

2. Flooding

as a resident for over 35 years we have seen flooding around the area many times the worst at beginning of Mill and Choke road were the road and properties are under water. also at Mill road and Whites road is flooding bad.

When the proposed area is build up and is all roads and roofs where is the storm water going too. that is a real worry for everyone living here now.

3. Rural Character & Amenity

We choose to live hear 35 years ago for the rural lifestyle, however a lot has changed already after the christchurch quakes the area is already a lot busier with lots of trucks and trailers units and car traffic. cant mention what is going to be like if this supclavion will go ahead Very scary.

4. Infrastructure

a worry is that there is not enough bore water for another 850+ homes. I have seen the choke stream dried up in the nineties which was a real shame
