Hello Alex, we have reviewed the decision and conditions, and have also liaised with the applicant . We commend the panel on its efforts and accuracy. We have no major errors to identify .

We suggest the following four very minor changes to the conditions suite :

- In the Interpretation section, in the Note under the definition of 'Consented Site' there appears to be a word missing:

'...Pursuant to clause 22 of Schedule 5 of the Fast-track Approvals Act 2024, the definition of Consented Site, and the Proposal Area shown on Plan A in Appendix A, must not be changed or cancelled until a further aquaculture decision is made under the Fisheries Act 1996'.

- At the end of Condition 2(e) there is a now orphan reference to the Resource Management Act 1991 that should be removed;
- In Condition 2(g) the word '*relevant*' has been introduced before '*Manager*'. '*Manager*' is already a defined term in the Interpretation section and introduction of the word '*relevant*' may cause confusion with that definition;
- In section B-1 Water Quality of Appendix B, in clause (a) there is a typo with the word '*monitoring*'.

Thanks for this opportunity

Regards

Bruce
