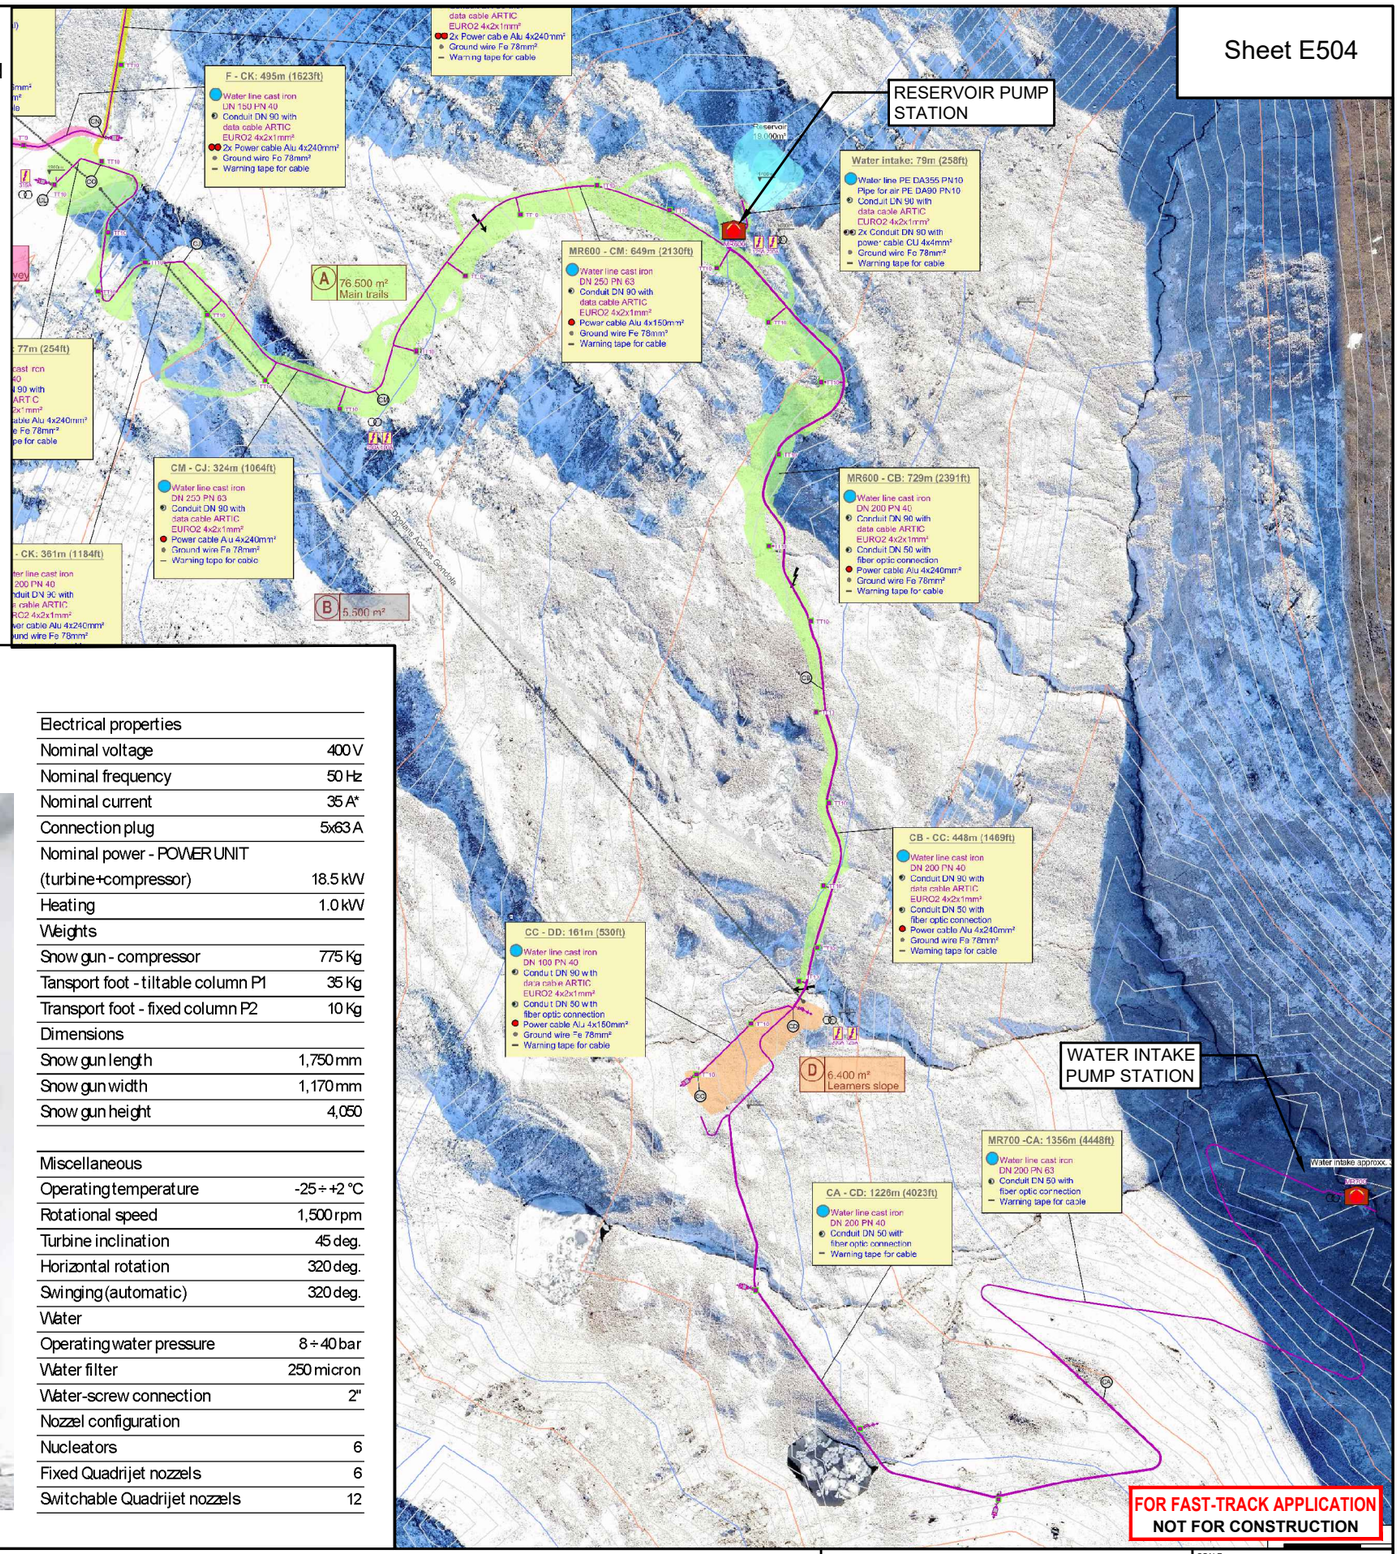
SNOWMAKING TRENCH DETAIL (TRENCH TYPE 4)

