
MINUTE 17 OF THE EXPERT PANEL

Conference Arrangements

Mt Welcome, Pukerua Bay, Porirua Project

FTAA-2603-1181

(28 August 2026)

[1] Issue of Minute 17 crossed with the applicant supplying its response to the Panel's request for information in Minute 11. The applicant's prompt provision of this information is appreciated.

[2] The information supplied includes new wastewater network capacity modelling and advice as to how the applicant proposes to manage vesting of assets. The Panel requests that the representatives of Tiaki Wai and PCC come to this Thursday's conference prepared to set out their organisations position on these matters.

[3] The information supplied also raises some issues in the Panel's minds. Rather than formalise those matters in follow-up questions when we think we can deal with the outstanding matters relatively briefly in person, the Panel requests that Mr Hudspith, Mr Thompson and the author of the Stantec memorandum attend Thursday's conference.

Trevor Robinson
Expert Panel Chair
