I am hugely concerned that there will be the removal of a substantial amount of car parking from the downtown area because of this project.

Auckland transport have already ruined the downtown area by increasing the number of bus lanes and reducing the amount of space for cars and their ability to get a park in the central city.

It can be seen that Central city businesses have suffered.
I know a lot of people who choose not to go to the City any more.

AT's course of action should've been a little more middle of the road than trying to cut so much of the car traffic from the central city.

I live on Waiheke Island and I use my car park in the downtown car park. It's very convenient to catch the ferry.

But vital for a number of people who don't have the luxury of the end of destination being anywhere near where public transport can take them in a reasonable period of time to get there and then come home again at night.

Frankly, it would become nearly impossible for a lot of people if there wasn't replacement parking for commuters in the downtown car park

Overall, I'm concerned that we won't have access to parking in a convenient location to the Waterfront and that it will be prohibitively expensive.

I know a lot of other Waiheke residents feel the same.
