To Whom it May Concern

I am not sure the reason I have received this email, as I believe anything that I said in the previous round of discussions was not accepted.

However, I am very concerned that the BIG MONEY talks and can override anything that the community in the area has to say, even after this application was declined in the previous round.

This wind farm ruin the scenic skyline the the Eastern Southland and Catlins area, which is very popular with tourist.

After the recent wind event in Southland where power lines where decimated, it proves the best way for the community to become self reliant for power would be to have solar power, not by Contact building massive wind turbines.

Regards

Julie Clarke
