The settlement dated 21 November 1997 records the matters required to give effect to the settlement of all of Ngāi Tahu's historical claims. The settlement is implemented in a legislative sense through the Ngāi Tahu Claims Settlement Act 1998.

There are no specific principles and provisions in the settlement, including statutory acknowledgements, that specifically apply to the geographical location of the Project. None of the land on which the Project activities will occur is land that has been or is required to be returned under the Ngāi Tahu Claims Settlement Act 1998.

3.5.4 If relevant, detail any principles or provisions in the Ngā Rohe Moana o Ngā Hapū o Ngāti Porou Act 2019 that would be invoked by the project and identify which aspects of the application trigger or otherwise invoke these requirements.

N/A

3.5.5 Will the project be located on land returned under a Treaty settlement?

No

3.5.6 Provide evidence of written agreement by the owners of the land returned.

3.5.7 Describe any processes already undertaken under the Public Works Act 1981 in relation to the project:

N/A

3.5.8 Provide information identifying any parcels of Māori land, marae, or identified wāhi tapu within the project area:

N/A

3.6 Legal interests

3.6.1 Provide a description of any legal interests you or any others applying, have in the land on which the project will occur, including a statement of how that affects your ability to undertake the work.

HDL is the registered owner of all of the land required for the Project. It is therefore able to progress the Project as soon as it receives the necessary approvals for it.

A summary of all legal interests registered against the titles for the Site is included as Attachment I. None of the legal interests affect the ability to undertake the work.

3.7 Other matters

3.7.1 Have any activities included in the project, or any that are substantially the same as those involved in the project, previously been the subject of an application or a decision under a specified Act?

Please note the term 'application' includes a notice of requirement and any other means by which a decision may be sought under a specified Act.

Yes

3.7.2 If an application has been made, provide details of the application.

In June 2024, HDL lodged a resource consent application with Selwyn District Council to authorise the subdivision of the Site into 392 residential lots and associated reserves and supporting infrastructure.

A decision on whether that application should be notified has not been made, and the processing of that application has been on hold (at HDL's request) since October 2024.

Since lodging that application, HDL has been investigating (with its expert team) the opportunity to provide for higher density lots within the central part of the Site

while retaining a lower density on the perimeter of the Site to maintain a level of consistency with the existing character of the area. With the support of its urban design expert and its infrastructure experts in particular, that proposal has been developed further and is now the Project that HDL is now seeking to refer under the FTAA. If that referral is successful, HDL will withdraw the existing resource consent application that is currently on hold with Selwyn District Council.

3.7.3 If a decision has been made, also provide the outcome of the decision and the reasons for it.

N/A

3.7.4 Provide a description of whether and how the project would be affected by climate change and natural hazards:

Please refer to the Referral Application Supporting Document (section 3.7.4).
Provide the additional details requested below as relevant to your application.

A temporary diversion structure will be required to support the establishment of the culverts and the partial realignment of the artificial water race.

- Indicate whether any fish salvage activities or other complex freshwater fisheries activities are proposed.
Prior to any works being undertaken within the water race, any upland bully or other fish species identified within the water race will be translocated away from impacted reaches. Preparation of an ecological management plan which addresses fish salvage and transfer will be proposed as a draft condition of resource consent. Any activities involving the translocation of fish will be conducted in accordance with the advice of HDL's ecologists.
