Subject: Arataki project

I would like to once again say that the proposed project in Arataki road can only be a detriment for the residents of Arataki Rd.

The new proposed roading is not wide enough for emergency vehicles or recycling/waste trucks. The proposed 171 houses seems to be going up to 200. There are no Doctors available in Havelock North let alone schools for any extra pupils. There is already housing estates being built in the area as well. Next to these proposed houses are a dog kennels, machinery workshop and not forgetting the mushroom farm which is still able to grow and produce mushrooms and the aroma in the area that comes with it, plus the noise.

Please look into at least reducing the amount of housing and giving each home some sort of garden area plus a home big enough in keeping with the already high standard homes along Arataki Road.

Regards

Mrs S Doughty
