Hi Will,

Watercare has advised there is capacity for the proposed 1550 DUE. I do note however, the Vector assessment was for 1700. Watercare have advised if this is the case, they will need to reassess capacity.

Regards,

**Sanjeev Morar**

Thanks Jignesh,

As discussed, we didn't receive an official response from Watercare.

I will check with Sanjeev the contact details if it was verbally or in writing and get back to you ASAP.

Regards.

Hi Hamayoon,

As discussed, if you could check with Sanjeev and confirm that liaison with Watercare was undertaken as part confirming the capacity.

We look forward to your response.

Hi Hamyoon,

Hope you are well.

I note below you state the capacity of the Takanini Branch will be checked with Watercare for acceptance.

I recall you were liaising with Watercare at the time of the email.

Can you please confirm this has now been done and capacity confirmed?

Thanks

Will

**Subject:** 55 Cosgrave Road and 508 Old Wairoa Road - Water Supply and Wastewater Infrastructure

Hi Will,

I have reviewed the application material received for the proposed development at 55 Cosgrave Road, Papakura and provide comments in matters pertaining to water and wastewater servicing below:

Currently, there is no existing water or wastewater infrastructure to allow for the servicing of the property 55 Cosgrave Road, Papakura. However, the subject property forms part of Area 2A. The Developer will provide the 'trunk' connecting water supply and wastewater infrastructure for the Area 2A (including wastewater pumping station) necessary to enable development of property 55 Cosgrave Road, Papakura. Therefore, based on the information currently available to Veolia, water and wastewater servicing of the proposed development appears possible.

#### Wastewater

- The capacity of the existing Transmission infrastructure [Takanini branch] will be checked with Watercare for acceptance. The retail wastewater network [wastewater pumping station / low pressure system] and associated 'trunk' connecting infrastructure are to be constructed by the Developer at the Developer cost.

#### Water

- In regards to the retail water network and associated 'trunk' connecting infrastructure are to be constructed by the Developer at the Developer cost. Also please note that the Network analysis (water modelling) coupled with water supply capacity measurements will need to be undertaken as a part of a detailed engineering design to demonstrate appropriate servicing of the development is achievable.

General comments:

- Construction of any water or wastewater infrastructure shall not commence until such time as a Construction / Connection of New Works Agreement has been issued by Veolia and accepted by the applicant (including construction requirements and charges payable) which the applicant must comply with before Veolia either physically permit the connection of the future water / wastewater infrastructure to the existing water supply / wastewater system or provide water / wastewater services.

Please let me know if you want to discuss this further.

Regards