SNOW GUN FOUNDATIONS

Snow gun towers to be founded on precast reinforced concrete foundation units, installed on a prepared and compacted subgrade (or lean concrete blinding if required). Foundations to include cast-in anchor bolts / base plate fixing for the snow gun tower. Final foundation type, bearing preparation, anchoring and levels to be confirmed by geotechnical assessment and detailed design.

SNOWMAKING INFRASTRUCTURE TRENCH

Typical cross section of snowmaking infrastructure trench provided above. Trench to be in combined services trench with supply services in the Doolans. All trenches to be constructed in trails and access roads.



TechnoAlpin TT10 Snow Gun

- 1 x Units along mid station return access
- 26 x Units along Doolans Ski Trails and mid station

Electrical properties	
Nominal voltage	400 V
Nominal frequency	50 Hz
Nominal current	41 A*
Connection plug	5x63 A
Nominal power - POWER UNIT (turbine+compressor)	22 kW
Heating	1.3 kW
Weights	
Snow gun - compressor	825 Kg
Tansport foot - tiltable column P1	35 Kg
Transport foot - fixed column P2	10 Kg
Dimensions	
Snow gun length	1,780 mm
Snow gun width	1,220 mm
Snow gun height	4,100
Miscellaneous	
Operating temperature	-25 ÷ +2 °C
Rotational speed	1,500 rpm
Turbine inclination	45 deg.
Horizontal rotation	320 deg.
Swinging (automatic)	320 deg.
Water	
Operating water pressure	8 ÷ 40 bar
Water filter	250 micron
Water connection - Camlock	2"
Nozzel configuration	
Nucleators	8
Fixed Quadrijet nozzels	8
Controlable Quadrijet nozzels	16

