Schedule 3 – Monitoring Sites

Schedule 4 - Wetlands for Temporary Protection

1. Interpretation

1.1 This Schedule identifies the wetlands to which condition 7.6 applies. It comprises the Plan at clause 2 and the Table at clause 3.

1.2 The boundaries shown on the Plan are indicative, having been derived from desktop identification. The surveyed boundary supplied under condition 7.6(c)(iii) prevails from the date of its receipt by the Consent Authority.

1.3 Wetland classifications follow the Ecological Effects Assessment (Appendix K, Figures 21 and 22 and Table 11): **DP** = dredge-pit wetland (artificial, linear channel; natural inland wetland where it meets the NPS-FM definition); **PL** = palustrine wetland (natural inland wetland); **HH** = hump-and-hollow wetland (excluded from this Schedule).

1.4 "Section" and "mine path" in the Substantive Application; indicative mining years are taken from Plan D (Substantive Application; , Rehabilitation Management Plan, Appendix K Figure 48) and are for information only.

2. Plan

Insert Plan redrawn on the Schedule 1 base at 1:5,000, showing: each Protected Wetland outlined and labelled W1 to W[n]; the mine path boundaries and Sections 1-3; Granite Creek, Canoe Creek, Collins Creek and Cargill Road; the northern wetland offset cells (condition 9.5); the 5 m fence line and 50 m SSESCP buffer.

4. Identification and amendment

4.1 The identification plan under condition 7.6(c)(iii) must show each Protected Wetland by the reference in the Table, its surveyed area, and the position of the fence required by condition 7.6(c)(ii).

4.2 A Protected Wetland ceases to be subject to condition 7.6 only on commencement of mining of its mine path under condition 7.6(a)-(b). No other amendment to this Schedule may be made except under section 127 of the Resource Management Act 1991 as applied by Schedule 5 clause 18 of the Act.
