VISION

Our vision for the site is that it becomes a thriving home and community. To thrive, the home needs to satisfy and be suitable for many. People of all ages and backgrounds will need space to live, play, relax and connect with their community and surrounding environment. Providing a range of considered, active and passive recreation spaces in the landscape that provide a safe and inclusive environment for all residents to enjoy will be key to achieving this. These spaces are a perfect opportunity connect people to the unique environment and natural landscape that surrounds them.

The proposed layout for the development has been shaped by the evolving urban form of the Ladies Mile corridor. This balances residential intensification with amenity and functionality. We propose to support this balance through significant landscape integration to help maintain the distinct sense of place that Central Otago offers, which is particularly important in a compact urban village setting such as this.

The built form is organized around intersecting central pedestrian spines, where north to south, existing maple trees will be retained as a defining feature that reinforces the sites identity, whilst framing spectacular mountain views. Along the east to west spine, taller buildings are grouped around central open spaces, allowing building height to be absorbed within the heart of the site while stepping down toward the edges. Two integrated parking garages reduce the need for extensive surface parking, enabling a more generous landscaped environment, space for recreation and supporting pedestrian and cycling priority. Retail activity has been integrated and focused toward the Lower Shotover Road corner, reinforcing an active edge at this prominent gateway location and supporting walkable access to daily amenities for residents. Four primary pavilion buildings and smaller BBQ pergolas provide social focal points throughout the site. Courtyard landscapes are intended to express a Central Otago identity that varies across the site, featuring alpine grasses, meadow planting and robust feature species. A mixture of native trees and deciduous exotics will contribute to visual softening of the built form, privacy and provide seasonal interest and character. This approach prioritises durability, seasonal variation, and long-term manageability while maximising sunlight access throughout the year. Embankment planting with large growing native beech tree species provides immediate visual impact and screening along State Highway 6 (Frankton-Ladies Mile Highway). This landscape treatment helps break down the perceived scale of the development from a range of viewpoints, while enhancing the overall streetscape experience.

The overall design approach intends to offer a 'people first' way of living that balances residential intensification with high quality urban design and an integrated landscape approach. The compact village form supports a safe, well-connected community with all necessary amenities available close by. This ensures the key needs of residents are met while remaining grounded in the unique context of the Queenstown surrounds.

SITE CONTEXT

The site at 14 Lower Shotover Road, Queenstown comprises a relatively flat parcel of land situated to the north of State Highway 6 (Frankton–Ladies Mile Highway) and adjacent to Lower Shotover Road, providing strong vehicular connectivity to the wider Queenstown area.

The Shotover River is located to the west of the site, contributing to the area’s natural landscape character, while long-range views are available toward The Remarkables mountain range to the south. Coronet Peak, a major alpine and recreational destination, lies to the north and is approximately a 20-minute drive, reinforcing the site’s proximity to key tourism and outdoor recreation assets.

The surrounding area is transitioning in character, with a mix of residential, commercial, and light industrial land uses. Queenstown Airport, Five Mile Shopping Centre and the Queenstown Events Centre are all located within approximately a 5-minute drive, providing access to retail, employment, transport, and community facilities. With future neighboring developments proposed, the strategic importance of this growth corridor is clear.

- ← - - - -> Proposed collector road linking into Lower Shotover Road
- ← - - - -> Proposed active mode pathways to connect to wider network
- Onsite Specimen trees to be retained where possible
- Proposed future neighbourhood park

PAVILLION C4

- A Meadow Planting Mix
- B Schist pavers bleeding into gravel & planting
- C Timber bench seating in gravel and planting
- D Landscape Mounding
- E Gravel pathways
- F Schist pavers bleeding into gravel