TechnoAlpin TT9 Snow Gun

- 8 x Units along mid station return access
- 4 x Units along Curvey access

Electrical properties	
Nominal voltage	400 V
Nominal frequency	50 Hz
Nominal current	35 A*
Connection plug	5x63 A
Nominal power - POWER UNIT (turbine+compressor)	18.5 kW
Heating	1.0 kW
Weights	
Snow gun - compressor	775 Kg
Tansport foot - tiltable column P1	35 Kg
Transport foot - fixed column P2	10 Kg
Dimensions	
Snow gun length	1,750 mm
Snow gun width	1,170 mm
Snow gun height	4,050
Miscellaneous	
Operating temperature	-25 ÷ +2 °C
Rotational speed	1,500 rpm
Turbine inclination	45 deg.
Horizontal rotation	320 deg.
Swinging (automatic)	320 deg.
Water	
Operating water pressure	8 ÷ 40 bar
Water filter	250 micron
Water-screw connection	2"
Nozzel configuration	
Nucleators	6
Fixed Quadrijet nozzels	6
Switchable Quadrijet nozzels	12

ACCESS TRACK FROM CURVEY BASIN TO MID-STATION

ROOF AREA 2: ~500m^2
ESTIMATE Q = 10l/s
FLOW TO BE DIVERTED TOWARD THE NEW ROADSIDE CHANNEL AND DISTRIBUTED TO SURROUNDING AREAS ON THE QLDC SIDE

SPLASH CROSSING B

RESERVOIR

Boundary

CATCHMENT : ~8.07Ha
ESTIMATED RUNOFF Q= 277 l/s (FOR 100 ARI)

DRAINAGE SWALE/CHANNEL AROUND THE POND TO BE DIVERTED AND DISTRIBUTED TO SURROUNDING AREA:

-DEPTH: 0.23m + 0.15m FREEBOARD-BOTTOM WIDTH: 0.6m-TOP WIDTH 2.0m- SLOPE 1-2%-VELOCITY: 0.79m/s LOW VELOCITY, SO NO RIPRAP REQUIRED; GRASS LINING OR AS EXCAVATED FINISH WILL BE OKAY

SPLASH CROSSING A

SPLASH CROSSING C

SPLASH CROSSING D

SPLASH CROSSING E

MID-STATION AREA

4WD ACCESS TRACK

INTERMEDIATE GROOMED SKI TRAIL WITH SNOWMAKING

ROOF AREA 5: ~141m^2
ESTIMATED Q = 2.6 l/s
DOWNPIPES DISCHARGING TO ROADSIDE SWALES FOR DISTRIBUTION TO SURROUNDING AREA

QLDC

OODC

4WD ACCESS TRACK

SPLASH CROSSING F

REPLICATE CULVERT E: 525mm HDPE/RCP, WITH POTENTIAL SCOUR PROTECTION (I.E D50=200)
CATCHMENT SIZE = ~17.5 Ha
ESTIMATED RUNOFF Q= 623 l/s

ARMOURED SWALE TO DIRECT EXISTING CREEK AROUND TRAIL

Boundary

CULVERT C: 750mm HDPE/RCP OR TWIN 450mm CULVERTS FOR REDUNDANCY, WITH SCOUR PROTECTION (I.E D50=200)
CATCHMENT SIZE = ~24.08 Ha
ESTIMATED RUNOFF Q= 711l/s

Boundary

INTERMEDIATE GROOMED SKI TRAIL WITH SNOWMAKING

BASED ON GOOGLE MAPS ELEVATION DATA, THIS ROAD SLOPES TOWARD CULVERT C, SO FLOW CAN POTENTIALLY BE DIVERTED TO CULVERT C

DOOLANS ACCESS GONDOLA

EXISTING SHEET FLOW TO BE RETAINED

DOOLANS EXPANSION AREA BOUNDARY

Doolans Creek

CULVERT B: 525mm HDPE/RCP, WITH SCOUR PROTECTION (I.E D50=200)
CATCHMENT SIZE = ~24.2 Ha
ESTIMATED RUNOFF Q= 714 l/s

CULVERT A: 900mm HDPE/RCP OR TWIN 600mm CULVERTS FOR REDUNDANCY, WITH SCOUR PROTECTION (I.E D50=300)
CATCHMENT SIZE = ~61.45 Ha
ESTIMATED RUNOFF Q= 1814 l/s

