

# **Crown Minerals Act 1991**

Section 36

## **Minerals Exploration Permit 60648**

I, JEANNETTE MADELEINE WALKER, Manager Minerals Operations, Energy and Resource Markets, acting pursuant to section 36 of the Crown Minerals Act 1991 and acting pursuant to delegated authority under schedule 6, clause 2 of the Public Service Act 2020, grant to

REEFTON RESOURCES PTY LIMITED (Permit Operator)

a change to the minerals to which the permit relates to include all metallic minerals (excluding uranium) and all non-metallic minerals.

All schedules of the permit are replaced with the schedules attached to this Certificate.

This exploration permit will remain a Tier 2 permit.

This change of minerals is granted subject to the Crown Minerals Act 1991 and all regulations made under that Act, and the conditions of the permit.

DATED this 18th day of September 2023

-----  
**JEANNETTE MADELEINE  
WALKER**

## **Schedule 1**

### **General Conditions**

#### **RIGHTS GRANTED BY THIS PERMIT**

- 1 The permit holder has the right to prospect for the specified minerals, in the permit area.
- 2 The permit holder has the right to explore for the specified Crown-owned minerals in the permit area.

#### **GOOD INDUSTRY PRACTICE**

- 3 The permit holder must make all reasonable efforts to explore and delineate the mineral resource potential of the land to which the permit relates in a proactive and efficient manner in accordance with this permit and good industry practice.

#### **COMPLIANCE AND CONSENTS**

- 4 In carrying out activities under this permit, the permit holder must:
  - (a) comply with the Crown Minerals Act 1991 (Act) and all other relevant legislative requirements;
  - (b) obtain any consents and approvals required under the Resource Management Act 1991, the Exclusive Economic Zone and Continental Shelf (Environmental Effects) Act 2012 and any other applicable Acts; and
  - (c) in accordance with section 33A of the Act, obtain confirmation from the chief executive that WorkSafe has given its approval or consent before carrying out an activity under the permit that requires the approval or consent of WorkSafe (in respect of the requirements of the Health and Safety at Work Act 2015 or regulations made under that Act).

#### **WORK PROGRAMME CONDITIONS**

- 5 Where the permit holder is required to commit to work pursuant to the permit, the permit holder must satisfy the chief executive that the permit holder can fulfil that commitment.

#### **RELINQUISHMENT OBLIGATIONS**

- 6 In addition to any other relinquishment requirement imposed in accordance with the Act, the permit holder must (where required) relinquish an area of the permit determined in accordance with the Act and the Minerals Programme if an extension of duration is granted.
- 7 Where the permit holder is required to relinquish part of the permit area, the permit holder must submit to the chief executive a map of the proposed relinquishment area not later than 28 days before the relinquishment obligation is due.

## **SUBCONTRACTING**

- 8 The permit holder is not discharged from any obligation arising under this permit by contracting a third party to perform the relevant obligation.

## **FEES**

- 9 The permit holder must pay annual fees and any other applicable fees relating to this permit, in accordance with the relevant regulations.

## **ROYALTIES**

- 10 In the event that minerals are produced from the permit area, the permit holder must notify the chief executive as soon as practicable.
- 11 The permit holder will be liable for payment of a royalty to the Crown calculated in accordance with the Crown Minerals (Royalties for Minerals Other than Petroleum) Regulations 2013.
- 12 In the event that royalties become payable under the permit, the Minister will determine the points of valuation for royalty calculation following consultation with the permit holder.
- 13 The permit holder must report and pay any royalties due in accordance with the relevant regulations.

## **REPORTING**

- 14 The permit holder must submit reports to the chief executive in accordance with the relevant regulations.

## **ACTIVITIES OF OTHER OPERATORS IN THE PERMIT AREA**

- 15 The permit holder must not unreasonably interfere with the activities of any other persons lawfully operating in the permit area.

## **RESTORATION**

- 16 On completion of activities in the permit area, the permit holder must carry out restoration of the permit area in accordance with all regulatory requirements, consents and good industry practice.

