No

A petroleum mining permit that would otherwise be applied for under section 23A of the Crown Minerals Act 1991 (section 42(4)(n)). If yes, complete **checklist I2**.

No

Please only answer the following questions if the application is for a mineral or petroleum mining permit:

Prior to lodging this application, did the applicant lodge the information specified in section 37(2) with the relevant chief executive?

Please confirm whether the following apply (section 42(11)(a)-(f)):

The approval is sought for 1 or more deposits of 1 or more minerals

The applicant holds exploration permits or existing privileges that apply to those minerals and have more than 3 months before they expire

The area of land for which the approval is sought is within, or the same as, the area of land to which those exploration permits or existing privileges apply

The application proposes that those exploration permits or existing privileges be surrendered in relation to the area of land over which the approval is sought

The proposed term of the approval is no more than 40 years

Granting the approval would not be prevented by any of sections 25(6) and (7) and 30(8) of the Crown Minerals Act 1991 if the approval were applied for under the Act

Part 4: Requirements for substantive application

Subpart 1: General requirements for substantive application

Does the application relate solely to a listed project or a referred project (whichever applies) (section 46(2)(b))?

Yes

Are there any differences from the application and the project as described in Schedule 2 (for a listed project) or in the notice of the Minister's decision under section 28 (for a referred project) (section 46(2)(b))?

No

If yes, please provide details on the difference(s) and describe how they relate, or do not relate, to the project as described in Schedule 2 (for a listed project) or in the notice of the Minister's decision under section 28 (for a referred project).

Please explain how the project is consistent with the purpose of the Act (section 43(1)(b)(i)). Or, if the application was referred under section 21(1)(a) of the Act, please explain how both the stage to which the application relates and the whole project are consistent with the purpose of the Act, and provide information relating to the likelihood that any later stages of the project will be completed (section 43(1)(b)(ii)(A) and(B)).

The Project's significant regional and/or national benefits are acknowledged and pre-determined by the changes made to Schedule 2 of the FTA by the Fast-track Approvals Amendment Act 2025 which provides that listed projects have significant regional or national benefits.

This report presents statistics from the Economic Effects Assessment (Appendix 1) that underscore the significance of the existing Port operation. It is sufficient to note that the Port is already an infrastructure asset of regional and national significance, in its role as an international freight gateway for imports and exports and one of only two ports able to accommodate the largest container vessels that visit New Zealand.

The Port's significance goes far beyond POTL's direct economic contributions to the economy. It is a critical enabler of economic activity because the Port infrastructure supports other industries to create their own value.

The current constraints on the Port's cargo throughput mean that without the Project, in the year 2033 an estimated \$792 million to \$1,179 billion would be forgone at the level of the national economy. This would equate to a reduction of approximately -0.16% to -0.24% in

New Zealand’s GDP. The losses would compound over successive years, until and unless the constraints are removed.

The Project’s significance is therefore in removing the constraints on the Port’s capacity, such that the opportunity costs estimated above do not eventuate. Consequently, the purpose of the FTA will be most appropriately given effect to through approval of the Project.

If the application is lodged by more than 1 authorised person, please state for each approval identified in part 3, which proposed approval is to be held by which authorised person (section 43(1)(d)):

N/A

If applicable, please explain how the application complies or does not comply with any information requirements specified by the Minister under section 24 (section 43(1)(e)(i)):

N/A

Have you completed the relevant checklist(s) identified in part 3 as relevant to the approval(s) sought (section 43(3))?

Yes

If yes, please identify which checklists have been completed:

	<p>Have any archaeological authorities been granted for this location in the past?</p>	
	<p>Identification of the relevant planning overlays, i.e. are there any relevant Heritage or QEII covenants or Heritage Orders, District Plan schedules, New Zealand Heritage list/Rārangi Kōrero entries?</p>	

CHECKLIST F1 – Archaeological authority: Approval for person to carry out activity

