

EXISTING APPROVALS AND THEIR RELATIONSHIP WITH THE APPLICATION

The following tables list the existing approvals held by Bathurst (including subsidiary companies and joint ventures) in the vicinity of the Stockton Plateau and Denniston Plateau and outline whether the authorised activity is still required and whether it has been incorporated into this application for the Buller Plateaux Continuation Project.

Existing Mining Permits

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
MP 41 810	Mining permit for the DOC Triangle (Stockton)	8 September 2040	Yes	Yes - No change to this permit as part of the BPCP, however, a variation for the associated access arrangement is being sought. This Mining Permit will continue as authorised.
MP 52 937	Mining permit across No. 2 South (Stockton)	4 November 2030	Yes	No - activities at No.2 South are outside of the scope of the BPCP. This Mining Permit will continue as authorised.
MP 41 515	Mining permit across Upper Waimangaroa	11 March 2038	Yes	Yes - No change to this permit as part of the BPCP. This Mining Permit will continue as authorised.
MP 51 279	Mining Permit for the existing Escarpment Mine	23 June 2047	Yes	Yes - No change to this permit as part of the BPCP, however, a new associated access arrangement is being sought. This Mining Permit will continue as authorised.
MP 60 138	Mining Permit for the existing Whareatea West Mine	15 July 2065	Yes	Yes - No change to this permit as part of the BPCP, however, a new associated access arrangement is being sought. This Mining Permit will continue as authorised.
MP 41 455	Mining Permit for the existing Cascade Mine	14 May 2027	Yes	No – activities at the Cascade Mine are outside of the scope of the BPCP. This Mining Permit will continue as authorised.

Existing Coal Mining Licences: Stockton

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
CML – 37 150	Coal Mining Licence for the Stockton Mine	31 March 2027	No - will be superseded by BPCP Approvals	Yes - New land use consent being sought (Stockton), and a Stockton Mining Permit application is being submitted as part of the FTAA application.
ACML – 37 150-02	Ancillary Coal Mining Licence for component of the Stockton Mine (Aerial ropeway and 2-5 haul road for transportation of coal)	31 March 2027	No - will be superseded by BPCP Approvals	Yes - New land use consent being sought (Stockton), and part of this existing ACML area is being incorporated in the Stockton Mining Permit application being submitted as part of the FTAA application.
ACML – 37 150-03	Ancillary Coal Mining Licence for component of the Stockton Mine (Ngākawau Rail Loadout)	31 March 2027	No - will be superseded by BPCP Approvals	Yes - Bathurst will continue to operate the Ngākawau Rail Loadout and will seek consents and access agreements as part of the FTAA Application

Existing Coal Mining Licences: Escarpment

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
CML – 37 161	Coal Mining Licence for Sullivan Mine	31 March 2027	No - will be superseded by BPCP Approvals	Yes - New land use consent being sought (ESE), and a Sullivan Mining Permit application is being submitted
ACML – 37 161-01	Ancillary Coal Mining Licence for component of the Sullivan Mine	31 March 2027	No	No - This is outside the BPCP Project Area and does not form part of the BPCP application.
ACML – 37 161-02	Ancillary Coal Mining Licence for component of the Sullivan Mine	31 March 2027	No - will be superseded by BPCP Approvals	Yes - New land use consent being sought (ESE), and part of this ACML area is being incorporated into the Sullivan Mining Permit application
ACML – 37 161-03	Ancillary Coal Mining Licence for component of the Sullivan Mine	31 March 2027	No - will be superseded by BPCP Approvals	Yes - New land use consent being sought (ESE), and part of this ACML area is being incorporated into the Sullivan Mining Permit application
ACML – 37 161-04	Ancillary Coal Mining Licence for component of the Sullivan Mine (Waimangaroa Storage Yard)	31 March 2027	No	Yes – Bathurst will not be seeking a mining permit over the Waimangaroa Storage Yard, but will be seeking consents – noting the Waimangaroa Storage Yard is included within the land use consent boundary for the BPCP (forming part of the ESE Project Sub-Area)

Existing Buller District Council RMA Consents: Stockton

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC07/145	Land Use consent to upgrade the existing power line to the Stockton Mine to a 33kV line.	N/A	No	No – the upgrade has been completed.
RC100064	To undertake indigenous vegetation clearance and earthworks for the purpose of widening eight sections of the Stockton Mine 2-5 Haul Road.	N/A	No	No – the road widening works have been completed.
RC100088 (and associated extension to lapse date application RC100088a).	To construct a haul road outside the CML area on DOC land for a length of 480m within a footprint of 2.8ha.	13 January 2031	No	No – the proposed haul road was not constructed and is not proposed to be constructed as part of the BPCP.
RC110623	Stockton security gate upgrade	N/A	Yes	No – the security gate upgrade has been completed.
RC120028	To develop and operate a car park for Stockton Alliance personnel and contractors.	N/A	No	No – the construction of the carpark has been completed, and it is no longer operated by BRL.

Existing Buller District Council RMA Consents: Cypress

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC03164 (as varied by RC020164e)	Undertake coal mining in Cypress.	22 August 2040	Yes	Yes – Section 127 variation being sought to ensure consistency in approach for biodiversity compensation proposed across the broader Project and to seek to ensure the existing objectives set out in the Cypress conditions are better achieved. Mining activities authorised within Cypress will remain as per existing approvals.

Existing Buller District Council RMA Consents: No.2 South

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC110043	To undertake all activities associated with mining of the No.2 South cutback area, including removal of vegetation, overburden, coal and earthworks including construction of access roads and drains, and the use of hazardous substances.	20 September 2046	Yes	No - activities at No.2 South are outside of the scope of the BPCP.

Existing Buller District Council RMA Consents: Mt William North

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC11/132A	To undertake coal mining and mining operations, including construction of access roads.	18 September 2049	Yes	No - activities at Mt William North are outside of the scope of the BPCP.
RC11/132B	Darcy Dam	N/A	Yes	No - activities at Mt William North are outside of the scope of the BPCP.

Existing Buller District Council RMA Consents: Escarpment

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC180031	To undertake seven drill holes within Exploration Permit 40-591 as part of a coal exploration programme.	N/A	No	No – the authorised exploratory drilling has been completed. EP 40 591 has since been superseded by MP60138 (Whareatea West).
RC10/70A	To undertake mining and associated activities relating to the Escarpment Mine Project on the Denniston Plateau Escarpment.	24 October 2025 Application made for new permit in July	No - will be superseded by BPCP Approvals	Yes - New land use consent sought, with a broader scope relating to the ESE Sub-Area rather than the former Escarpment Mine Project.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
		2025, currently subject to RMA s124.		
RC10/70G	To construct, operate and maintain an electrical substation and overhead electrical powerlines with associated access.	N/A	No - will be superseded by BPCP Approvals	Yes - New land use consent sought, with a broader scope relating to the ESE Sub-Area rather than the former Escarpment Mine Project.
RC10/70H	To use and store hazardous substances during mining, the construction and operation of the coal processing plant, the Fairdown coal handling facility, and within the electrical substation.	24 October 2025 Application made for new permit in July 2025, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - New land use consent sought, with a broader scope relating to the ESE Sub-Area rather than the former Escarpment Mine Project.