## Schedule 2

### The Land to Which the Permit Relates

**Land Area:** 4730.14 hectares  
**Regional Council:** West Coast Region  
**Territorial Authority:** Buller District

#### Description of Land Area:

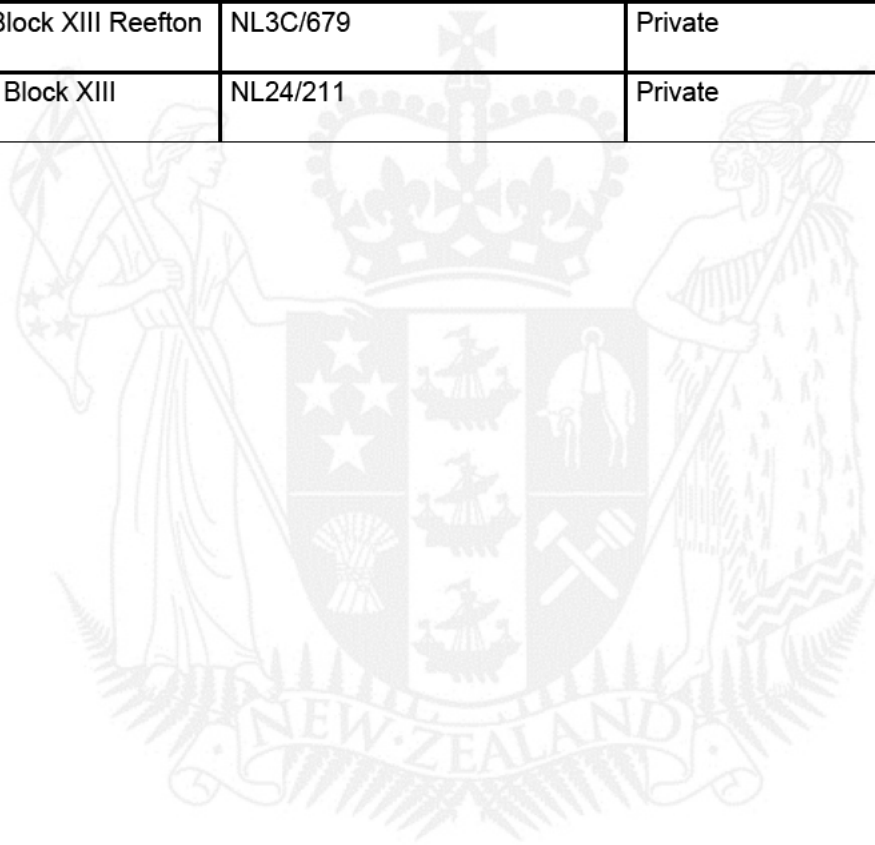

All that area of land as shown in the attached map and more particularly identified in the spatial database held by the chief executive.

