2.0 Introduction

This consultation summary has been prepared in support of the Substantive Application (Application) for Auckland Surf Park Stage 2 ('the Project') and is provided in accordance with section 29 and 11 of the FTAA. It provides a consolidated summary of all relevant consultation and engagement undertaken to date in relation to Stage 2 of the Project.

Since the commencement of the Stage 1 and during the development of the proposal, AW Holdings 2021 Ltd ('the Applicant') and its representatives have undertaken comprehensive and ongoing consultation with key stakeholders, including Auckland Council, Mana Whenua authorities (Ngāti Manuhiri and Te Kawerau ā Maki) and relevant Administering Agencies, including the Ministry for the Environment, the Environmental Protection Authority and Heritage New Zealand Pouhere Taonga. The objective of this consultation was to discuss the proposal and infrastructure proposed to service the development, understand any issues that may exist with the site, locality and development as well as the information requirements needed for the application.

Consultation and engagement have been carried out through a number of online and in-person meetings, emails and written correspondence. The details of consultation undertaken with the stakeholders including how feedback received during consultation was addressed is set out below.

3.0 Auckland Council

3.1 Kick-off Hui

The proposal was first discussed with Auckland Council (Council) at a kick-off hui held via Teams on 1 September 2025.

At the meeting, the project team provided an overview of the site, the Stage 1 consented development, and the proposed Stage 2 Masterplan. Key changes since Stage 1 were outlined including amendments to land use, subdivision layout, residential yield, infrastructure servicing, and water supply arrangements.

Council's team discussed matters relating to planning, infrastructure servicing, transport, ecology, noise, urban design, landscape and wastewater management. Particular attention was given to the proposed industrial and residential components, the solar farm, water take and wastewater disposal arrangements.

The approach to consenting, including the use of a s127 application and new consent components was discussed. Council provided preliminary guidance on specialist inputs and the importance of clearly identifying changes from the consented baseline to avoid relitigating approved matters where no material change is proposed.

Council also highlighted the importance of early and ongoing consultation with mana whenua and other stakeholders, as well as the need for a robust economic assessment to support the Fast Track Approvals process. The meeting included discussion on the preparation of the s30 letter, coordination of specialist reporting and the proposed process for Council to review key reports prior to lodgement of the substantive application. These report and plans were supplied to Council between the 10 December to 3 February.

3.2 Site Visit

A site visit was held across the new landholding (1320 Dairy Flat Highway and 89 and 105 Lascelles Drive) on 18 February 2025.

Site visit attendees included the Auckland Council Planner, Ecologist, Development Engineer and Landscape Visual Specialist.

During the site visit, the Applicants representatives provided an overview of the site area, proposal, and key matters relating to development engineering, urban design, planning, transport, ecology and landscaping.

At the time of lodgement, no formal feedback has been received by Council.

5.0 North shore Aero Club

North Shore Aero Club was consulted in relation to the Auckland Surf Park Community Fast-track – Stage 2 proposal.

In November 2025, the project team engaged with representatives of the Aero Club regarding potential effects associated with aircraft noise and the proposed connector road intersection with Postman’s Road. The Aero Club subsequently provided written correspondence confirming their willingness to work with the project team (**Appendix 7.5**).

The North Shore Aero Club acknowledged the assessment of aircraft noise effects and noted the potential application of an Airport Noise Covenant to affected residential titles. The Aero Club also requested that the design of the proposed road intersection consider runway approach paths, clearance requirements and aviation safety considerations. The Aero Club indicated its willingness to review detailed design information when available and to continue engagement as required.

In their letter dated 22 April 2026, the North Shore Aero Club confirms that they are generally supportive of the proposal and are confident that they can work together with the Applicant to resolve the outstanding technical matters. These technical matters include:

- Concerns in relation to operational noise of the airport impacting the proposed residential activities; and
- Concerns in relation to the detailed design of the Postman Road intersection.
- The Applicant is committed to continuing to work with the North Shore Aero Club to resolve these points raised.

6.0 Environmental Protection Agency

A summary of correspondence with Environmental Protection Agency is set out below:

- B&A sent initial email on 26 August 2025 with an overview of the proposal and advising that we are seeking to lodge the substantive application.

- A pre-application meeting was held on 2 September 2025. At the meeting, the EPA provided an overview of the FTAA and the substantive application process. The EPA had advised that there is an application form that needs to be submitted with the substantive application.

Correspondence with the EPA is attached as **Appendix 7.6**.

7.0 Heritage New Zealand Pouhere Taonga

An application for Archaeological Authority was sought from Heritage New Zealand Pouhere Taonga (HZNPT) by CFG Heritage in relation to the removal of the early 1900s building located at 1350 Dairy Flat Highway, Dairy Flat.

Heritage New Zealand Pouhere Taonga granted archaeological authority (2026-306) on 12 January 2026 subject to the conditions outlined in the approval. The archaeological authority is included as **Appendix 7.7**.

8.0 Minister for the Environment

A summary of correspondence with the Ministry for the Environment (MfE) is set out below:

- B&A sent initial email on 26 August 2025 with an overview of the proposal and advising that we are seeking to lodge the substantive application;
- MfE responded on 1 September 2025 with a summary of national direction to be considered as part of the proposal. Where relevant, the National Policy Statements and National Environmental Standards have been assessed as part of the application.

The complete correspondence with MfE is attached as **Appendix 7.8**.