PROPOSED LIFT STATION - SEE LIFT DESIGN

PROPOSED DOOLANS BASE BUILDING

PROPOSED LEARNERS SLOPE

ROOF AREA 4: ~900m^2
ESTIMATED Q = 16 l/s
DOWNPIPES DISCHARGING TO GROUND WITH SUMPS AND PIPED TO ADJACENT CREEK

ROOF AREA 3 : ~1318m^2
ESTIMATED Q = 24 l/s
DOWNPIPE CAN BE EXTENDED AT THE BASE TO ALLOW FLOW TO DRAIN INTO EXISTING WATERCOURSE, WITH OUTLET SCOUR PROTECTION (2xD50=100 ROCKS)

Appendix D: All Identified Invertebrate Taxa.

Filename:	E3 Remarkables Insect Data
Created by:	William Frost
Date created:	16/03/2025
Project name:	NZSki Entomological Survey of the Doolans region, the Remarkables, Queenstown, NZ
Project aim:	risk species within a proposed ski lift's footprint
Project objectives:	1. Determine a snapshot of the invertebrate fauna within the Doolan's area 2. Identify noteworthy threatened species collected within the footprint area
Data collection description:	Specimen data for 100 pitfalls separated into 20 sites is identified with a generic/ specific name where possible and a family level taxonomic unit where generic/ specific identification is too difficult to discern.
Data entered by:	William Frost & Dustin Lamont
Data checked by:	William Frost

Worksheets:

"Pitfall"	Contains information referring to all larval and adult specimens of invertebrates collected and identified from pitfall trapping within the Doolans.
"Hand collect"	Contains information referring to all larval and adult specimens collected and identified from hand collection surveys throughout the Doolans area.
"Light trap"	Contains information referring to all adult Lepidoptera specimens collected and identified from light trapping with a 200 watt mercury vapour bulb within the Doolans.

Variable name	**Description**
Set_Date	The date in which a given pitfall trap was set up and established, i.e the surveying period began on the date the pitfall was installed.
Collection_ Date	The date in which samples from a given pitfall trap were collected and the pitfall was removed, i.e the surveying period ended on the date the pitfall was removed.
Site_No	A number from 1-20 referring to which pitfall site a specimen was collected from.
Pit_No	A number from 1-5 referring to which pitfall trap within a site a specimen was collected from.
Code	A combination of both the Site_No and Pit_No in one code to simplify labelling of specimens.
Class	The Class grouping classification for an invertebrate, i.e 'Insecta, Arachnida'.
Order	The order level taxonomic grouping for classification and identification of an invertebrate, i.e 'Orthoptera, Lepidoptera'.
Family	The family level taxonomic grouping for classification and identification of an invertebrate, i.e 'Anostostomatidae, Crambidae'.
Genus	The genus level taxonomic grouping for classification and identification of an invertebrate, i.e 'Hemiandrus, Scoparia'.
Species	The species level taxonomic grouping for classification and identification of an invertebrate, i.e 'focalis, niphospora'.
Name	The genus and species taxonomic identification for a specimen are supplied here if possible.
Tentative Y/N	Was an identification made with uncertainty?
Life_Stage	What life stage was an invertebrate specimen, i.e nymph, larval, adult, pupal.
Count	What number of specimens of the same grouping were collected within a pitfall trap.
Threat_Classification	What is the threat status (if available) for an invertebrate specimen, note these are all derived from the New Zealand Threat Classification System, Lepidoptera are updated as per unpublished assessments for Hoare. et al 2025.
Determiner_Name	The person that made an identification, i.e Will Frost, Dustin Lamont
Notes	Any notes of relevance or value pertaining to a singular specimen/ set of specimens.
Collection_Method	How was the specimen hand collected? I.e sweeping net, hand collection.
Lat	What was the latitude where a specimen was collected.
Lon	What was the longitude where a specimen was collected.

