Act Approvals – Access Arrangements of the Substantive Application.
- The purposes for which the rights of access are required are for mining and mining operations as specified in the draft access arrangements and Section 15.4 of Chapter 15 – Crown Minerals Act Approvals – Access Arrangements of the Substantive Application.
- The proposed programme of work and the likely adverse effects are specified in Chapter 1 – Project Wide Overview, Chapter 6 – Assessment of Environmental Effects and Section 15.4 of Chapter 15 – Crown Minerals Act Approvals – Access Arrangements of the Substantive Application. This includes the following:
 - terrestrial and wetland ecology effects;
 - freshwater ecology effects;
 - water quality and hydrology effects;
 - landscape and visual effects;
 - historic heritage effects;
 - recreation and access effects;
 - amenity and operational effects; and
 - closure and long-term obligations.
- The compensation and safeguards against any likely adverse effects are specified in Chapter 7 – Management and Monitoring of Actual and Potential Environmental Effects of the Substantive Application. This detail has also been provided in draft application documentation through the data room. Where adverse effects cannot be avoided, Bathurst proposes remediation, mitigation, rehabilitation and measures to address residual effects. Key measures include:
 - clean-water diversions;
 - staged earthworks;
 - erosion and sediment controls;
 - selective handling and encapsulation of acid-forming materials;
 - engineered landforms;
 - active and passive water treatment;
 - progressive rehabilitation;
 - vegetation direct transfer;

- indigenous planting;
 - fauna salvage and relocation;
 - biosecurity controls;
 - pest and weed management;
 - archaeological recording;
 - managed public access; and
 - controls for noise, vibration, traffic, lighting, dust, waste and hazardous substances.
- The types of permits held and applied for are specified in Chapter 14 – Crown Minerals Act Approvals – Mining Permits and Chapter 15 – Crown Minerals Act Approvals – Access Arrangements.
- The direct net economic and other benefits of the activities are specified in the Economic Impact Assessment prepared by AIGIS Group and peer review by Market Economics Limited and Section 6.3 of Chapter 6 – Assessment of Environmental Effects of the Substantive Application.
