RE: Proposed Ridgeburn Development Waste Collection

Good morning Emily,

Thank you for your correspondence regarding waste collection at the proposed new Ridgeburn development.

I can confirm that AllWaste can supply roadside collection to all street-side bins with a new smaller designed side load vehicle that is more suited to this type of site.

For areas where there are multi dwellings and commercial tenants and public recreation areas, we would service with our small rear load trucks using 600-1100 litre bins on wheels.

As your plans progress, we can work with you to guarantee smooth collection processes and no waste left on streets.

Kind Regards

Malcolm Dodds