Existing Buller District Council RMA Consents: Cascade and Coalbrookdale

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC120047	To undertake indigenous vegetation clearance and earthworks over six hectares associated with the expansion of mining activity at Cascade Mine.	N/A	Yes	No – activities associated with the Cascade mine are outside of the scope of the BPCP.
RC240051	Use of a Coal Storage Area (CSA) as a support base for mining related activities and to continue with rehabilitation activities at Cascade East.	17 December 2049	Yes	Yes - although activities associated with the Cascade Mine are outside of the scope of the BPCP, the BPCP will rely on this existing land use consent when using the Coalbrookdale mining support area as a laydown area during construction and maintenance of the UWHR.
RC160055	To undertake open-cast coal mining, quarrying and processing of granite and associated activities within the existing Cascade Mine footprint of 44 hectares.	Expiry consistent with MP 41-455, i.e. 14 May 2027 (or any granted replacement mining permit)	Yes	No – activities associated with the Cascade mine are outside of the scope of the BPCP.

Existing West Coast Regional Council RMA Consents: Stockton

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
N93/405	To discharge up to 10 tonnes of refuse per year comprising wood, paper, plastic, steel and rubber by burying in overburden dumps in the Consent Holder's coal mining operation at Stockton	1 April 2027 Note: this consent is subject to RMA s123C which extends the	Yes	No – this activity is outside of the scope of the BPCP.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
		expiry date to 31 December 2027.		
N98/231	To disturb the bed of watercourses associated with the development of access roads on coal mining licence 37 150	11 August 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC01034/1	To extend and maintain a culvert over Sandy Creek and associated disturbance.	9 April 2036	Yes	No – construction of the culvert has been completed.
RC01104/1	To discharge contaminated stormwater and sprinkler water (used for dust suppression) from within the coal handling and coal storage areas of the Ngakawau Coal handling Facility to the coastal marine area of the Ngakawau River via a water treatment system.	25 January 2039	Yes	No - this activity is outside the scope of the BPCP.
RC01104/2	To discharge uncontaminated stormwater from the Ngakawau Coal Handling Facility into the coastal marine area of the Ngakawau River.	25 January 2039	Yes	No - this activity is outside the scope of the BPCP.
RC01104/3	To take water from an unnamed creek behind the Ngakawau Coal Handling Facility for dust suppression purposes and other site activities.	25 January 2039	Yes	No - this activity is outside the scope of the BPCP.
RC05145/1	To take water from various waterbodies.	28 September 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC05145/2	To discharge water containing drilling cuttings to land.	28 September 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC05264/1	To discharge storm and wash water containing contaminants from a 'coal transfer station' to land in circumstances where it may enter water.	28 February 2041	Yes	No - existing consent has a long duration and is fit for purpose, relating to Station 3 settling pond.
RC06205 – V2	To discharge coal combustion products/ash to land in circumstances where contaminants may enter water.	22 January 2027	No	No – this activity is outside the scope of the BPCP.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
		Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.		
RC06206/2	To discharge mine water containing contaminants to the Mangatini Stream via a spillway channel and stormwater sump.	24 January 2028	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC06206/2	To discharge stormwater containing contaminants to the Mangatini Stream.	24 January 2028	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC06206/3	To discharge limestone for water treatment purposes to the Mangatini Stream.	24 January 2028	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC06206/4	To discharge treated water from a water treatment plant to the Mangatini Stream.	24 January 2028	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC06287/1	Water permit for diverting water from upper catchments of Webb, Whirlwind, Herbert and Deep Streams into Ngakawau Catchment.	14 June 2028	No	No – the diversion is permanent and does not require re consenting.
RC07007/1	To dam mine water in Duncan's Sump in the Mangatini Stream Catchment.	19 April 2028	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC07007/2	To take groundwater associated with the construction of "Duncan's Sump".	19 April 2028	No	No – Construction of Duncan's Sump has been completed.
RC07007/3	To discharge mine water from "Duncan's Sump" to the Mangatini Stream via an overspill structure.	19 April 2028	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC07008/1	To disturb Sandy Creek to widen Tin-town corner.	22 March 2042	No	No – the widening of Tin-town corner has been completed.
RC07008/2	To divert Sandy Creek to widen Tin-town corner.	22 March 2042	No	No – the widening of Tin-town corner has been completed.
RC7011/1	To discharge cement kiln dust (CKD) to land in circumstances where contaminants may enter water.	24 May 2027 Note: this consent is subject to RMA s123C which extends the	Yes	No – this activity is outside the scope of the BPCP.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
		expiry date to 31 December 2027.		
RC07072/1	To divert sections of T31, T35 and Fly Creeks associated with Campbell's Overburden Site.	18 June 2028	No	No – the diversion is permanent and does not require re consenting.
RC07149/1	To dam mine water in the Mangatini Stream Catchment.	4 October 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No	No – Davies Sump (the dam proposed under this consent) does not exist.
RC07149/2	To take groundwater associated with the construction of “Davie’s Sump”	4 October 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No	No – Davies Sump does not exist.
RC07149/3	To discharge mine water from “Davies Sump” to the Mangatini Stream via an overspill structure.	4 October 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No	No – Davies Sump does not exist.
RC07149/4	To divert water from the upper Granity catchment area into the Mangatini Stream.	4 October 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC07149/5	To divert water from the upper Rudolf catchment area into the Mangatini Stream.	4 October 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC07179/1	To discharge stormwater and washwater from “No 5 Station Ponds” to land in circumstances where contaminants may enter Mine Creek.	13 November 2028	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC07229/1	To disturb the bed of the Mangatini Stream associated with the construction of intake and outfall structures.	22 April 2028	No	No – Construction of Mangatini Sump has been completed as is therefore out of scope of the BPCP.
RC07229/2	To undertake earthworks within the riparian margin of the Mangatini Stream associated with the construction of the “Mangatini Sump”.	22 April 2028	No	No – Construction of Mangatini Sump has been completed as is therefore out of scope of the BPCP.
RC07229/3	To divert water from the Mangatini Stream into the “Mangatini Sump”.	22 April 2028	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC07229/4	To take groundwater associated with the construction and operation of the “Mangatini Sump”.	22 April 2028	No - will be superseded by BPCP Approvals	Yes - The continued operation of the Mangatini Sump is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC07229/5	To dam mine water in the Mangatini Stream Catchment.	22 April 2028	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC07229/6	To discharge treated stormwater from the floating decant in the “Mangatini Sump” to the Mangatini Stream.	22 April 2028	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC07229/7	To discharge treated stormwater from the “Mangatini Sump” to the Mangatini Stream via an overspill structure.	22 April 2028	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC07244/1	To undertake wet bed disturbance of Herbert Stream associated with the diversion structure associated with the installation of a water treatment system.	29 April 2033	No	No – A water treatment system for Herbert Stream is outside of the scope of the BPCP.
RC07244/2	To dam water within the Herbert Stream sub-catchment associated with a water treatment system.	29 April 2033	No	No – A water treatment system for Herbert Stream is outside of the scope of the BPCP.
RC07244/3	To discharge water to Herbert Stream from a water treatment system.	29 April 2033	Yes	No – A water treatment system for Herbert Stream is outside of the scope of the BPCP.
RC07244/4	To divert water within Herbert Stream for the purposes of water treatment.	29 April 2033	Yes	No – A water treatment system for Herbert Stream is outside of the scope of the BPCP.
RC08126/1	To take and use surface water in the Stockton Coal Mining Licence area for coal processing and associated activities.	21 August 2028	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC09028/1	To divert up to 150 L/s from Miller Stream to Mine Creek (via the “Millerton Water Treatment Plant” on an intermittent basis.	28 October 2044	No - will be superseded by BPCP Approvals	Yes – this permit has a lengthy remaining term, however the Millerton Water Treatment Plant is not proposed as part of the BPCP, so a new permit is sought for diversions under the broader scope of the BPCP.