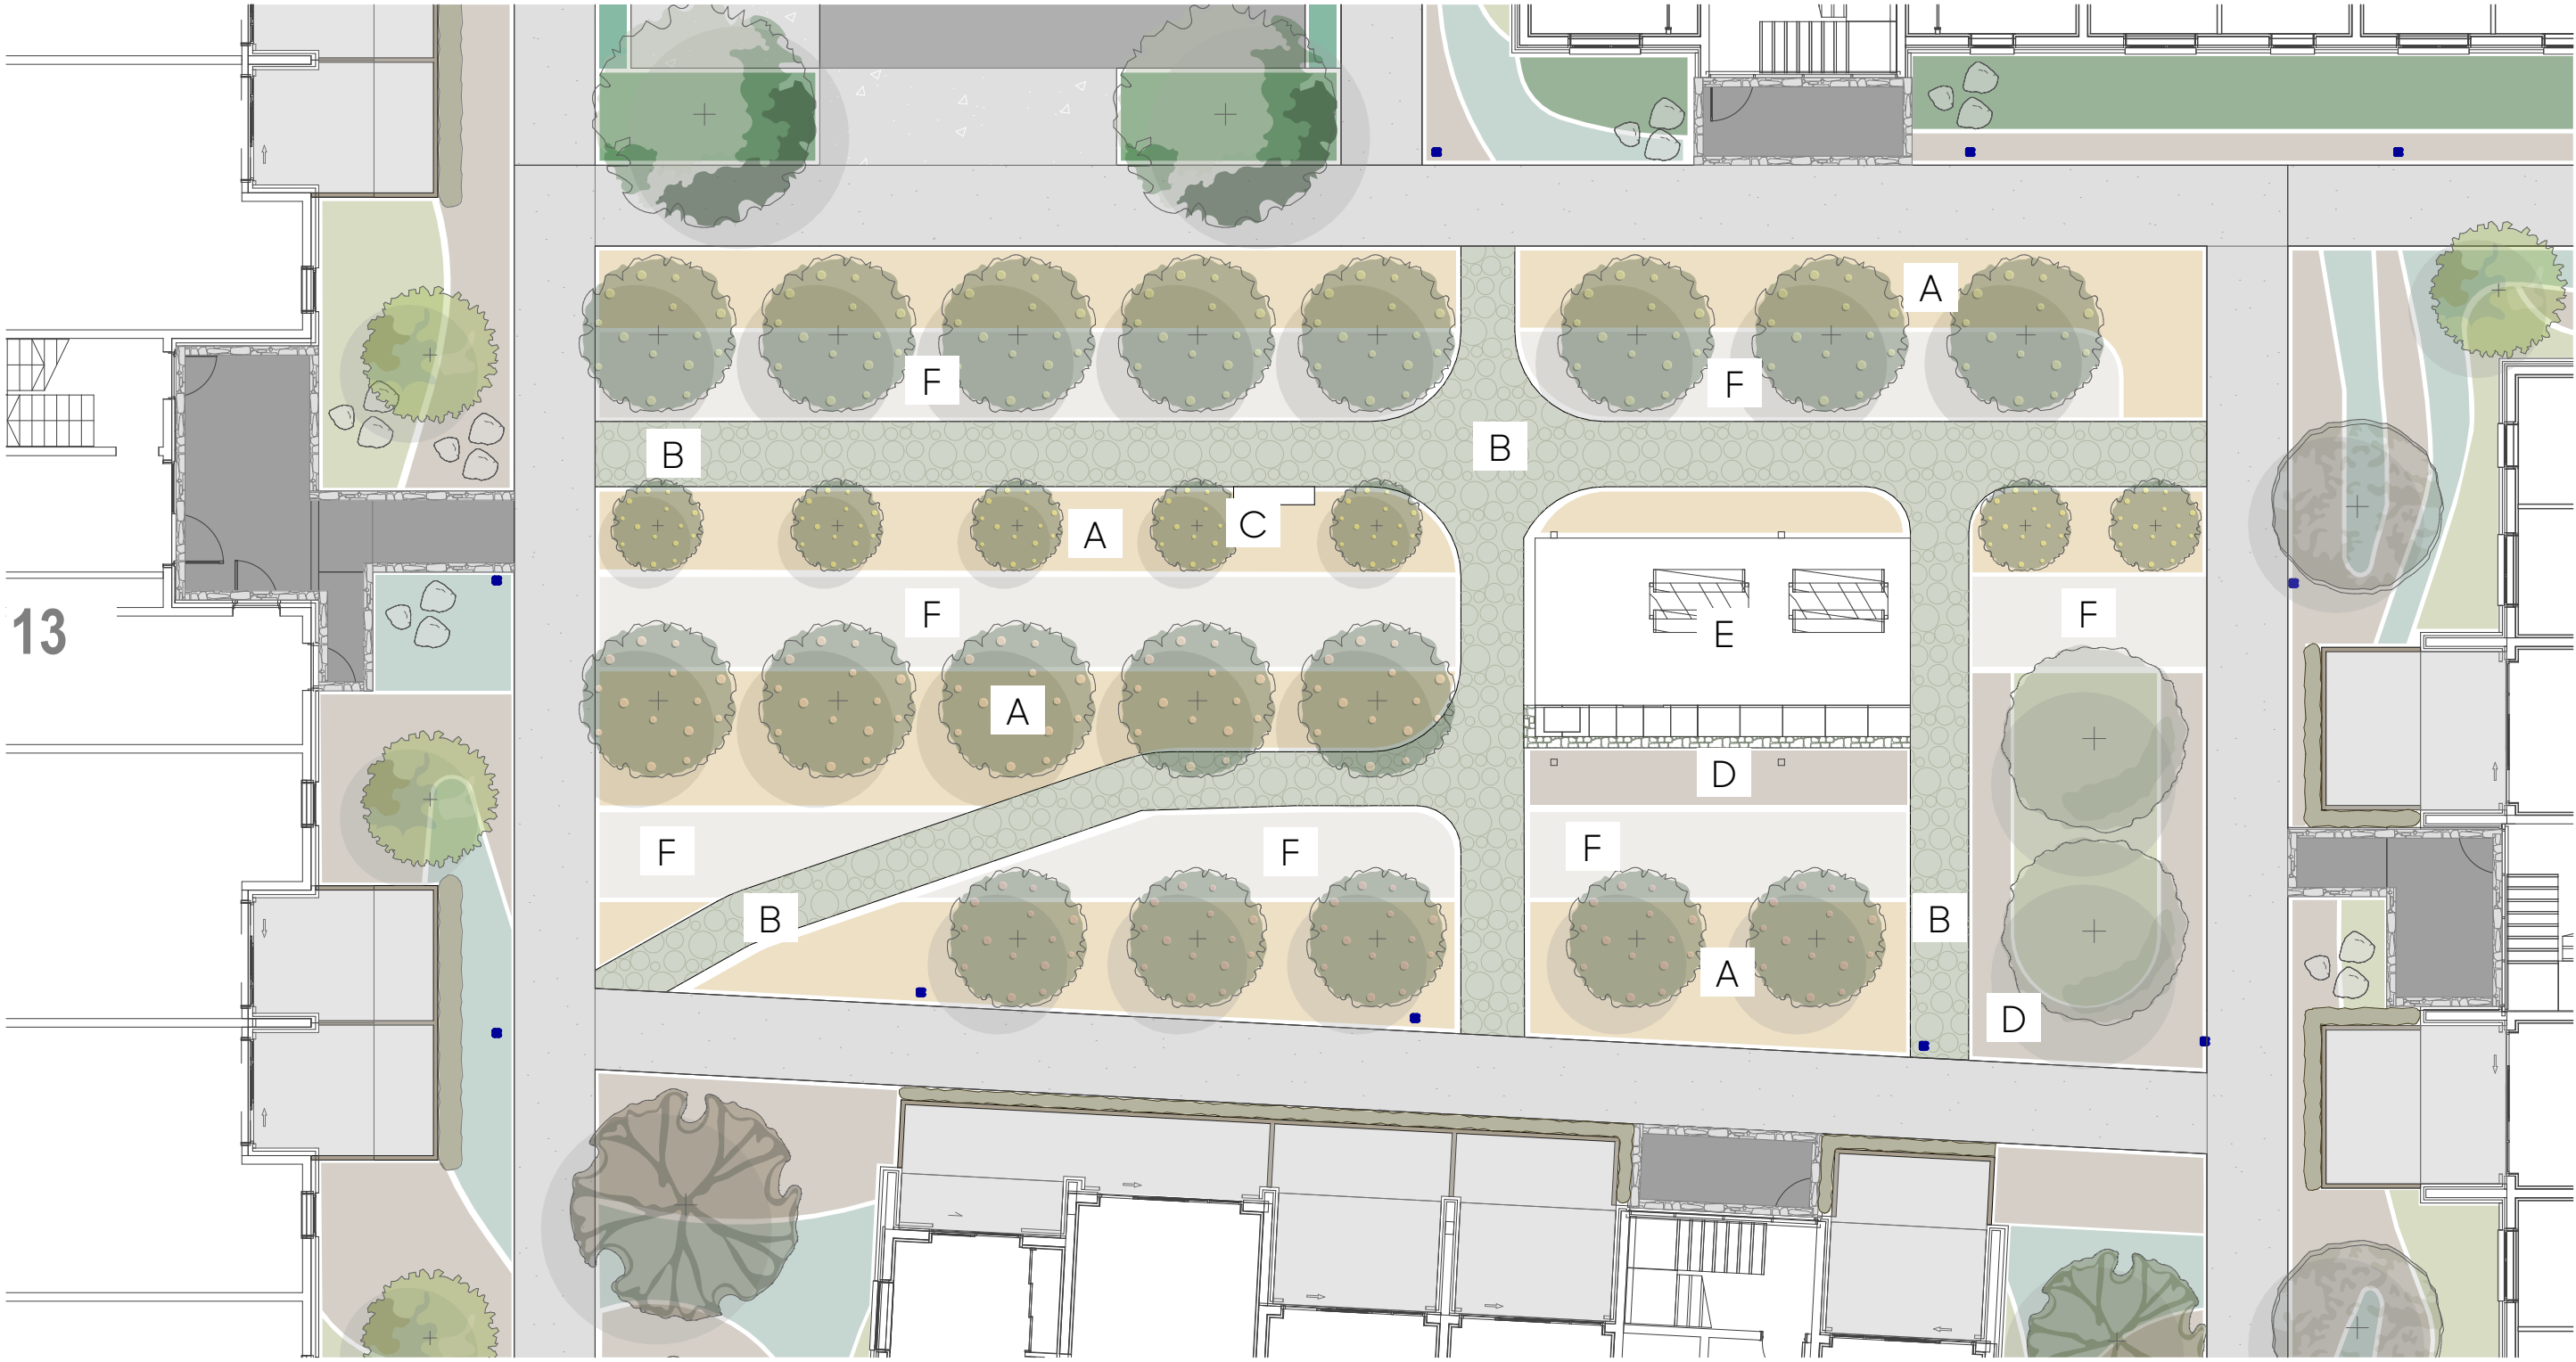

PERGOLA AND PLAY SPACE

- A Rockery Planting Mix
- B Timber play elements on bark softfall
- C Planted mounds
- D Meandering gravel pathways
- E Concrete path and pergola area
- F Bench seating

