

Barrytown Minerals project – register of member’s Interests

25 August 2026

Due to the limited size of the resource consenting industry in New Zealand, it is unavoidable that panel members have previous professional connections with a number of the experts or companies that the Applicant has contracted for its application. Where a panel member has identified an interest that is more specific in nature, it has been recorded below.

Name	Declarations
John Maassen	• Nothing to declare.
Sharon Dines	• Sharon has known one of the Applicant's ecology experts, Dr Gary Bramley, and his family for a number of years. Sharon and Dr Bramley had not discussed the application prior to her appointment to the panel, and on her appointment agreed immediately not to discuss the application with each other. The Panel are confident that any perceived conflict of interest can be managed.
Cameron Lines	• Nothing to declare.