RC09028/2	To divert minewater from the active pit to “Duncan’s Sump” and the “Mangatini Water Treatment Plant”.	28 October 2044	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC09028/3	To divert stormwater to the Mangatini Stream upstream of the “Mangatini Sump”.	28 October 2044	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC09028/4	To divert clean water around mining areas.	28 October 2044	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC09028/5	To divert minewater, stormwater, surface water and groundwater to the syncline within the underground workings, the “North-East Sump” and the “Millerton Water Treatment Plant”.	28 October 2044	No - will be superseded by BPCP Approvals	Yes – the Millerton Water Treatment Plant and North-East Sump are not proposed as part of the BPCP, so whilst this permit has a lengthy remaining term a new permit is sought for diversions under the broader scope of the BPCP.
RC09028/6	To dam (impound) water from Mine Creek and Miller Stream and surface water runoff in the syncline within the Millerton underground workings, up to its capacity.	28 October 2044	Yes	No - existing consent has a long duration and is fit for purpose. Note: a new permit will be sought for the proposed MW16 Sump as part of the BPCP.
RC09028/7	To dam (impound) water and sediment from Mine Creek and Miller Stream in the “North-East Sump”.	28 October 2044	No	No – the North-East Sump does not exist and is not proposed as part of the BPCP.
RC09028/8	To take and use water from a variety of sources (namely stormwater and minewater retention ponds or sumps in the Mine, Miller and Mangatini catchments and tributaries) for fire suppression.	28 October 2044	Yes	No - existing consent has a long duration and is fit for purpose. Fire suppression activities are anticipated to be complete prior to the expiry date.
RC09028/9	To discharge treated minewater and stormwater to Mine Creek via the “Millerton Water Treatment Plant”.	28 October 2044	No	No – the Millerton Water Treatment Plant is not proposed as part of the BPCP.
RC09028/10	To discharge settled stormwater and contaminants to the Mangatini Stream upstream of the “Mangatini Sump”.	28 October 2044	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC09028/11	To discharge water containing sediment and coal fines onto land above and into underground workings for the purposes of fire suppression.	28 October 2044	Yes	No - existing consent has a long duration and is fit for purpose. Fire suppression activities are anticipated to be complete prior to the expiry date.
RC09028/12	To discharge alkaline dosing materials into the North-East Sump or a channel leading to the “North-East Sump”.	28 October 2044	No	No – the North-East Sump authorised under this consent is not within the scope of the BPCP. Alternative sumps are proposed under the BPCP.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC09028/13	To discharge water, which may contain sediment and coal fines, from the underground workings to Miller Stream to drain ponded water.	28 October 2044	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC09028/14	To deposit potentially acid-forming and low- or non-acid-forming overburden material sourced from the Cypress Mine site to the "Millerton backfill".	28 October 2044	No - will be superseded by BPCP Approvals	Yes – Although this permit has a lengthy remaining term, it will be superseded by a new permit for this activity within the broader scope of the BPCP.
RC10103/1	To discharge biosolids to land in circumstances where contaminants may enter water at Stockton Coal Mine.	2 November 2025 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	Yes	No – the discharge to land of biosolids is outside of the scope of the BPCP.
RC10199/1	To discharge cement kiln dust (CKD) to land in circumstances where contaminants may enter water at Stockton Coal Mine.	25 May 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	Yes	No – the discharge to land of CKD is outside of the scope of the BPCP.
RC10255/1 V1	To take water from the "syncline adit" at Stockton Coal Mine	28 October 2044	Yes	No – existing consent has a lengthy term and remains fit for purpose.
RC10255/2 V1	To discharge water containing contaminants to the "Mangatini sump" at Stockton Coal Mine.	28 October 2044	Yes	No – existing consent has a lengthy term and remains fit for purpose.
RC10256/1	To undertake vegetation removal and earthworks within riparian margins.	1 March 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC10256/2	To erect structures (dams/sumps) on the bed and banks of unnamed tributaries of Fly Creek.	1 March 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC10256/3	To take groundwater (seepage) from the mine pit, McCabe's Block.	1 March 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC10256/4	To dam water in the unnamed tributaries of Fly Creek for water treatment purposes.	1 March 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC10256/5	To divert stormwater around mining areas and to settling ponds.	1 March 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC10256/6	To discharge water (stormwater and treated minewater) containing contaminants to water.	1 March 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC10256/7	To discharge overburden (potentially containing acid-forming material) to land.	1 March 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC10265/1	Land use consent to undertake vegetation clearance and earthworks on slopes greater than 25 degrees to construct a section of the Cypress Haul Road.	11 March 2038	No	No – construction of this section of the Cypress Haul Road has been completed.
RC10265/2	To disturb the bed and banks of four unnamed tributaries of T35 Stream to construct a section of Cypress Haul Road.	11 March 2038	No	No – construction of this section of the Cypress Haul Road has been completed.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC10265/3	To divert water in four unnamed tributaries of T35 Stream to construct a section of Cypress Haul Road	11 March 2038	No	No – construction of this section of the Cypress Haul Road has been completed.
RC11138/1	To discharge shellfish shells to land in circumstances where contaminants may enter water at the Stockton Coal Mine.	28 September 2046	Yes	No - existing consent has a long duration and is fit for purpose for the continued operation of the existing Whirlwind Mussel Shell Reactor.
RC11138/2	To stockpile shellfish shells in circumstances where contaminants may enter water at the Stockton Coal Mine.	28 September 2046	No - will be superseded by BPCP Approvals	Yes – a permit for discharge to land of mussel shells is being sought more broadly for the BPCP which would supersede this.
RC11138/3	To discharge contaminants (shellfish shells) to water via "leach beds" at the Stockton Coal Mine.	28 September 2046	Yes	No - existing consent has a long duration and is fit for purpose for the continued operation of the existing Whirlwind Mussel Shell Reactor.
RC11138/4	To discharge contaminants (odour) to air associated with the discharge and storage of shellfish shells.	28 September 2046	No - will be superseded by BPCP Approvals	Yes – an air discharge permit is being sought more broadly for the BPCP which would supersede this.
RC11225/1	To divert uncontaminated water of the Fly Creek catchment to the T31 Stream, Stockton Plateau	1 March 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No	No - The diversion channel has been constructed and is a permanent diversion which does not require re consenting.
RC11237/1	Land use consent to undertake up to 28 ha of vegetation clearance and earthworks, including works within the riparian margins of surface water courses associated with the construction, operation, use, repair, and maintenance of the Lower St Pat's Reservoir Water Treatment Scheme.	27 February 2047	Yes	No - the Lower St Pat's Reservoir Water Treatment Scheme is outside the scope of the BPCP.
RC11237/2	Land use consent to disturb, excavate and deposit material in the bed of watercourses, and to erect, place, use, repair, and maintain structures within the bed of watercourses associated with the construction, operation, use, repair and maintenance of the Lower St Pat's Reservoir Water Treatment Scheme.	27 February 2047	Yes	No - the Lower St Pat's Reservoir Water Treatment Scheme is outside the scope of the BPCP.
RC11237/3	Water permit to take, use, dam and divert water associated with the construction, operation, use, repair, and maintenance of Lower St Pat's Reservoir Water Treatment Scheme.	27 February 2047	Yes	No - the Lower St Pat's Reservoir Water Treatment Scheme is outside the scope of the BPCP.
RC11237/4	Water permit to take, divert and use groundwater (including seepage) within the scheme area associated with the construction, use, operation, repair, and maintenance of the Lower St Pat's Reservoir Water Treatment Scheme.	27 February 2047	Yes	No - the Lower St Pat's Reservoir Water Treatment Scheme is outside the scope of the BPCP.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC11237/5	To take and use water for construction activities associated with the Lower St Pat's Reservoir Water Treatment Scheme, from surface watercourses within the scheme area.	27 February 2047	Yes	No - the Lower St Pat's Reservoir Water Treatment Scheme is outside the scope of the BPCP.
RC11237/6	To discharge water and contaminants (principally sediment) to land, surface water and groundwater within the scheme area associated with the construction, use, operation, repair, and maintenance of the Lower St Pat's Reservoir Water Treatment Scheme.	27 February 2047	Yes	No - the Lower St Pat's Reservoir Water Treatment Scheme is outside the scope of the BPCP.
RC11237/7	Discharge Permit to discharge water and contaminants (including low pH water, trace elements, limestone, and sediment) associated with the use and operation of the Lower St Pat's Reservoir Water Treatment Scheme.	27 February 2047	Yes	No - the Lower St Pat's Reservoir Water Treatment Scheme is outside the scope of the BPCP.
