Written approval agreement

Part A – Application (to be completed by applicant)

Applicant(s) name: Fletcher Concrete and Infrastructure Limited (trading as Winstone Aggregates)

Address of proposed activity: Hunua Quarry, 489 Hunua Road, Hunua, Auckland 2583

Brief description of proposed activity/project: The Project involves the staged development of the existing Symonds Hill Pit within Hunua Quarry to secure long-term access to high-quality greywacke aggregate for the Auckland region. Hunua Quarry is one of Auckland's most strategically significant aggregate resources and has been in operation for approximately 100 years. The proposed development will enable access to over 80 years of resource, supporting critical infrastructure projects including roads, housing, and regionally significant construction works.

The Project seeks to expand the quarry footprint to approximately 100–110 hectares and deepen the pit to around RL -50 metres, enabling production of up to 5.4 million tonnes of aggregate per annum. Key enabling works include the realignment of approximately 941 metres of a tributary to the Mangapū Stream, construction of a new western haul road, additional sediment retention and water management infrastructure, and progressive overburden removal and rehabilitation. The stream realignment is designed not only to accommodate pit expansion but also to deliver ecological enhancement through naturalised channel design, riparian planting, habitat creation, and improved sediment control.

Vegetation clearance of approximately 48.6 hectares (including 38.2 hectares of indigenous vegetation) will be undertaken in stages, with mitigation achieved through a comprehensive biodiversity offset and restoration programme. This includes extensive native replanting, riparian restoration, pest plant control, habitat connectivity improvements, and long-term ecological management. Progressive rehabilitation will occur throughout the life of the quarry.

The development will operate within established environmental management frameworks, including detailed management plans covering noise, air quality, groundwater, sediment control, ecological mitigation, and cultural monitoring. The proposal is being advanced under the Fast-track Approvals Act 2024 as a listed project, reflecting its regional and national importance in maintaining aggregate supply and supporting Auckland's continued growth and infrastructure resilience.

The Application is to be lodged and processed under the provisions of the Fast-track Approvals Act 2024.

I have the authority to sign on behalf of all the other owners/occupiers of the property:

Yes

No other owners/occupiers

Please provide documentation providing this authority.

Note: the approval of all the legal owners/occupiers of the affected property may be necessary. If signing on behalf of a trust or company, please provide additional written evidence that you have signing authority.

Part C – Declaration

(to be completed by persons and/or organisations providing written approval)

- I/We have been given and read the details of the proposal and plans (as referred to under Part A above) to which I/we are giving written approval.
- In signing this written approval, I/we understand that the consenting authority must decide that I am no longer an affected person, and the consenting authority must not have regard to any adverse effects on me.
- I/We understand that I/we may withdraw my/our written approval by giving written notice to the consenting authority before the application is determined.
- I/We understand that by giving my/our written approval, the applicant may be permitted to undertake the activity by the Expert Panel under the Fast-track Approvals Act 2024 (FTAA), provided they have supplied the correct information, including all other written approvals required.

Note: If you require the applicant’s consenting process to be explained, please do let the applicant know and they can endeavour to assist with providing you with additional information. Conditional written approvals cannot be accepted. There is no obligation to sign this form, and no reasons need to be given.

Brief description of proposed activity/project: The Project involves the staged development of the existing Symonds Hill Pit within Hunua Quarry to secure long-term access to high-quality greywacke aggregate for the Auckland region. Hunua Quarry is one of Auckland's most strategically significant aggregate resources and has been in operation for approximately 100 years. The proposed development will enable access to over 80 years of resource, supporting critical infrastructure projects including roads, housing, and regionally significant construction works.

The Project seeks to expand the quarry footprint to approximately 100–110 hectares and deepen the pit to around RL -50 metres, enabling production of up to 5.4 million tonnes of aggregate per annum. Key enabling works include the realignment of approximately 941 metres of a tributary to the Mangapū Stream, construction of a new western haul road, additional sediment retention and water management infrastructure, and progressive overburden removal and rehabilitation. The stream realignment is designed not only to accommodate pit expansion but also to deliver ecological enhancement through naturalised channel design, riparian planting, habitat creation, and improved sediment control.

Vegetation clearance of approximately 48.6 hectares (including 38.2 hectares of indigenous vegetation) will be undertaken in stages, with mitigation achieved through a comprehensive biodiversity offset and restoration programme. This includes extensive native replanting, riparian restoration, pest plant control, habitat connectivity improvements, and long-term ecological management. Progressive rehabilitation will occur throughout the life of the quarry.

The development will operate within established environmental management frameworks, including detailed management plans covering noise, air quality, groundwater, sediment control, ecological mitigation, and cultural monitoring. The proposal is being advanced under the Fast-track Approvals Act 2024 as a listed project, reflecting its regional and national importance in maintaining aggregate supply and supporting Auckland's continued growth and infrastructure resilience.

The Application is to be lodged and processed under the provisions of the Fast-track Approvals Act 2024.

Part B – Person(s) giving approval (to be completed by persons and/or organisations providing written approval)

I am the owner and/or occupier of the below property.

Full name: (in print)

Full name: (in print)

Full name: (in print)

Address of property:

Phone

Email:

I have the authority to sign on behalf of all the other owners/occupiers of the property:

Yes

No other owners/occupiers

Please provide documentation providing this authority.

Note: the approval of all the legal owners/occupiers of the affected property may be necessary. If signing on behalf of a trust or company, please provide additional written evidence that you have signing authority.

Part C – Declaration

(to be completed by persons and/or organisations providing written approval)

- I/We have been given and read the details of the proposal and plans (as referred to under Part A above) to which I/we are giving written approval.
- In signing this written approval, I/we understand that the consenting authority must decide that I am no longer an affected person, and the consenting authority must not have regard to any adverse effects on me.
- I/We understand that I/we may withdraw my/our written approval by giving written notice to the consenting authority before the application is determined.
- I/We understand that by giving my/our written approval, the applicant may be permitted to undertake the activity by the Expert Panel under the Fast-track Approvals Act 2024 (FTAA), provided they have supplied the correct information, including all other written approvals required.

Note: If you require the applicant’s consenting process to be explained, please do let the applicant know and they can endeavour to assist with providing you with additional information. Conditional written approvals cannot be accepted. There is no obligation to sign this form, and no reasons need to be given.

To whom it may concern,

Re: Hunua Quarry Development – Written Approval to Application

Fletcher Concrete and Infrastructure Limited (“FCIL”), together with Firth Industries (a division of Fletcher Concrete and Infrastructure Limited) (“Firth”), provide written approval to the application by Winstone Aggregates (also a division of Fletcher Concrete and Infrastructure Limited) for the Hunua Quarry Development under the Fast-track Approvals Act 2024.

FCIL and Firth confirm that they:

- Have reviewed the application and understand the nature and scale of the proposed Hunua Quarry Development, including the expansion and ongoing operation of the quarry and associated activities.
- Provide their written approval to the application in respect of the properties listed in the schedules below.
- Acknowledge that, as a result of this written approval, any actual or potential adverse effects of the proposed activities on those properties, and on their respective interests in those properties, may be disregarded when the application is considered.

For the avoidance of doubt:

- This approval applies to FCIL as landowner for properties owned by FCIL; and
- This approval applies only to the interests of FCIL and Firth for any properties where they hold a partial or controlled interest.

This approval may be relied upon by Winstone Aggregates (a division of Fletcher Concrete and Infrastructure Limited) for the purposes of the application and included within the substantive application documentation.

Signed for and on behalf of Fletcher Concrete and Infrastructure Limited (including Firth Industries)