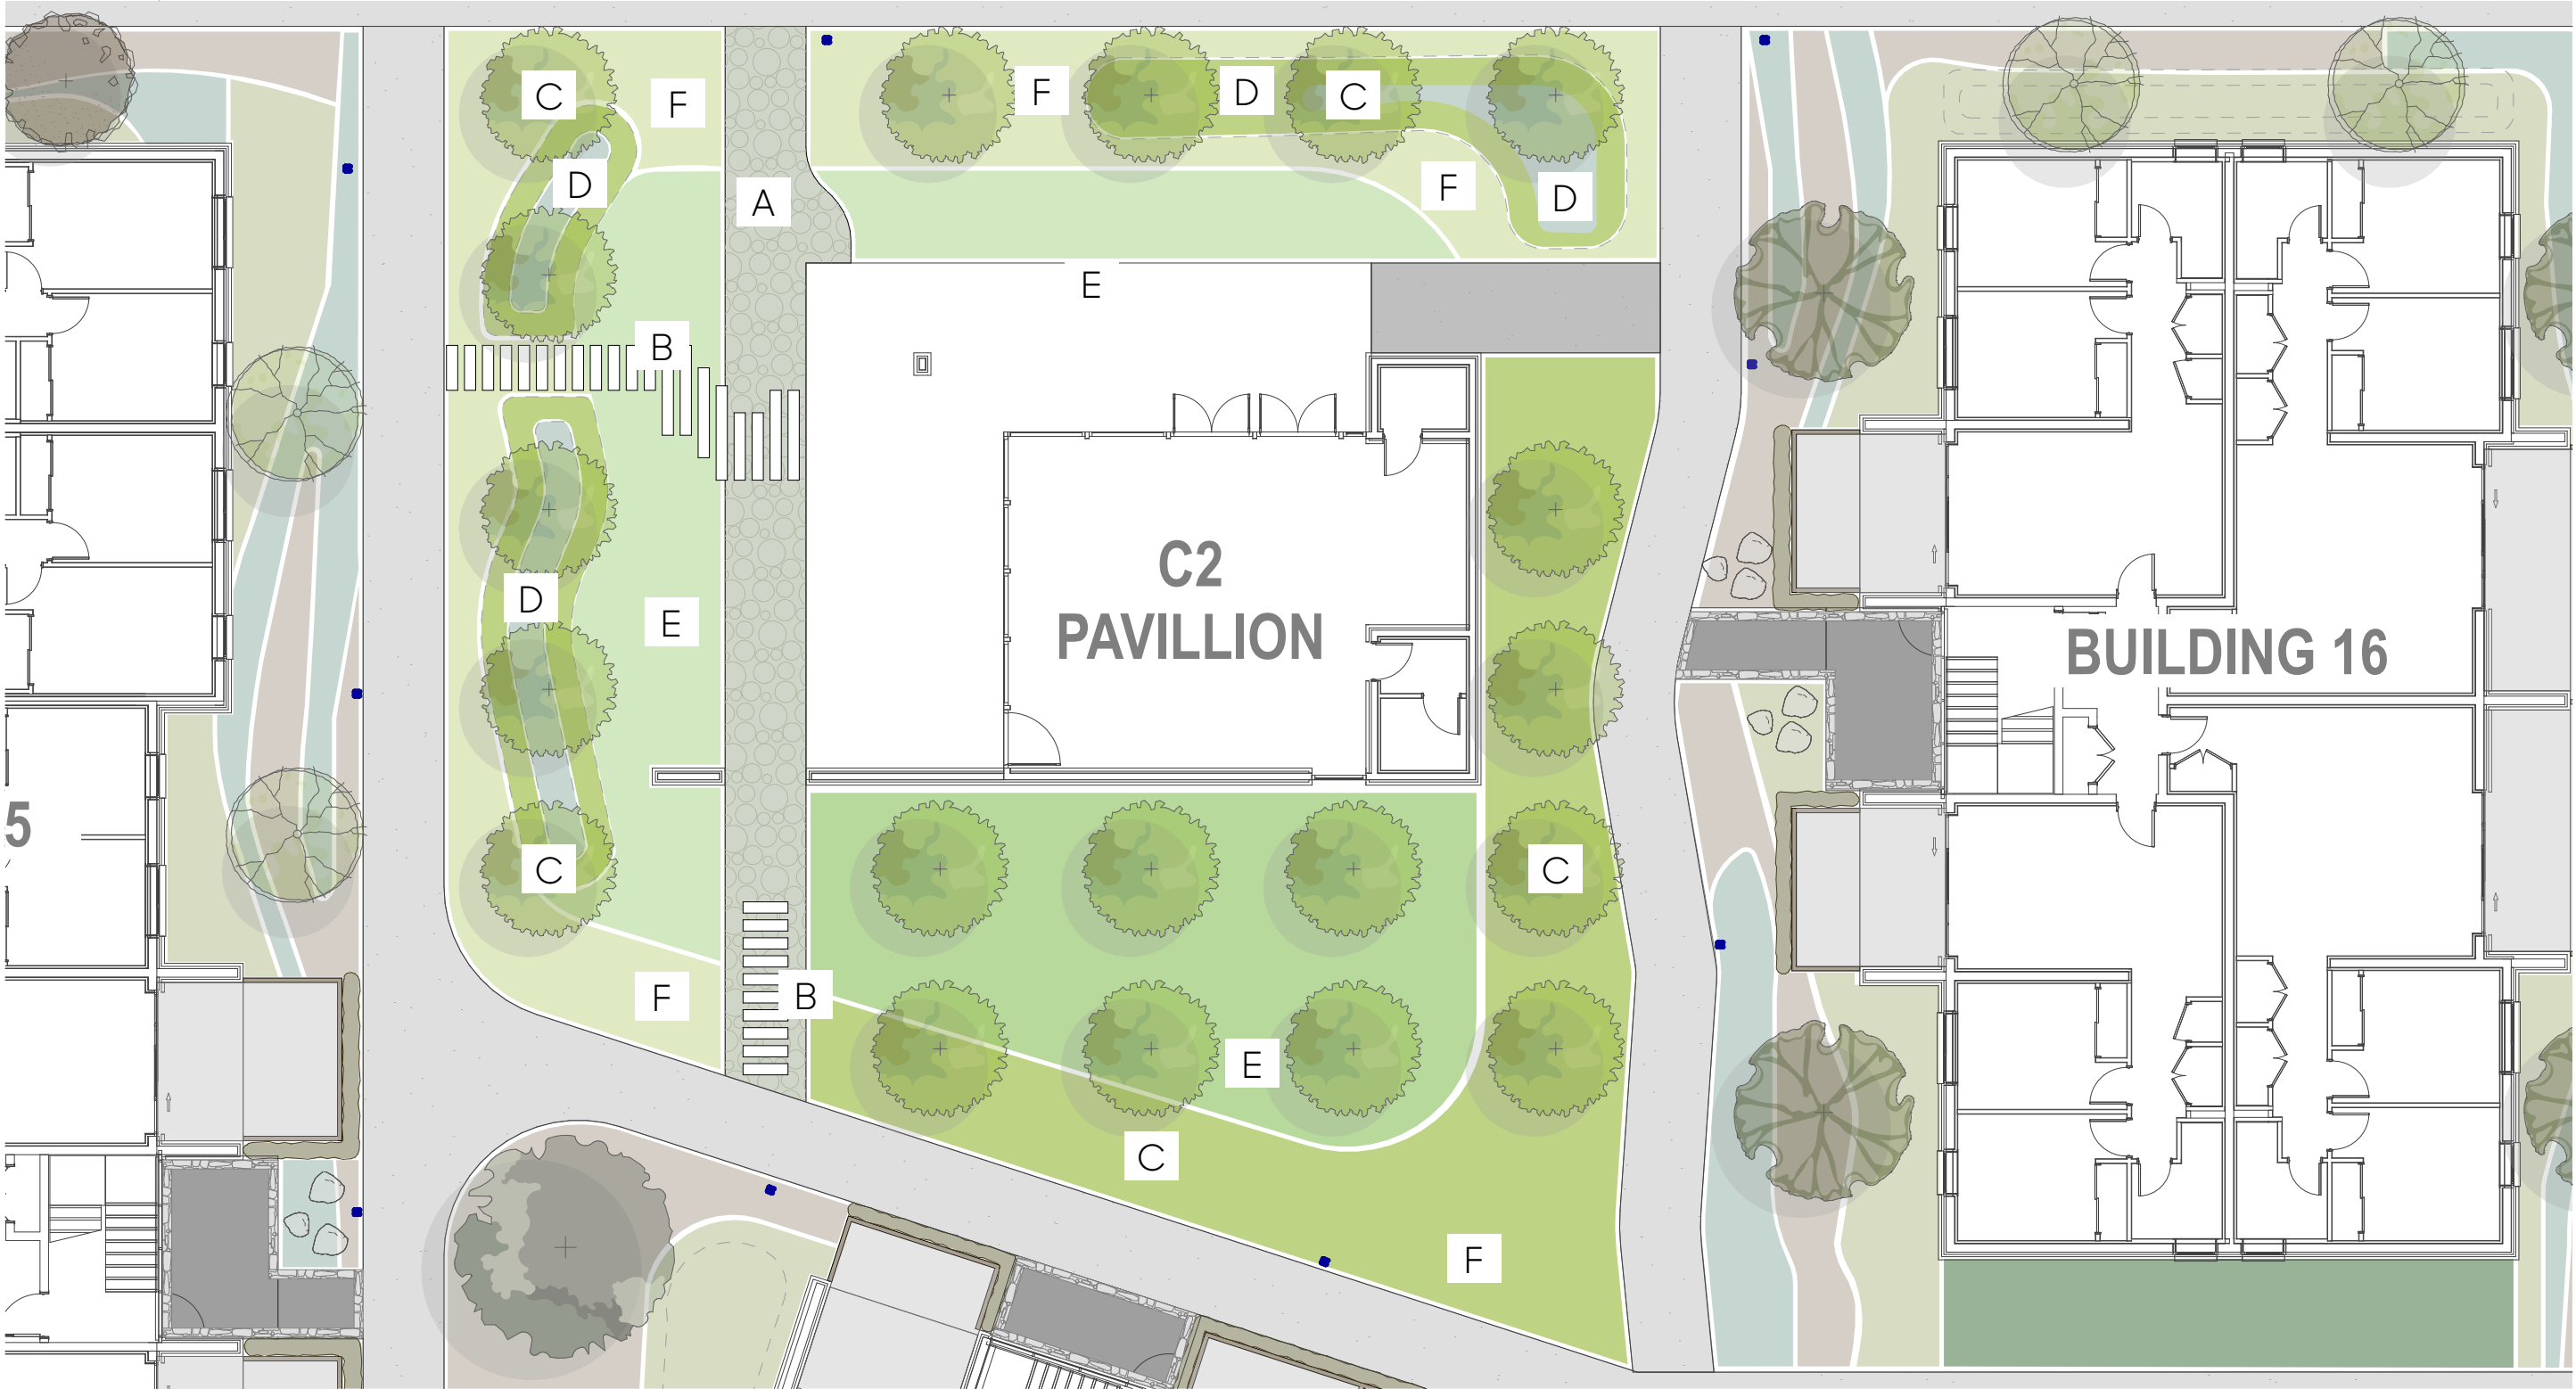

FRUIT ORCHARD AND PERGOLA

- A Orchard Planting
- B Gravel pathways through orchard
- C Timber bench seating
- D Tussock planting
- E Pergola and BBQ area
- F Walkable groundcover planting

