Philip Heffernan
Project Manager
Winstone Aggregates

Dear Phil

RE: WRITTEN CONSENT PROVIDED UNDER S1276(1)(B) OF THE RESOURCE MANAGEMENT ACT REGARDING THE PROPOSED HUNUA QUARRY DEVELOPMENT

We are writing to you to confirm that Ardmore Airport Limited have reviewed the appended plans and brief description of the proposed activity received on 19 March 2026. You have explained that Winstone Aggregates Limited is seeking approval for a proposed expansion of Hunua Quarry at 489 Hunua Road, Hunua under the Fast-Track Approvals Act 2024 (FTAA).

The Hunua Quarry Development is a Listed Project in Schedule 2 of the FTAA, reflecting its regional and national significance. The proposal is to expand the existing quarry to increase annual quarry production to approximately 5.4 million tonnes of aggregate. The proposed development will enable access to over 80 years of resource supporting critical infrastructure projects including roads, housing, and regionally significant construction works.

Based on our understanding of the Project, Ardmore Airport Limited can confirm they do not have any concerns that proposed Hunua Quarry Development, located at 489 Hunua Road and adjoining parcels and located within our Designation No. 200 in the Auckland Unitary Plan (Operative in part) 15 November 2016. We further confirm the Project would not prevent or hinder our operations as provided for under the designation purpose.

We have sighted the plans and these are attached and signed for completeness.

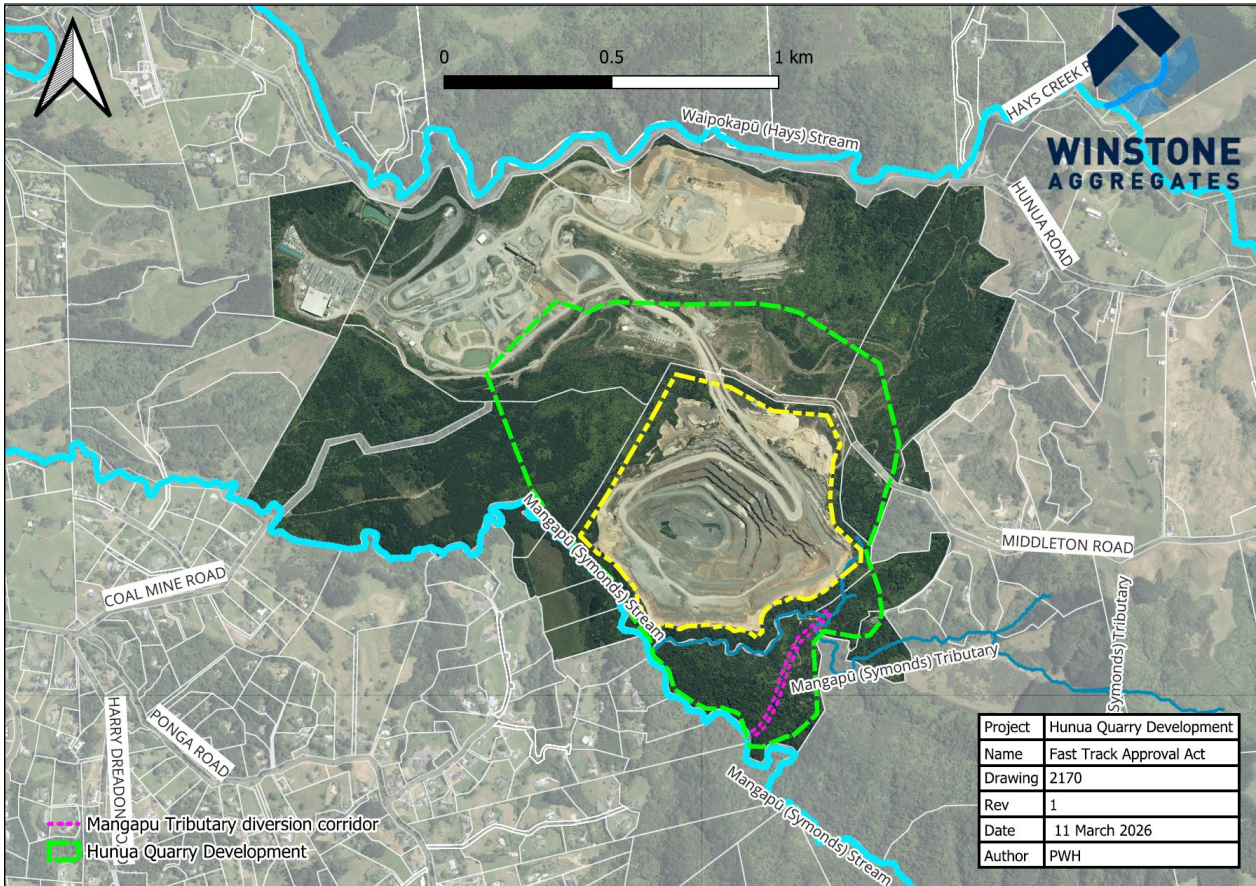

KIND REGARDS

DAVE MARCELLUS
CEO