Clause 7(5), Schedule 8	Information required for an approval described in clauses 7(1) and (2)(b) (approval of person to carry out activity)	Application Reference (Name of document, section and page)
(a)	Evidence that the person carrying out the activity under an authority has sufficient skill and competency, is fully capable of ensuring that the proposed activity is carried out to the satisfaction of Heritage New Zealand Pouhere Taonga, and has access to appropriate institutional and professional support and resources	
(b)(i)	In the case of a site of interest to Māori, evidence that the person carrying out the activity under an authority has the requisite competencies for recognising and respecting Māori values	
(b)(ii)	In the case of a site of interest to Māori, evidence that the person carrying out the activity under an authority has access to appropriate cultural support	

CHECKLIST G – Complex freshwater fisheries approval

Clause, Schedule 9	Information required for an approval described in section 42(4)(j) (complex freshwater fisheries approval), clause 3 of Schedule 9	Application Reference (Name of document, section and page)
3(a)	in relation to the structure and any fish facility: <ul style="list-style-type: none"> (i) a description of the type of structure or fish facility: (ii) the dimensions of the structure or fish facility: (iii) the design of the structure or fish facility: (iv) the placement of the structure or fish facility: (v) the water flows: (vi) the operating regime 	
3(b)	the freshwater species and values present (with particular focus on threatened, data-deficient, and at-risk species as defined in the New Zealand Threat Classification System)	
3(c)	the water quality and quantity in the surrounding habitat (at the proposed structure location, upstream and downstream)	
3(d)	how the passage of fish will be provided for or impeded	

CHECKLIST H – Marine consent

Clause, Schedule 10	Information required for an approval described in section 42(4)(k) (marine consent), clauses 3 and 4 of Schedule 10	Application Reference (Name of document, section and page)
3	Does the substantive application include an application for a resource consent for a cross-boundary activity (within the meaning of section 88 of the EEZ Act) under section 42(4)(a) (resource consent) in addition to an application for marine consent?	
4(a)	a description of the proposed activity:	
4(b)	an impact assessment prepared in accordance with section 39 of the EEZ Act and any requirements prescribed in regulations made under that Act:	
4(c)	if the application relates to an activity referred to in section 20(2)(a), (b), or (c) of the EEZ Act, a description in general terms of how and when it is proposed that the structure, submarine pipeline, or submarine cable will be dealt with at the end of its life.	

CHECKLIST I – Access arrangements

Clause, Schedule 11	Information required for an approval described in sections 42(4)(l) or (m), clause 3 of Schedule 11	Application Reference (Name of document, section and page)
3(a)	a copy of the relevant permit under the Crown Minerals Act 1991 (if a permit has been granted under that Act):	
3(b)	a clear map or plan of the application area with GPS co-ordinates:	
3(c)	a document identifying the areas of conservation land located within the application area, its classification, and an assessment against its purpose:	
3(d)	a description of the proposal, including –	
	(i) the application area, including location and features (for example, water courses, roads, and amenities):	
	(ii) a summary of proposed activities (including type of prospecting, exploration, or mining methods, duration, and scale of activity):	
	(iii) a statement of the objectives of any Act under which the land is administered:	
	(iv) any policy statement, management strategy, or management plan of the Crown that applies in relation to the land:	
	(v) details of any resource consents and concessions held or applied for, or intended applications in relation to the application area:	
	(vi) in the case of an application under section 42(4)(l), a statement of the direct net economic and other benefits of the proposed activities in relation to which the access arrangement is sought:	
	(vii) in the case of an application under section 42(4)(m), the interests of the owner of the mineral, or of any person to whom the owner of the mineral has granted any rights in relation to the mineral, in obtaining access to that mineral:	

3(e)	an assessment of the environment, including –	
	(i) a description of the existing natural environment in and around the application area (including flora, fauna, aquatic life, and landscape):	
	(ii) a description of any historic, cultural, and archaeological sites within the application area (position and significance):	
	(iii) a description of the social environment in and around the application area (including scenic qualities, recreation facilities, and their use):	
	(iv) an assessment of the effects that proposed activities will have on the environment described in subparagraph (i), both while the activities are taking place and after their completion:	
	(v) an outline of consultation undertaken, including full details of consultation with relevant iwi:	
	(vi) a description of the proposed safeguards and mitigation measures to be put in place (for example, proposed rehabilitation, water management, management of flora and fauna and cultural or historic sites, and the way in which risks will be managed):	
	(vii) information about financial and legal liabilities and obligations associated with the land:	
3(f)	in the case of an application where the land in question is a reserve managed by a local authority, confirmation that the local authority has provided written agreement for the activity to be undertaken on the reserve.	