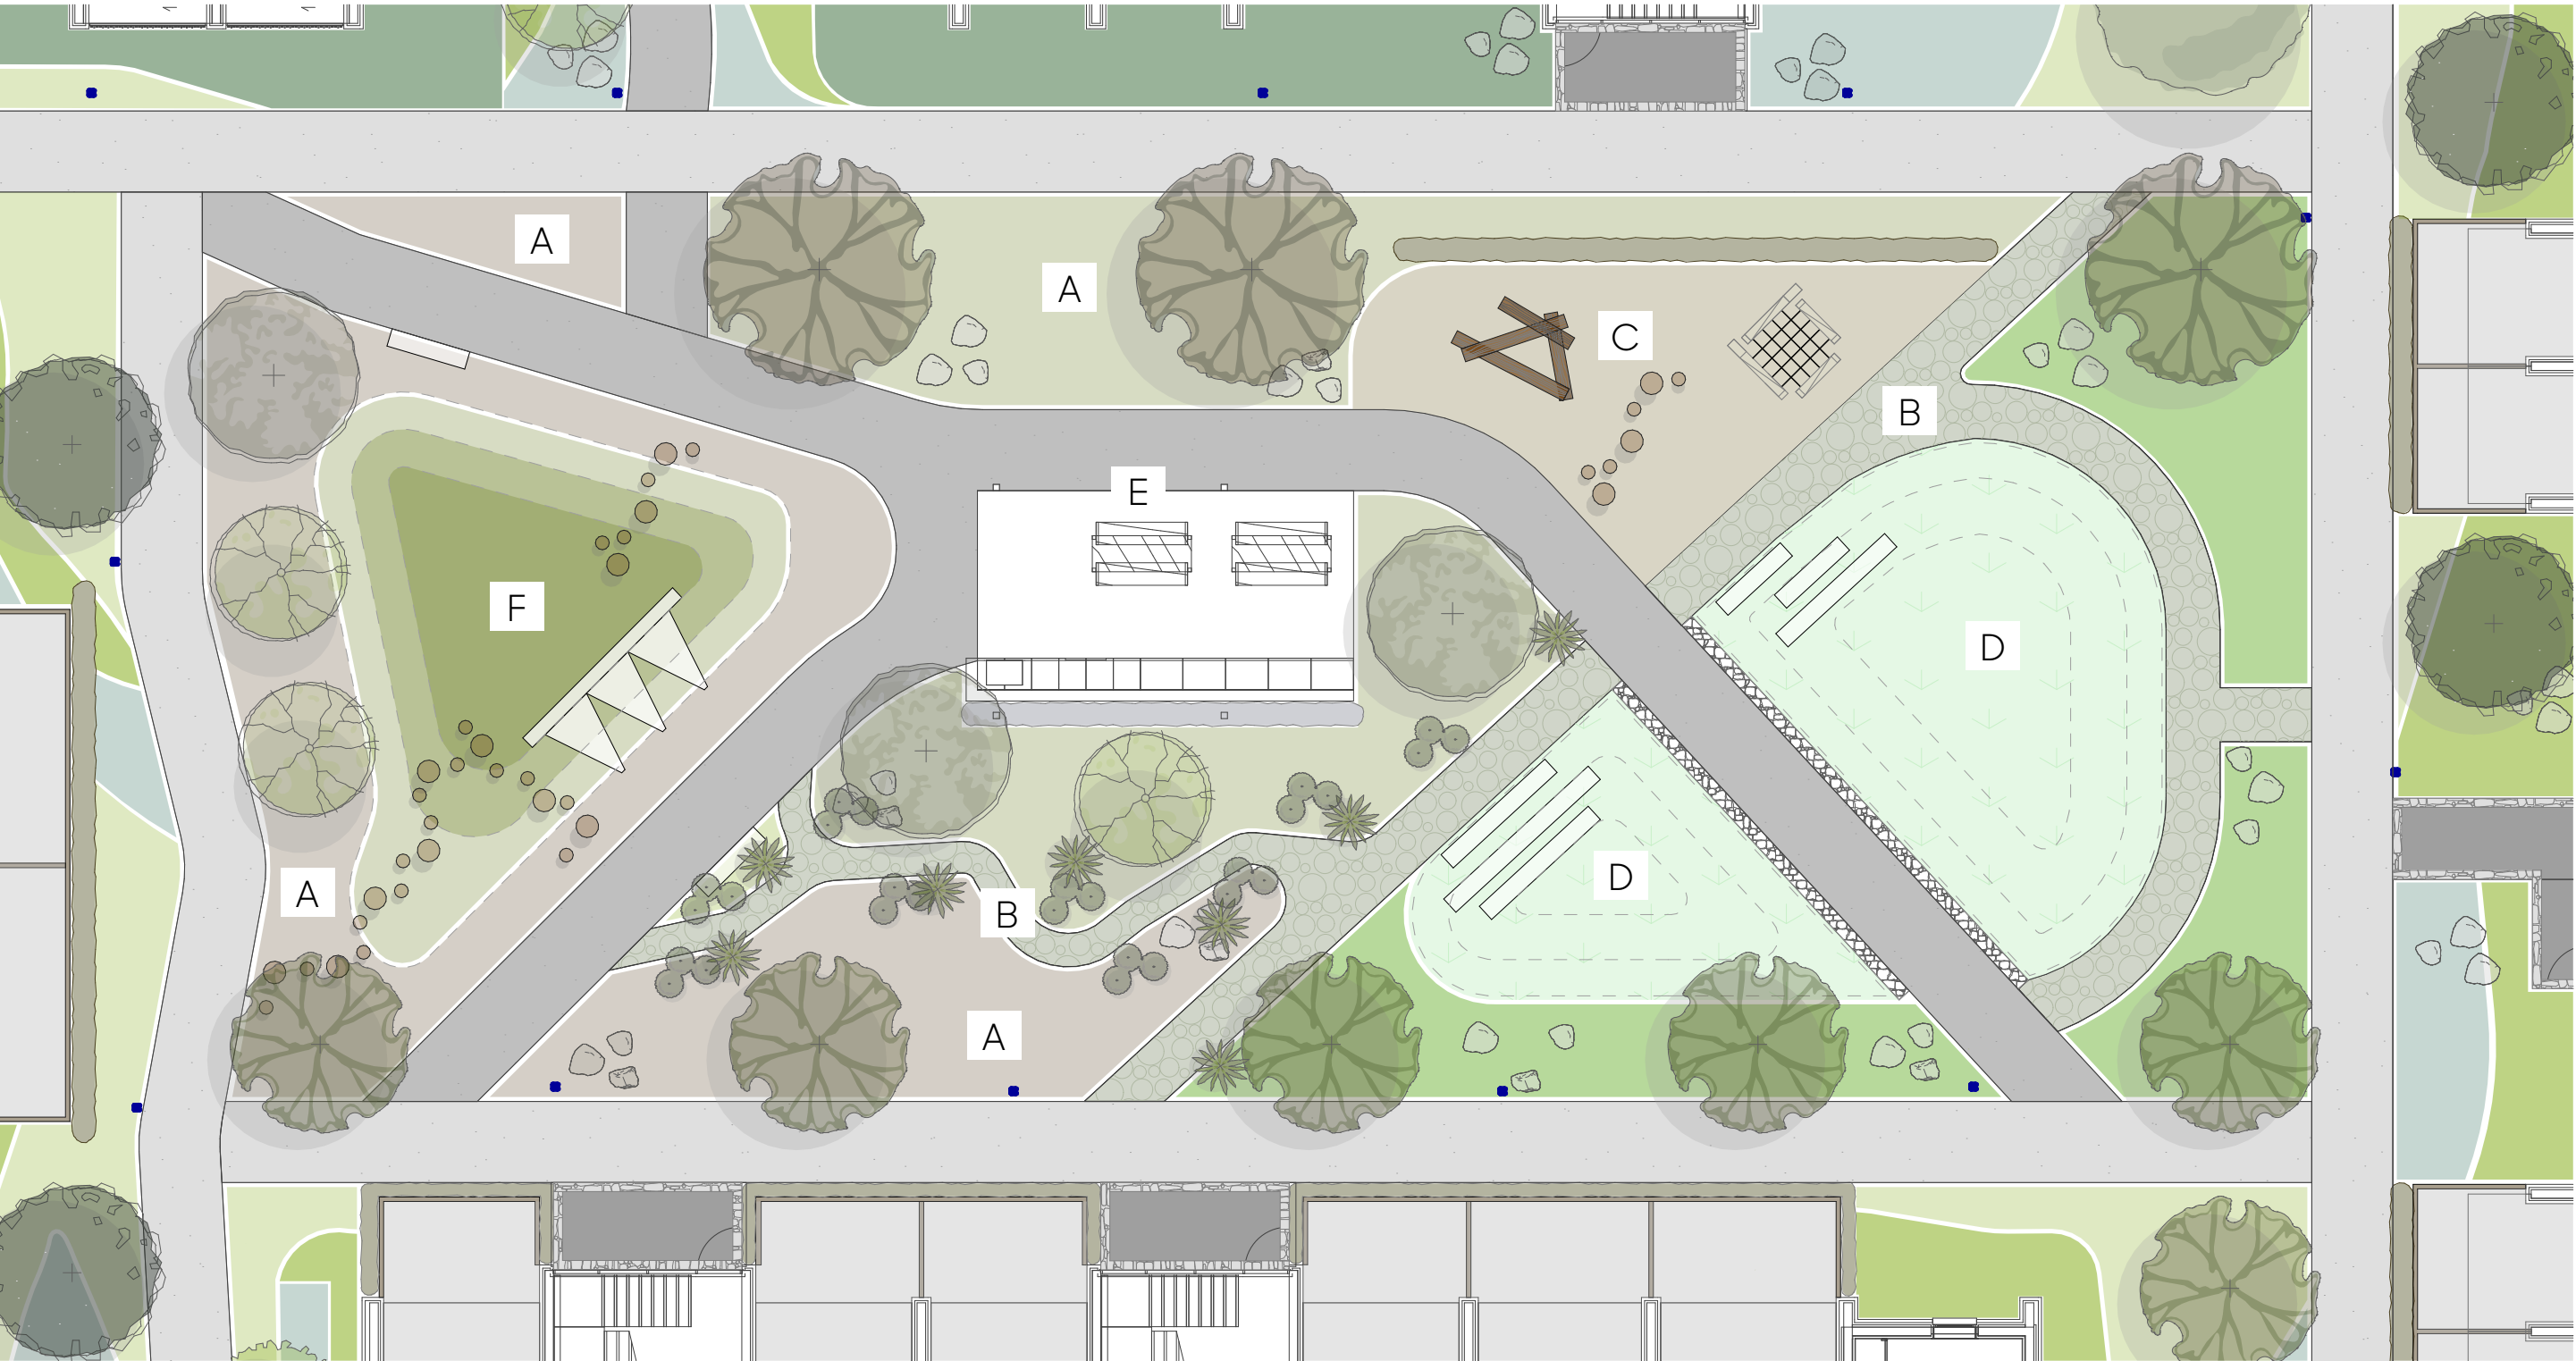

PAVILLION C2 - DOGWOOD ORCHARD

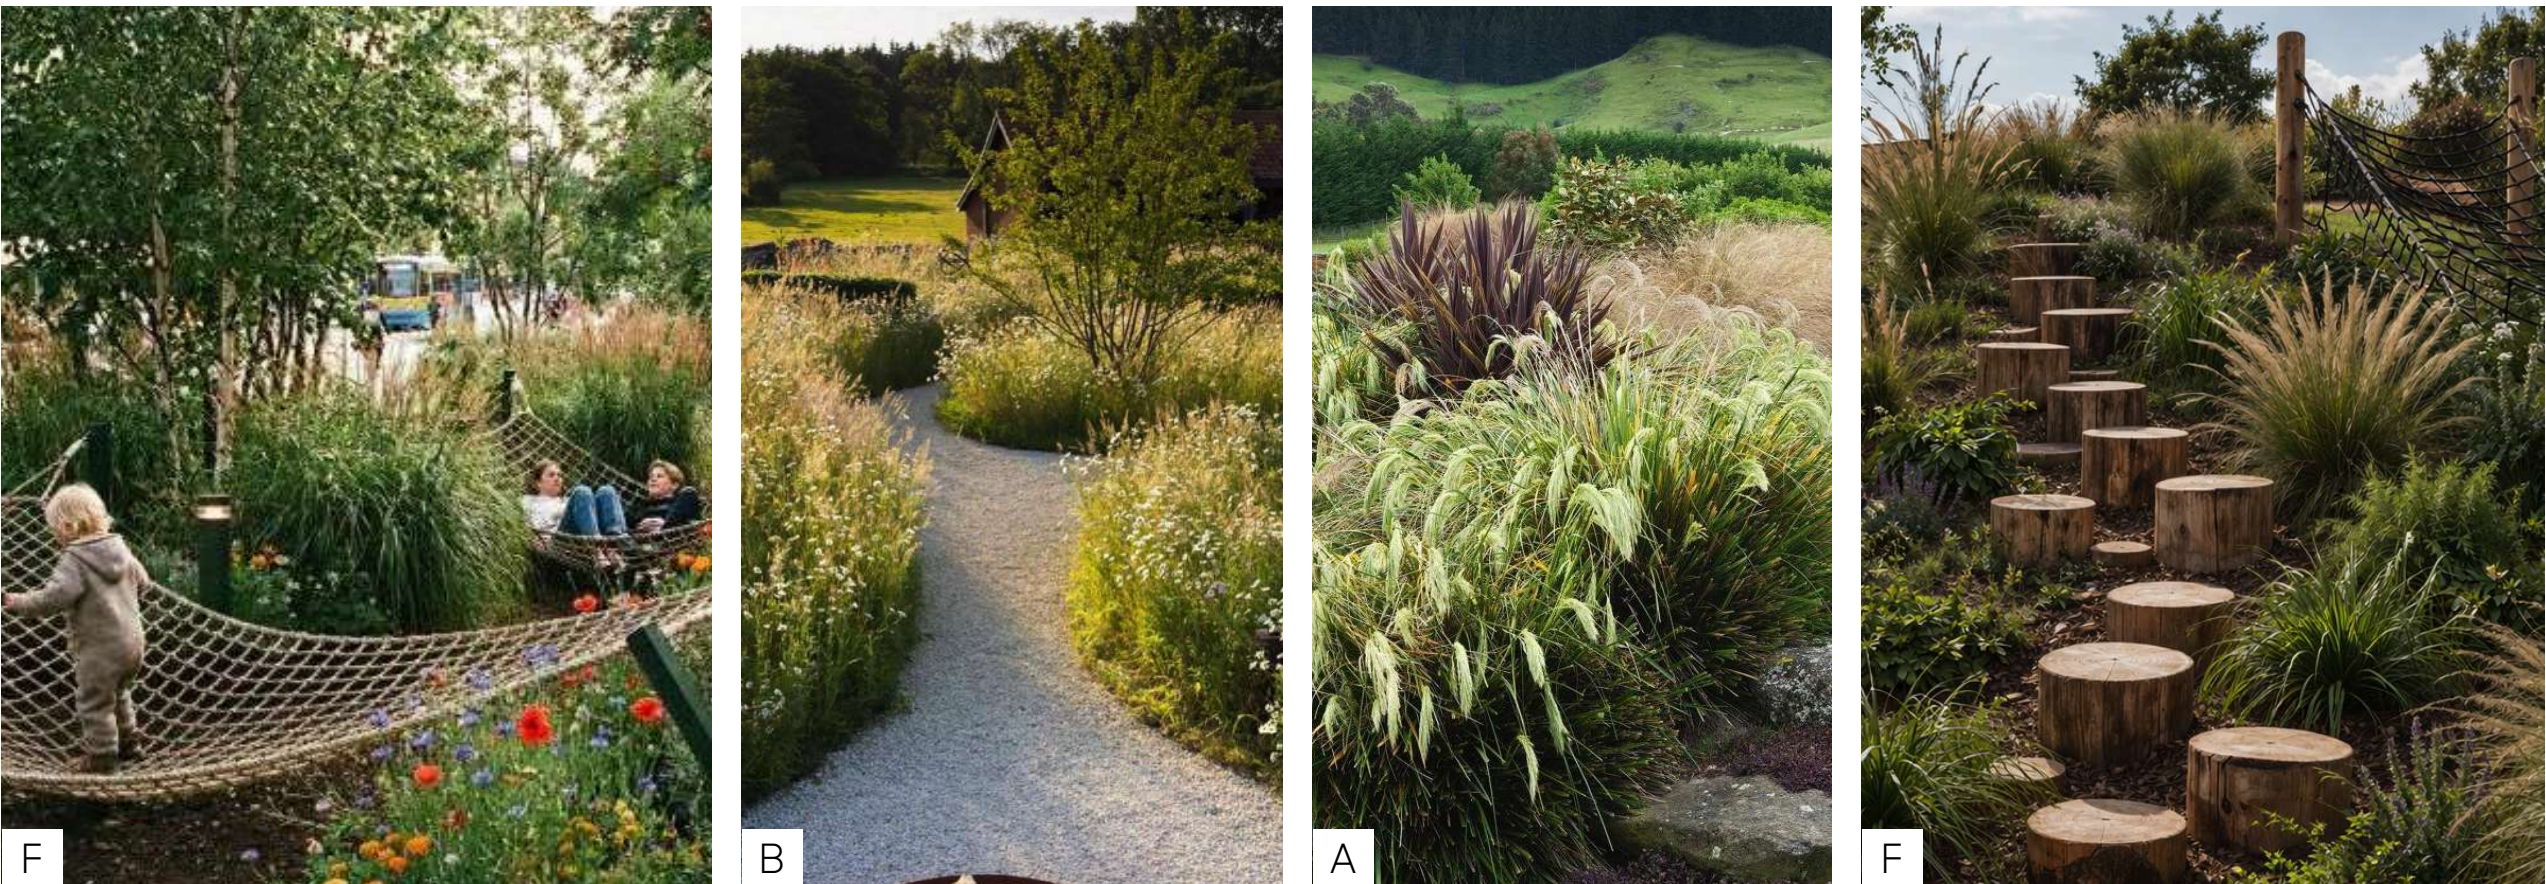

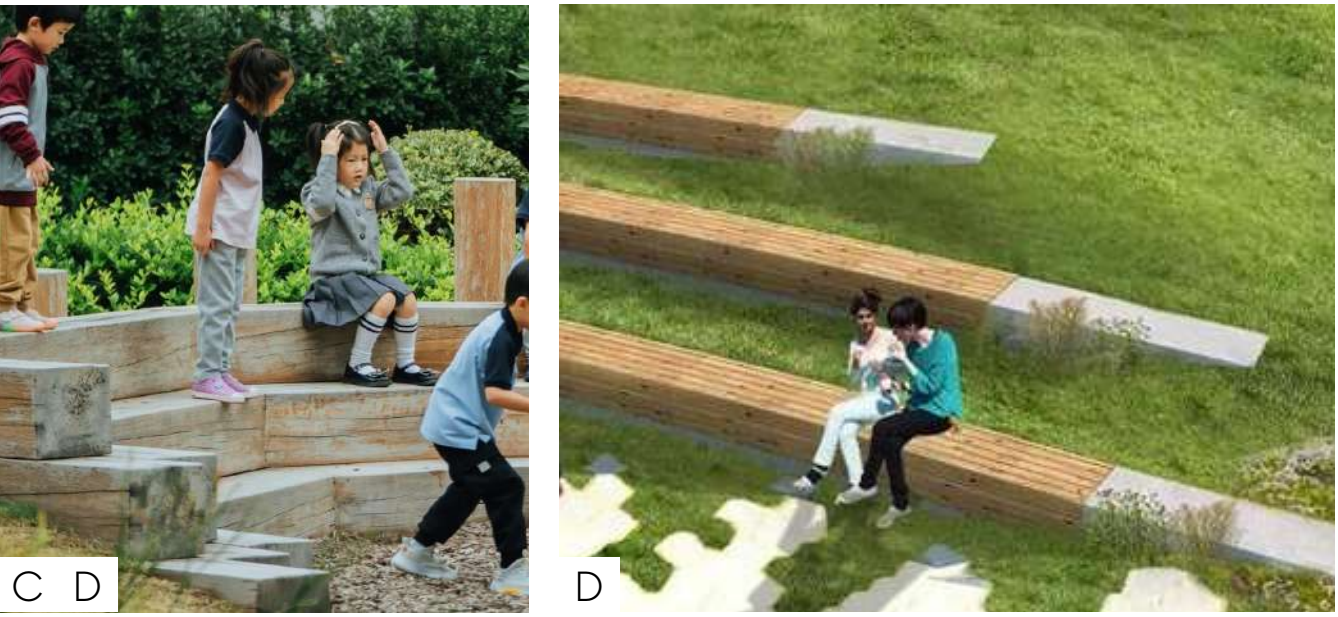

- A Gravel pathway
- B Timber sleeper pathway
- C Cornus 'Greenvale' specimen tree forest
- D Landscape Mounding
- E Rockery Planting Mix
- F Meadow Planting Mix

PERGOLA AND NATURAL PLAY

- A Tussock Planting
- B Gravel pathways through planting
- C Nature play areas, bark softfall
- D Turf mound for seating and playing
- E Pergola, BBQ area, concrete pathways
- F Planted mound with timber steppers and hammocks

PERGOLA AND PLAYSPACE

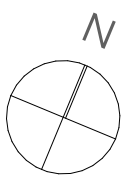

- A Rockery Planting mix
- B Gravel pathways / pump track through planting
- C Playground, bark soft-fall
- D Gravel area with picnic table and bench seat
- E Pergola, BBQ area, concrete pathways
- F Planted mounds for screening from carpark

PAVILLION C3

- A Meadow Planting mix
- B Picnic Tables and hoggin area under trees
- C Meandering gravel path with timber seating
- D Landscape mounds - planted
- E Timber stepper logs / play element
- F Mixed materials, gravel, schist pavers, timber

