Dear Expert Panel,

Thank you for the opportunity to comment on the Auckland Surf Park Community Stage 2 proposal.

I am the owner of [redacted] close to the proposed development.

I am supportive of the Surf Park Stage 2 proposal and believe the development, together with the new infrastructure and community facilities, could be a positive addition to the wider Dairy Flat area.

As a local landowner, I would like to suggest that the applicant consider providing **an additional access from Lascelles Drive**, if this is practical and can be safely accommodated.

At present, the main access appears to be focused on Dairy Flat Highway and Postman Road. A suitable connection from Lascelles Drive could make the Surf Park, Village Centre and other community facilities more accessible to residents living around Lascelles Drive and the surrounding area, without requiring them to travel around to the main entrances.

Even if a full vehicle entrance is not considered appropriate, it may be worthwhile considering a **pedestrian and cycling connection** from Lascelles Drive as part of the long-term development of the area.

I would also appreciate the development being designed so that stormwater, traffic and other infrastructure do not adversely affect neighbouring properties and, where practicable, can integrate with the future development of the wider Dairy Flat area.

Overall, I support the proposal and look forward to seeing the Surf Park and surrounding community develop.

Thank you for considering my comments.

Kind regards,
Yuanhui Li
