Subject: Paul Wigglesworth [REDACTED] Reply RE: Letter inviting Comments on Draft Conditions - Milldale

To whom it may concern,

Thank you for the opportunity to comment on the draft conditions on the Milldale Fast Track application. I have read the conditions and am satisfied that the conditions I sought in my comments on the application previously provided have been largely included.

Firstly, the obligation has been included in condition 76 that the Emergency Response Plan must include procedures to immediately notify me (as owner and occupier of [REDACTED] [REDACTED] by email, phone or text of any accidental overflows, emergency discharges, and/or breaches of the discharge consent conditions. As the landowner [REDACTED] the wastewater treatment plant (WWTP), the inclusion of this obligation is very important to me.

Secondly, the requirement in condition 80 that the Annual Report on the WWTP also be provided to me will allow me to understand any actions taken against complaints should they arise, plus compliance against the water quality standards of the consent.

Thank you again for the opportunity and I look forward to the issuing of the consent with these conditions.

Best Regards

Paul Wigglesworth