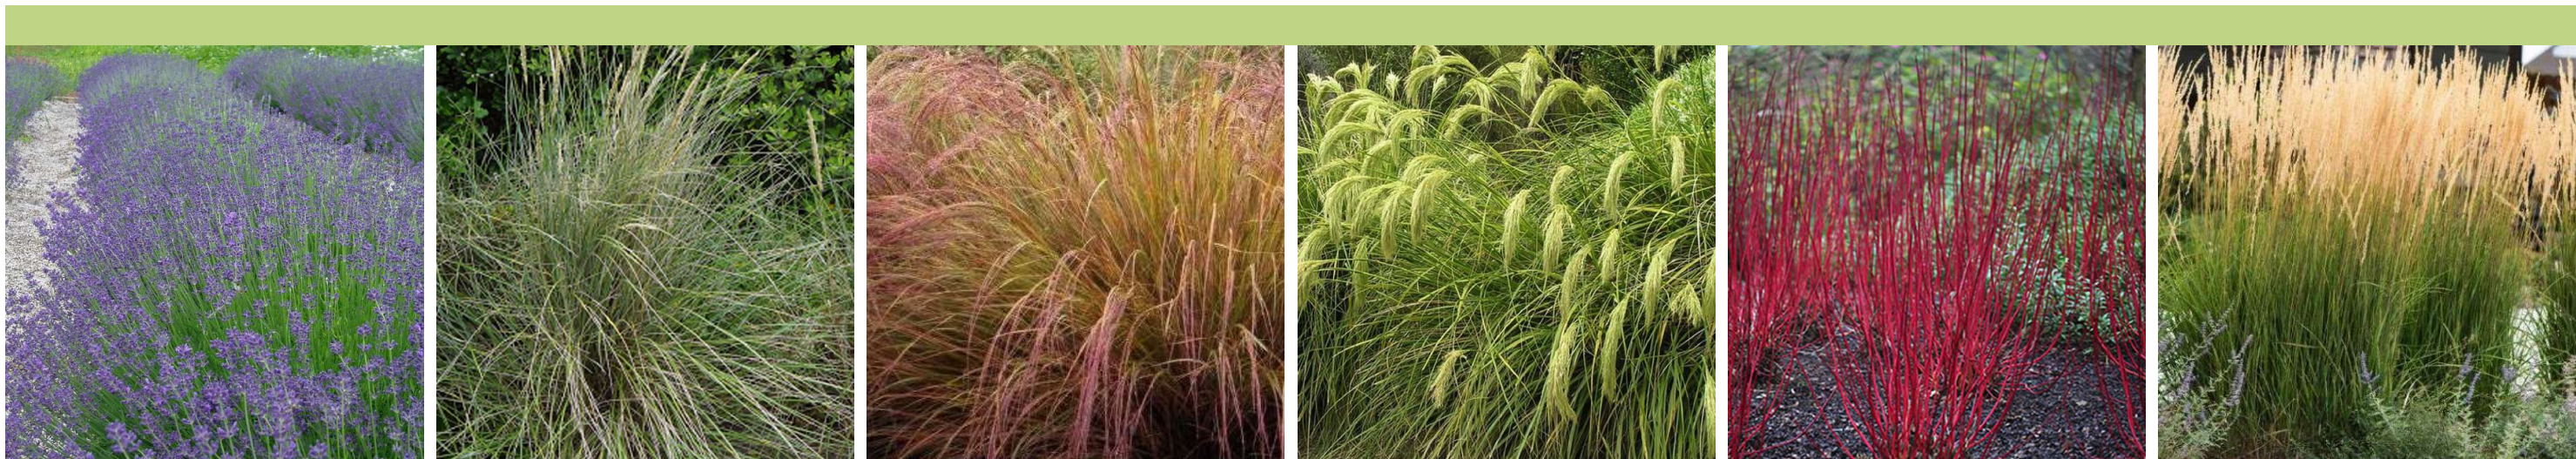

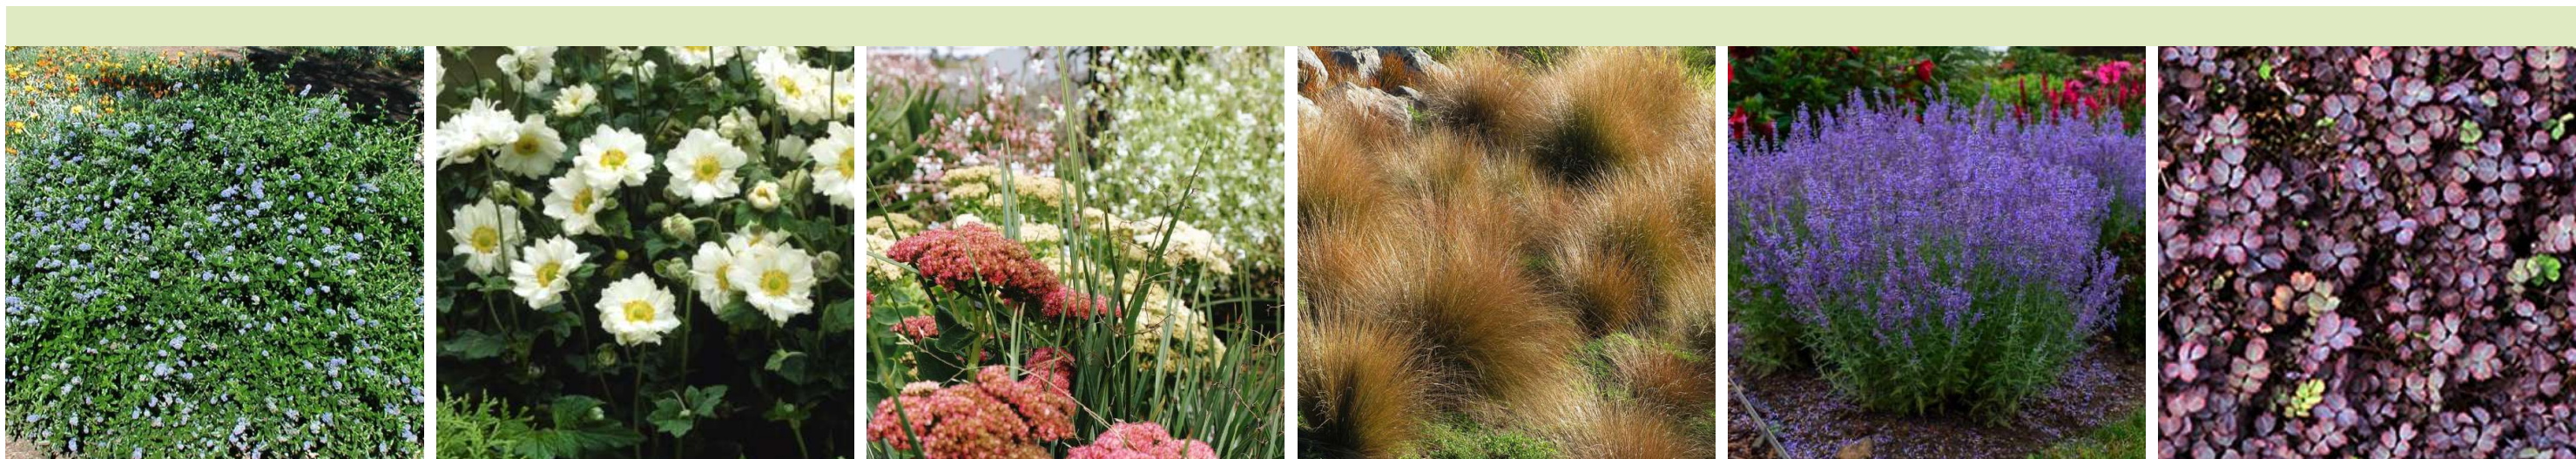

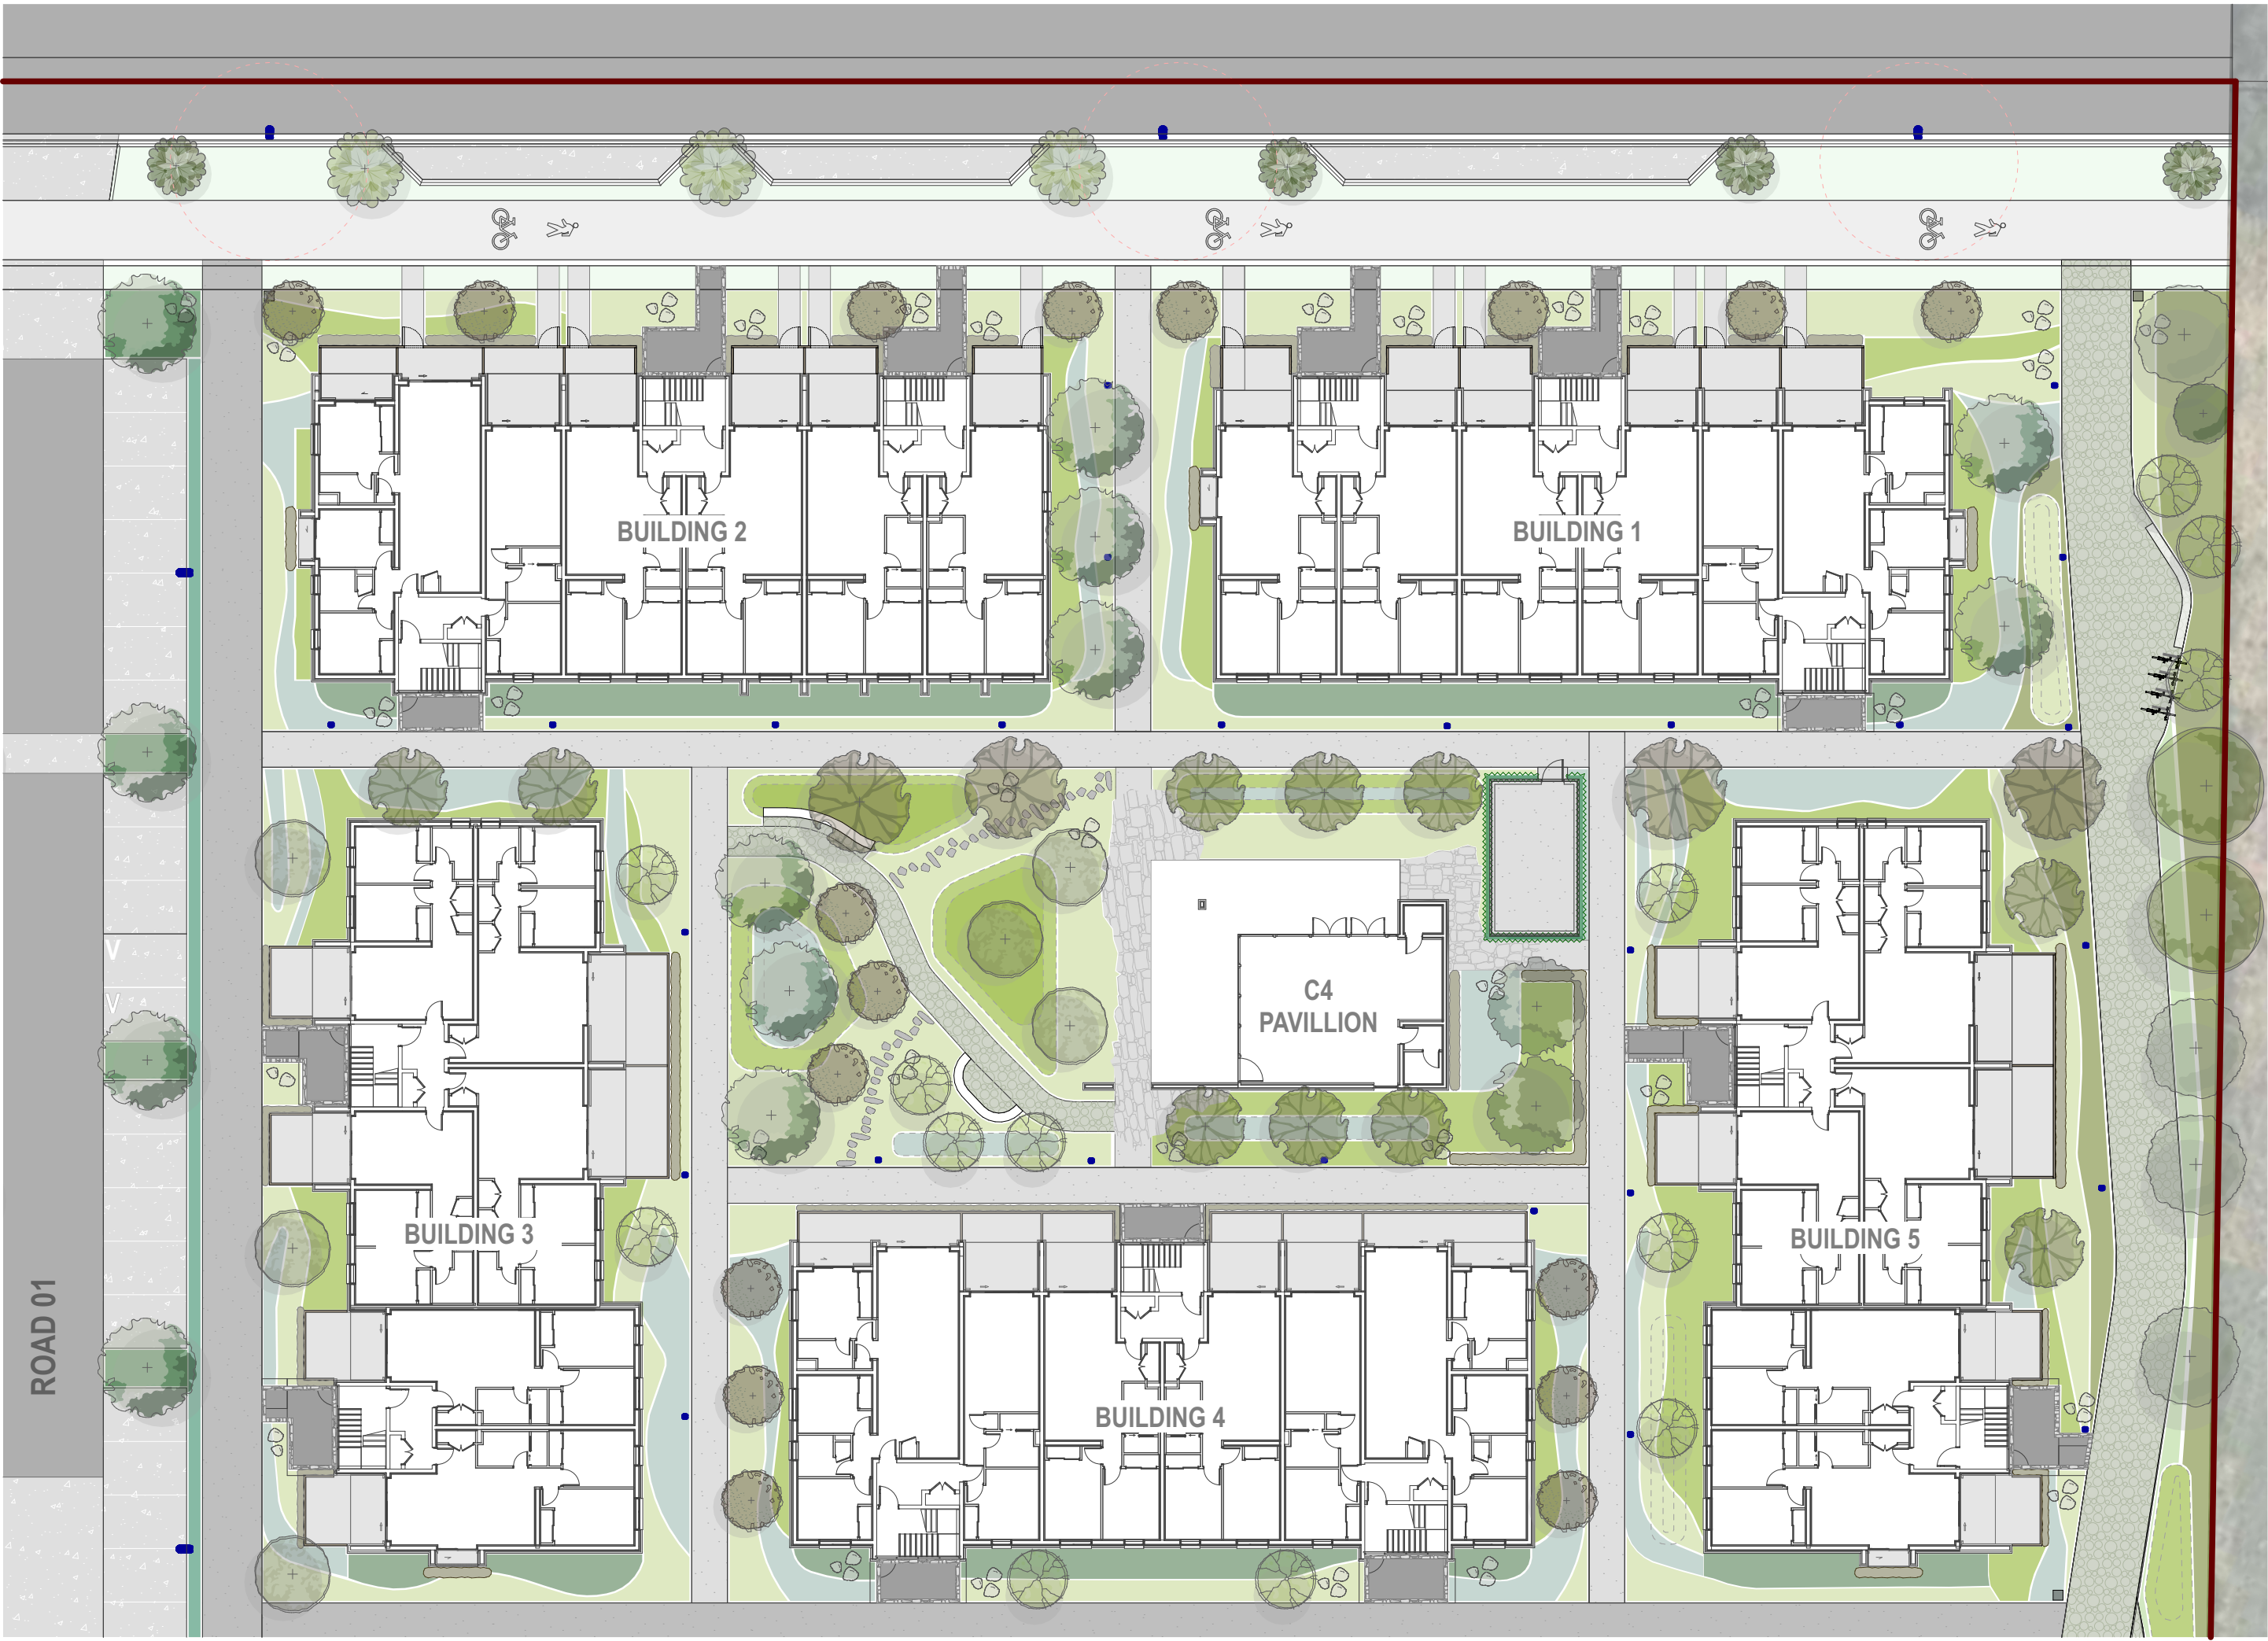

PAVILLION C4