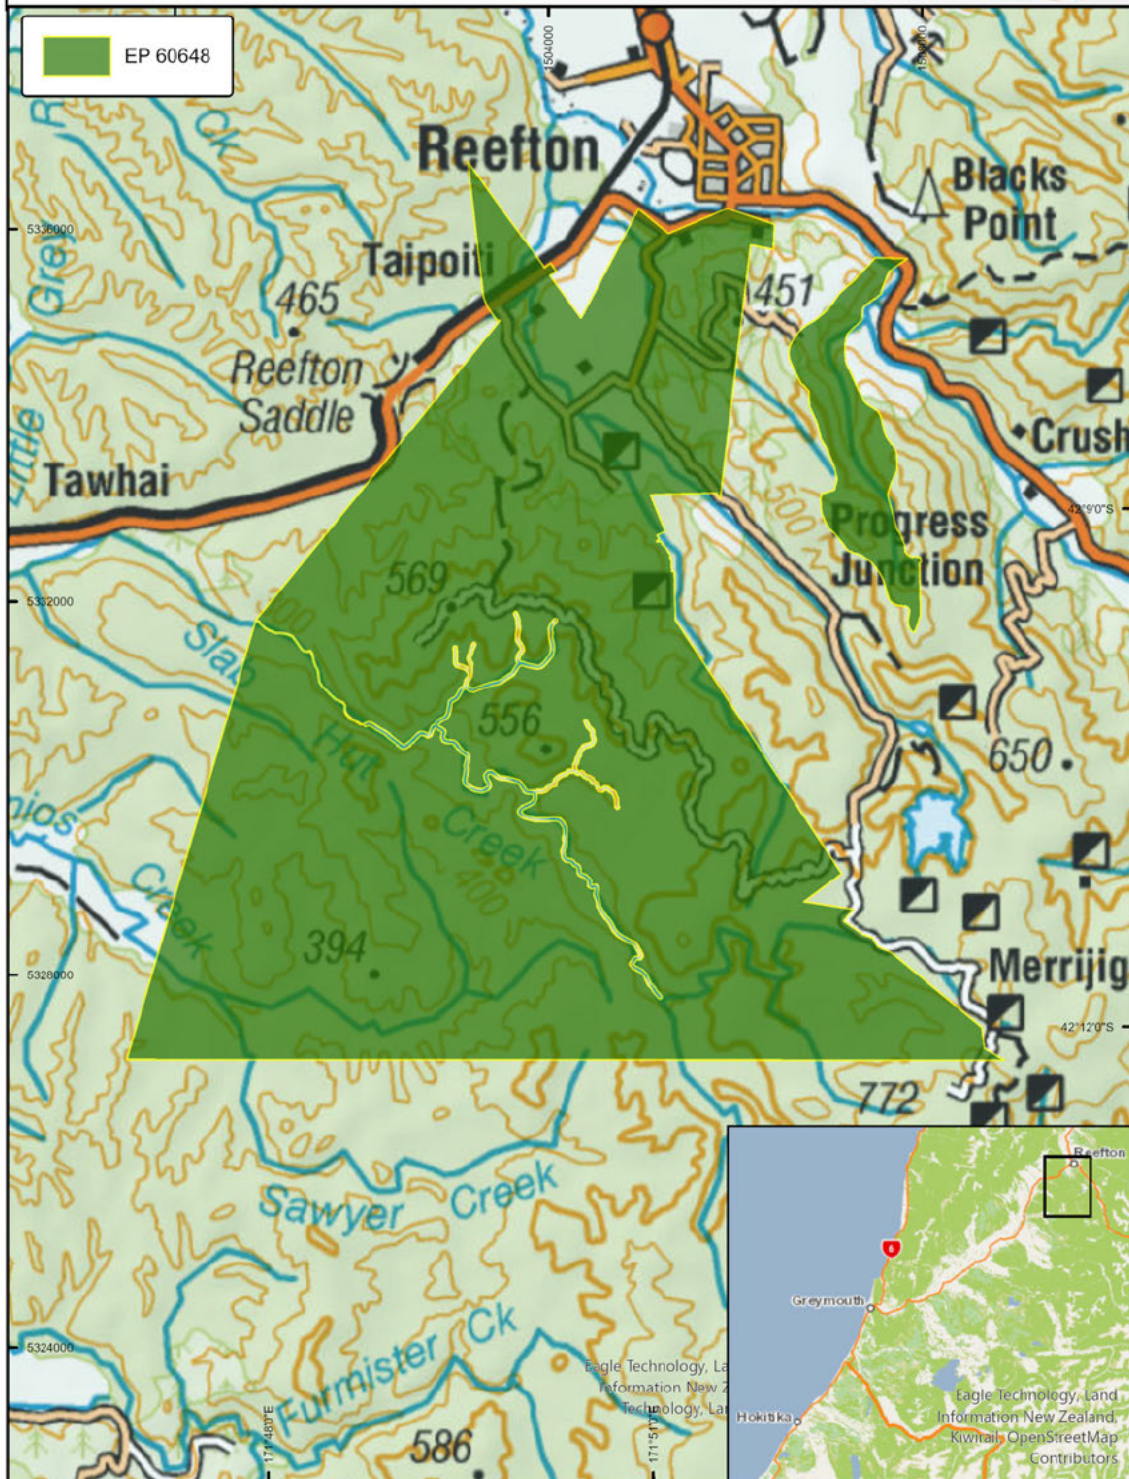

Non-statute minerals (All minerals in this group, All minerals in this group) held in private ownership, as shown on the table below, are excluded from this permit.

| Legal Description                                            | Instrument of title | Ownership of non-statute minerals |
|--------------------------------------------------------------|---------------------|-----------------------------------|
| Lot 5 DP 255                                                 | NL31/269            | Private                           |
| Lot 1 DP 1763                                                | NL61/127            | Private                           |