RC11237/8	To discharge water and contaminants (including ultra fine limestone and/or hydrated lime) associated with the use and operation of limestone dosing plant or plants.	27 February 2047	Yes	No - the Lower St Pat's Reservoir Water Treatment Scheme is outside the scope of the BPCP.
RC11237/9	To discharge contaminants to air associated with the construction, operation, use, repair, and maintenance of the Lower St Pat's Reservoir Water Treatment Scheme.	27 February 2047	Yes	No - the Lower St Pat's Reservoir Water Treatment Scheme is outside the scope of the BPCP.
RC12073/1	To undertake earthworks and vegetation clearance associated with quarrying activities including an overburden storage area, staging area and road construction, Lower St Pat's Quarry.	6 June 2047	Yes	No - The Lower St Pat's Quarry is outside the scope of the BPCP.
RC12073/2	To take and use groundwater from seepage, Lower St Pat's Quarry.	6 June 2047	Yes	No - The Lower St Pat's Quarry is outside the scope of the BPCP.
RC12073/3	To divert surface and groundwater, including runoff, Lower St Pat's Quarry.	6 June 2047	Yes	No - The Lower St Pat's Quarry is outside the scope of the BPCP.
RC12073/4	To discharge water containing contaminants to water, Lower St Pat's Quarry.	6 June 2047	Yes	No - The Lower St Pat's Quarry is outside the scope of the BPCP.
RC12073/5	To discharge stormwater runoff to land, Lower St Pat's Quarry.	6 June 2047	Yes	No - The Lower St Pat's Quarry is outside the scope of the BPCP.
RC12073/6	To discharge contaminants, including overburden stockpiles, to land, Lower St Pat's Quarry.	6 June 2047	Yes	No - The Lower St Pat's Quarry is outside the scope of the BPCP.
RC12073/7	To discharge contaminants to air, Lower St Pat's Quarry.	6 June 2047	Yes	No - The Lower St Pat's Quarry is outside the scope of the BPCP.
RC12202/1	To divert water from Granity and Hugh Streams and Rudolph Creek through a constructed diversion channel, Rockies West Mining Block.	31 March 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No	No - The diversion channel has been constructed and is a permanent diversion which does not require re consenting.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC-2019-0076-01	To disturb the bed of Fly Creek to install a weir structure, McCabes Block.	14 August 2054	Yes	No – the Fly Creek weir has been constructed.
RC-2019-0076-02	To permanently divert water from Fly Creek to “McCabes Sump” for water treatment purposes.	14 August 2054	Yes	No - existing consent has a long duration and is fit for purpose. The diversion is permanent.
RC-2019-0076-03	To dam water in the “McCabes Sump” for water treatment purposes.	14 August 2054	No - will be superseded by BPCP Approvals	Yes – Whilst this consent has a lengthy remaining term, a new consent is being sought to align this activity with damming activities across the broader scope of the BPCP.
RC-2019-0076-04	To discharge contaminants (coal fines) to land, McCabes Block.	14 August 2054	No - will be superseded by BPCP Approvals	Yes – Whilst this consent has a lengthy remaining term, a new consent is being sought to align with activities across the broader scope of the BPCP.
RC-2021-0059-01	To discharge compost to land in circumstances where it may enter water.	2 June 2036	Yes	No - Existing activity to remain authorised under existing consents.
RC-2022-0028-01	To store new, used and scrapped tyres in hard stand areas.	21 April 2057	Yes	No - Existing activities to remain authorised under existing consents.
RC89038 - 890169	Water Take - Coal Washing, Dust Suppression, Office.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890170	Water Take - Bathhouse.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890171	Divert Natural Flow of Mine Creek Around Areas to be mined.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890172	Divert Natural Flow of Sandy Creek Around Areas to be Mined.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No	No – No mining in the Sandy Creek catchment proposed as part of BPCP.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC89038 – 890173	Divert Natural Flow of Mangatini Stream around areas to be mined.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890221	Divert Natural Flow of Fly Creek around areas to be mined.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890222	Divert Natural Flow of Plover Stream around areas to be mined.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890223	Divert Natural Flow of Whirlwind Stream around areas to be mined.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890224	Divert Natural Flow of Herbert Stream around areas to be mined.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890225	Divert Natural Flow of Webb Stream around areas to be mined.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No	No – No mining in the Webb Stream catchment proposed in the Stockton sub-area of BPCP. The previous diversion of Webb Stream headwaters is permanent and does not require reconsenting.
RC89038 – 890226	Divert Natural Flow of Deep Stream around areas to be mined.	1 October 2026 Application made for new permit in June	No	No – No mining in the Deep Stream catchment proposed in the Stockton sub-area of BPCP, (acknowledging that Deep Stream flows through the MFS sub-area of the BPCP). The previous diversion of Deep Stream headwaters is permanent and does not require reconsenting.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
		2026, currently subject to RMA s124.		
RC89038 – 890227	Divert Natural Flow of Granity Creek around areas to be mined.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890228	Divert Natural Flow of Rudolph Creek around areas to be mined.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890229	Discharge of Stormwater into Sandy Creek, Mangatini Stream, Fly Creek and Plover Stream.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890231	Discharge of Stormwater into Granity Creek and Rudolph Creek.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890232	Discharge of Waste Water into T35 Stream.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890233	Discharge of Waste Water into Fly Creek.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC89038 – 890234	Discharge Water from Coal Wash Plant into Mangatini Stream.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No	No – the Coal Wash Plant (CHPP) does not discharge water directly to Mangatini Stream, the water is instead directed to the Mangatini treatment system.
RC89038 – 890235	Dam - Above Discharge Point into Sandy Creek.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890236	Dam - Above Discharge Point into Whirlwind Stream.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890237	Dam - Above Discharge Point into Granity Creek.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890238	Dam - Above Discharge Point into T35 Stream.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 – 890239	Dam - Above Discharge Point into Fly Creek.	1 October 2026 Application made for new permit in June 2026, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC89038 - 890240	Dam - Above Discharge Point into Mangatini Stream.	1 October 2026 Application made for new permit in June	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
		2026, currently subject to RMA s124.		
RC95002.1	Discharge of fugitive dust from coal extraction, coal handling and coal stockpile activities at Stockton.	31 March 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC95002.2	Discharge of fugitive dust to air from roads at Stockton Mine and loading operations at Stockton aerial receival station.	31 March 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC95002.3	Discharge of fugitive dust to air from transport on aerial ropeway between Stockton and Ngakawau.	31 March 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC95002.4	Discharge of fugitive dust to air from internal roads at Ngakawau and coal handling and stockpiling at Ngakawau.	31 March 2027 Note: this consent is subject to RMA s123C which extends the expiry date to 31 December 2027.	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC99027/2	To permanently divert an unnamed creek around a fill structure.	16 July 2035	Yes	No – this is a permanent diversion and does not require reconsenting.
RC99027/7	To permanently divert a section of Mangatini Stream.	16 July 2035	Yes	No – this is a permanent diversion and does not require reconsenting.
RC99027/8	To take water from Mine Creek.	16 July 2035	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC99027/10	To discharge contaminants to Mine Creek.	16 July 2035	No - will be superseded by BPCP Approvals	Yes - This activity is required as part of the BPCP. A replacement consent will be sought as part of the FTAA.
RC99027/11	To discharge fugitive dust to air from the access road.	16 July 2035	No - will be superseded by BPCP Approvals	Yes – this activity is still required, and an air discharge permit is sought more broadly for the BPCP.
RC99027/12	To discharge dust and coal material to air from unloading and handling facilities at station No. 5.	16 July 2035	No - will be superseded by BPCP Approvals	Yes – this activity is still required, and an air discharge permit is sought more broadly for the BPCP.
RC98107/1	A Discharge Permit to discharge fugitive dust from construction activities and coal handling, processing and stockpiling operations at the new infeed facility at Stockton Mine.	31 March 2033	No - will be superseded by BPCP Approvals	Yes – this activity is still required, and an air discharge permit is sought more broadly for the BPCP.
RC98107/2	A Discharge Permit to discharge up to 1,000 litres of wastewater generated from the infeed facilities to a disposal field.	31 March 2033	No - will be superseded by BPCP Approvals	Yes – this activity is still required, and a permit to discharge to land is sought more broadly for the BPCP.

