Dear Peter,

Re: Southern Link Logistics Park

I'm writing to provide my continued support for the proposed Southern Link Logistics Park. While Fonterra does not see itself as a direct user of the Logistics Park, we believe that its development will reduce congestion at Port Chalmers, which will support Fonterra's exports from the region.

We also see the Logistics Park as providing valuable resilience to our existing supply chain through its close proximity, noting that this started with the development of the new container depot beside our Mosgiel distribution centre.

Yours sincerely