Additional comments:	Any 'Indet.' (indeterminate identification) notations refer to specimens that could not be identified to the highest possible taxonomic level due to a lack of resources for identification of that group, difficulty of identification or damage to specimens. The 'Indet.' notation is also provided for threat classification where a species could not be identified to the highest possible taxonomic unit. Threat assessments made for Lepidoptera are updated pertaining to the most recent unpublished threat assessment, for which I was a panel member. The specimens collected and identified represent a small and suboptimal time frame of monitoring within the Doolans area and in no

Filename:	E3 Remarkables Insect Data
Created by:	William Frost
Date created:	17/02/2026
Project name:	NZSki Entomological Survey of the Doolans region, the Remarkables, Queenstown, NZ
Project aim:	To survey the entomological fauna of the Doolan's area with a variety of collecting methods, to ascertain a snapshot view of the invertebrate fauna and at risk species within a proposed ski lift's footprint
Project objectives:	1. Determine a snapshot of the invertebrate fauna within the Doolan's area 2. Identify noteworthy threatened species collected within the footprint area
Data collection description:	Specimen data for 40 pitfalls separated into 8 sites is identified with a generic/ specific name where possible and a family level taxonomic unit where generic/ specific identification is too difficult to discern.
Data entered by:	William Frost & Dustin Lamont
Data checked by:	William Frost

Worksheets:

"Pitfall"	Contains information referring to all larval and adult specimens of invertebrates collected and identified from pitfall trapping within the Doolans.
"Hand collect"	Contains information referring to all larval and adult specimens collected and identified from hand collection surveys throughout the Doolans area.
"Light trap"	Contains information referring to all adult Lepidoptera specimens collected and identified from light trapping with a 200 watt mercury vapour bulb within the Doolans.

Variable name	**Description**
Set_Date	The date in which a given pitfall trap was set up and established, i.e the surveying period began on the date the pitfall was installed.
Collection_ Date	The date in which samples from a given pitfall trap were collected and the pitfall was removed, i.e the surveying period ended on the date the pitfall was removed.
Site_No	A number from 1-20 referring to which pitfall site a specimen was collected from.
Pit_No	A number from 1-5 referring to which pitfall trap within a site a specimen was collected from.
Code	A combination of both the Site_No and Pit_No in one code to simplify labelling of specimens.
Class	The Class grouping classification for an invertebrate, i.e 'Insecta, Arachnida'.
Order	The order level taxonomic grouping for classification and identification of an invertebrate, i.e 'Orthoptera, Lepidoptera'.
Family	The family level taxonomic grouping for classification and identification of an invertebrate, i.e 'Anostostomatidae, Crambidae'.
Genus	The genus level taxonomic grouping for classification and identification of an invertebrate, i.e 'Hemiandrus, Scoparia'.
Species	The species level taxonomic grouping for classification and identification of an invertebrate, i.e 'focalis, niphospora'.
Name	The genus and species taxonomic identification for a specimen are supplied here if possible.
Tentative Y/N	Was an identification made with uncertainty?
Life_Stage	What life stage was an invertebrate specimen, i.e nymph, larval, adult, pupal.
Count	What number of specimens of the same grouping were collected within a pitfall trap.
Threat_Classification	What is the threat status (if available) for an invertebrate specimen, note these are all derived from the New Zealand Threat Classification System, Lepidoptera are updated as per unpublished assessments for Hoare. et al 2025.
Determiner_Name	The person that made an identification, i.e Will Frost, Dustin Lamont
Notes	Any notes of relevance or value pertaining to a singular specimen/ set of specimens.
Collection_Method	How was the specimen hand collected? I.e sweeping net, hand collection.
Lat	What was the latitude where a specimen was collected.
Lon	What was the longitude where a specimen was collected.

Additional comments:	Any 'Indet.' (indeterminate identification) notations refer to specimens that could not be identified to the highest possible taxonomic level due to a lack of resources for identification of that group, difficulty of identification or damage to specimens. The 'Indet.' notation is also provided for threat classification where a species could not be identified to the highest possible taxonomic unit. Threat assessments made for Lepidoptera are updated pertaining to the most recent unpublished threat assessment, for which I was a panel member. The specimens collected and identified represent a small and suboptimal time frame of monitoring within the Doolans area and in no way represent a complete assessment of the Doolans area's invertebrate fauna. Will Frost.

Appendix E: New Zealand Wetland Data Forms.