CHECKLIST I1 – Mineral mining permit

Clause, Schedule 11	Information required for an approval described in section 42(4)(n) (mining permit), clause 16 of Schedule 11	Application Reference (Name of document, section and page)
16(a)	Information that would be required to be supplied under the Crown Minerals Act 1991, regulations, or minerals programmes made under that Act if the application for the permit were made under that Act	
16(b)	Statements of confirmation that the application complies with each of the criteria set out in sections 42(4)(n) and (11)	
16(c)	<p>Section 37 allows the information for a mining permit application to be submitted to the chief executive of MBIE prior to submitting the substantive application.</p> <p>Confirm whether the information was provided to the chief executive under section 37 and If YES, provide details of any differences between the information provided for the purposes of section 37 and the information being provided in the substantive application.</p>	
Section 42(11)	Information required under section 42(11)	
(a)	the approval is sought for 1 or more deposits of 1 or more minerals	
(b)	<p>the applicant holds exploration permits or existing privileges that—</p> <ul style="list-style-type: none"> (i) apply to those minerals; and (ii) have more than 3 months before they expire 	
(c)	the area of land for which the approval is sought is within, or the same as, the area of land to which those exploration permits or existing privileges apply	
(d)	the application proposes that those exploration permits or existing privileges be surrendered in relation to the area of land over which the approval is sought	
(e)	the proposed term of the approval is no more than 40 years	
(f)	granting the approval would not be prevented by any of sections 25(6) and (7) and 30(8) of the Crown Minerals Act 1991 if the approval were applied for under that Act	

Clause, Pt 3, Schedule 2, CMA Regs	Information that would be required under Part 3 of Schedule 2 of the Crown Minerals (Minerals Other than Petroleum) Regulations 2007 (CMA Regs) as required in section 16(a) of Schedule 11 of the Act	
1AA	The particulars of the person who is responsible for the application.	
1	A statement of the technical qualifications and financial resources of the applicant.	
2	If the application is on behalf of 2 or more persons, an explanation of each person's interest in the permit (including the percentage of the share of the permit that each person will hold).	
2A	If the application is on behalf of 2 or more persons, the proposed permit operator.	
2B	The area of land to which the application relates (in hectares or square kilometres).	
2C	A statement that allows the [panel] to form a view as to whether the proposed permit operator has, or is highly likely to have, by the time the relevant work in any granted permit is undertaken, the capability and systems that are likely to be required to meet the health and safety requirements of all specified Acts for the types of activities proposed under the permit	
3	A map of the permit area (as defined in Regulations 4 and 5 of the CMA Regs).	
4	The applicant's estimates of total in-ground resources.	
4A	<p>A report that sets out the evidence for a mineable mineral resource or exploitable mineral deposit sufficient to support a mining permit that includes—</p> <p>(a) estimates of the mineable mineral resource or exploitable mineral deposit,—</p> <p>(i) which may include inferred, indicated, and measured resources or deposits and probable and proved reserves or deposits;</p> <p>(ii) and which, for an application for a Tier 1 mining permit, must be made in accordance with the</p>	

	<p>Canadian National Instrument, the JORC Code, or the South African Code; and</p> <p>(b) a map showing the size and location of the resource or deposit; and</p> <p>(c) a description of the geology of the resource or deposit; and</p> <p>(d) if applicable, a description of the type of coal and its properties.</p>	
4B	<p>The following information to accompany the estimates prepared under item 4A(a)(ii):</p> <p>(a) documentation on input data, methodology, quality control, and validation of the resource or deposit; and</p> <p>(b) a spatial definition of the areas to which the figures in the estimates apply; and</p> <p>(c) a statement of the criteria used to determine the estimates; and</p> <p>(d) a statement of whether the estimates are made on the basis of a scoping, pre-feasibility, or feasibility study, or on some other specified basis.</p>	
5	<p>A statement of the proposed work programme that provides an overview of how the permit area will be worked that includes—</p> <p>(a) the size, nature, extent, and siting of the proposed mining operations; and</p> <p>(b) the proposed mining methods to be used; and</p> <p>(c) the proposed mining and production schedule; and</p> <p>(d) the expected production and long-term mining scheme for the mineable resource; and</p> <p>(e) the proposed start date for production; and</p> <p>(f) any proposed prospecting or exploration work in relation to the permit area; and</p> <p>(g) the proposed expenditure under the permit; and</p> <p>(h) if applicable, the point of valuation for royalty purposes.</p>	

