Dear [REDACTED]

FTAA-2608-1279 – BULLER PLATEAUX CONTINUATION PROJECT
Buller District Council Response on Section 46 Consultation

Thank you for your letter dated 24 August 2026 requesting Buller District Council's feedback on the completeness of the substantive application for the Buller Plateaux Continuation Project under section 46 of the Fast-track Approvals Act 2024 (FTAA).

Council has reviewed the application documentation relevant to the resource consent approvals and changes/cancellations of resource consent conditions for which Buller District Council is the relevant consent authority.

Council's assessment is set out in the attached **Table A – Substantive Application Completeness Checklist**. The table considers the relevant information requirements under sections 42 and 43 and Schedule 5 of the FTAA, together with whether the information has been provided in sufficient detail for the purposes of section 44. It is noted that Council's comments are limited to clauses 5 – 7 and clause 10 of Schedule 5, with clause 8 not relevant to the application and clause 9 being a matter for the Department of Conservation.

Overall, Council considers that the application contains a comprehensive level of information addressing the matters relevant to the district resource consent approvals sought. The attached Table A identifies those matters which Council considers have been adequately addressed, matters that are not applicable or fall within the jurisdiction of the West Coast Regional Council.

Yours sincerely

Simon Bastion
