APPENDIX 1 – Summary of Applicant's suggested minor corrections to designation conditions dated 22 October 2026

Reference	Suggested minor corrections (additions shown in bold underline and deletions shown in bold strikethrough)
Designation alteration	
Definition: Auckland Prison Site	Section 1 SO 66966 appears twice in the legal description. Delete duplicate as shown in **Appendix 2.**
Definition: Flood Hazard	Correct typo: "assuming the primary stormwater network is 100%~~**%**~~ blocked"
Designation Condition DES05	Remove redundant line in Table 2: Maximum Height Limits (as shown in **Appendix 2**).
Designation condition DES12	Formatting corrections
Designation Condition 14A (now DES15)	Amend referencing of conditions to change 14A to 15, and consequential amendments to numbering and cross-referencing to other conditions as shown in Appendix 2.
Designation Condition DES39 (now DES40)	Clause (a) "Remove '~~**site**~~ earthworks' (the word 'site' was struckout on the Decision Version of designation conditions however the deletion of the word 'site' was missed by the Expert Panel in creating the final clean version of conditions). Clause (c) "The balance of the planting (required under the LMEEP) must be implemented progressively and must be completed no later than ten years after the **6th October 2026"** (inserting the date of decision). Insert the words "**unless explicitly stated above**" or similar to the last part of the condition. This is because an existing small access track is located south of Watercourse 6 and must be maintained to enable ongoing weed control surrounding the watercourse and to facilitate the construction of future fish passage improvements. Clause DES40(f) expressly recognises this access track, which is located within the ecological offsetting area. However, the last part of the condition also excludes ecological

	compensation and offsetting areas from the list of areas exempt from the relevant condition, creating an inconsistency. To resolve this inconsistency and give effect to the intended exemption, the applicant requests a minor correction to the last part of the condition which is consistent with the suggested wording provided in the Section 55 report.
Designation Condition DES46 (Iwi Forum) (now DES47)	Re-formatting and correction of cross references within condition, as shown in **Appendix 2**
	Adding new words to the condition: "**In the fulfilment of the purpose of the Iwi Forum,** the Iwi Forum will…" (as stated in paragraph 728 of the Expert Panel's decision).
Resource consents	
Appendix 1 to Expert Panel's Final Decision	Delete reference to Rule groundwater abstraction under rule E7.4.1(A26). In Section 53 comments, Auckland Council confirmed that consent is not required under this rule for dewatering activities during construction which the Applicant agreed to (refer Table 10 of Section 55 Report).
Archaeological Authority	
Authority number	Add reference numbers to Page 1 of the Archaeology Authority conditions as follows**:** **Heritage New Zealand reference: 2026/769** **Fast Track Approvals reference: FTAA-2603-1179**
Wildlife Approval	
Wildlife Approval	Add reference numbers to Page 1 of the Wildlife Approval conditions as follows**:** **Fast Track Approvals reference: FTAA-2603-1179** Department of Conservation has advised they cannot supply an internal reference number at this point in time however they consider the DoC reference number is not critical and can be added at a later date under s46 of the Legislation Act 2019.