## Schedule 3

### Minimum Work Programme

- 1 Within 36 months of the commencement date of the permit, the permit holder shall (to the satisfaction of the chief executive):
  - (a) complete a literature review and compile all available geological data into a GIS database;
  - (b) undertake a programme of mapping and geochemical sampling;
  - (c) complete a programme of trenching;
  - (d) identify potential drill sites for hard rock mineralisation targets;
  - (e) complete a programme of drilling to define width, dip, and grade of the defined mineralisation within the permit for a minimum of 500m;
  - (f) compile a GIS database of all new data obtained; and
  - (g) prepare a technical report detailing all work completed during this stage of the work to be submitted to the chief executive in accordance with the regulations.
- 2 Within 60 months of the commencement date of the permit, the permit holder shall (to the satisfaction of the chief executive):
  - (a) complete a further programme of geochemical sampling;
  - (b) complete a programme of diamond drilling, with a minimum of 1000m;
  - (c) update the GIS database with all new data obtained
  - (d) define an Inferred Resource, if warranted; and
  - (e) prepare a technical report detailing all work completed during this stage of the work programme to be submitted to the chief executive in accordance with the regulations.

# **Crown Minerals Act 1991**

Section 36

## **Minerals Exploration Permit 60648**

I, JEANNETTE MADELEINE WALKER, Manager Minerals Operations, Energy and Resource Markets, acting pursuant to section 36 of the Crown Minerals Act 1991 and acting pursuant to delegated authority under schedule 6, clause 2 of the Public Service Act 2020, grant to

REEFTON RESOURCES PTY LIMITED (Permit Operator)

an extension of the land area of the permit.

Schedule 2 of the permit is replaced with Schedule 2 attached to this Certificate.

This exploration permit will remain a Tier 2 permit.

This extension of the land area is granted subject to the Crown Minerals Act 1991 and all regulations made under that Act, and the conditions of the permit.

DATED this 16th day of January 2023

Sections 25, 29A and 32

## **Minerals Exploration Permit 60648**

I, SUSAN CATHERINE BAAS, National Manager Petroleum and Minerals, Energy and Resource Markets, acting pursuant to sections 25, 29A and 32 of the Crown Minerals Act 1991 and acting pursuant to delegated authority under schedule 6, clause 2 of the Public Service Act 2020, grant to:

**REEFTON RESOURCES PTY LIMITED (Permit Operator)**

a subsequent permit to Minerals Prospecting Permit 60465 which gives the exclusive right to explore for gold and silver in the land described in Schedule 2.

This minerals exploration permit is granted for a term of 5 years commencing on 19 March 2021.

This permit is a Tier 2 permit unless and until a change to the tier status of the permit takes effect in accordance with section 2B or 2D of the Crown Minerals Act 1991.

This permit is granted subject to the Crown Minerals Act 1991 and all regulations made under that Act, and the conditions of the permit.

DATED this 19th day of March 2021

**SUSAN CATHERINE BAAS**

# **Schedule 1**

## **General Conditions**

### **RIGHTS GRANTED BY THIS PERMIT**

- 1 The permit holder has the right to prospect for the specified minerals, in the permit area.
- 2 The permit holder has the right to explore for the specified Crown-owned minerals in the permit area.

### **GOOD INDUSTRY PRACTICE**

- 3 The permit holder must make all reasonable efforts to explore and delineate the mineral resource potential of the land to which the permit relates in a proactive and efficient manner in accordance with this permit and good industry practice.

### **COMPLIANCE AND CONSENTS**

- 4 In carrying out activities under this permit, the permit holder must:
  - (a) comply with the Crown Minerals Act 1991 (Act) and all other relevant legislative requirements;
  - (b) obtain any consents and approvals required under the Resource Management Act 1991, the Exclusive Economic Zone and Continental Shelf (Environmental Effects) Act 2012 and any other applicable Acts; and
  - (c) in accordance with section 33A of the Act, obtain confirmation from the chief executive that WorkSafe has given its approval or consent before carrying out an activity under the permit that requires the approval or consent of WorkSafe (in respect of the requirements of the Health and Safety at Work Act 2015 or regulations made under that Act).

