To Whom it May Concern

RE: Milldale Stages 14-17 – Private Water and Wastewater Utility Services

Fulton Hogan Limited (FHL) confirms that it is willing and able to construct, operate and own the proposed Wastewater Treatment Plant (WWTP), Water Treatment Plant (WTP), and associated reticulation networks to service all lots with the proposed Milldale Stages 14 – 17 development.

The role would include the following:

- Ownership of the infrastructure assets required to provide private water supply and wastewater services to the development;
- Operation, maintenance and renewal of the water supply and wastewater infrastructure;
- Obtaining and maintaining any other statutory approvals required for the operation of the infrastructure;
- Ensuring the potable water supply complies with the applicable drinking water requirements; and
- Recovery of operating, maintenance and renewal costs from property owners through an appropriate legal mechanism that will be included on each title by Fulton Hogan Land Development Ltd who are undertaken the development in question.

FHL has extensive experience in the delivery, operation and maintenance of civil infrastructure throughout New Zealand and Australia, including water and wastewater plants and associated reticulation. FHL has the technical capability, operational systems and financial resources necessary to undertake the long-term management of private infrastructure of this nature.

Yours sincerely

Simon Dyne
Chief Operating Officer - Infrastructure