6	The applicant's mining feasibility studies, which include mine design, scheduling and production, resource recovery, and economic viability.	
7	A report on the project economics of the operation. In particular, the report must include the financial viability, technical constraints, and proposed level of expenditure in relation to the scale and extent of the proposed operations.	
8	For an application for a Tier 1 mining permit, a report on any alternative mine development plans that have been identified, which must include details of the projected ultimate recovery of the resource under each plan and a statement as to why these options have not been pursued	
9	For an application for a Tier 1 mining permit for minerals other than gold or silver, or for a permit in relation to an area offshore, a report stating the ownership of the minerals (commonly known as a Land Mineral Status Report).	
10	A statement as to whether the proposed mining operations are in accordance with good industry practice.	
11	A statement on any other matter the applicant considers relevant to support the application.	

CHECKLIST I2 – Petroleum mining permit

Clause, Schedule 11	Information required for an approval described in section 42(4)(n) (mining permit), clause 16 of Schedule 11	Application Reference (Name of document, section and page)
16(a)	Information that would be required to be supplied under the Crown Minerals Act 1991, regulations, or minerals programmes made under that Act if the application for the permit were made under that Act	
16(b)	Confirmation that the application will comply with sections 42(4)(n) and (11)	
16(c)	<p>Section 37 allows the information for a mining permit application to be submitted to the chief executive prior to submitting the substantive application.</p> <p>Confirm whether the information was provided to the chief executive under section 37 and If YES, provide details of any differences between the information provided for the purposes of section 37 and the information being provided in the substantive application.</p>	
Section 42(11)	Information required under section 42(11) as required in section 16(b) of the Act	
(a)	the approval is sought for 1 or more deposits of 1 or more minerals	
(b)	<p>the applicant holds exploration permits or existing privileges that—</p> <ul style="list-style-type: none"> (i) apply to those minerals; and (ii) have more than 3 months before they expire 	
(c)	the area of land for which the approval is sought is within, or the same as, the area of land to which those exploration permits or existing privileges apply	
(d)	the application proposes that those exploration permits or existing privileges be surrendered in relation to the area of land over which the approval is sought	
(e)	the proposed term of the approval is no more than 40 years	
(f)	granting the approval would not be prevented by any of sections 25(6) and (7) and 30(8) of the Crown Minerals Act 1991 if the approval were applied for under that Act	

Clause, Pt 2, Schedule 2, Petroleum Regs	Information that would be required under Part 2 of Schedule 2 of the Crown Minerals (Petroleum) Regulations 2007 (Petroleum Regs) as required in Section 16(a) of Schedule 11 of the Act	
1	A statement of the technical qualifications and financial resources of the applicant.	
2	A map of the permit area as defined in Regulations 4 and 5 of the Crown Minerals (Petroleum) Regulations 2007.	
3	If the application is on behalf of 2 or more persons, - (a) an explanation of each person's interest in the permit; and (b) a statement identifying which of the persons is to be the permit operator.	
4	A report that - (a) sets out the reserves and proposed work programme for the development of the field concerned; and (b) includes the information described in clauses 5 - 14.	
5	An executive summary of the information supplied under clauses 2 to 10, including - (a) a summary of the in-place and recoverable reserves (including the applicant's calculations of the assigned probabilities of the reserves); and (b) a description of the proposed facilities to extract, treat, and transport the petroleum; and (c) the proposed annual and cumulative field production.	
6	A discussion of the permit history, including - (a) exploration results (including any geophysical or geochemical survey results); and (b) appraisal results (including any drilling and well-testing results).	
7	A statement of the geology of the permit area, including its regional setting, geological history, and regional stratigraphy.	

