Dear Alex

Reference: Hananui Aquaculture Project

Ngāi Tahu Seafood Resources Limited (the applicant) received the decision of the Expert Consenting Panel on the Hananui Aquaculture Project (FTAA-2511-1138) on 10 August 2026. In the covering letter accompanying the decision the applicant was invited to advise of any minor errors that could be corrected under section 89 FTAA.

The applicant has identified the following minor matters in the consent conditions that could be usefully corrected:

- In the Interpretation section, in the Note under the definition of 'Consented Site' there appears to be a word missing:

*'...Pursuant to clause 22 of Schedule 5 of the Fast-track Approvals Act 2024, the definition of Consented Site, and the Proposal Area shown **on** Plan A in Appendix A, must not be changed or cancelled until a further aquaculture decision is made under the Fisheries Act 1996'.*
- At the end of Condition 2(e) there is a now orphan reference to the Resource Management Act 1991 that should be removed;
- In Condition 2(g) the word 'relevant' has been introduced before 'Manager'. 'Manager' is a defined term in the Interpretation section and introduction of the word 'relevant' may cause confusion with that definition;
- In section B-1 Water Quality of Appendix B, in clause (a) there is a typo with the word 'monitoring'.

In the wildlife approval conditions, the applicant believes that the reference in Condition 2 to resource consent conditions should be to Conditions 47 – 49 and 54 – 56, which are the consent conditions that govern the review and amendment of two management plans.

We would appreciate it if you could pass these matters on to the Expert Consenting Panel for their consideration.

17 August 2026