Existing West Coast Regional Council RMA Consents: Cypress

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC03175/1 (V8)	Earthworks and vegetation clearance over approx. 266 ha of Mining Permit 41-515 associated with the development and operation of the Cypress Mine.	22 August 2040	Yes	Yes – via section 127. This consent remains part of the Cypress consent suite. The application instead seeks amendments to conditions that form part of the integrated set of conditions applying across both Regional and District consents for Cypress in respect of its existing compensation obligations.
RC03175/2 (V8)	To disturb the beds of Cypress and Bryne Creeks and their tributaries for the construction and maintenance of diversion channels around the Cypress opencast pits.	22 August 2040	Yes	Yes – via section 127. This consent remains part of the Cypress consent suite. The application instead seeks amendments to conditions that form part of the integrated set of conditions applying across both Regional and District consents for Cypress in respect of its existing compensation obligations.
RC03175/3 (V8)	To disturb the bed of St Patrick Stream and tributaries for the construction and maintenance of diversion channels from a point upstream of St Pat's Dam water	22 August 2040	Yes	Yes – via section 127.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
	impoundment area to a point downstream of St Pat's Dam, to facilitate mining activities and site water management.			This consent remains part of the Cypress consent suite. The application instead seeks amendments to conditions that form part of the integrated set of conditions applying across both Regional and District consents for Cypress in respect of its existing compensation obligations.
RC03175/4 (V8)	The refurbishment and maintenance of St Pat's Dam and spillway structures, including raising the dam crest and associated disturbance to the bed of St Partick Stream, to facilitate mine water management and treatment.	22 August 2040	Yes	Yes – via section 127. This consent remains part of the Cypress consent suite. The application instead seeks amendments to conditions that form part of the integrated set of conditions applying across both Regional and District consents for Cypress in respect of its existing compensation obligations.
RC03175/5 (V8)	The placement and maintenance of culverts and water management structures in St Patrick Stream and associated disturbance to the bed of St Patrick Stream.	22 August 2040	Yes	Yes – via section 127. Haul road construction was always anticipated as part of the Cypress Mine development. As such, the portion of the UWHR located within the Cypress Mine area will be undertaken in accordance with the relevant conditions and requirements of the existing Cypress approvals.
RC03175/6 (V8)	To take water from St Pat's Dam water impoundment for dust suppression purposes.	22 August 2040	Yes	Yes – via section 127. Haul road construction was always anticipated as part of the Cypress Mine development. As such, the portion of the UWHR located within the Cypress Mine area will be undertaken in accordance with the relevant conditions and requirements of the existing Cypress approvals.
RC03175/7 (V8)	To take groundwater seepage and stormwater runoff from within the Cypress opencast pits for dewatering purposes.	22 August 2040	Yes	Yes – via section 127. This consent remains part of the Cypress consent suite. The application instead seeks amendments to conditions that form part of the integrated set of conditions applying across both Regional and District consents for Cypress in respect of its existing compensation obligations.
RC03175/8 (V8)	To divert (clean) stormwater runoff from undisturbed areas around the perimeter of the operational mining areas, including opencast workings, haul road, Cypress overburden placement area, soil stockpiles, and St Pat's Dam water impoundment and stormwater runoff from rehabilitated areas of the mine.	22 August 2040	Yes	Yes – via section 127. Haul road construction was always anticipated as part of the Cypress Mine development. As such, the portion of the UWHR located within the Cypress Mine area will be undertaken in accordance with the relevant conditions and requirements of the existing Cypress approvals.
RC03175/9 (V8)	To divert minewater (stormwater runoff and groundwater seepage) from within opencast workings, haul road, Cypress overburden placement area, soil	22 August 2040	Yes	Yes – via section 127.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
	stockpiles, and other ancillary mining activities, to St Pat's Dam water impoundment via drainage channels.			Haul road construction was always anticipated as part of the Cypress Mine development. As such, the portion of the UWHR located within the Cypress Mine area will be undertaken in accordance with the relevant conditions and requirements of the existing Cypress approvals.
RC03175/10 (V8)	To divert water in Cypress and Byrne Creeks and their tributaries around the Cypress opencast pits.	22 August 2040	Yes	Yes – via section 127. This consent remains part of the Cypress consent suite. The application instead seeks amendments to conditions that form part of the integrated set of conditions applying across both Regional and District consents for Cypress in respect of its existing compensation obligations.
RC03175/11 (V8)	To divert water in St Patrick Stream, upstream of St Pat's Dam water impoundment to a point downstream of St Pat's Dam, to facilitate mining activities and site water management.	22 August 2040	Yes	Yes – via section 127. This consent remains part of the Cypress consent suite. The application instead seeks amendments to conditions that form part of the integrated set of conditions applying across both Regional and District consents for Cypress in respect of its existing compensation obligations.
RC03175/12 (V8)	To dam water in St Patrick Stream behind the refurbished St Pat's Dam to form a water impoundment area for water treatment purposes.	22 August 2040	Yes	Yes – via section 127. This consent remains part of the Cypress consent suite. The application instead seeks amendments to conditions that form part of the integrated set of conditions applying across both Regional and District consents for Cypress in respect of its existing compensation obligations.
RC03175/13 (V8)	To dam water in St Patrick Stream behind a weir structure upstream of St Pat's Dam water impoundment to facilitate the diversion of the stream around the water impoundment area and St Pat's Dam.	22 August 2040	Yes	Yes – via section 127. This consent remains part of the Cypress consent suite. The application instead seeks amendments to conditions that form part of the integrated set of conditions applying across both Regional and District consents for Cypress in respect of its existing compensation obligations.
RC03175/14 (V8)	To discharge minewater (stormwater runoff and groundwater seepage) from within opencast workings, haul road, Cypress overburden placement area, soil stockpiles, and other ancillary mining activities, to St Pat's Dam water impoundment, and/or either the SP2 Sump or Mid St Pat's Reservoir or Lower St Pat's Reservoir.	22 August 2040	Yes	Yes – via section 127. This consent remains part of the Cypress consent suite. The application instead seeks amendments to conditions that form part of the integrated set of conditions applying across both Regional and District consents for Cypress in respect of its existing compensation obligations.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC03175/15 (V8)	To discharge treated minewater from St Pat's Dam impoundment to St Patrick Stream via a decant outlet pipe and flood overflow spillway.	22 August 2040	Yes	Yes – via section 127. This consent remains part of the Cypress consent suite. The application instead seeks amendments to conditions that form part of the integrated set of conditions applying across both Regional and District consents for Cypress in respect of its existing compensation obligations.
RC03175/16 (V8)	To discharge (clean) stormwater runoff from perimeter drains and stormwater runoff from rehabilitated areas of the mine to natural watercourses within the catchments of Upper Waimangaroa River and St Patrick Stream.	22 August 2040	Yes	Yes – via section 127. This consent remains part of the Cypress consent suite. The application instead seeks amendments to conditions that form part of the integrated set of conditions applying across both Regional and District consents for Cypress in respect of its existing compensation obligations.
RC03175/17 (V8)	The deposition of overburden material and waste rock containing potentially acid-forming material, and the associated discharge of contaminants to land from the overburden material and waste rock at: (i) Stockton Mine overburden disposal area (Webb Pit); and (ii) Cypress overburden placement area, and backfilled into Cypress opencast workings.	(i) 31 March 2027 (ii) 22 August 2040 Note: consent (i) is subject to RMA s123C which extends the expiry date to 31 December 2027.	(i) Yes (ii) Yes	(i) A new discharge permit is being sought to replace this consent, which expires. It is provided for in the Stockton suite of approvals being sought, as it is a discharge of material to Stockton Sub-Area. (ii) This permit remains, but is subject to the broader section 127 being sought for Cypress.
RC03175/18 (V8)	To discharge sewage and greywater from the Cypress office amenities area to land at the Cypress overburden placement area.	22 August 2040	Yes	Yes – via section 127. This consent remains part of the Cypress consent suite. The application instead seeks amendments to conditions that form part of the integrated set of conditions applying across both Regional and District consents for Cypress in respect of its existing compensation obligations.
RC03175/19 (V8)	To discharge dust, including coal, into the air from earthworks and mining operations at Cypress Mine, including dust generated from the blasting of rock and coal, vehicle movements, mobile aggregate crushing plant, and the stockpiling, conveying and handling of coal and other materials.	22 August 2040	Yes	Yes – via section 127. Haul road construction was always anticipated as part of the Cypress Mine development. As such, the portion of the UWHR located within the Cypress Mine area will be undertaken in accordance with the relevant conditions and requirements of the existing Cypress approvals.
RC03175/20 (V8)	To dam and divert water during construction phases.	[not listed on consent]	Yes	Yes – via section 127. Haul road construction was always anticipated as part of the Cypress Mine development. As such, the portion of the UWHR located within the Cypress Mine area will be undertaken in accordance with the relevant conditions and requirements of the existing Cypress approvals.
RC03175/21 (V8)	To discharge site stormwater to water during construction phases.	[not listed on consent]	Yes	Yes – via section 127.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
				Haul road construction was always anticipated as part of the Cypress Mine development. As such, the portion of the UWHR located within the Cypress Mine area will be undertaken in accordance with the relevant conditions and requirements of the existing Cypress approvals.
RC05270/1	To take surface water from water bodies located in the upper Waimangaroa Catchment associated with exploratory core drilling for coal.	23 May 2039	Yes	No - existing consent has a long duration and is fit for purpose.
RC05270/2	To discharge water containing contaminants to land that may enter water.	23 May 2039	Yes	No - existing consent has a long duration and is fit for purpose.