8	<p>A geophysical analysis and interpretation of the permit area, including –</p> <ul style="list-style-type: none"> (a) a database and maps showing seismic coverage and discussion of seismic data quality; and (b) the seismic ties to wells and a discussion of the accuracy of the ties; and (c) the seismic interpretation techniques and results; and (d) the techniques and results of depth conversion (including velocity analysis and a discussion of the sensitivity to depth mapping to variations in velocity fields); and (e) maps of all average and interval velocity fields using depth conversion, including uncertainty maps; and (f) structural maps and models in time and depth for reservoir units; and (g) a geophysical analysis of seismic attributes and modelling, including seismic inversion; and (h) a discussion of reservoir structure and uncertainties that could affect reserves (including analysis of faulting, alternative fault correlations, and fault seals). 	
9	<p>A geological interpretation covering the following:</p> <ul style="list-style-type: none"> (a) description of stratigraphy, including a table of formation tops, thicknesses, and cored intervals (all in measure depth and true vertical depth); and (b) sedimentological analysis and facies interpretation; and (c) stratigraphic and structural correlations of reservoir units; and (d) net sand and net pay maps for each reservoir; and (e) a geological model, including descriptions of the petroleum system and its constituent parts on which the mining proposal is based. 	
10	<p>A petrophysical evaluation, including –</p> <ul style="list-style-type: none"> (a) a database containing wireline, logging while drilling, monitoring while drilling, core, and sidewall core measurements, and any other subsurface measurements; and (b) formation temperature measurements; and 	

	<p>(c) a petrophysical interpretation that covers-</p> <ul style="list-style-type: none"> (i) lithology, porosity, permeability; and (ii) connate water saturation and water salinity; and (iii) the cut-off criteria used to determine net reservoir and net pay; and (iv) fracture density; and (v) comparisons of laboratory analyses and log-derived data; and <p>(d) any petrographic and core analyses of reservoir rocks.</p>	
11	<p>Reservoir engineering data, including –</p> <ul style="list-style-type: none"> (a) results and interpretation of all subsurface pressure measurements, including wireline, logging while drilling, monitoring while drilling, and test data measurements (open and cased hole); and (b) the interpretation position of gas-oil, oil-water, gas-water contacts, including an electric log analysis over the reservoir interval; and (c) desorption data and gas content maps for any coal seam gas field; and (d) a description of the aquifer extent and strength; and (e) details of reservoir fluid parameters, including – <ul style="list-style-type: none"> (i) pressure, volume, and temperature analysis of gas (methane and ethane), liquefied petroleum gas (propane and butane), condensate (C5+), and oil (including dew point and bubble point); and (ii) the oil formation by volume factor and the gas to oil and condensate to gas ratios with depth; and (iii) chemical analysis of any gas, condensate, or water samples; and (iv) a discussion of any significant differences between the results from different wells or intervals within a well. 	
12	<p>Reserves information, including –</p> <ul style="list-style-type: none"> (a) structure maps, cross sections, or models showing the areal and vertical extent of the field and the hydrocarbon contacts; and 	

	<p>(b) a statement of the hydrocarbons-in-place, including (with any estimates made in accordance with the Petroleum Resources Management System) –</p> <ul style="list-style-type: none"> (i) a description of the methodologies used to calculate their volume and distribution; and (ii) the assigned probabilities for oil, gas (methane and ethane), liquefied petroleum gas (propane and butane), and condensate (C5+) (with details for each production layer or zone); and (iii) oil initially in place; and (iv) gas initially in place; and <p>(c) recoverable hydrocarbon estimates, including their assigned probabilities, and production forecasts for individual wells and field totals (irrespective of any gas sales contracts); and</p> <p>(d) a reservoir model or models; and</p> <p>(e) information in relation to contingent resources; and</p> <p>(f) an explanation of why any contingent resources are classified as such, including a description of development and cost thresholds).</p>	
13	<p>A proposed field development plan, including –</p> <ul style="list-style-type: none"> (a) a summary structure map for each reservoir showing interpreted field contacts and the surface and down-hole location of proposed production and injection wells; and (b) an estimate and range of field life, including annual forecast production profiles for oil, water, and gas (and the assumptions on which the profiles are based) and any forecast annual injection profiles; and (c) information on all existing and proposed well locations (and their surface and reservoir completion depths), pipelines, production and reinjection facilities, treatment facilities, and transportation and storage facilities, including – <ul style="list-style-type: none"> (i) a development timeline showing the sequence of drilling, well completions, installations of facilities, and commissioning and production start-up dates; and (ii) a discussion of well design and well completion philosophy supported by diagrams; and 	