### **WORK PROGRAMME CONDITIONS**

- 5 Where the permit holder is required to commit to work pursuant to the permit, the permit holder must satisfy the chief executive that the permit holder can fulfil that commitment.

### **RELINQUISHMENT OBLIGATIONS**

- 6 In addition to any other relinquishment requirement imposed in accordance with the Act, the permit holder must (where required) relinquish an area of the permit determined in accordance with the Act and the Minerals Programme if an extension of duration is granted.
- 7 Where the permit holder is required to relinquish part of the permit area, the permit holder must submit to the chief executive a map of the proposed relinquishment area not later than 28 days before the relinquishment obligation is due.

## **SUBCONTRACTING**

- 8 The permit holder is not discharged from any obligation arising under this permit by contracting a third party to perform the relevant obligation.

## **FEES**

- 9 The permit holder must pay annual fees and any other applicable fees relating to this permit, in accordance with the relevant regulations.

## **ROYALTIES**

- 10 In the event that minerals are produced from the permit area, the permit holder must notify the chief executive as soon as practicable.
- 11 The permit holder will be liable for payment of a royalty to the Crown calculated in accordance with the Crown Minerals (Royalties for Minerals Other than Petroleum) Regulations 2013.
- 12 In the event that royalties become payable under the permit, the Minister will determine the points of valuation for royalty calculation following consultation with the permit holder.
- 13 The permit holder must report and pay any royalties due in accordance with the relevant regulations.

## **REPORTING**

- 14 The permit holder must submit reports to the chief executive in accordance with the relevant regulations.

## **ACTIVITIES OF OTHER OPERATORS IN THE PERMIT AREA**

- 15 The permit holder must not unreasonably interfere with the activities of any other persons lawfully operating in the permit area.

## **RESTORATION**

- 16 On completion of activities in the permit area, the permit holder must carry out restoration of the permit area in accordance with all regulatory requirements, consents and good industry practice.

## Schedule 2

### The Land to Which the Permit Relates

**Land Area:** 4622.74 hectares  
**Regional Council:** West Coast Region  
**Territorial Authority:** Buller District

### Description of Land Area:

All that area of land as shown in the attached map and more particularly identified in the spatial database held by the chief executive.

## Schedule 3

### Minimum Work Programme

- 1 Within 36 months of the commencement date of the permit, the permit holder shall (to the satisfaction of the chief executive):
  - (a) complete a literature review and compile all available geological data into a GIS database;
  - (b) undertake a programme of mapping and geochemical sampling;
  - (c) complete a programme of trenching;
  - (d) identify potential drill sites for hard rock gold targets;
  - (e) complete a programme of drilling to define the width, dip and grade of the defined gold mineralisation within the permit for a minimum of 500m;
  - (f) compile a GIS database of all new data obtained; and
  - (g) prepare a technical report detailing all work completed during this stage of the work to be submitted to the chief executive in accordance with the regulations.
- 2 Within 60 months of the commencement date of the permit, the permit holder shall (to the satisfaction of the chief executive):
  - (a) complete a further programme of geochemical sampling;
  - (b) complete a programme of diamond drilling, with a minimum of 1000m;
  - (c) update the GIS database with all new data obtained

- 12 In the event that royalties become payable under the permit, the Minister will determine the points of valuation for royalty calculation following consultation with the permit holder.
- 13 The permit holder must report and pay any royalties due in accordance with the relevant regulations.

## **REPORTING**

- 14 The permit holder must submit reports to the chief executive in accordance with the relevant regulations.

## **ACTIVITIES OF OTHER OPERATORS IN THE PERMIT AREA**

- 15 The permit holder must not unreasonably interfere with the activities of any other persons lawfully operating in the permit area.

## **RESTORATION**

- 16 On completion of activities in the permit area, the permit holder must carry out restoration of the permit area in accordance with all regulatory requirements, consents and good industry practice.

## Schedule 2

### The Land to Which the Permit Relates

**Land Area:** 2249.77 hectares  
**Regional Council:** West Coast Region  
**Territorial Authority:** Buller District

### Description of Land Area:

All that area of land as shown in the attached map and more particularly identified in the spatial database held by the chief executive.