Existing West Coast Regional Council RMA Consents: No.2 South

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC11088/1	To undertake vegetation removal and earthworks on slopes greater than 12 degrees at "No. 2 South cutback".	4 September 2046	Yes	No – No.2 South is outside the scope of the BPCP.
RC11088/2	To divert water containing contaminants (sediment, coal fines and pH) from "No. 2 South cutback" to the "No. 1 North Pond" for treatment.	4 September 2046	Yes	No – No.2 South is outside the scope of the BPCP.
RC11088/3	To discharge potentially acid-forming overburden from "No. 2 South cutback" to land within Coal Mining Licence 37150.	4 September 2046	Yes	No – No.2 South is outside the scope of the BPCP.
RC11088/4	To discharge contaminants (dust, vehicle emissions and other fugitive emissions) to air from "No. 2 South cutback".	4 September 2046	Yes	No – No.2 South is outside the scope of the BPCP.

Existing West Coast Regional Council RMA Consents: Mt William

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC11181/1	To discharge contaminants into air from earthworks and mining operations at the Mt William North Mining Areas.	7 September 2047	Yes	No – Mt William is outside the scope of the BPCP.
RC11181/2	Earthworks and vegetation clearance within Mining Permit associated with the development and operation of the Mt William North mining area.	7 September 2047	Yes	No – Mt William is outside the scope of the BPCP.
RC11181/3	To disturb the beds of streams within the disturbance area on Figure 1.2(a) by the placement and maintenance of culverts and water management structures	7 September 2047	Yes	No – Mt William is outside the scope of the BPCP.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC11181/4	To take and divert groundwater seepage and stormwater runoff from within the opencast pit at the Mt William North mining area for dewatering purposes.	7 September 2047	Yes	No – Mt William is outside the scope of the BPCP.
RC11181/5	To dam and divert the headwaters of streams and minewater (stormwater runoff and groundwater seepage) from within opencast workings, haul road, overburden placement area, soil stockpiles, and other ancillary mining activities, to Lower St Pats Reservoir and Darcy Dam via drainage channels	7 September 2047	Yes	No – Mt William is outside the scope of the BPCP.
RC11181/6	To discharge site stormwater to water during construction.	7 September 2047	Yes	No – Mt William is outside the scope of the BPCP.
RC11181/7	To divert clean runoff around a sump or sumps into Darcy Stream.	7 September 2047	Yes	No – Mt William is outside the scope of the BPCP.
RC11181/8	To dam water in Darcy Stream behind Darcy Dam.	7 September 2047	Yes	No – Mt William is outside the scope of the BPCP.
RC11181/9	To discharge treated minewater and stormwater from Darcy Dam into Darcy Stream.	7 September 2047	Yes	No – Mt William is outside the scope of the BPCP.
RC11181/10	To discharge water treatment chemicals into Darcy Dam	7 September 2047	Yes	No – Mt William is outside the scope of the BPCP.
RC11181/11	The deposition of overburden material and waste rock containing potentially acid-forming material, and the associated discharge of contaminants onto land from the overburden material and waste rock.	7 September 2047	Yes	No – Mt William is outside the scope of the BPCP.
RC11012/1	To undertake up to 28 ha of vegetation clearance and earthworks, including works within the scheme area defined in Figure A, associated with the construction, operation, use, repair, and maintenance of the St Pats 2 Water Treatment Scheme.	5 May 2046	Yes	No – This water treatment scheme was proposed associated with the proposed mining activities at Mt William. Mt William is outside the scope of the BPCP.
RC11012/2	To disturb, excavate and deposit material in the bed of watercourses, and to erect, place, use, repair, and maintain structures within the bed of watercourses, located within the scheme area detailed in Figure A, associated with the construction, operation, use, repair and maintenance of the St Pats 2 Water Treatment Scheme.	5 May 2046	Yes	No – This water treatment scheme was proposed associated with the proposed mining activities at Mt William. Mt William is outside the scope of the BPCP.
RC11012/3	To take, use, dam and divert (including temporary activities) associated with the construction, operation, use, repair, and maintenance of the St Pats 2 Water Treatment Scheme.	5 May 2046	Yes	No – This water treatment scheme was proposed associated with the proposed mining activities at Mt William. Mt William is outside the scope of the BPCP.
RC11012/4	To take, divert and use groundwater (including seepage) within the scheme area defined in Figure A associated with the construction, use, operation, repair, and maintenance of the St Pats 2 Water Treatment Scheme.	5 May 2046	Yes	No – This water treatment scheme was proposed associated with the proposed mining activities at Mt William. Mt William is outside the scope of the BPCP.
RC11012/5	To take and use water for construction activities associated with the St Pats 2 Water Treatment Scheme, from surface watercourses within the scheme area.	5 May 2046	Yes	No – This water treatment scheme was proposed associated with the proposed mining activities at Mt William. Mt William is outside the scope of the BPCP.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC11012/6	To discharge water and contaminants (principally sediment) associated with the construction, use, operation, repair, and maintenance of the St Pats 2 Water Treatment Scheme.	5 May 2046	Yes	No – This water treatment scheme was proposed associated with the proposed mining activities at Mt William. Mt William is outside the scope of the BPCP.
RC11012/7	To discharge water and contaminants (including low pH water, trace elements and sediment) associated with the use and operation of the St Pats 2 or Mid St Pats Water Treatment Schemes.	5 May 2046	Yes	No – This water treatment scheme was proposed associated with the proposed mining activities at Mt William. Mt William is outside the scope of the BPCP.