NEW ZEALAND WETLAND DELINEATION DATA FORM: PASTURE TEST

SECTION A – SITE INFORMATION

site 1

Site: 1 Doolans. Region: ~~Doolans~~ Remarks (otago) Sampling point/ID: Site 2

Owner/address: DOC Date: 26/3/25 Land use: Conservation land

Landform: adjacent farm. Local relief: Gentle slope - 20m Land cover: tussock grassland

Is the land drained? YES___ NO ✓ ___UNKNOWN___ Investigator(s): LSW, AD Slope°: <3°

GPS (NZTM): 643 Altitude m:___ Photo Nos: LSW Ph. 3273

Are climatic/hydrologic conditions on the site typical for this time of year? YES ✓ ___NO___ (if NO explain in Remarks)

Are Vegetation___Soil___or Hydrology___ significantly disturbed? No Are 'Normal Circumstances' present? YES ✓ ___NO___

Are Vegetation___Soil___or Hydrology___ naturally problematic? No Explain answers in Remarks if needed

SUMMARY OF FINDINGS—Attach site map showing sampling point locations, transects, important features etc.

Pasture exclusion?				
YES ☐ NO ☐	Hydrophytic vegetation present?	YES ~~☐~~	~~☐~~ NO	
	Hydric soils present?	YES ☐	☒ NO	
	Wetland hydrology present?	YES ☐	☒ NO	

Is the sampled area within a wetland? YES ☐ NO ☒

SECTION B – VEGETATION

Use scientific names of plants.

Tree Stratum (Plot size:___)	Absolute % cover	Dominant Species?	Indicator Status	Pasture % cover

Total	96 (A)	409 (B)

Prevalence Index (B/A) = 4.26

Hydrophytic vegetation indicators:

☐ Rapid Test

☐ Dominance Test is >50%

☐ Prevalence Index is ≤3.0[1]

☐ Morphological adaptations[1] (supporting data in Remarks)

☐ Problematic hydrophytic vegetation[1]

Indicators of hydric soil and wetland hydrology must be present, unless disturbed or problematic

Hydrophytic vegetation present? YES ☐ NO ☐ UNCERTAIN ☒

Remarks: unable to be assessed due to indicator status not being assigned.

SECTION C – SOIL AND HYDROLOGY

Profile description: (Describe to the depth needed to confirm indicator presence/absence, 30 cm default)

Depth (cm)	Matrix colour (moist)	Mottles colour (moist)	Mottles %[1]	Mottles Size[2]	Mottle location[3]	Material[4]	Remarks
0-8	10YR 3/2		–			mineral	~~Soft~~ silt loam
							shallow profile - rock

[1]Use % area charts; [2]Use size classes; [3]Ped face, pore, within ped along roots, within matrix; [4]Organic (peaty), humic, mineral soil

Hydric soil indicators:

Soil drainage (circle) W (MW) I P VP

Organic layers:
- ☐ Organic soil material
- ☐ Litter
- ☐ Fibric
- ☐ Mesic
- ☐ Humic
- ☐ Peaty topsoil
- ☐ Peaty subsoil

Concretions:
- ☐ Iron concretions
- ☐ Manganese concretions
- ☐ Nodular

Consistence:
- ☐ Plastic
- ☐ Sticky
- ☐ Fluid

Colours: profile form either:
- ☐ Gley OR
- ☐ Mottled

Horizon:
- ☐ Reductimorphic
- ☐ Redox mottled
- ☐ Redox segregations
- ☐ Perch-gley features

Cause of wetness (circle appropriate):

Location: Depression Flat Valley Gully (Slope)

Water table: Depth (cm) ____

High GW Perched Seepage Tidal Lithic

Pans: Depth (cm) _____

Pan Humus Fe-pan Densi- Duri- Fragi Ortstein

Layers: Depth (cm) 8cm Rock

Slow perm argillic

☐ Pugged

Hydric soils present? YES ☐ NO ☒ UNCERTAIN ☐ NZSC subgroup _____

Primary hydrology indicators: minimum of 1 required; check all boxes that apply

- ☐ Surface water (1A)
- ☐ Groundwater <30 cm (1B)
- ☐ Soil saturation <30 cm (1C)
- ☐ Water marks (2A)
- ☐ Sediment deposits (2B)