	<ul style="list-style-type: none"> (iii) the proposed geological, petrophysical, and reservoir monitoring programmes for the duration of the field’s life (with particular emphasis on resolving field uncertainties and dynamic performance); and (iv) the proposed pressure maintenance, including any assisted recovery, artificial lift, or enhanced recovery; and (v) the proposed frequency of reserve re-evaluations; and (vi) the proposed location of meters to be used for the metering of oil, condensate, and gas that is produced, consumed, and flared; and (vii) details of petroleum to be used to fuel any of the proposed operations or to be flared, and a discussion of other methods considered for petroleum utilisation; and (viii) a description of the proposed development (including diagrams) and a description of the related process facility (including flow diagrams); and (ix) the reasons for selecting the proposed development; and (x) a discussion of the proposed abandonment of facilities; and (xi) proposed expenditure on matters to which this paragraph applies; and (xii) the proposed commencement date for production 	
14	The proposed point or points of valuation for royalties payable.	
XX	A statement on any other matter the applicant considers relevant to support the application.	

CHECKLIST J – Listed project information requirements

Section, Fast-track Approvals Act	Information required for a substantive application under section 43(2) and section 13(4)	Application Reference (Name of document, section and page)
13(4)(a)	a description of the project and the activities it involves	03 - POTL - Stella Passage Development - FTA Substantive Application - FINAL, Section 4 The Project (page 96 - 142)
13(4)(c)	information to demonstrate that the project does not involve any ineligible activities (other than activities that may be the subject of a determination under section 23 or 24)	03 - POTL - Stella Passage Development - FTA Substantive Application - FINAL, Section 2.4 Ineligible Activities (page 46 - 47)
13(4)(d)	a description or map of the whole project area that identifies its boundaries in sufficient detail to enable consideration of the referral application	03 - POTL - Stella Passage Development - FTA Substantive Application - FINAL, Section 3.1 Project Site (page 48) and Appendix 29 - Proposed Project Plans & shut down zones
13(4)(e)	the anticipated commencement and completion dates for construction activities (where relevant)	03 - POTL - Stella Passage Development - FTA Substantive Application - FINAL, Section 4.2 Staging and Timing (page 106 - 109)

13(4)(f)(i)	a statement of whether the project is planned to proceed in stages and, if so an outline of the nature and timing of the stages	N/A
13(4)(h)	a description of the anticipated and known adverse effects of the project on the environment	03 - POTL - Stella Passage Development - FTA Substantive Application - FINAL, Section 6 Assessment of Effects and Section 7 Summary of Effects Management Measures (page 161 - 241)
13(4)(i)	a statement of any activities involved in the project that are prohibited activities under the Resource Management Act 1991	N/A
13(4)(j)	a list of the persons and groups the applicant considers are likely to be affected by the project, including— <ul style="list-style-type: none"> (i) relevant local authorities: (ii) iwi authorities and groups that represent hapū that are parties to relevant Mana Whakahono ā Rohe or joint management agreements: (iii) other relevant iwi authorities: (iv) relevant Treaty settlement entities: (v) relevant protected customary rights groups and customary marine title groups: (vi) ngā hapū o Ngāti Porou, if the project area is within or adjacent to, or the project would directly affect, ngā rohe moana o ngā hapū o Ngāti Porou: (vii) relevant applicant groups under the Marine and Coastal Area (Takutai Moana) Act 2011: (viii) persons with a registered interest in land that may need to be acquired under the Public Works Act 1981: 	03 - POTL - Stella Passage Development - FTA Substantive Application - FINAL, Section 2.1.2 (page 36)
