2.6 Appropriateness for fast-track approvals process

Here you must explain how the project meets the referral application criteria ([section 22](#)). Please consider and respond where relevant, to each question.

If the project is planned to proceed in stages, you must explain how each stage meets the referral application criteria.

If a part of the project is proposed as an alternative project, you must explain how each stage meets the referral application criteria,

- 2.6.1** The criteria for accepting a referral application is that the project is an infrastructure or development project that would have significant regional or national benefits. Explain how this project satisfies the criteria:

The Project will contribute significant regional benefits to the Tasman region. These benefits are described in Attachment 1 at 2.6.1

- 2.6.2** Explain how referring the project to the fast-track approvals process:

- 2.6.2.1** Would facilitate the project, including by enabling it to be processed in a more timely and cost-effective way than under normal processes; and

The fast-track process offers a number of advantages in terms of certainty of outcome and time savings over the standard RMA process for this project. This is addressed in Attachment 1 at 2.6.2.1.

- 2.6.2.2** Is unlikely to materially affect the efficient operation of the fast-track approvals process

The project will not materially impact the operation of the fast-track approval process. All consents sought are standard RMA approvals and the project is not complex. Relevant iwi have provided favourable cultural values and cultural impact assessments (Attachments 4 and 5) . This is addressed in Attachment 1 at 2.6.2.2.

- 2.6.2.3** Has the project been identified as a priority project in a central government, local government, or sector plan or strategy (for example, in a general policy statement or spatial strategy), or a central government infrastructure priority list?

For example – a sector plan that specifically identifies the project including details such as location.

No

- a. Identify the plan, strategy or list (or any other relevant document).

- 2.6.2.4** Will the project deliver new regionally or nationally significant infrastructure or enable the continued functioning of existing regionally or nationally significant infrastructure?

No

- a. Explain how the project will deliver this.

- 2.6.2.5** Will the project increase the supply of housing, address housing needs, or contribute to a well-functioning urban environment (within the meaning of policy 1 of the National Policy Statement on Urban Development 2020). If yes, explain how the project will achieve this.

Yes, the project will increase the supply of housing and address housing needs. As discussed in Attachment 1 at 2.6.2.5, Tasman is the least

affordable region for housing in New Zealand (Nelson Tasman Annual Monitoring Report, December 2025). The Project will contribute 141 new lots to the Tasman housing market, which Tahimana Ltd is shovel-ready to deliver. A large proportion will be affordable family homes. The proposal represents a net addition to the Tasman housing market. See also Attachment 6 Developer Statement and Attachment 7 Economic Report.

2.6.2.6 Will the project deliver significant economic benefits, and if so, how?

Provision of housing, and particularly affordable housing, has significant economic benefits at a regional scale. In addition, the project will deliver significant employment benefits. Urban Economics (Attachment 7) has determined that construction of the proposal will directly contribute approximately \$17.4 million to construction sector GDP and support 105 full-time equivalent (FTE) jobs. Construction of the proposal will also indirectly contribute \$19.6 million to national GDP and support approximately 120 FTE jobs. Of this indirect economic impact, the proposal would make a significant contribution towards primary sector GDP and FTE employment, contributing approximately \$8.2 million, which would support an estimated 50 FTE jobs. This is addressed further in Attachment 1 at 2.6.2.6.

2.6.2.7 Will the project support primary industries, including aquaculture, and if so, how?

2.6.2.8 Will the project support development of natural resources, including minerals and petroleum, and if so, how?

2.6.2.9 Will the project support climate change mitigation, including the reduction or removal of greenhouse gas emissions, and if so, how?

2.6.2.10 Will the project support climate change adaptation, reduce risks arising from natural hazards, or support recovery from events caused by natural hazards, and if so, how?

The project contributes to climate change adaptation by supporting housing in a location that is not at risk from sea level rise, and where other climate change-related risks are at most low. The restoration of the wetlands and streams will reduce risks arising from natural hazards beyond the site. See attachment 1 at 2.6.2.10, Attachment 8 Natural Hazards and Climate Change Report and Attachment 9 Ecology Report.

2.6.2.11 Will the project address significant environmental issues, and if so, how?

The project addresses the significant environmental issue of wetland degradation. Wetlands on private land in Tasman have been severely depleted, now covering only about 5 % of their former area across the region. The project involves the protection and restoration of all wetlands on the site. This restoration project is considered by the project ecologist to provide a significant regional benefit to Tasman's wetlands. See Attachment 1 at 2.6.2.11 and Attachment 9 Ecology report.

2.6.2.12 Is the project consistent with local or regional planning documents, including spatial strategies, and if so, how?

See Attachment 10 Planning Memorandum at 4.0. The relevant planning document is the Tasman Resource Management Plan. In particular, the project is consistent with the Rural 3 zone policies and policies for wetland protection and restoration.

Section 3: Project details

Remember: at this stage only a general level of detail is required, enough to inform eligibility to use the fast-track approvals process.

For construction activities, please state the anticipated commencement and completion dates.

Based on an estimated consent commencement date of October 2026, the anticipated commencement date for construction activities is January 2027 with an expected completion date for the Stage 1 construction works of March 2028. See Attachment 11 Construction Activity Commencement and Completion.

3.1 Approvals required

Applications must specify all of the proposed approvals sought but only need to provide a general level of detail about each proposed approval, sufficient to inform the Minister's decision on the referral application.

For each proposed approval an applicant must be eligible to apply for any corresponding approval under a specified Act. For example, if an approval is for a notice of requirement under the RMA, the applicant for that approval would need to be a requiring authority.

Applications for approvals under a specified Act, as required by in [section 13\(4\)\(y\)](#), are covered below in 3.8 Specific proposed approvals.

3.1.12 Where there are any particular eligibility requirements to apply for an above approval; identify what they are, who the relevant applicant is, and confirm that the relevant applicant meets those requirements (including providing any necessary supporting information or documentation to evidence this).

3.1.13 Are there any other types of consents, certificates, designations, concessions, and other legal authorisations (other than contractual authorisations or the proposed approvals) and you consider are needed to authorise the project (including any that may be needed by someone other than you as the applicant(s)). Provide details on whether these have been obtained.

A license to occupy is required from NZTA for the wastewater application area. NZTA has advised that it will grant a license to occupy (Attachment 12 License to Occupy letter).