RC11012/8	To discharge water and contaminants (including ultrafine limestone and hydrated limestone) associated with the use and operation of the St Pats 2 or Mid St Pats Water Treatment Schemes.	5 May 2046	Yes	No – This water treatment scheme was proposed associated with the proposed mining activities at Mt William. Mt William is outside the scope of the BPCP.
RC11012/9	To discharge contaminants to air associated with the construction, operation, use, repair, and maintenance of the St Pats 2 Water Treatment Scheme including but not limited to dust associated with the excavation, handling, conveying and processing of gravel, sand, soil, rock and other natural materials; the operation of aggregate crushing and screening and concrete batching plants and stockpiling activities.	5 May 2046	Yes	No – This water treatment scheme was proposed associated with the proposed mining activities at Mt William. Mt William is outside the scope of the BPCP.

Existing West Coast Regional Council RMA Consents: Escarpment

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC10193/1	To enable mining and associated land use disturbance activities associated with the Escarpment Mine Project.	24 October 2025 Application made for new permit in July 2025, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - New land use consent sought, with a broader scope, which would supersede this one: relating to the ESE Sub-Area rather than the former Escarpment Mine Project.
RC10193/4	To take, use, dam or divert water associated with the Escarpment Mine Project.	24 October 2025 Application made for new permit in July 2025, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - New water permits sought, with a broader scope, which would supersede this one: relating to the ESE Sub-Area rather than the former Escarpment Mine Project.
RC10193/5	To discharge contaminants or water into water associated with the Escarpment Mine Project.	24 October 2048	No - will be superseded by BPCP Approvals	Yes - New discharge permits sought, with a broader scope, which would supersede this one: relating to the ESE Sub-Area rather than the former Escarpment Mine Project.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC10193/6	To discharge contaminants onto or into land in circumstances which may result in that contaminant (or any other contaminant emanating as a result of natural processes from that contaminant entering water associated with the Escarpment Mine Project.	24 October 2048	No - will be superseded by BPCP Approvals	Yes - New discharge permits sought, with a broader scope, which would supersede this one: relating to the ESE Sub-Area rather than the former Escarpment Mine Project.
RC10193/7	To discharge contaminants onto or into land associated with the Escarpment Mine Project.	24 October 2025 Application made for new permit in July 2025, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - New discharge permits sought, with a broader scope, which would supersede this one: relating to the ESE Sub-Area rather than the former Escarpment Mine Project.
RC10193/9	To enable land disturbance and associated activities (including but not limited to vegetation clearance and structures) associated with Coal Processing and Transport.	N/A	No - will be superseded by BPCP Approvals	Yes - New land use consent sought, with a broader scope, which would supersede this one: relating to the ESE Sub-Area rather than the former Escarpment Mine Project.
RC-2017-0112-02	To divert water for the purposes of coal mining within MP51279.	31 July 2053, or upon the expiry or surrender of RC10193 Application made for new permit in July 2025, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - New water permits sought, with a broader scope, which would supersede this one: relating to the ESE Sub-Area rather than the former Escarpment Mine Project.
RC-2017-0112-03	To discharge water containing contaminants to Cascade Creek and its tributaries, namely V8 Creek, for the purposes of Coal Mining within MP51279.	31 July 2053, or upon the expiry or surrender of RC10193 Application made for new permit in July 2025, currently subject to RMA s124.	No - will be superseded by BPCP Approvals	Yes - New discharge permits sought, with a broader scope, which would supersede this one: relating to the ESE Sub-Area rather than the former Escarpment Mine Project.

Existing West Coast Regional Council RMA Consents: Cascade and Coalbrookdale

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC07056/1	To divert a section of an unnamed tributary of Cascade Creek associated with coal mining activities.	27 July 2027	Yes	No - activities at the Cascade Mine are outside of the scope of the BPCP.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
RC13081/2	To take and use water from Mill Creek (also known as VS Creek) associated with opencast coal mining within MP 41455.	30 September 2030	Yes	No - activities at the Cascade Mine are outside of the scope of the BPCP.
RC13081/3	To discharge mine influenced water from treatment ponds to Hagen Creek and Mill Creek within MP 41455.	30 September 2030	Yes	No - activities at the Cascade Mine are outside of the scope of the BPCP.
RC-2017-0051	To undertake earthworks and vegetation clearance associated with the operation of the Cascade Mine site within MP 41455.	20 March 2028	Yes	No - activities at the Cascade Mine are outside of the scope of the BPCP.
RC- 2024-0118-01	To undertake earthworks including stockpiling and rehabilitation of the site within a Schedule 2 wetland, Coalbrookdale.	20 December 2049	Yes	No – activities at the Cascade Mine are outside of the scope of the BPCP.
RC- 2024-0118-02	To discharge stormwater containing contaminants to land and to a tributary of Cascade Creek via existing water management infrastructure for the purpose of operating a mining support area, Coalbrookdale.	20 December 2049	Yes	Yes – Whilst activities at the Cascade Mine are outside of the scope of the BPCP, the BPCP will rely upon the existing discharge permit when using the Coalbrookdale mining support area to provide a laydown area during construction and maintenance of the UWHR.

