NOTE: ZTV analysis is indicative only, and may either over or under-represent visibility. It cannot indicate the potential visual impacts of a development, nor show the likely significance of impacts.
 For this project, the following parameters were used:
 Terrain model type: LiDAR derived DEM, bare-ground only
 Terrain model resolution (GSD): 1.0 m
 Height of target points: 0.2m
 Observer eye height: 1.7m
 Earth curvature and light refraction included: Yes

Viewpoint 1: View from Boulder Hill Track in Belmont Regional Park, approximately 340 metres northwest of the proposed land exchange, looking in a southeasterly direction.

Viewpoint 2: View from Kelson Track in Belmont Regional Park, approximately 930 metres west of the proposed land exchange, looking in an easterly direction.

Viewpoint 3: View from Kaitangata Crescent, approximately 1.1 kilometres west of the proposed land exchange, looking in an easterly direction.

Viewpoint 4: View from Liverton Road, approximately 1 kilometre southwest of the proposed land exchange, looking in a northeasterly direction.

Viewpoint 5: View from High Street, approximately 1 kilometre southeast of the proposed land exchange, looking in a northwesterly direction.

Viewpoint 6: View from Aldersgate Grove, approximately 1.3 kilometres southeast of the proposed land exchange, looking in a northwesterly direction.

Viewpoint 7: View from Eastern Hutt Road, approximately 1.3 kilometres southeast of the proposed land exchange, looking in a northwesterly direction.

Viewpoint 8: View from Lord Street, approximately 2.3 kilometres east of the proposed land exchange, looking in a westerly direction.

Viewpoint 9: View from Fraser Park, approximately 2.3 kilometres southwest of the proposed land exchange, looking in a northeasterly direction.

Together. Shaping Better Places.

Boffa Miskell is a leading New Zealand environmental consultancy with nine offices throughout Aotearoa. We work with a wide range of local, international private and public sector clients in the areas of planning, urban design, landscape architecture, landscape planning, ecology, biosecurity, Te Hīhiri (cultural advisory), engagement, transport advisory, climate change, graphics and mapping. Over the past five decades we have built a reputation for creativity, professionalism, innovation and excellence by understanding each project's interconnections with the wider environmental, social, cultural and economic context.