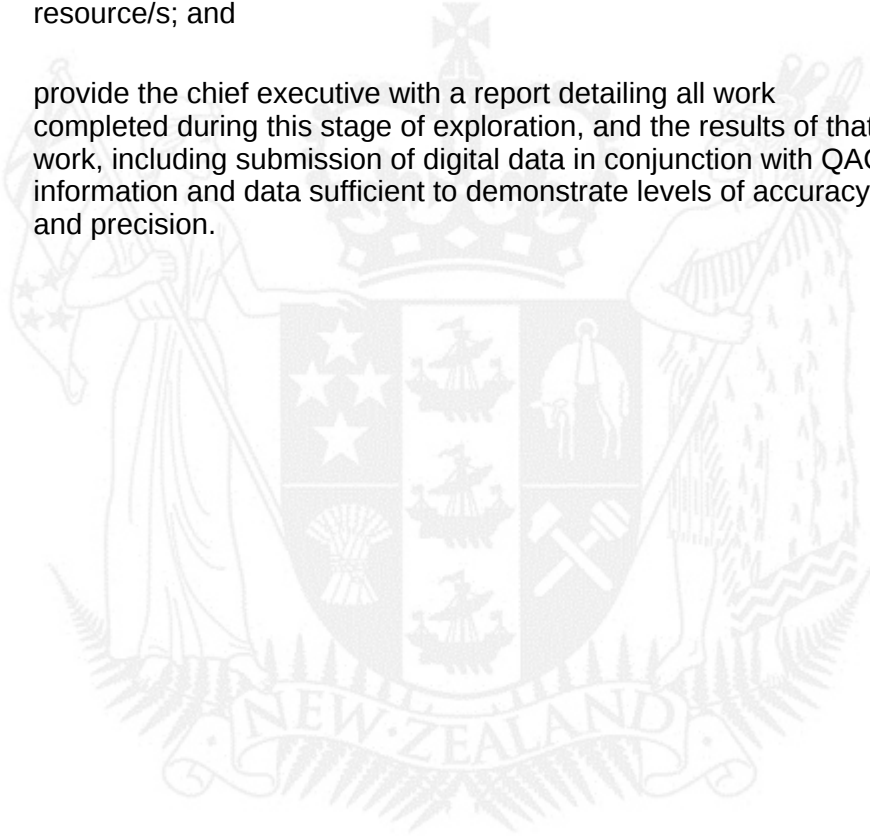

## Schedule 3

### Minimum Work Programme

- 1 Within 36 months of the commencement date of the permit, the permit holder shall (to the satisfaction of the chief executive):
  - (a) complete a literature review and compile all available geological and drilling data into a GIS database;
  - (b) complete a LiDar survey;
  - (c) undertake programme of detailed mapping and rock chip sampling of the Exploration Targets;
  - (d) complete a geophysical survey/s;
  - (e) complete a programme of soil sampling where appropriate;
  - (f) a programme of handheld trenching to expose the mineralisation;
  - (g) identify potential drill sites for key Exploration Targets;
  - (h) complete a programme of drilling, for a minimum of 4,000 m;
  - (i) generate a geological model incorporating mapping, trenching, core logging, geochemical and geophysical data;
  - (j) compile a GIS database of all new data obtained; and
  - (k) provide the chief executive with a report detailing all work completed during this stage of exploration, and the results of that work, including submission of digital data in conjunction with QAQC information and data sufficient to demonstrate levels of accuracy and precision.
- 2 Within 60 months of the commencement date of the permit, the permit holder shall (to the satisfaction of the chief executive):
  - (a) complete a programme of mapping and geochemical sampling to further improve the geological model;

- (b) complete a programme of geophysical surveying to further improve the geological model;
- (c) complete a further programme of drilling, for a minimum of 8,000m;
- (d) update the Geological model;
- (e) update the GIS database with all new data obtained;
- (f) complete a JORC resource estimate/s define an Inferred / Indicated resource/s; and
- (g) provide the chief executive with a report detailing all work completed during this stage of exploration, and the results of that work, including submission of digital data in conjunction with QAQC information and data sufficient to demonstrate levels of accuracy and precision.
