Kevin Kearney
Port Otago Ltd

Dear Kevin,

**ELECTRICITY SUPPLY AVAILABILITY FOR PROPOSED SOUTHERN LINK – INLAND PORT DEVELOPMENT.
270 DUKES RD NTH, MOSGIEL.**

Thank you for your inquiry outlining the above proposed development.

Subject to technical, legal and commercial requirements, Aurora Energy can make a Point of Supply¹ (PoS) available for this development.

Aurora Energy can confirm that existing Network capacity up to 2.1MVA is available for the initial stage of the development.

For future stages from 2030 onward, a reassessment may be required. By that time, we expect improved visibility into load diversity behaviour on site, its interaction with existing feeder loading, and we will work with you to manage any network upgrades that may be required.

Disclaimer

This letter confirms that a PoS can be made available, subject to approval and finalisation when a formal application is made.

Next Steps

To arrange an electricity connection to the Aurora Energy network, a standard connection application will be required, followed by a network connection application. General and technical requirements for electricity connections are contained in Aurora Energy's Network Connection Standard which is available at www.auroraenergy.co.nz

Please contact your key account manager and email getconnected@auroraenergy.nz when you are ready to proceed.

Yours sincerely

A handwritten signature in blue ink, appearing to read "Mark Pratt".

Mark Pratt

General Manager – Customer and Commercial

¹ Point of Supply is defined in section 2(3) of the Electricity Act 1993.
