10 November 2025

Jayne Macdonald
Homestead Bay Expert Panel Chair

Dear Jayne,

Response to Expert Panel Minute 3 – Homestead Bay

This memorandum is in response to the Homestead Bay Panel Minute 3, sent on Friday 7 November 2025. In preparing this memorandum, RCL has read the Otago Regional Council's response which it shared before the deadline for responses.

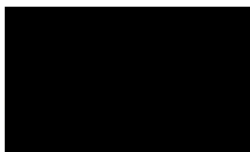

RCL agrees with the attendees for conferencing suggested by the Otago Regional Council, with the addition of Ned Norton. Mr Norton is an environmental scientist who has been involved in RCL's application in respect of the environmental monitoring regime and associated conditions.

RCL's representatives would therefore be:

- Brian Elwood – environmental engineer
- Amanda Leith – planner
- Ned Norton – environmental scientist – water quality specialist

Providing that the numbers are limited along similar lines to that recommended by RCL and the Otago Regional Council, RCL is comfortable that the conferencing can occur online and without facilitation. However, RCL also confirms that its representatives can travel to meet in person if needed.

Please advise if you require any clarification on the above.

Amanda Leith