Existing Exploration Permits

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
EP 61 157	Exploration Permit for the Deep Creek Area	15 July 2030	Yes	Yes - Mining Permit being sought for MFS Sub-Area, with the balance of EP 61 157 remaining as an Exploration Permit until expiry.

Existing Access Arrangements

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
37 444	Access arrangement for Mining Permit 41 810 (the DOC Triangle at Stockton)	8 September 2040 (MP41810)	Yes	Yes - A variation is being sought to expand the footprint for activities authorised by the access arrangement.
AA 51279 (also known as 37 873)	Access Arrangement for Mining Permit 51 279 (existing Escarpment Mine)	23 June 2032 (MP51279)	No – will be superseded by BPCP approvals	Yes – the BPCP seeks a new Access Arrangement that includes an extended footprint.
38096	Access Arrangement for Mining Permit 52 937 (existing No.2 South at Stockton)	4 November 2030	Yes	No - activities at No.2 South are outside of the scope of the BPCP. This Access Arrangement will continue as authorised.
12984-1	Access Arrangement for Mining Permit 41 515 (Upper Waimangaroa)	11 March 2038 (MP41515)	Yes	Yes – the BPCP will rely on this existing Access Arrangement.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
19116-1	Access Arrangement for Mining Permit 41 515 (Upper Waimangaroa)	11 March 2038 (MP41515)	Yes	Yes – the BPCP will rely on this existing Access Arrangement.
AA 41455	Access Arrangement for Mining Permit 41 455 (existing Cascade Mine)	14 May 2027 (MP41455)	Yes	No – activities at the Cascade Mine are outside the scope of the BPCP. This Access Arrangement will continue as authorised.

Existing Research and Collection Permits

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
93000-FLO	Authority for research and / or collection and / or introduction of material on public conservation land.	9 September 2031	Yes	Yes – collection of vegetative cuttings, seeds, spores and seedlings under this approval will be used to source plant material for the Bathurst nursery as part of the BPCP, until this permit expires.
66807-GEO	To take water samples for research purposes – 1 litre per sample, 1 sample/ fortnight-month, using grab samples and permanent sondes.	4 June 2028	No – will be superseded by BPCP approvals	Yes – this approval is no longer required, as it will be superseded by the access arrangements being sought at Escarpment Extended, which will provide for BPCP water monitoring activities.
67824-RES	To take water samples for research purposes – 1 litre per sample, 1 sample/ fortnight-month, using grab samples and permanent sondes.	4 June 2028	No – will be superseded by BPCP approvals	Yes – this approval is no longer required, as it will be superseded by the access arrangements being sought at Escarpment Extended, which will provide for BPCP water monitoring activities.

Existing Concessions

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
67930-OTH	Rockies Fly Rock concession (Stockton).	31 May 2028	No – will be superseded by BPCP approvals	Yes - A new concession is being sought to increase the footprint to include all land subject to Fly Rock deposition from the Stockton Mine.
WC-111267-OTH	Easement allowing right-of-way over Fly Creek Mine Road for the purpose of vehicles, excluding all vehicles hauling coal (Stockton).	31 May 2034	No – will be superseded by BPCP approvals	Yes - This concession is being included in an application for a new concession which includes an amalgamation of several concessions and provision of new areas to provide for infrastructure activities at the Stockton Mine.
26733-OTH	Easement of Solid Energy power line (Stockton).	31 March 2027	No – will be superseded by BPCP approvals	Yes - This concession is being included in an application for a new concession which includes an amalgamation of several concessions and provision of new areas to provide for infrastructure activities at the Stockton Mine.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
16811-OTH	Easement associated with Stockton Haul Road.	31 August 2027	No – will be superseded by BPCP approvals	Yes - This concession is being included in an application for a new concession which includes an amalgamation of several concessions and provision of new areas to provide for infrastructure activities at the Stockton Mine.
EAS-0069	The placement on and the occupation of the easement area by three power poles and associated 11,000 volt lines.	31 December 2031	No – will be superseded by BPCP approvals	Yes - This concession is being included in an application for a new concession which includes an amalgamation of several concessions and provision of new areas to provide for infrastructure activities at the Stockton Mine.
99374-OTH	Mt Augustus and No 2 South Fly Rock concession (Stockton).	31 July 2032	No	No – this concession is not required as blasting in this area is completed
34684-OTH	Whareatea Road Concession – use of easement land for the upgrade, maintenance and use of Whareatea Road for the purpose of access to and transport of coal from Escarpment Mine.	31 June 2024	No – will be superseded by BPCP approvals	No – this concession will be superseded by access arrangement being sought for the BPCP
113740-OTH	A right of way for the purpose of vehicle passage to the Escarpment mine, including lay-bys and carpark.	31 July 2030	No – will be superseded by BPCP approvals	No – this concession will be superseded by access arrangement being sought for the BPCP
103746-TEL	Radio repeater station associated with MP 51279, Denniston Plateau (Escarpment Mine)	20 June 2033	Yes	No – the existing permit will remain applicable to the activity.
54303-OTH	Easement allowing right-of-way over existing road, a locked gate, sign-in facility and barrier arm (Cascade Mine)	14 May 2027	Yes	No - activities at the Cascade Mine are outside of the scope of the BPCP.
121279-AIR	Commercial drone use on Orange Category Public Conservation Land	31 December 2028	Yes	Yes – this concession will remain live, but the access arrangements being sought for the BPCP also provide for drone use over the access arrangement footprints

Existing Wildlife Act Permit

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
WC-97411-FAU	Capture, handling, disturbance, and incidental killing of protected wildlife from Cypress (within MP41515)	31 December 2027	No – will be superseded by BPCP approvals	Yes - This Wildlife Act Authority will be superseded by the global Wildlife Act Authority proposed under the BPCP.
WC-108591-FAU	Capture, handling, disturbance, and incidental killing of protected wildlife from Cypress (within CML37150)	On the termination of CML 37-150 or 10 years from date consent granted, whichever occurs first	No – will be superseded by BPCP approvals	Yes - This Wildlife Act Authority will be superseded by the global Wildlife Act Authority proposed under the BPCP.

Approval Number	Description	Expiry Date	Is this Approval still required?	Is the activity incorporated into the Application?
WC-97412-FAU	Capture, handling, disturbance and incidental killing of protected wildlife at Rockies and Millerton mining blocks (Stockton).	On the termination of CML 37-150 of 10 years from the date consent is granted, whichever occurs first	No – will be superseded by BPCP approvals	Yes - This Wildlife Act Authority will be superseded by the global Wildlife Act Authority proposed under the BPCP.
68010-FAU	To disturb, catch alive, handle and incidentally kill absolutely protected wildlife while undertaking drilling of sites under existing access arrangement (Sullivan).	21 October 2028	No	No – this work has been completed, so this approval is not required going forward
