Dear June,

**FTAA-2509-1100: THE POINT SOLAR FARM APPLICATION
REQUEST FOR INFORMATION 12 (3 JUNE 2026)**

Thank you for providing the Mackenzie District Council with the opportunity to respond to the updated ecology information and the associated conditions provided by Far North Solar Farm Ltd on 29 May 2026.

The Panel has asked whether the Council could identify:

- a) whether the updated ecology information satisfies (in whole or in part) any concerns previously expressed.
- b) whether there are material deficiencies in the ecological information now before the Panel.
- c) what further amendments are required to the updated condition sets, as to any ecology matters.

As set out previously, the Mackenzie District Council has delegated the assessment and comment on all ecological matters in relation to the above application to the Canterbury Regional Council/Environment Canterbury (the Regional Council). In that context the Council does not make any specific comment in response to the request for information, but adopts those provided by the Regional Council on its behalf.

Kind Regards,

Julie Shanks
Planning Manager