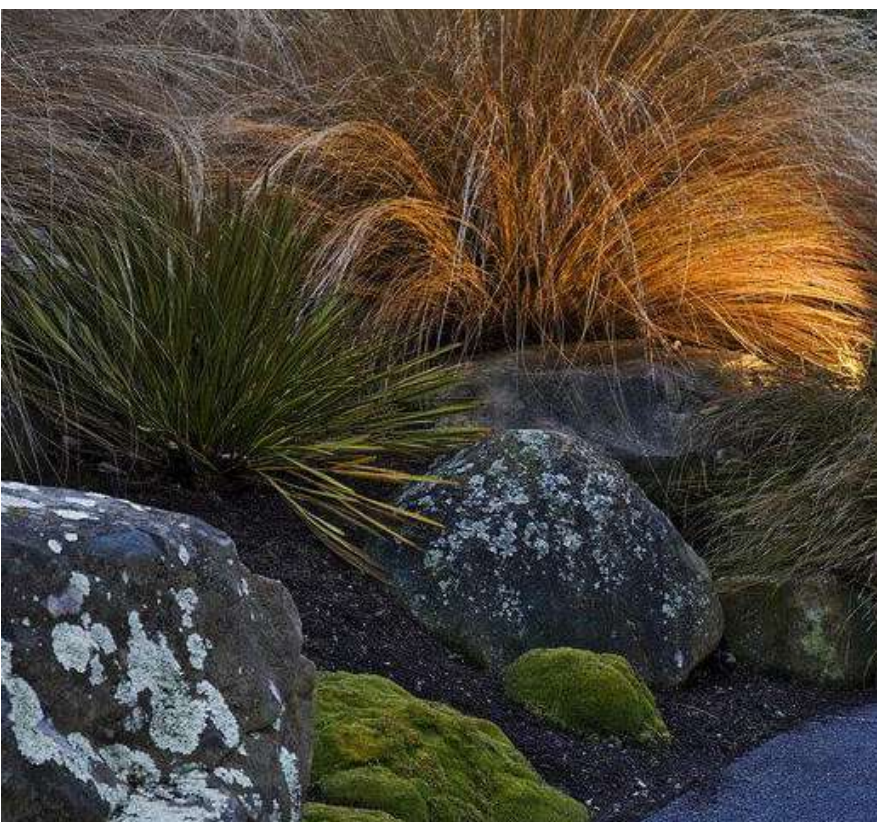

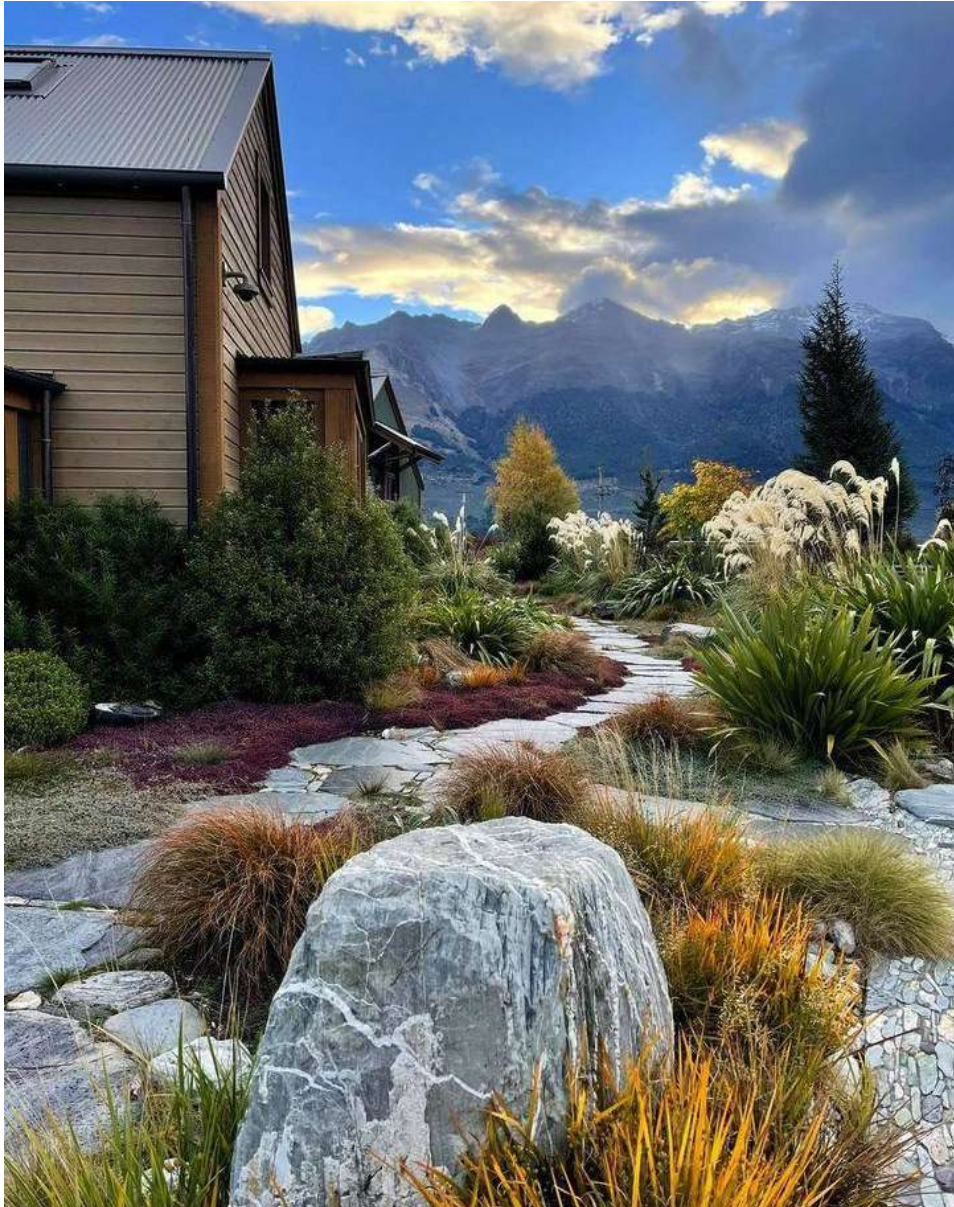

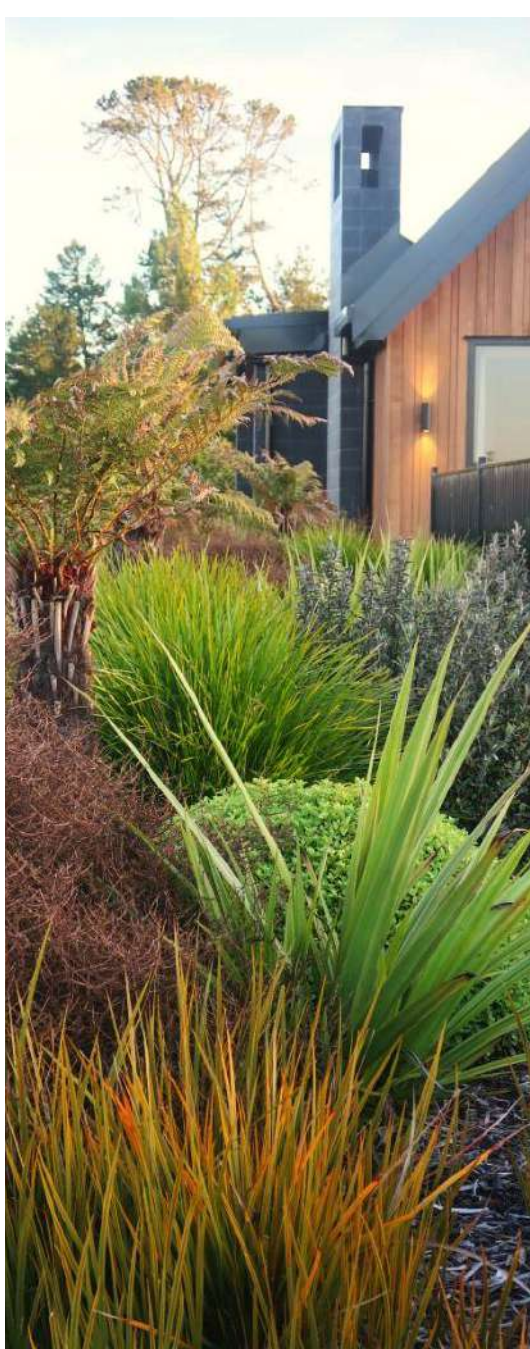

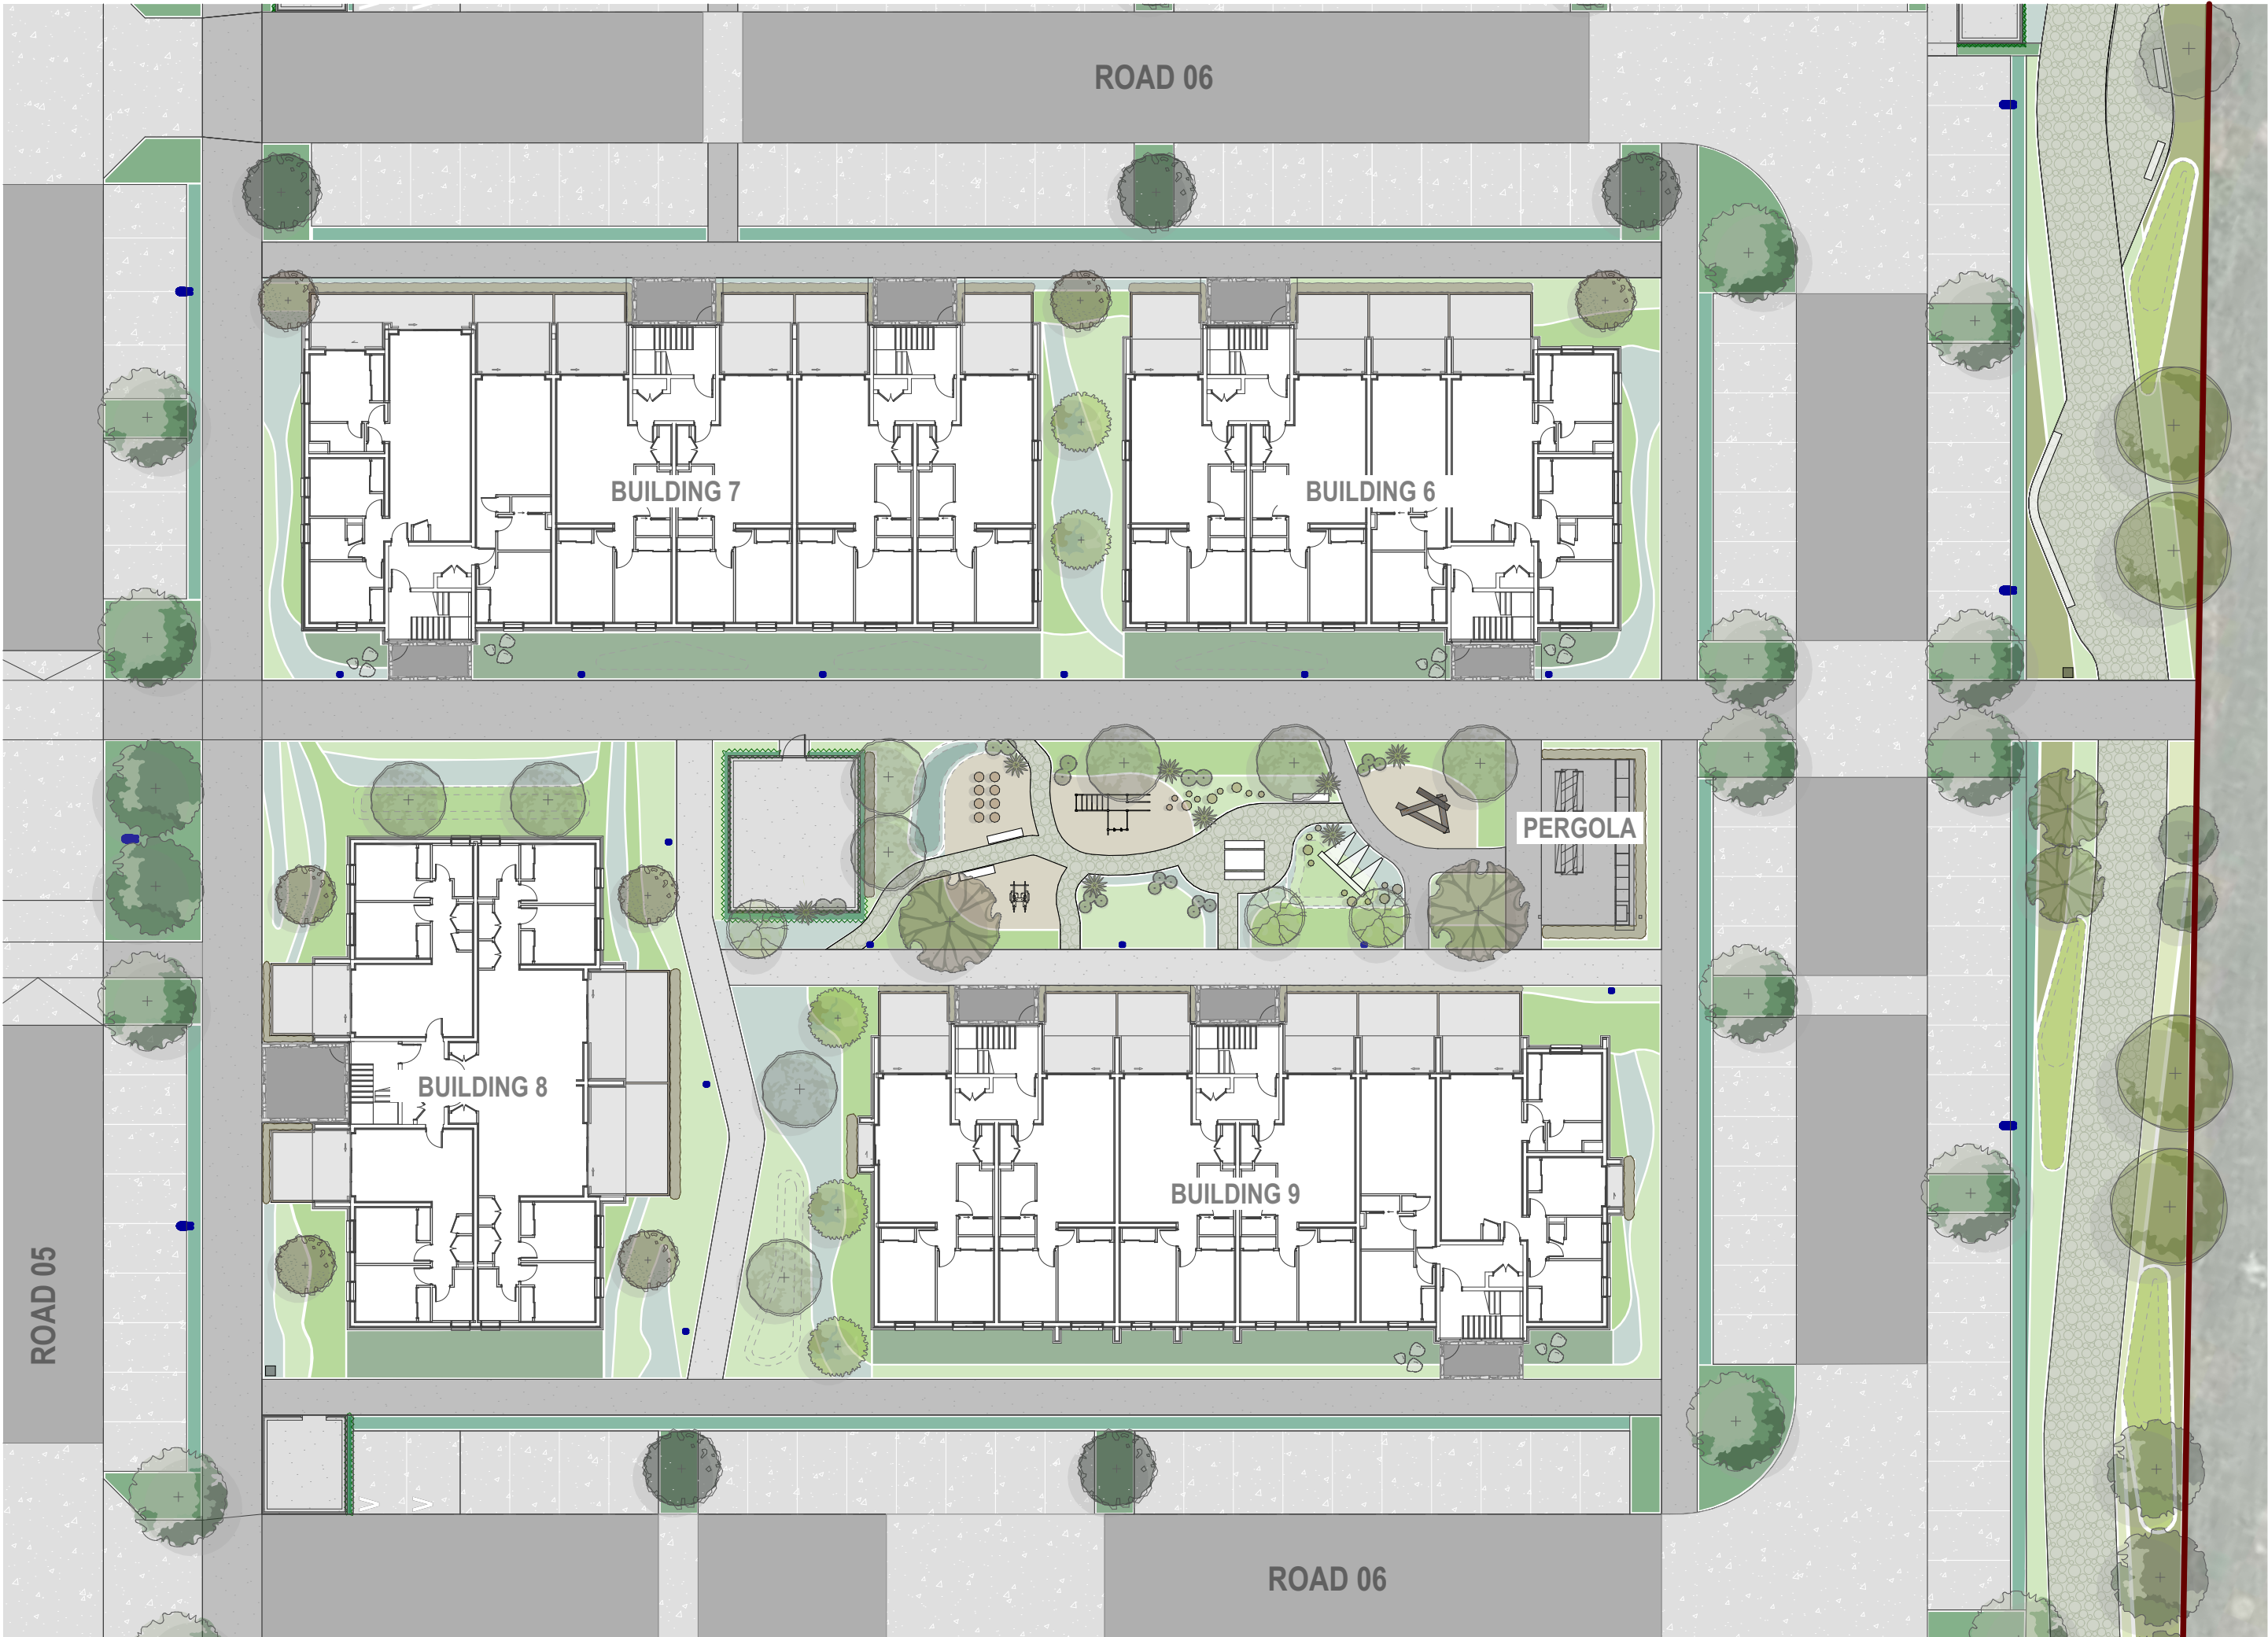

- A Schist Paving with trees and planting
- B Lawn / event space
- C Food Truck Planting
- D Landscape mounds - rockery + tussock plant mix
- E Existing Maple trees
